vikalpa. (P. *vikappa*; T. *mam par rtog pa*; C. *fenbie*; J. *funbetsu*; K. *punbyōl*). In Sanskrit, “[false] discrimination,” “imagining,” or “conception”; the discriminative activities of mind, generally portrayed in the negative sense of fantasy and imagination, and often equivalent to “conceptual proliferation” ([PRAPAṆCA](#)). *Vikalpa* refers to the conceptual activities of the mental consciousness ([MANOMIJÑĀNA](#)), a mediated mental activity that operates through the medium of generic images ([SĀMĀNYALAK A A](#)). *Vikalpa* is often opposed to the immediate knowledge provided by direct perception ([PRATYAK A](#)). The direct perception of reality is therefore commonly described as [NIRVIKALPA](#), or “free from thought.” ¶ Three types of conceptual discrimination ([TRIMKALPA](#)) are typically described in the literature. (1) Intrinsic discrimination ([SVABHĀVAMKALPA](#)), which refers to the initial adventence of thought ([VITARKA](#)) and the subsequent sustained attention ([VICĀRA](#)) to a perceived object of the six sensory consciousnesses ([VIJÑĀNA](#)), that is, the discrimination of present objects, as when visual consciousness perceives a visual object. (2) Conceptualizing discrimination ([ABHINIRŪPA AMKALPA](#)), which refers to discursive thought on ideas that arise in the sixth mental consciousness when it adverts toward a mental object that is associated with any of the three time periods of past, present, or future. (3) Discrimination involving reflection on past events ([ANUSMARA AMKALPA](#)), which refers to discriminative thought involving the memory of past objects. ¶ There is a wide range of opinion as to the value of *vikalpa* (in the sense of “thought” or “conception”) in the soteriological progress. Some traditions would hold that the structured use of conceptual and logical analysis (and especially the use of inference, or [ANUMĀNA](#)) is a necessary prerequisite to reaching a state beyond all thought. Such a position is advocated in the Indian philosophical schools and in those that favor the so-called gradual path to enlightenment. In the stages of the path to enlightenment, all forms of meditation prior to the attainment of the path of vision ([DARŚANAMĀRGA](#)) are “conceptual” and thus entail *vikalpa*. Other schools radically devalue all thought as an obstacle to the understanding of the ultimate and would claim that the nonconceptual, described in some cases as “no-thought” (C. [WUNJIAN](#)), is accessible at all times. Such an approach, most famously expounded in the [CHAN](#) traditions of Asia, is associated with the so-called sudden path to enlightenment (see [DUNWU](#)). ¶ In the [YOGĀCĀRA](#) school, *vikalpa* is described specifically as the “discriminative conception of apprehended and apprehender” ([GRĀHYAGRĀHAKAMKALPA](#)), referring to the misconception that there is an inherent bifurcation between a perceiving subject (*grāhaka*) and its perceived objects (*grāhya*). This bifurcation occurs because of false imagining ([ABHŪTAPARIKALPA](#)), the tendency of the relative phenomena ([PARATANTRA](#)) to be misperceived as divided into a perceiving self and a perceived object that is external to it. By relying on these false imaginings to construct our sense of what is real, we inevitably subject ourselves to continued suffering ([DU KHA](#)) within the cycle of birth-and-death ([SA SĀRA](#)). Overcoming this bifurcation leads to the nondiscriminative wisdom ([NIRVIKALPAJÑĀNA](#)), which, in the five-stage path ([PAÑCAMĀRGA](#)) system, marks the inception of the path of vision (*darśanamārga*), where the adept sees reality directly, without the intercession of concepts. The elimination of *grāhyagrāhaka* *vikalpa* proceeds from the less to the more subtle. It is easier to realize that a projected object is a projection than to realize that a projecting subject is as well; among projected objects, it is easier to realize that afflicted ([SA KLI A](#)) dharmas (the [SKANDHAS](#) and so on) are projections than to realize that purified ([VYAVADĀNA](#)) dharmas (the five paths and so on) are as well; and among subjects it is easier to realize that a material subject (a mental substratum and so on) is a projection than to realize that a nominally existing subject (a nominally existing self and so on) is. This explanation of *vikalpa*, common in the [PRAJÑĀPĀRAMITĀ](#) commentarial tradition, influenced the theory of the [SA PANNAKRAMA](#) (completion stage) in [ANUTTARAYOGA](#) (highest yoga) [TANTRA](#), where prior to reaching enlightenment the four sets of *vikalpas* are dissolved with their associated [PRĀ AS](#) in the central channel ([AVADHŪTI](#)).

Vikramāśīla. (T. *Rnam gnon ngang tshul*). A monastery and monastic university in the northern region of ancient [MAGADHA](#), in the modern Bihar state of India, located

along the Ganges River in the Bagmati District of Bihar, about 450 miles east of [Nālandā](#). King Dharmapāla of the Pāla dynasty founded Vikramaśīla in the late eighth and early ninth centuries and appointed his teacher, Buddhajñānapāda, to be abbot of the monastic university. Throughout its existence, leaders of the Pāla dynasty supported the teachers, students, and maintenance of the institution. There were six areas of religious study, supplemented by such secular subjects as grammar, metaphysics, and logic. The two monastic universities of Vikramaśīla and Nālandā had a great deal of scholarly interaction, and, like Nālandā, Vikramaśīla served as a model for Tibetan monasteries. There were more foreign students at Vikramaśīla than at Nālandā, and the monastery is said to have been large enough to accommodate around ten thousand resident students, including specific dormitories for visiting Tibetan students. Vikramaśīla also housed a substantial library, where texts were both stored and recopied by students and teachers. By the tenth century CE, Vikramaśīla had outgrown even Nālandā, reaching its peak in the eleventh century, and offered a famous [PRAJÑĀPĀRAMITĀ](#) curriculum. The monastery became the focus of tantric scholarship during this period, and pilgrims came to study from many regions of Asia. During the reign of King Nayapāla, in the eleventh century, [ATISA DIPA KARASRIJNANA](#) was considered the greatest scholar at the monastery. Other famous scholars also taught there, including [JITARI](#), [JÑANĀSRIMITRA](#), [NĀROPA](#) (briefly), and [RATNĀKARASĀNTI](#). Vikramaśīla was attacked by Muslim armies between 1199 and 1203 CE. During the same period, [ODANTAPURĪ](#) was also attacked, and the surviving scholars and students were forced to flee. Many scholars escaped to Nepal and Tibet, saving many texts from their libraries. [ŚĀKYAŚRIBHADRA](#) was the last abbot of Vikramaśīla, and also the last to flee to Tibet from the monastery, arriving in 1204.

vik epa. (P. vikkhepa; T. mam par g.yeng ba; C. sanluan; J. sanran; K. sallan). In Sanskrit, “distraction”; the movement of the mind away from the object of observation or a lack of mental balance that disturbs concentration. It is one of the forty-six mental concomitants ([CAITTA](#)) according to the [VĀBHĀKA](#) school of [SARVĀSTIVĀDAABHIDHARMA](#) and one of the fifty-one according to the [YOGĀCĀRA](#) school, which lists it as one of the twenty secondary afflictions ([UPAKLEŚA](#)).

vimalā. (T. dri ma med pa; C. ligou di; J. rikuiji; K. igu chi). In Sanskrit, “immaculate” or “stainless”; the name of the second of the ten bodhisattva stages, or [BHŪM](#). On this bhūmi, the bodhisattva engages in the perfection of morality ([ŚILĀPĀRAMITĀ](#)) and is unstained by even subtle types of unwholesome actions performed by body, speech, or mind. It is said that from this bhūmi onward, the bodhisattva is untainted by killing, stealing, sexual misconduct, lying, divisive speech, harsh speech, senseless prattle, covetousness, harmful intent, or wrong views, even during dreams. He performs the ten virtues of protecting life, giving gifts, maintaining sexual ethics, speaking truthfully, speaking harmoniously, speaking kindly, speaking sensibly, nonattachment, helpful intent, and right views without the slightest taint of a conception of self ([ĀTMAGRAHA](#)). The bodhisattva remains on this stage until he is able to enter into all worldly forms of [SAMĀDHI](#).

Vimalakīrti. (T. Dri med grags pa; C. Weimojie; J. Yuimakitsu; K. Yumahl). Sanskrit proper name of a mythical Indian Buddhist layman. He is the subject of an eponymous sūtra that describes his victories in debates with elite [MAHĀYĀNABODHISATTVAS](#). See [VIMALAKĪRTINIRDEŚA](#).

Vimalakīrtinirdeśa. (T. Dri med grags pas bstan pa'i mdo; C. Weimo jing; J. Yuimagyō; K. Yuma kyōng). In Sanskrit, “Vimalakīrti’s Instructions”; one of the most beloved Indian Mahāyāna sūtras, renowned especially for having a layman, the eponymous [VIMALAKĪRTI](#), as its protagonist. The text probably dates from around the second century CE. Among the seven translations of the sūtra into Chinese, the most famous is that made by [KUMĀRAJĪVA](#) in 406. His translation seems to have been adapted to appeal to Chinese mores, emphasizing the worldly elements of Vimalakīrti’s teachings and introducing the term “filial piety” into the text. The sūtra was also translated by [XUANZANG](#) in 650. The sūtra was translated into Tibetan twice, the more famous being that of Chos nyid tshul khriims in the ninth century. It has also been rendered into Sogdian, Khotanese, and Uighur. The original Sanskrit of the text was lost for over a millennia until a Sanskrit manuscript was discovered in the [PO TALA](#) palace in Tibet in 2001. The narrative of the sūtra begins with the Buddha requesting that his leading [ŚRĀVAKA](#) disciples visit his lay disciple Vimalakīrti, who is ill. Each demurs, recounting a previous meeting with Vimalakīrti in which the layman had chastised the monk for his limited understanding of the dharma. The Buddha then instructs his leading bodhisattva disciples to visit Vimalakīrti. Each again demurs until [MAJUŚRĪ](#) reluctantly agrees. Vimalakīrti explains that his sickness is the sickness of all sentient beings, and goes on to describe how a sick bodhisattva should understand his sickness, emphasizing the necessity of both wisdom ([PRAJÑĀ](#)) and method ([UPĀYA](#)). A large audience of monks and bodhisattvas then comes to Vimalakīrti’s house, where he delivers a sermon on “inconceivable liberation” (acintyavimokṣa). Among the audience is [ŚĀRIPUTRA](#), the wisest of the Buddha’s śrāvaka disciples. As in other Mahāyāna sūtras, the eminent śrāvaka is made to play the fool, repeatedly failing to understand how all dichotomies are overcome in emptiness ([ŚŪNYATĀ](#)), most famously when a goddess momentarily transforms him into a female. Later, a series of bodhisattvas take turns describing various forms of duality and how they are overcome in nonduality. Vimalakīrti is the last to be invited to speak. He remains silent and is praised for this teaching of the entrance into nonduality. The sūtra is widely quoted in later literature, especially on the topics of emptiness, method, and nonduality. It became particularly famous in East Asia because the protagonist is a layman, who repeatedly demonstrates that his wisdom is superior to that of monks. Scenes from the sūtra are often depicted in East Asian Buddhist art.

Vimalamitra. (T. Dri med bshes gnyen). An Indian master revered in Tibet as one of the chief figures in the transmission of the [RDZOGS CHEN](#) teachings of the [RNYING MA](#) sect, especially of the “heart drop” ([SNYING THIG](#)) tradition. He is said to have received rdzogs chen teachings from both Jñānasūra and [ŚRISĪ HA](#). According to legend, Vimalamitra transmitted these teachings to Tibet when he was invited (when he was supposedly already two hundred years old) to come to Tibet by King [KHRI SRONG LDE BTSAN](#), arriving either before or after the king’s death in 799. He remained in Tibet for thirteen years, before leaving for China. While in Tibet, he collaborated in the translation of a number of texts from Sanskrit into Tibetan, including the [GUHYASAMĀJĀTANTRA](#), the [GUHYAGARBHĀTANTRA](#), and the [PRAJÑĀPĀRAMITĀH DAYASŪTRA](#) (“Heart Sūtra”). Vimalamitra is especially renowned for his transmission of the “instruction class” ([MANG NGAG SDE](#)), which were gathered in a collection named after him, the [BI MA SNYING THIG](#). He is also said to have concealed treasure texts (gter ma) at a hermitage above [BSAM YAS](#) monastery. The works attributed to him preserved in the Tibetan canons are all tantric in subject matter, with two exceptions, a commentary on the [SAPTASĀHASRIKĀPRAJÑĀPĀRAMITĀSŪTRA](#) (“Perfection of Wisdom in Seven Hundred Lines”) and a commentary on the [Prajñāpāramitāh dayasūtra](#). Both are straightforward exegetical works, which prompted the Tibetan historian ‘Gos lo tsā ba to report in his [DEB THER SNGON PO](#) (“Blue Annals”) that these commentaries were not the product of the tantric master revered in Rnying ma, and that in fact there must have been two Vimalamitras.

Vimalaprabhā. (T. Dri med ‘od). In Sanskrit, “Stainless Light,” the most important commentary on the [KĀLĀCAKRATANTRA](#). It is traditionally attributed to Puṣṭika, one of the kings of [ŚAMBHĀLA](#).

Vima sakasutta. (C. Qiujie jing; J. Gugekyō; K. Kuhae kyōng). In Pāli, “Discourse on Investigation”; the forty-seventh sutta in the [MAJHIMANIKĀYA](#) (a separate [SARVĀSTIVĀDA](#) recension appears as the 186th [SŪTRA](#) in the Chinese translation of the [MADHYAMĀGAMA](#)); delivered by the Buddha to a gathering of monks in the [JETAVANA](#) grove at the town of Sāvaththi ([ŚRĀVASTĪ](#)). In this sutta, the Buddha describes specific means by which it may be determined whether or not the [TATHĀGATA](#) has in fact attained buddhahood. He directs the inquirer to rely on what he has seen and heard to determine whether the tathāgata possesses any defiled states, mixed states, or impure states; whether he possesses wholesome states; and whether he is free from the dangers of renown and fame, free from fear and sexual passion, and free from contempt for others due to their failings. Finally the Buddha states that the monk gains true confidence in the three jewels ([RAJNATRAYA](#)) by learning the Buddha’s teachings and confirming their truth through direct experience born of practice.

Vimānavatthu. In Pāli, “Accounts of the Celestial Abodes,” the sixth book of the Pāli [KHUDDAKANIKĀYA](#). The text contains accounts of the heavenly abodes (P. vimāna, lit. “mansion, palace”) of various divinities ([DEVĀ](#)), which they acquired as rewards for meritorious deeds performed in previous lives. Its eighty-three stories were told to Moggallāna ([MAHĀMAUDGALYĀYANA](#)) and other saints during their sojourns in celestial realms, who in turn related them to the Buddha. The Vimānavatthu appears in the Pali Text Society’s English translation series as *Stories of the Mansions*.

vimok a. (P. vimokkha; T. nam par thar pa; C. jietuo; J. gedatsu; K. haet’al 脫). In Sanskrit, “liberation” or “deliverance”; the state of freedom from rebirth, achieved by the [ŚRĀVAKA](#), [PRATYĒKABUDDHA](#), or [BODHISATTVĀ](#) paths ([MĀRGA](#)). In mainstream Buddhist literature, this liberation is said to be of three types, corresponding to the three “doors to deliverance” ([VIMOK AMUKHA](#)): (1) emptiness ([ŚŪNYATĀ](#)), (2) signlessness ([ĀNIMITTA](#)), and (3) wishlessness ([APRĀ IHITA](#)). Another set of eight grades of liberation (vimokṣa) is associated with the attainment of meditative absorption ([DHYĀNA](#)). In Pāli sources, these grades refer to eight levels in the extension of consciousness that accompany the cultivation of increasingly more advanced states of dhyāna (P. [JHĀNA](#)). The eight grades are (1) the perception of material form ([RŪPA](#)) while remaining in the subtle-materiality realm; (2) the perception of external material forms while not perceiving one’s own form; (3) the development of confidence through contemplating the beautiful; (4) passing beyond the material plane with the idea of “limitless space,” one attains the plane of limitless space ([ĀKĀŚĀNANTYĀYATANA](#)), the first level of the immaterial realm; (5) passing beyond the plane of limitless space with the idea of “limitless consciousness,” one attains the plane of limitless consciousness ([VJÑĀNĀNANTYĀYATANA](#)); (6) passing beyond the plane of limitless consciousness with the idea “there is nothing,” one attains the plane of nothingness ([ĀKĀNCĀNANTYĀYATANA](#)); (7) passing beyond the plane of nothingness one attains the plane of neither perception nor nonperception ([NAVASA JÑĀNĀSA JÑĀYATANA](#)); and (8) passing beyond the plane of neither perception nor nonperception one attains the cessation of consciousness (viz., [NIRODHASAMĀPATTI](#)). In the Mahāyāna [ABHIDHARMA](#), it is said that the first two grades enable bodhisattvas to manifest different forms for the sake of others, the third controls their attitude toward those forms (by seeing that beauty and ugliness are relative), and the remaining five enable them to live at ease in order to help others.

vimok amārga. (S). See [VIMUKTIMĀRGA](#).

vimok amukha. (P. vimokkhamukha; T. nam par thar pa’i sgo; C. jietuo men; J. gedatsumon; K. haet’al mun 脫). In Sanskrit, “gates to deliverance,” or “doors of liberation”; three points of transition between the compounded ([SA SK TA](#)) and uncompounded ([ASA SK TA](#)) realms, which, when contemplated, lead to liberation ([VIMOK A](#)) and [NIRVĀ A](#): (1) emptiness ([ŚŪNYATĀ](#)), (2) signlessness ([ĀNIMITTA](#)), and (3) wishlessness ([APRĀ IHITA](#)). The three are widely interpreted. In mainstream Buddhist

materials, emptiness (*śūnyatā*) entails the recognition that all compounded (*SA SK TA*) things of this world are devoid of any perduring self (*ĀTMAN*) and are thus unworthy objects of clinging. By acknowledging emptiness, the meditator is thus able to turn away from this world and instead advert toward *nirvāṇa*, which is uncompounded (*ASA SK TA*). Signlessness (*ānimitta*) is a crucial stage in the process of sensory restraint (*INDRIYASA VARA*): as the frequent refrain in the *SŪTRAS* states, “In the seen, there is only the seen,” and not the superimpositions created by the intrusion of ego (*ĀTMAN*) into the perceptual process. Signlessness is produced through insight into impermanence (*ANITYA*) and serves as the counteragent (*PRATIPAK A*) to attachments to anything experienced through the senses; once the meditator has abandoned all such attachments to the senses, he is then able to advert toward *nirvāṇa*, which ipso facto has no sensory signs of its own by which it can be recognized. Wishlessness is produced through insight into suffering (*DU KHA*) and serves as the counteragent (*PRATIPAK A*) to all the intentions (*āśaya*) and aspirations (*PRA IDHĀNA*) one has toward any compounded dharma. As the Buddha’s famous simile of the raft also suggests, the adept must finally abandon even the attachment to the compounded religious system that is Buddhism in order to experience *nirvāṇa*, the summum bonum of the religion. Once the meditator has abandoned all such aspirations, he will then be able to advert toward *nirvāṇa*, which ipso facto has nothing to do with anything that can be desired (*VAIRĀGYA*). ¶ In the *ABHIDHARMAKOSĀBHĀ YA*, the three are explained in terms of three types of concentration (*SAMĀDHI*) on the sixteen aspects of the *FOUR NOBLE TRUTHS*. The four aspects of the first truth, of suffering (*DU KHASATYA*), are impermanence, misery, emptiness, and selflessness. The four aspects of the second truth, origination (*SAMUDAYASATYA*), are cause, origination, strong production, and condition. The four aspects of the third truth, cessation (*NIRODHASATYA*), are cessation, pacification, exaltedness, and emergence. The four aspects of the fourth truth, path (*MĀRGASATYA*), are path, suitability, achievement, and deliverance. According to the *Abhidharmakośabhā ya*, the *samādhi* associated with signlessness observes the four aspects of cessation; the *samādhi* of emptiness observes emptiness and selflessness, two of the four aspects of suffering; and the *samādhi* of wishlessness observes the remaining ten aspects. ¶ In *YOGĀCĀRA* texts, such as the *MAHĀYĀNASĀ GRAHA*, emptiness, wishlessness, and signlessness are related to the three natures (*TRISVABHĀVA*) of the imaginary (*PARIKALPITA*), the dependent (*PARATANTRA*), and the consummate (*PARINI PANNA*), respectively. In the *MAHĀYĀNASŪTRĀLA KĀRA*, it is said that the *samādhi* of emptiness understands the selflessness of persons and phenomenal factors (*DHARMA*), the *samādhi* of wishlessness views the five aggregates (*SKANDHA*) as faulty, and the *samādhi* of signlessness views *nirvāṇa* as the pacification of the aggregates. Elsewhere in that text, the three are connected to the four seals (*CATURMUDRA*) that certify a doctrine as Buddhist. The statements “all compounded factors are impermanent” and “all contaminated things are suffering” are the cause of the *samādhi* of wishlessness. “All phenomena are devoid of a perduring self” is the cause of the *samādhi* of emptiness. “*Nirvāṇa* is peace” is the cause of the *samādhi* of signlessness. According to another interpretation, emptiness refers to the lack of a truly existent entity in phenomena, signlessness refers to the lack of a truly existent cause, and wishlessness refers to the lack of a truly existent effect.

Vi śatikā. (T. *Nyi shu pa*; C. *Weishi ershi lun*; J. *Yuishiki nijūron*; K. *Yusik isip non* 論). The “Twenty,” also known as *Vi śatikāvijñaptimātratāsiddhikārikā*, the “Twenty Stanzas Proving Representation-Only,” one of the most influential independent (i.e., noncommentarial) works of the fourth- or fifth-century Indian master *VASUBANDHU*. A short work in twenty verses, it outlines the basic position of the *YOGĀCĀRA* regarding the status of external objects, arguing that such objects do not exist apart from the consciousness that perceives them. He argues, for example, that the fact that objects appear to exist in an external world is not proof of that existence, since an external world also appears to exist in dreams. Therefore, all external phenomena are merely projections of consciousness (*VJÑĀNA*) and thus are representation-only (*VJÑĀPTIMĀTRATĀ*).

vi śatiprabhedasa gha. (T. dge 'dun nyi shu; C. ershi senggqie/shengwen cidì; J. nijūsōgya/shōmonshidai; K. isip sūngga/sōngmun ch'aje /). In Sanskrit, “the twenty varieties of the **SA GHA**” or “twenty members of the community”; a subdivision of the eight noble persons (**A ĀRYAPUDGALA**) into twenty based on different faculties (**INDRIYA**) and the ways in which they reach **NIRVĀ A**; a subdivision used in Mahāyāna works, particularly in the **PRAJÑĀPĀRAMITĀ** literature, as a template to further identify as many as forty-eight **ĀRYA BODHISATTVA**s. Only those who have reached the noble path (**ĀRYAMĀRGA**) or the religious life (śrāma ya) that begins with the path of vision (**DARŚANAMĀRGA**) are included in this idealized sa gha. The twenty varieties are based on the eight noble persons, two for each of the four fruits of the noble path or religious life (**ĀRYAMĀRGAPHALA**; **ŚRĀMA YAPHALA**). The four fruits, from lowest to highest, are stream-enterer (**ŚROTAĀPANNA**), once-returner (**SAK DĀGĀMIN**), nonreturner (**ANĀGĀMIN**), and worthy one (**ARHAT**). For each there is one who enters (**ŚROTAĀPPANAPRATIPANNAKA**, etc.) and one who abides (**ŚROTAĀPPANNAPHALASTHA**, etc.) in a particular fruition. This list also includes the seven noble persons (P. ariyapuggala; S. **ĀRYAPUDGALA**) as found in the **MAJHIMANIKĀYA**. They are (1) the follower of faith (P. saddhānūsāri; S. **ŚRADDHĀNUSĀRIN**); (2) the one liberated through faith (P. saddhāvimutta; S. **ŚRADDHĀMMUKTA**); (3) the bodily witness (P. kāyasakkhi; S. **KĀYASĀK IN**); (4) the one liberated both ways (P. ubhatobhāgavimutta; S. **UBHAYATOBHĀGAVIMUKTA**); (5) the follower of the dharma (P. dhammānūsāri; S. **DHARMĀNUSĀRIN**); (6) the one who has attained understanding (P. di hippatta; S. **D IPRĀPTA**); and (7) the one liberated through wisdom (P. paññāvimutta; S. **PRAJÑĀMMUKTA**).

The list of the twenty according to the **MAHĀYŪTPATTI** is:

1. Stream-enterer (**ŚROTAĀPANNA**)
2. One who takes up to seven existences (**SAPTAK DBHAVAPARAMA**)
3. One who goes from family to family (**KULA KULA**)
4. Once-returner (**SAK DĀGĀMIN**)
5. One who has a single obstacle (**EKAMCITA**)
6. Nonreturner (**ANĀGĀMIN**)
7. One who achieves nirvā a in the intermediate state (**ANTARĀPARINIRVĀYIN**)
8. One who achieves nirvā a at birth (**UPAPĀDYAPARINIRVĀYIN**)
9. One who achieves nirvā a through effort (**SĀBHISA SKĀRAPARINIRVĀYIN**)
10. One who achieves nirvā a without effort (**ANABHISA SKĀRAPARINIRVĀYIN**)
11. One who goes higher (**URDHVASROTAS**)
12. Bodily witness (**KĀYASĀK IN**)
13. Follower through faith (**ŚRADDHĀNUSĀRIN**)
14. Follower through doctrine (**DHARMĀNUSĀRIN**)
15. One who has aspired through faith (**ŚRADDHĀDHIMUKTA**)
16. One who attains through seeing (**D IPRĀPTA**)
17. One who is liberated dependent upon particular occasions (**SAMAYAMUKTA**).
18. One who is liberated regardless of occasion (**ASAMAYAMUKTA**)
19. One who is liberated through wisdom (**PRAJÑĀMMUKTA**)
20. One who is liberated through both ways (**UBHAYATOBHĀGAVIMUKTA**)

Of these twenty, the first three are subdivisions of the first fruit, the next two of the second fruit, the sixth to twelfth of the third fruit, and the last two subdivisions of the fourth fruit of the **ARHAT**. The remaining are more general categories. For detailed explanations, see each individual entry.

vimukti. (P. vimutti; T. mam par grol ba; C. jietuo; J. gedatsu; K. haet'al 脫). In Sanskrit, “liberation.” See **VIMOK A**.

vimuktimārga. (T. mam par grol ba'i lam; C. jietuodao; J. gedatsudō; K. haet'alto 脫). In Sanskrit, “path of liberation”; a technical term that refers to the second of a two-stage process of abandoning the afflictions (**KLEŚA**). As one proceeds from the path of vision (**DARŚANAMĀRGA**) to the adept path where there is nothing more to learn (**ĀSAMK MĀRGA**), the kleśas are abandoned in sequence through repeated occasions of yogic direct perception (**YOGIPRATYAK A**), consisting of two moments. The first is called the **ANANTARYAMĀRGA** (uninterrupted path), in which the specific kleśa or set of kleśas is actively abandoned; this is followed immediately by the vimuktimārga [alt. vimok amārga], which is the state of having abandoned, and thus being liberated from, the kleśa.

Vimuktisena. [alt. Ārya Vimuktisena] (T. Grol sde). An Indian scholar-monk (likely from the sixth century CE) who is the author of the first extant commentary (v tti) on the **ABHISAMAYĀLA KĀRA**, a work associated with the name of **MAITREYA** or **MAITREYANĀTHA**, the most influential **PRAJÑĀPĀRAMITĀ** commentary for Indian and Tibetan Buddhism. Vimuktisena connects the *Abhisamayāla kāra* to the **PANCAI ŚĀTISĀHASRIKAPRAJÑĀPĀRAMITĀ** (“Perfection of Wisdom in Twenty-five Thousand Lines”), making the otherwise cryptic *Abhisamayāla kāra* comprehensible. In scholastic Tibetan Buddhism his name is linked with the Yogācāra-Madhyamaka synthesis, but Vimuktisena's view is more closely aligned to **MADHYAMAKA**, without the distinctive terminology associated with the **PRAMĀ A** school of **DIGNĀGA** and **DHARMAKĪRTI**.

***Vimuttimaggā**. (T. Rnam grol gyi bstan bcos; C. Jietuodao lun; J. Gedatsudōron; K. Haet'alto non 脫). In Pāli, “Treatise on the Path to Liberation”; an Indian **ABHIDHARMA** treatise attributed to Upatissa (S. *Upati ya). The *Vimuttimaggā* was composed sometime prior to the fifth century, perhaps in northern India. It is no longer extant in its Indian recension, but was translated into Chinese in its entirety in 505; portions were also translated into Tibetan. The original language of the text is uncertain, and is usually known by its putative Pāli title (its Sanskrit reconstruction would be **Vimuktimārga*). It is clear that the work was known to the Pāli exegete **BUDDHAGHOSA**, who made use of it in composing his **VIŚUDDHIMAGGA**, although he does not cite it by name. Like the *Visuddhimaggā*, the **Vimuttimaggā* sets forth the path in terms of the three trainings in morality (P. sīla; S. **ŚĪLA**), meditation (**SAWĀDHI**), and wisdom (P. paññā; S. **PRAJÑĀ**). The **Vimuttimaggā* is, however, a much shorter text, omitting the illustrative stories Buddhaghosa offers and including a more succinct section on prajñā. While the *Visuddhimaggā* is regarded as a text delivering the doctrine of the conservative **MAHĀVĪHĀRA** branch of the Sri Lankan Pāli tradition, the **Vimuttimaggā* is thought to represent instead the views of the **ABHAYAGIRI** sect, a school that was influenced by **MAHĀYĀNA** thought.

vinaya. (T. 'dul ba; C. lü; J. ritsu; K. yul). In Sanskrit and Pāli, “discipline”; the corpus of monastic regulations, especially that directed at fully ordained monks (**BHIK U**) and nuns (**BHIK U I**). The term is used by extension for those texts in which these codes are set forth, which form the “basket of the discipline” (**VINAYAPI AKA**) in the Buddhist canon (**TRĪPI AKA**). According to an account in the *Sifen lü kaizongji*, by the Chinese vinaya master **DAOXUAN** (596–667), **UPAGUPTA**, the fifth successor in the Buddha's lineage about a century following his death, had five major disciples, who were said to have established their own schools based on their differing views regarding doctrine; these five also redacted separate recensions of the **VINAYA**, which the Chinese refer to as “five recensions of the vinaya” (Wubu lü). These five vinayas are (1) the “Four-Part Vinaya” (C. **SIFEN LÜ**; S. **Cāturgvāryavinaya*) of the **DHARMAGUPTAKA** school; (2) the “Ten-Recitations Vinaya” (C. *Shisong lü*; S. **Daśādhyāyavinaya*; [alt. **Daśabhā avāravīnaya*]) of the **SARVĀSTIVĀDA** school; (3) the “Five-Part Vinaya” (C. *Wufen lü*; S. **Pañcavargikavinaya*) of the **MAHĪŚĀSAKA** school and the **Prātimok avinaya* of the **KĀŚYAPIYA** school; (4) the ***MAHĀSĀ GHĪKA VINAYA** of the **MAHĀSĀ GHĪKA** school; and (5) the **MŪLASARVĀSTIVĀDA VINAYA**. All five of these recensions are extant in Chinese translation, but the *Sifen lü* (“Four-Part Vinaya”) of the Dharmaguptakas came to dominate the conduct of ecclesiastical affairs in East Asian Buddhism. The only vinaya to survive intact in an Indian language is the Pāli vinaya used in the **STHAMRANIKĀYA** tradition; this vinaya compilation was unknown to the Chinese Tradition. The largest vinaya of them all, the Mūlasarvāstivāda vinaya, is a massive collection that is some four times longer than any of the other recensions. The entire collection is available in its Tibetan translation; portions of this vinaya were also translated in Chinese, and substantial fragments of its original Sanskrit version have survived. ¶ The vinayas are a rich source of Buddhist history because they describe the occasion surrounding the formulation of each of the myriads of rules of conduct and deportment promulgated by the Buddha. It is said that the Buddha made a new rule only after the commission of an infraction that would need to be prevented in the future, so the vinayas are careful to recount, in sometimes embarrassing detail, the specific events leading up to the Buddha's formulation of the rule. These accounts therefore provide important insights into issues facing the monastic institutions of India. The principal rules of monastic life are contained in the **PRĀTIMOK A**, which presents rosters of offenses of varying gravity, with penalties ranging from expulsion from the order for the most serious to mere confession for the more minor ones. The most serious offenses, called **PĀRĀJĪKA**, or “defeat,” and requiring expulsion according to some vinaya traditions, were four for monks: sexual misconduct (defined in the case of a monk as the penetration of an orifice to the depth of a mustard seed), theft, the killing of a living being, and lying about spiritual attainments. (Even for such serious misdeeds, however, some vinayas prescribe procedures for possible reinstatement; see **ŚIK ĀDATTAKA**.) In the Mūlasarvāstivāda vinaya, there were 253 total rules to be followed by monks, 364 for nuns. The majority of these rules were matters of etiquette and decorum meant to ensure harmonious relations within the monastic institution and with lay patrons. The prātimok a was recited fortnightly in the **UPO ADHA** ceremony. A second major part of the vinaya is the **VBHA GA**, or explanation of each rule, explaining the circumstances of its formulation and the conditions under which a violation does and does occur. A third part was called the **VINAYAVASTU** or **KHANDAKA**, separate sections (ranging between seventeen and twenty in number) on various topics such as ordination, the rains retreats, bedding, robes, and the use of medicine. Although sometimes regarded simply as a collection of regulations, the various vinaya texts are an essential part of Buddhist literature. Many of the vinayas, but especially the Mūlasarvāstivāda vinaya, also include enormous numbers of narrative tales and ancillary materials, including texts that in other traditions would have been collected in the **SŪTRAPI AKA**.

vinayapi aka. (T. 'dul ba'i sde snod; C. lüzang; J. ritsuzō; K. yulchang 律藏). In Sanskrit and Pāli, “basket of discipline” or the “collection of discipline”; one of the three “baskets” ([TRIPĪKA](#)), or divisions of Buddhist scripture, together with the [SŪTRAPIKA](#) and the [ABHIDHARMAPIKA](#). Although typically presumed to include just the rules and regulations of monastic conduct, the vinayapi aka is actually one of the richest sources for understanding Buddhist practice and institutions in India. It is said that the Buddha instituted a new rule only after the commission of some form of misconduct that he sought to prevent in the future, so the vinayas are careful to recount in great detail the circumstances leading up to the Buddha's promulgation of the rule. The vinayapi aka is therefore composed largely of narratives, some of considerable length; one of the earliest biographies of the Buddha appears in the vinaya of the [MŪLASARVĀSTIVĀDA](#) school (see [MŪLASARVĀSTIVĀDA VINAYA](#)). According to tradition, the redaction of the vinayapi aka occurred at the first Buddhist council ([SA GĪTĪ](#); see [COUNCIL, FIRST](#)), shortly after the Buddha's death, when a group of [ARHATS](#) assembled to recite the Buddha's teachings. There, the monk [UPĀLI](#), considered an expert in the monastic code, was called upon to recite the vinaya. However, assuming that such a recitation occurred, disputes soon arose over what was allowable conduct according to the rules and regulations included in the vinayapi aka. At the time of his death, the Buddha told [ĀNANDA](#) that, after his death, the minor rules could be disregarded. At the first council, he was asked what those minor rules were, and Ānanda admitted that he had failed to ask. All rules were therefore retained, and his failure to ask was one of his errors requiring a confession of wrongdoing. The eventual division into the traditional eighteen [MAINSTREAM BUDDHIST SCHOOLS](#) often centered on questions of vinaya practice and conduct. There is, therefore, no single vinayapi aka, but a number of vinayapi akas, with the precise content determined by the specific Indian school. To give one example, the Pāli vinayapi aka, which was perhaps redacted around the first century CE, is composed of the following three major divisions: (1) [SUTTAMBAHA GA](#) (S. sūtravibha ga; cf. [VINAYAMBAHA GA](#)), which includes the pā imokkha (S. [PRĀTIMOKA](#)) code with explanations and commentary, including the mahāvibha ga with the rules for monks and the bhikkhu vibha ga with the rules for nuns; (2) [KHANDHAKA](#) (S. skandhaka; cf. [VINAYASTU](#)), which is subdivided between the [MAHĀVAGGA](#), which includes chapters on such topics as the procedure for the ordination of monks, the fortnightly observances (P. uposatha; S. [UPOADHA](#)), the rains retreat, the use of clothing, food, medicine, and so forth, and the [CŪVAGGA](#), which includes a variety of judicial rules, procedures for the ordination of nuns, and accounts of the first and second Buddhist councils; and (3) [PARIVĀRA](#), an appendix that provides a summary and classification of the rules of monastic conduct. ¶ Numerous vinaya texts were translated into Chinese, including complete (or near-complete) vinayapi akas associated with five of the mainstream schools of Indian Buddhism. In the order of their translation dates, these five are (1) “Ten-Recitations Vinaya” (C. *Shisong lü*; C. **Daśabhā avāraṇinaya*; **Daśādhyaṇinaya*) of the [SARVĀSTIVĀDA](#) school, perhaps composed sometime between the first and third centuries CE and translated into Chinese between 404 and 409 CE; (2) [DHARMAGUPTAKA](#) vinaya, the renowned “Four-Part Vinaya” ([SIFEN LÜ](#)), translated between 410 and 412 CE, which becomes the definitive recension of the vinaya in the East Asian traditions and the focus of scholarship in the different East Asian vinaya schools (see [NANSHAN LÜ ZONG](#), [DONGTA LÜ ZONG](#), [RISSHŪ](#)); (3) [MAHĀSĀ GHĪKA](#) vinaya (*Mohesengji lü*), composed between 100 and 200 CE and translated between 416 and 418; (4) [MAHĪ ŚĀSĀKA](#) vinaya, or the “Five-Part Vinaya” (*Wufen lü*), perhaps composed in the first century BCE and translated between 422 and 423; and (5) the [MŪLASARVĀSTIVĀDA](#) vinaya, perhaps composed in the fourth or fifth century CE and translated into Chinese between 703 and 713. (The complete Tibetan translation of this vinaya becomes definitive for Tibetan Buddhism). ¶ It is important to note that the texts contained in the vinayapi aka of any school have served as just one source of the monastic code. In China, no complete recension of any Indian vinaya was translated until the beginning of the fifth century. (Indeed, none of the surviving recensions of the vinayas of any Buddhist school can be dated prior to the fifth century CE.) When the Indian vinayas were translated into Chinese, for example, their regulations were viewed as being so closely tied to the customs and climate of India that they were sometimes found either incomprehensible or irrelevant to the Chinese. This led to the composition of indigenous Chinese monastic codes, called guishi (“regulations”) or [QINGGUI](#) (“rules of purity”), which promulgated rules of conduct for monks and nuns that accorded more closely with the realities of life in East Asian monasteries. In Tibet, the [VINAYASŪTRA](#) by [GU APRABHA](#), a medieval Indian summary of the much larger Mūlasarvāstivāda vinaya, was the primary source for the monastic code, but each monastery also had its own regulations ([BCA'YIG](#)) that governed life there. See also [PRĀTIMOKA SŪTRA](#).

Vinayasūtra. (T. 'dul ba'i mdo). In Sanskrit, “Discourse on Discipline”; a work on the monastic code by the Indian master [GU APRABHA](#), who is dated between the fifth and seventh century CE. Despite its title, the work is not a [SŪTRA](#) (in the sense of a discourse ascribed to the Buddha), but instead is an authored work composed of individual aphoristic statements (sūtras). The text offers a summary or condensation of the massive [MŪLASARVĀSTIVĀDA VINAYA](#). At approximately one quarter the length of this massive vinaya collection, Gu aprabha's abridgment seems to have functioned as a kind of primer on the monastic code, omitting lengthy passages of scripture and providing the code of conduct to which monks were expected to subscribe. In this sense, the text is an important work for determining what monastic practice may actually have been like in medieval India. The *Vinayasūtra* became the most important vinaya text for Tibetan Buddhism, being studied in all of the major sects. In the [DGE LUGS](#), it is one of the five books (GZHUNG LŊGA) that served as the basis of the monastic curriculum. The detailed commentaries on the *Vinayasūtra* by the Pāla dynasty writer Dharmamitra (early ninth century) and the [BKA GDAMPA](#) master Tsho sna ba Shes rab bzang po's (b. thirteenth century) were widely studied.

vinayavastu. (T. 'dul ba'i gzhi; C. pinaiye shi; J. binayaji; K. pinaya sa 律藏). In Sanskrit, “foundation of the vinaya”; that section of the Sanskrit vinayas that corresponds to the [KHANDHAKA](#) (S. skandhaka) in the Pāli vinaya. This section consists of separate chapters (ranging in number from seventeen to twenty) on individual topics related to monastic life, including the procedures for ordination, the proper performance of the rains retreat, the [KA HINA](#) ceremony, and rules concerning the acquisition, use, and disposal of monastic robes ([CĪVARA](#)), foodstuffs, and medicines.

vinayavibha ga. (T. 'dul ba mam par 'byed pa; C. Genben Shuoyiqieyoubinaiye; J. Konpon Setsuissaiubunaiya; K. Kūnbōn Sōrilch'eyubunaiya 律說). In Sanskrit, lit. “Differentiation of the Discipline”; a major division of Sanskrit [VINAYA](#) literature, corresponding to the [SUTTAMBAHA GA](#) in the Pāli [VINAYAPIKA](#). The primary foci of such sections are the disciplinary rules for monks ([PRĀTIMOKA](#)), the exact number of which varies according to the tradition. The vinayavibha ga of the [MŪLASARVĀSTIVĀDA](#) vinaya (to which the Sinographs above correspond), for example, lists 253 such rules. Each rule is accompanied by a description of the appropriate response to its violation. These sanctions may range from possible expulsion from the order, as with the rules of “defeat” ([PARĀJIKĀ](#)), to simple confession of the misdeed during the fortnightly recitation of the rules ([UPOADHA](#)). The narrative form used to convey these rules follows that of most other vinaya literature, describing the circumstances that led to the Buddha's declaration of a particular rule. Just as the Pāli vinaya begins with a section of this type, the vinayas of the [SARVĀSTIVĀDA](#) and Mūlasarvāstivāda schools also begin with sections entitled vinayavibha ga. In both of these vinayas, a formal listing of the rules is followed by commentary and narratives that explain each rule more fully. These accounts provide important and often surprising insights into the concerns of Indian Buddhist monastic life.

Vinītaruci. (V. Ty Ni Ā Lu Chī 提 提) (d. 594). The Sanskrit name of an Indian monk who is traditionally regarded as the founder of the first school of [THĪEN](#) ([CHAN](#)) in Vietnam. The Vietnamese genealogical history [THĪEN UYĒN TĒP ANH](#) records that Vinītaruci was a brāhmaṇa from south India who wandered throughout India as a young man searching for the essence of the Buddhist teaching. He is reputed to have arrived in China in 574, where he went to see the third Chan patriarch [SENGCAN](#), who offered him instruction before advising him to go south. Vinītaruci then traveled to Zhizhi monastery in Guangzhou, where he remained for six years and translated many Buddhist texts. In 580, he arrived in Vietnam and settled at Pháp Vân monastery, where he subsequently transmitted the mind-seal (XINYIN) to Pháp Hiền (died 626), who carried on this Chan lineage associated with the third patriarch. He passed away sometime in 595. The Vinītaruci mentioned in the *Thiền Uyển Tập Anh* is undoubtedly the same Indian monk whose name is mentioned in Chinese Buddhist literature as a translator; however, it remains unclear whether Vinītaruci ever really came to Vietnam, as the Vietnamese Buddhist tradition reports. In any case, there are no historical grounds for the claim that he was the founding patriarch of a Chan lineage in Vietnam or to attribute to him the teaching style emblematic of the Southern school of Chan ([NAN ZONG](#)), which did not appear until centuries after his death.

vinīyata. (T. yul nges; C. bieijing [xinsuo]; J. betsukyō [no shinjo]; K. pyōlgyōng [simso] 律) [律]. In Sanskrit, “determinative,” or “object-specific”; the second of the six categories of mental concomitants ([CAITTA](#)) according to the hundred dharmas ([BAIFA](#)) schema of the [YOGĀCĀRA](#) school, along with the omnipresent ([SARVATRAGA](#)), the wholesome ([KUSALA](#)), the root afflictions ([MŪLAKLEŚA](#)), the secondary afflictions ([UPAKLEŚA](#)), and the indeterminate ([ANĪYATA](#)). There are five mental factors in the category of determinative mental concomitants; their function is to aid the mind in ascertaining or determining its object. The five are aspiration or desire-to-act ([CHANDA](#)), determination or resolve ([ADHIMOKA](#)), mindfulness ([SMṬI](#)), concentration ([SAMĀDHI](#)), and wisdom ([PRAJÑĀ](#)). According to [ASA GA](#), these five determinative factors accompany wholesome (kuśala) states of mind, so that if one is present, all are present.

vipāka. (T. mam par smin pa; C. guobao/yishu; J. kahō/ijuku; K. kwabo/isuk 果報 / 業報). In Sanskrit and Pāli, lit. “ripening,” thus “maturation,” “fruition,” or “result”; referring specifically to the “maturation” of past deeds ([KARMA](#)). Vipāka refers to any mental phenomenon that occurs as a result of a morally wholesome or unwholesome volitional action performed by body, speech, or mind, either in this or previous lives. Fruitions can be divided between those that occur during the lifetime in which the deed is performed, those that occur in the lifetime immediately following the lifetime in which the deed is performed, and those that occur two or more lifetimes later. Although the fruition is the result of a wholesome or unwholesome act, the vipāka itself is always morally neutral and manifests itself as something pleasant or painful that is either physical or mental. Vipāka is a subset of the related term “fruition” ([PHALA](#)); in the context of moral cause and effect, the ripening of moral causes is called the [VIPĀKAPHALA](#), which is one of the five types of effects or fruitions (phala) described in the [VAIBHĪKA](#) school of [SARVĀSTIVĀDA ABHIDHARMA](#); in that context vipākaphala is limited to effects, such as the body and so on, that last from the first moment to the last moment of a life. In the [MAHĀYĀNA](#) in general, the term also appears (with other forms of the verbal root √pac, “to cook”) in the sense of “maturation,” to refer to the power of buddhas and [BODHISATTVAS](#) to “ripen” beings in their progress along the path ([MĀRGA](#)).

vipākahetu. (T. mam smin gyi 'bras bu; C. yishu guo; J. ijuuku; K. isuk kwa). In Sanskrit, lit. "ripened fruit," viz., "retributive cause"; one of the five types of effects or fruitions (**PHALA**) described in the **VAIBHĪKA** school of **SARVĀSTIVĀDA ABHIDHARMA**, as well as by **VASUBANDHU** in the **ABHIDHARMAKOŚABHĀ YA**. These are karmic effects of either wholesome (**KUŚALA**) deeds (**KARMAN**) that are tainted by ignorance (**AMĪDĀ**), or of unwholesome (**AKUŚALA**) deeds; neutral actions cannot serve as retributive causes. These deeds have the potency to ripen, even at some point in the distant future, as vipākaphala, specifically as the aggregates (**SKANDHA**) of a future lifetime, producing the physical body (**RŪPA**), the six types of consciousness (**VIJÑĀNA**), and sensations (**VEDANĀ**). According to some schools, the retributive cause is essentially identical to volition (**CEṬANĀ**), since it is the force that initiates action. The goal of the eightfold path (**ĀRYĀ Ā GAMĀRGA**) is to end the generation of such causes and thereby exhaust the karmic forces that bind one to **SA SĀRA**.

vipākaphala. (T. mam smin gyi 'bras bu; C. yishu guo; J. ijuuku; K. isuk kwa). In Sanskrit, lit. "ripened fruit," viz., "retributive effect"; one of the five types of effects or fruitions (**PHALA**) described in the **VAIBHĪKA** school of **SARVĀSTIVĀDA ABHIDHARMA**, as well as by **VASUBANDHU** in the **ABHIDHARMAKOŚABHĀ YA**. These are karmic effects of either wholesome (**KUŚALA**) deeds (**KARMAN**) that are tainted by ignorance (**AMĪDĀ**), or of unwholesome (**AKUŚALA**) deeds; neutral actions do not produce ripened effects. These effects, the results of the **VIPĀKAHETU**, ripen, even at some point long after the performance of the specific deed, as the aggregates (**SKANDHA**) of a future lifetime, producing the physical body (**RŪPA**), the six types of consciousness (**VIJÑĀNA**), and sensations (**VEDANĀ**). The vipākaphala is the ultimate and inevitable effect of the "retributive cause" (vipākahetu): in a metaphor used in the tradition, the retributive cause is the seed that grows into the fruit-bearing tree that is the retributive effect.

vipak a. [alt. vipak abhūta] (T. mi mthun phyogs; C. yipin/suoduizhi; J. ihon/shotaiji; K. ip'um/sodaech'i /). In Sanskrit, "opposite class"; referring to a category that is the opposite of another category, such that one must be absent for the other to be present. The term appears especially in two contexts in Buddhist literature. First, in Buddhist logic (**HETUVIDYĀ**), vipak a is one of three terms: **PAK A** (logical subject), **SAPAK A** (similar instance), and vipak a (dissimilar instance). For example, in the syllogism (**PRAYOGA**) "sound is impermanent because it is produced," sound is the pak a. A pot would be an example or sapak a (a "similar instance" or "in the similar class;" knowledge that a pot breaks because it is produced can be extended to sound). Space would be a counterexample or vipak a (a dissimilar instance or in the dissimilar class; knowledge that it is not produced because it is permanent can be extended to exclude a sound from the dissimilar class because it is articulated and produced). Second, in Buddhist literature on the practice of the path (**MĀRGA**), vipak a is contrasted with **PRATIPAK A** ("counteracting force" or "antidote") to the afflictions (**KLEŚA**). For example, the opposing class of hatred (**DVE A**) is counteracted by loving-kindness (**MAITRĪ**), such that meditation on loving-kindness temporarily displaces hatred from the mind but does not permanently remove it, as does a pratipak a.

vipari āmadu khatā. (P. vipari āmadukkhā; T. 'gyur ba'i sdug bsngal; C. huaiku; J. eku; K. koego). In Sanskrit, "suffering associated with change"; the second of the three types of suffering, along with **DU KHADU KHATĀ** ("physical and mental suffering") and **SA SKĀRADU KHATĀ** ("suffering intrinsic to conditioned existence itself"). This type of suffering is defined as feelings of mental and physical pleasure that inevitably turn into pain if the activity that produces them is continued indefinitely, such as overindulging in delicious food, staying out in the sun too long, or sitting in the same posture for hours on end. The Buddhist claim is that pain and pleasure are qualitatively different: painful feelings will continue to be painful unless some further action is taken to assuage the pain, whereas pleasurable feelings will become painful if one persists in engaging in the activity that produces the pleasure. For example, after walking for a long distance, walking becomes painful, at which point it is pleasurable to sit down. After sitting for a long period of time, sitting becomes painful, and it is pleasurable to stand up and walk. Feelings of pleasure are thus a type of suffering, because they will inevitably revert to pain. An example is pouring cold water on a burn; after a moment of relief, the burning sensation will return. In the same way, feelings of pleasure are merely a brief lessening of pain.

viparyāsa. (P. vipallāsa; T. phyin ci log; C. diandao; J. tendō; K. chōndo). In Sanskrit, lit. "inversion," but referring to "perverted," "corrupted," or "inverted" views (the Chinese translation diandao literally means "upside down") or simply "error." There is a standard list of four "inverted views" that cause sentient beings to remain subject to the cycle of rebirth (**SA SĀRA**). The four are (1) to view as pleasurable what is in fact painful or suffering (**DU KHA**), (2) to see as permanent what is in fact impermanent (**ANITYA**), (3) to see as pure what is in fact impure (**AŚUBHA**), and (4) to see as having self what is in fact devoid of self (**ANĀTMAN**). These four inversions are corrected through insight into the true nature of reality, which prompts the realization that the aggregates (**SKANDHA**) are in fact suffering, impermanent, impure, and devoid of self. In the **TATHĀGATAGARBHA** literature, these four putatively correct views are in turn said also to be inversions from the standpoint of the tathāgatagarbha, which is said to possess four perfect qualities (**GU APĀRAMITĀ**): bliss, permanence, purity, and selfhood.

vipassanā. In Pāli, "insight" (see also **S. VIPAŚYANĀ**). Insight is defined as the direct intuition of the three marks (P. tilakkha a; S. **TRILAK A A**) of existence that characterize all phenomena: P. aniccā (S. **ANITYATĀ**) or impermanence, dukkha (S. **DU KHA**) or suffering, and anatta (S. **ANĀTMAN**) or nonself. Insight associated with the attainment of any of the eight noble paths and fruits (P. ariyamaggaphala; S. **ĀRYAMĀRGAPHALA**) or associated with the attainment of cessation (**NIRODHASAMĀPATTI**) is classified as supramundane (P. lokuttara; S. **LOKOTTARA**); that which is not associated with the noble paths and fruits is classified as mundane (P. lokiya; S. **LAUKIKA**). The classical commentarial paradigm pairs vipassanā with samatha (S. **SAMATHA**), or tranquillity, these two together being described as the two wings of Buddhist meditative cultivation (**BHĀVANĀ**). Vipassanā, when fully developed, leads to enlightenment (**BODHI**) and nibbāna (S. **NIRVĀ A**); samatha when fully developed leads to the attainment of **JHĀNA** (S. **DHYĀNA**), or meditative absorption, and the attainment of certain supranormal powers (P. abhiññā; S. **ABHIJÑĀ**). While the formal training in vipassanā meditation does not require the prior attainment of either jhāna or abhiññā, the mind must nevertheless have achieved a modicum of pacification through "threshold concentration" (**UPACĀRASAMĀDHI**) as a prerequisite for successful vipassanā practice. The **VIŚUDDHIMAGGA** lists eighteen main types of vipassanāñā a (S. vipaśyanāñjāna), or insight knowledge, of (1) impermanence (aniccānupassanā), (2) suffering (dukkhānupassanā), (3) nonself (anattānupassanā), (4) aversion (nibbidānupassanā), (5) dispassion (virāgānupassanā), (6) extinction (nirodhānupassanā), (7) abandoning (pa inissaggānupassanā), (8) waning (khayānupassanā), (9) disappearing (vayānupassanā), (10) change (vipari āmanupassanā), (11) signlessness (animittānupassanā), (12) wishlessness (apa ihitānupassanā), (13) emptiness (suññatānupassanā), (14) higher wisdom regarding phenomena (adhipaññādharmavipassanā), (15) knowledge and vision that accords with reality (**YATHĀBHŪTAJÑĀNADARŚANA**), (16) contemplation of danger (ādinavānupassanā), (17) contemplation involving reflection (pa isa khānupassanā), and (18) turning away (viva anānupassanā). While the terms samatha and vipassanā do appear in sūtra discussions of meditative training—although far more often in the later **KHUDDAKANIKĀYA** sections of the canon—they figure most prominently in the **ABHIDHAMMA** and the later commentarial literature. The systems of vipassanā training taught today are modern constructs that do not antedate late-nineteenth century Burma (see **LEDI SAYADAW**; **MAHASI SAYADAW**); they are, however, derived from, or at least inspired by, commentarial or scriptural precedents. Two of the most successful vipassanā organizations outside Asia are the Insight Meditation Society and the loosely knit group of centers teaching S. N. Goenka's vipassana meditation; the former originates with **AJAHN CHAH BODHIÑĀ A** (1917–1992) of the Thai forest tradition and the latter with the Burmese teacher U **BA KHIN** (1899–1971). See also **YATHĀBHŪTAJÑĀNADARŚANA**.

vipassanādhura. In Pāli, lit., "the burden of insight," in the sense of the obligation to develop insight through formal meditation training. The term is often contrasted with **GANTHADHURA**, "the burden of book," in the sense of the obligation to study. In the later **THERAVĀDA** tradition, these two duties have been seen as two vocations open to monks, viz., contemplative practice and doctrinal study. See also **PA JPAṬṬI**.

vipassanāñā a. In Pāli, "insight knowledge"; see **VIPASSANĀ**.

vipassanāñā ikasamādhī. In Pāli, "concentration of insight knowledge"; a commentarial term used to refer to a form of concentration that is developed through attending to the arising and passing away of the present thought-moment or object, when such concentration has successfully removed all distractions. It is equal in intensity to the "threshold concentration" (**UPACĀRASAMĀDHI**) that is cultivated in the course of practicing tranquillity meditation (P. samathabhāvanā; see **SAMATHA**). Vipassanāñā ikasamādhī, when fully developed, leads to the attainment of the paths (P. magga; S. **MĀRGA**) and fruits (**PHALA**) of liberation, whereas upacārasamādhī, when fully developed, leads only to the attainment of "absorptive concentration" (**APPANĀSAMĀDHI**), which is synonymous with "meditative absorption" (P. **JHĀNA**; S. **DHYĀNA**).

vipassanūpakkilesa. In Pāli, "defilement of insight"; according to the **VIŚUDDHIMAGGA**, ten experiences that occur to the diligent practitioner of meditation as natural concomitants of insight training (**VIPASSANĀ-BHĀVANĀ**). If the practitioner should become attached to any of these experiences, they become a hindrance to further progress along the path to liberation and thus would be deemed defilements of insight. The ten experiences are (1) a vision of radiant light (P. obhāsa; S. avabhāsa), (2) knowledge (P. ñā a; S. **JÑĀNA**), (3) physical rapture (P. pīti; S. **PRĪTĪ**), (4) tranquillity (P. passaddhi; S. **PRASRADDHI**), (5) mental ease or bliss (**SUKHA**), (6) determination (P. adhimokkha; S. **ADHIMOK A**), (7) energy (P. paggaha; S. pragraha), (8) heightened awareness (P. upa hāna; S. upasthāna), (9) equanimity (P. upekkhā; S. **UPEK A**), and (10) delight (P. nikanti; S. nikānti). As long as the mind is disturbed through attachment to the ten defilements of insight, it will be unable to comprehend the three marks of existence (P. tilakkha a; S. **TRILAK A A**) of impermanence P. (anicca; S. **ANITYA**), suffering (P. dukkha; S. **DU KHA**), and nonself (P. anatta; S. **ANĀTMAN**), the knowledge of which is the content of enlightenment (**BODHI**). These ten defilements may cause the practitioner to believe that he has already attained enlightenment as a stream-enterer (**SROTAĀPANNA**), a once-returner (**SAK DĀGĀMIN**), a nonreturner (**ANĀGĀMIN**), or a worthy one (**ARHAT**), when in fact he has not. Infatuation with the defilements is overcome by understanding them for what they are, as mere impermanent by-products of meditation. This understanding is developed through perfecting the "purity of knowledge and vision of what is and is not the path" (**MAGGĀMAGGAÑĀ ADASSANAVISUDDHI**), which is the fifth of seven "purities" (**VIŚUDDHI**) to be developed along the path to liberation.

vipaśyanā. (P. vipassanā; T. lhag mthong; C. guan; J. kan; K. kwan). In Sanskrit, "insight"; a technical term for an understanding of reality (either conceptual or nonconceptual) at a level of mental concentration equal to or exceeding that of **SAMATHA**. The presence of vipaśyanā is the distinguishing feature of the wisdom that

derives from meditation (BHAVANĀYAPRAJNĀ). Such insight is required to destroy the various levels of afflictions (KLEŚA) and to proceed on the path to liberation (VIMOKṢA) from REBIRTH. See also VIPASSANĀ; MOHE ZHIGUAN; XIUXI ZHIGUAN ZUOCHAN FAYAO.

Vipaśyīn. (P. Vipassī; T. Rnam gzigs; C. Piposhi fo; J. Bibashi-butsu; K. Pibasi pul). Sanskrit proper name of the sixth of the seven buddhas of antiquity (SAPTATATHĀGATA), who directly precede ŚĀKYAMUNI; Vipāśyīn is also listed as the nineteenth of twenty-five buddhas mentioned in the BUDDHAVA SA. In the Pāli tradition, his story is first recounted in the MAHĀPĀDĀNASUTTA in the DĪGHANIKĀYA. There, it is said that Vipassī's father was Bandhumā and his mother was Bandhumatī. He was born in the Khema park and belonged to the Kondañña clan. During his time, the human life span was eighty thousand years. He dwelt as a householder for eight thousand years and possessed three palaces named Nanda, Sunanda, and Sirmā, one for each of the three seasons. His wife's name was Sutanā, and he had a son named Samavattakkhandha. When he renounced the world, he left his house in a chariot, after which he practiced austerities for eight months. As with all BODHISATTVAS, Vipassī abandoned austerities as unprofitable when he realized that they did not lead to enlightenment. He attained buddhahood under a pā ali (S. pālali) tree. In the description of his enlightenment, he is shown contemplating dependent origination (PRAṬITYASAMUTPĀDA), but in a chain of ten rather than the standard twelve links. He preached his first sermon in the Khema Deer Park to his brother Khandha and to Tissa, the son of his family's priest. These two became his chief monk disciples. His chief nun disciples were Candā and Candamittā, and his attendant was named Asoka. His chief lay disciples were the laymen Punnabbasummitta and Nāga, and the laywomen Sirimā and Uttarā. He died at the age of eighty thousand in the Sumittārāma, and over his relics was erected a reliquary (STŪPA) seven leagues high. The bodhisattva who was to become GAUTAMA Buddha was at that time a NĀGA king named Atula.

viprayuktasa skāra. (S). See CITAMPRAYUKTASA SKĀRA.

vīra. (T. dpa' bo; C. yongmeng; J. yūmyō; K. yongmaeng). In Sanskrit and Pāli, "hero"; a common epithet of the Buddha. The word is also used for a bodhisattva skilled in tantric practices who accompanies a ĀKINĪ during the GA ACakra (tantric feast) ritual. Ekavīra (T. Dpa' bo goig pa), "Solitary Hero," is a form of YAMĀNTAKA widely practiced in Tibet and is used in general to describe the depiction of a male tantric deity without a consort.

virati. (T. spong ba; C. li; J. ri; K. i). In Sanskrit and Pāli, lit. "abstinence," "seclusion"; a polysemous term in both Sanskrit and Buddhist literature. In its Buddhist usages, virati generally refers to the separation or detachment from mental afflictions (KLEŚA) and false conceptualizations (Vikalpa); it may also indicate a desire to leave behind such afflictions. In Pāli literature, virati indicates three specific types of abstention, viz., from wrong speech, wrong action, and wrong livelihood. In SARVASTIVĀDA thought, virati results from a positive sense of perplexity about one's state in the world, and from it arises the soteriologically indispensable NIRVEDA, "disgust with the world" or "disillusionment." Two kinds of seclusion (C. ERZHONG YUANLI) are also discussed in the Chinese tradition: physical seclusion (shen yuanli) and the seclusion of the mind (xin yuanli). Removing oneself from a distracting, unwholesome, and disquieting environment by leaving it behind constitutes physical seclusion. Seclusion of the mind usually refers to "guarding one's senses" (INDRIYASA VARA) with mindfulness so that the mind will neither cling to, not be repulsed by, sensory stimuli; it also refers to the "withdrawal" from sensory stimulations and the consolidation of attention during meditative states (see DHYĀNA).

Virū haka. (P. Virū haka [alt. Vi ū abha]; T. 'Phags skyes po; C. Zengzhang tian; J. Zōjōten; K. Chūngjang ch'ōn). Sanskrit proper name of one of the four LOKAPĀLA, the kings of the four directions who reside on the four sides of Mount SUMERU. He is king of the south and resides on the southern face of the central mountain, where he is lord of the kumbha as. ¶ Virū haka (corresponding to the Pāli transcription Vi ū abha) is also the proper name of a king of KOŚALA at the time of the Buddha; he was the son of the Buddha's patron, PRASENAJIT, and usurped his father's throne. When Prasenajit ascended the throne, he requested a wife from the ŚĀKYA tribe. The Śākyas instead sent a maidservant, claiming that she was from a noble family, and she eventually gave birth to Virū haka. As a boy, he visited KAPILAVASTU and learned of his low birth. Realizing that his father had been deceived, he vowed to take revenge upon the Śākyas. After his father's death, he led an army against Kapilavastu, destroying the Śākyas kingdom and slaughtering its inhabitants. A violent storm caused a flood during the night, and Virū haka and his warriors, who were sleeping in the riverbed, were swept away. See also CĀTURMAHĀRĀJĀKĀYKA.

Virūpa. (Bi rü pa). Sanskrit proper name of one of the eighty-four MAHĀSIDDHAS, particularly revered in the SA SKYA sect of Tibetan Buddhism. Very little can be said with certainty about his life (whether he was a historical figure is open to question), but he may have lived at the end of the tenth century CE. He is said to have been a monk and a distinguished scholar of NĀLANDĀ monastery (in some sources, SOMAPURA), who was originally named Dharmapāla, devoting himself to scholastic study during the day and tantric practice at night. He recited the MANTRA of CĀKRASA VARA for years, but, unable to make any progress in his practice, he threw his rosary into the latrine. That night, the goddess NARĀTMĀ, appeared to him in a dream, instructing him to retrieve his rosary. Over the course of six nights, she conferred initiations and instructions that allowed him to attain the sixth bodhisattva BHŪM. She also gave him a text, which is otherwise unknown in Sanskrit, whose Sanskrit title might be reconstructed as *Mārgaphalamūlāsāstra, the "Root Treatise on the Path and Its Fruition." Dharmapāla subsequently began to engage openly in tantric practices and was expelled from the monastery and branded "deformed" or "ugly" (virūpa), whence he derived his name. Among the many stories told about him, perhaps the most famous tells of his stopping in a tavern to drink. When the tavern keeper demanded payment, he offered her the sun instead, using his ritual dagger to stop the sun in its course. The sun did not move for three days, during which time Virūpa consumed huge amounts of drink. In order to set the sun on its course, the king agreed to pay his bill. Virūpa eventually encountered two YOGINS who became his disciples: ombiheruka and K acārin. In the eleventh century, the Tibetan scholar SACHEN KUN DGA' SNYING PO of the 'Khon clan is said to have had a vision of Virūpa in which he received transmission of the *Mārgaphalamūlāsāstra. This became the foundation for the LAM BRAS teachings of the Sa skya sect, where Virūpa is regarded as a buddha, equal in importance to Nāropa for the BKA' RGYUD sect. His most famous work is his RDORJE TSHIG RANG ("Vajra Verses").

Virūpāk a. (P. Virupakkha; T. Mig mi bzang; C. Guangmu tian; J. Kōmokuten; K. Kwangmok ch'ōn). One of the four LOKAPĀLA, the kings of the four directions who reside on the four sides of Mount SUMERU. He is king of the west and resides on the western face of the central mountain, where he is lord of the NĀGAs.

vīrya. (P. viriya; T. brtson 'grus; C. jingjin; J. shōjin; K. chōngjin). In Sanskrit, "energy," "effort"; an enthusiasm to perform virtuous acts, which serves as the antidote to laziness. Since, by definition, the term refers to a delight in virtue, striving for nonvirtuous ends would not be considered "energy." The connotations of the term include the willingness to undertake virtuous deeds, the delight in the performance of virtuous deeds, a lack of discouragement, a commitment to success, and a dissatisfaction with minimal virtues. Deemed essential to progress on the path, vīrya is a constituent of many numerical lists. Vīrya is the second of the five spiritual faculties (INDRIYA) and counters the hindrance (NIVARA A) of sloth and torpor (STYĀNA-MDDHA). It is counted as one of the eleven wholesome mental concomitants (KUSĀLA-CAITTA) and constitutes the fourth of the six perfections (PĀRAMITĀ).

vīryapāramitā. (P. viriyapāramī; T. brtson 'grus kyi pha rol tu phyin pa; C. jingjin boluomiduo; J. shōjinharamita; K. chōngjin paramita). In Sanskrit, "the perfection of energy [alt. effort, vigor]"; the fourth of the six [alt. ten] perfections (PĀRAMITĀ) cultivated on the BODHISATTVĀ path. It is perfected on the fourth of the ten stages (DĀSABHŪM) of the bodhisattva path, ARCI MATI (radiant), where the flaming radiance of the thirty-seven factors pertaining to enlightenment (BODHIPĀK IKADHARMA) becomes so intense that it incinerates all the obstructions and afflictions, giving the bodhisattva inexhaustible energy in his quest for enlightenment. When the six perfections are divided based on whether they are associated with the accumulation of merit (PU YASA BHĀRA) or of wisdom (JNĀNĀSA BHĀRA), the perfection of energy is associated with both.

Viśākha. (P. Viśākha; T. Sa ga; C. Pishequ; J. Bishakya; K. Pisagōᄃᆞᆫ). A wealthy merchant of RĀJAG HA and husband of the female ARHAT DHAMMADINNĀ; he should be distinguished from Viśākḥā (s.v.), the foremost donor among laywomen. According to the Pāli account, Viśākha accompanied King BIMBISĀRA on a visit to the Buddha during the latter's first sojourn at Rājagaha (RĀJAG HA) after his enlightenment. Upon hearing the Buddha preach, Viśākha became a stream-enterer (SROTAĀPANNA) and, subsequently, a once-returner (SAK DĀGĀMIN) and a nonreturner (ANĀGĀMIN). Once he became a nonreturner, his behavior toward his wife Dhammadinnā changed, and once she learned the reason, Dhammadinnā requested permission to renounce the world and enter the order as a nun. Impressed by his wife's piety, he informed Bimbisāra, who arranged for her to be carried to the nunnery on a golden palanquin. After Dhammadinnā attained arhatship, Viśākha asked her questions pertaining to dharma, all of which she expertly answered. He reported this to the Buddha, who praised her for her skill in teaching. Viśākha and Dhammadinnā were husband and wife during the time of Phussa (S. Puya) Buddha (the twenty-first of the thousand buddhas) when, as a treasurer, he had arranged an offering of alms for Phussa Buddha and his disciples. Viśākha was a renowned teacher in his own right and is mentioned as one of seven lay disciples who each had five hundred followers.

Viśākḥā. (P. Viśākḥā; T. Sa ga ma; C. Pishequ/Luzimu; J. Bishakyamo/Rokushimo; K. Pisagōmo/Nokchamᄃᆞᆫ /). Prominent female lay disciple of the Buddha (and to be distinguished from the Buddhist layman Viśākha); in the A GUTTARANIKĀYA, the Buddha declares her to be foremost among laywomen who minister to the order. According to the Pāli account, Viśākḥā was born into a wealthy family and was converted by the Buddha at the age of seven, when he visited her native city of Bhaddiya. Viśākḥā had been dispatched by her grandfather, Me āka, with five hundred chariots, five hundred companions, and five hundred slaves to approach the Buddha and listen to him preach. Upon hearing his sermon, Viśākḥā became a stream-enterer (SROTAĀPANNA). Later, Viśākḥā was married to the son of a wealthy merchant named Migāra, who dwelt in the city of Sāvathī (ŚRĀVASTI) and was a follower of the Niga has (S. NIRGRANTHA; see JAINA). Although she was a dutiful wife and daughter-in-law, Viśākḥā was offended by the nakedness of the Niga ha ascetics and refused to show them respect. When criticized for her attitude, she threatened to return to her parents' house. Although sorely distressed by his daughter-in-law's behavior, Migāra consented to listen to a sermon by the Buddha if she would consent to remain in his family. Upon hearing the Buddha preach, Migāra became a stream-enterer (SROTAĀPANNA), and remained forever grateful to Viśākḥā, even giving her the sobriquet Migāramātā, "Migāra's Mother." Viśākḥā fed five hundred monks in her home daily, and was constant in her attentions to the

monastic community in Sāvattthi. She fulfilled the long-held wish shared by the five monasteries built to the east of the city named Migāramāpāsāda (S. [MĠĀRAM TUPRĀSĀDA](#)), which she visited with her children, grandchildren, and great grandchildren. The Buddha related how, in previous lives, Visākhā had ministered to the needs of the Buddhas Padumuttara (S. Padmottara) and Kassapa (S. [KĀSĀPA](#)). Visākhā was said to have died at the age of 120, although she always looked to be a maiden of sixteen. She was endowed with phenomenal strength, and the people of Sāvattthi believed that she brought good fortune to their city. Visākhā is upheld by the tradition as the ideal laywoman.

visa yogaphala. (T. bral ba'i 'bras bu; C. liji guo; J. rikeka; K. igye kwa). In Sanskrit, "separation effect"; a term used to describe liberation from rebirth and the reality of [NIRVĀ A](#). This is one of the five effects ([PHALA](#)) enumerated in the [VAIBHĀ IKA](#) school of [SARVĀSTIVĀDA ABHIDHARMA](#) and the [YOGĀCĀRA](#) system. Liberation ([VIMOK A](#)) and nirvā a are forms of cessation ([NIRODHA](#)) and as such are unconditioned phenomena ([ASA SK TADHARMA](#)) and permanent ([NITYA](#)) because they do not change moment by moment. Specifically, they are classified as "analytical cessations" ([PRATISA KHYANIRODHA](#)), that is, states of cessation that arise through the process of insight. In the Buddha's delineation of the [FOUR NOBLE TRUTHS](#) (catvāry āryasatyāni), the third truth of cessation ([NIRODHASATYA](#)) is followed by the fourth truth of the path ([MĀRGASATYA](#)). Later commentators would explain that cessation and path stand in a relationship of effect and cause, respectively. However, this is not possible in the literal sense, because an impermanent and conditioned phenomenon such as the path cannot serve as the cause for a permanent and unconditioned phenomenon such as cessation. In order to preserve this distinction but nonetheless acknowledge the role of religious practice in bringing about the state of nirvā a, the Vaibhā ika school proposed the category of visa yogaphala, which is essentially an effect that has no cause. Thus, the practice of the path leads to a permanent separation from the [KLEŚAS](#), and because that state of separation is permanent, it not formally the effect of a cause.

vi aya. (P. visaya; T. yul; C. jing; J. kyō; K. kyōng). In Sanskrit, lit. "sphere" or "object"; in epistemology, a general term for the object of a sensory consciousness ([VUJĀNA](#)). Various types of such objects are described in works on logic and epistemology, with distinctions made between the objects perceived by the five sensory consciousnesses and the objects perceived by the mental consciousness ([MANOVUJĀNA](#)).

Viśi acāritra. (C. Shangxing; J. Jōgyō; K. Sanghaeng). In Sanskrit, "Exemplary Practices"; the leader of the four [BODHISATTVAS](#) of the earth to whom [ŚĀKYAMUNI](#) Buddha transfers the quintessence of the [SŪTRA](#) in the [SADDHARMAPU ARIKASŪTRA](#) ("Lotus Sūtra"). Viśi acāritra is said to represent the "true self" aspect of the buddha-nature ([FOXYING](#)). Viśi acāritra has special significance for the Japanese [NICHIRENSHŪ](#) schools, because [NICHIREN](#) himself believed that his proselytization work had fulfilled the charge that Śākyamuni had given the bodhisattva. Thus, some Nichiren schools assume that their founder is the reincarnation of Viśi acāritra.

viśuddhabuddhak etra. (T. dag pa'i zhing khams; C. qingjing fuguotu; J. shōjōbukkoku; K. ch'ōngjōng pulgukt'o). In Sanskrit, lit. "purified buddha-field"; an important concept in Mahāyāna Buddhism and closely synonymous with some denotations of the East Asian term [JINGTU](#) ("PURE LAND"). According to certain [MAHĀYĀNA](#) texts, when a bodhisattva achieved buddhahood, the merit that he accumulated over the course of the path fructifies not only as the body, speech, mind, and activities of a buddha but also as the physical environment of that buddha as well. That physical environment is called a "buddha-field." These lands may be either "impure" or "pure," depending upon a number of factors, the most common of which is whether the land does or does not include three baleful destinies ([DURGATI](#)) of animals ([TIRYAK](#)), ghosts ([PRETA](#)), and hell denizens ([NĀRAKA](#)). The most famous of these pure buddha-fields is [SUKHĀVĀTĪ](#), the land of the buddha [AMITĀBHA](#). See also [BUDDHAK ETRA](#).

viśuddhi. [alt. viśuddha] (P. visuddhi; T. mam par dag pa; C. qingjing; J. shōjō; K. ch'ōngjōng). In Sanskrit, "purity"; of which two types are enumerated: innate purity (prak ti or svabhāvaviśuddhi) and purity free of temporary or adventitious stains (āgantukamalaviśuddhi). The former is the natural state of the mind (see [PRABHĀSĀVA](#)) as in the Pāli [A GUTTARANIKĀYA](#): "The mind, O monks, is luminous (P. pabhassara), but is defiled by adventitious defilements" (pabhassara ida bhikkhave citta , tañ ca kho āgantukehi upakkilesehi upakkili ha). The latter is the mind when the path ([MĀRGA](#)) has cleansed it of hindrances (see [NĪVARA A](#); [ĀVARA A](#)). In Pāli, there are seven purities (visuddhi) that must be developed along the path leading to liberation. The list of seven purities is first enumerated in the [MAJJHIMANIKĀYA](#) and forms the outline for both [BUDDHAGHOSA](#)'s [VISUDDHIMAGGA](#) and Upatissa's earlier [VIMUTTAMAGGA](#). The seven purities are likened to seven carriages that one takes in sequence to reach seven progressive goals. Thus, (1) the purity of morality (P. sīlavissuddhi; see S. [ŚĪLAVISUDDHI](#)) leads to its goal of (2) the purity of mind ([CITTAVISUDDHI](#)), and the purity of mind leads to its goal of (3) purity of understanding or views ([DI HVISUDDHI](#)). The purity of understanding leads to its goal of (4) purity of overcoming doubt ([KA KHĀVĀTARA AMSUDDHI](#)), and the purity of overcoming doubt leads to its goal of (5) the purity of knowledge and vision of what is and is not the path ([MAGGĀMAGGAÑĀ ADASSANAMSUDDHI](#)). The purity of knowledge and vision of what is and is not the path leads to its goal of (6) knowledge and vision of progress along the path ([PA IPADĀÑĀ ADASSANAMSUDDHI](#)), and knowledge and vision of progress along the path leads to its goal of (7) the purity of knowledge and vision ([ÑĀ ADASSANAMSUDDHI](#)). The goal of this last purity is liberation through the attainment of any of the four supramundane paths (P. ariyamagga; S. [ĀRYAMĀRGA](#)).

Visuddhimagga. In Pāli, "Path of Purity"; the definitive Pāli compendium of Buddhist doctrine and practice, written by the exegete [BUDDHAGHOSA](#) at the [MAHĀVĪHĀRA](#) in [ANURĀDHAPURA](#), Sri Lanka, in the fifth centuryCE. The work serves as a prolegomenon to the soteriological content of the entire Pāli canon in terms of the three trainings in morality (P. sīla; S. [ŚĪLA](#)), concentration ([SAMĀDHI](#)), and wisdom (P. paññā; S. [PRAJÑĀ](#)). These are the "three trainings" (P. tisikkhā; S. [TRISIK A](#)) or "higher trainings" (P. adhisikkhā; S. adhiśik ā). In his use of this organizing principle for his material, Buddhaghosa is clearly following Upatissa's earlier [VIMUTTAMAGGA](#), which is now extant only in a Chinese translation. Buddhaghosa had originally come to Sri Lanka from India in order to translate the Sinhalese commentaries [A HAKATHĀ](#) to the Pāli canon back into the Pāli language. It is said that, in order to test his knowledge, the Mahāvīhāra monks first gave him two verses and ordered him to write a commentary on them; the *Visuddhimagga* was the result. Legend has it that, after completing the treatise, the divinites hid the text so that he would be forced to rewrite it. After a third time, the divinites finally relented, and when all three copies were compared, they were found to be identical, testifying to the impeccability of Buddhaghosa's understanding of the doctrine. The commentaries that Buddhaghosa was then allowed to edit and translate make numerous references to the *Visuddhimagga*. The text contains a total of twenty-three chapters: two chapters on precepts, eleven on meditation, and ten on wisdom. In its encyclopedic breadth, it is the closest equivalent in Pāli to the [ABHIDHARMAMAHĀMBHĀ Ā](#) of the [SARVĀSTIVĀDA](#) school of [ABHIDHARMA](#). The post-fifth centuryCE exegete [DHAMMAPĀLA](#) wrote a Pāli commentary to the *Visuddhimagga* titled the [PARAMATTHAMANUJOSĀ](#) ("Container of Ultimate Truth"), which is also often referred to in the literature as the "Great Subcommentary" (*Mahā Tkā*).

Viśva tara. (S). See [VESSANTARA](#).

Vitakkasa hānasutta. (C. Zengshangxin jing; J. Zōjōshingyō; K. Chūngsangsim kyōng). In Pāli, "Discourse on Removing Distracting Thoughts," the twentieth sutta in the [MAJJHIMANIKĀYA](#) (a separate [SARVĀSTIVĀDA](#) recension appears as the 101st [SŪTRA](#) in the Chinese translation of the [MĀDHYAMĀGAMA](#)); preached by the Buddha to an assembly of monks at the [JETAVANA](#) grove in the town of Sāvattthi (S. [ŚRĀVASTĪ](#)). The Buddha teaches five methods that can be used to overcome unwholesome, distracting thoughts (P. vitakka; S. [VITARKA](#)) that may arise during the course of meditation. These methods include replacing the unwholesome thought with a wholesome thought, contemplating the danger of the unwholesome thought, ignoring the unwholesome thought, progressively stilling the process of thought formation, and forcibly suppressing the unwholesome thought through the application of concentration. An analogous treatment of five methods of controlling thoughts also appears in the [YOGĀCĀRABHŪMŚĀSTRA](#).

vītarāgapūrvin. (T. chags bral sngon song; C. xian liyu ren; J. senriyokunin; K. sŏn iyok in). In Sanskrit, "one already free from attachment," that is, one who has eliminated the afflictions ([KLEŚA](#)) that cause rebirth in the sensual realm ([KĀMĀDHĀTU](#)) prior to reaching the path of vision ([DARŚANAMĀRGA](#)); a general designation used in [ABHIDHARMA](#) to describe a set of the twenty members of the [ĀRYASA GHA](#) (see [VI ŚATIPRABHEDASA GHA](#)). The vītarāgapūrvin are said to be those who do not gain each of the four fruits of the noble path ([ĀRYAMĀRGAPHALA](#)) in a series, but leap over one or more before reaching [NIRVĀ A](#). See [SROTAĀPANNAPHALAPRATIPANNĀKA](#); [SAK DĀGĀMPHALASTHA](#).

vitarka. (P. vitakka; T. rtog pa; C. xun; J. jin; K. sim). In Sanskrit, "thoughts," "applied thought," or "applied attention"; one of the forty-six mental concomitants ([CAITTA](#)) according to the [VAIBHĀ IKA](#) school of [SARVĀSTIVĀDA ABHIDHARMA](#), one of the fifty-one according to the [YOGĀCĀRA](#) school, and one of the fifty-two in the Pāli [ABHIDHAMMA](#). Although etymologically the term contains the connotation of "investigation," vitarka is polysemous in the Buddhist lexicon and refers to a mental activity that could be present both in ordinary states of consciousness as well as during meditative absorption ([DHYĀNA](#)). Generically, vitarka can simply denote thoughts, and specifically "distracted thoughts," as in the [VITAKKASA HĀNASUTTA](#). In ordinary consciousness, it is perhaps best translated as "applied thought" or "initial application of thought" and refers to the momentary advertence toward the chosen object of attention. Vitarka is listed in the [ABHIDHARMA](#) as an indeterminate mental factor ([ANĪYATA-CAITTA](#)), because it can be employed toward either virtuous or nonvirtuous ends, depending on one's intentions and the object of one's attention. In meditative absorption, vitarka is one of the five constituents ([DHYĀNĀ GA](#)) that make up the first [DHYĀNA](#), and is perhaps best translated in that context as "applied attention" or "initial application of attention." In dhyāna, vitarka involves directing one's focus onto the single chosen meditative object. According to the Pāli [VISUDDHIMAGGA](#), "applied attention" is like a bee flying toward a flower, having oriented itself toward its chosen target, whereas "sustained attention" ([VICĀRA](#)) is like a bee hovering over that flower, having closer contact with and fixing itself upon the flower.

vitarkamudrā. (C. anwei yin; J. anniin; K. anwi in). In Sanskrit, "gesture of instruction" or "gesture of discussion." Vitarkamudrā is formed with a combination of gestures: the right palm faces outward, fingers up near the shoulder in the [ABHAYAMUDRĀ](#), and the left palm faces out, fingers down by the knee in the [VARĀDAMUDRĀ](#). Typically, the thumb and index finger of each hand also touch lightly, forming circles, while the rest of the fingers are splayed outward. This is a common gesture in Buddhist iconography, and the pose is often seen used with images of [BHAI AJYAGURU](#), [VAIROcana](#), [AMITĀBHA](#), [MAJUSŪRĪ](#), and even [AVALOKITEŚVARA](#). This gesture is also

sometimes called the vyākhyānamatrā, the gesture of explanation.”

vivartakalpa. (P. viva akappa; T. chags pa'i bskal pa; C. chengjie; J. jōkō; K. sōnggōp). In Sanskrit, “eon of formation” or “eon of creation”; one of the four periods in the cycle of the creation and destruction of a world system, according to Buddhist cosmology. These are the eon of formation (**vivartakalpa**), the eon of abiding (**VIVARTASTHĀYIKALPA**), the eon of dissolution (**SA VARTAKALPA**), and the eon of nothingness (**SA VARTASTHĀYIKALPA**). According to the **ABHIDHARMAKOSĀBHĀ YA**, each of the four eons lasts for twenty intermediate eons. The eon of formation begins when a wind begins to blow in space, impelled by the **KARMA** of sentient beings. A circle of wind forms, followed by a circle of water, followed by a circle of golden earth. The entire world system of the sensuous realm (**KĀMA DHĀTU**) then forms, including Mount **SUMERU**, the four continents and their subcontinents, the heavens, and the hells (see **BHĀJANĀLOKA**). These are then populated by beings (see **SATTVALOKA**), reborn in the various realms as a result of their previous karma. When all realms of the world system have been populated, the eon of formation ends and the eon of abiding begins.

vivartasthāyikalpa. (P. viva a hāyikappa; T. gnas pa'i bskal pa; C. zhujie; J. jūkō; K. chugōp). In Sanskrit, “eon of abiding,” or “eon of duration”; one of the four periods in the cycle of the creation and destruction of a world system, according to Buddhist cosmology. The others are: the eon of formation (**VIVARTAKALPA**), the eon of abiding (**vivartasthāyikalpa**), the eon of dissolution (**SA VARTAKALPA**), and the eon of nothingness (**SA VARTASTHĀYIKALPA**). According to the **ABHIDHARMAKOSĀBHĀ YA**, each of the four eons lasts twenty intermediate eons. The eon of formation begins when a wind begins to blow in space, impelled by the karma of sentient beings. A circle of wind forms, followed by a circle of water, followed by a circle of golden earth. The entire world system of the sensuous realm (**KĀMA DHĀTU**) and the first **DHĀYĀNA** of the realm of subtle materiality (**RŪPA DHĀTU**) then forms (see **BHĀJANĀLOKA**), which is then populated by beings (see **SATTVALOKA**) who are reborn there as a result of their previous **KARMA**. When all realms of the world system have been populated, the eon of formation ends and the eon of abiding begins. At the beginning of the eon of abiding, the human life span is said to be “infinite” and decreases until it eventually reaches ten years of age. It then increases to eighty thousand years, before decreasing again to ten years. It takes one intermediate eon for the life span to go from ten years to eighty thousand years to ten years again. The eon of abiding is composed of twenty eons, beginning with the intermediate eon of decrease (in which the life span decreases from “infinite” to ten years), followed by eighteen intermediate eons of increase and decrease, and ending with an intermediate eon of increase, when the life span increases from ten years to eighty thousand years, at which point the next eon, the eon of dissolution, begins. **ŚĀKYAMUNI** Buddha appeared when the life span was one hundred years. It is said that **MATREYA** will come when the human life span next reaches eighty thousand years.

viveka. (T. dben pa; C. yuanli; J. onri; K. wōlli). In Sanskrit and Pāli, “seclusion,” “aloofness,” “solitude.” In Buddhist meditative literature, viveka refers to the “aloofness” that occurs as a result of becoming increasingly focused on a meditative object and thus more “secluded” from the things of the sensual world. In the **NIDDESA** of the Pāli **KHUDDAKANIKĀYA**, three kinds of viveka are described: kāyaviveka, or “physical seclusion”; cittaviveka, or “mental seclusion;” and upadhiviveka, or “seclusion from the substrata of rebirth (**UPADHI**),” viz., the five aggregates (**SKANDHA**) and/or the afflictions (**KLEŚA**). Kāyaviveka is actual physical separation from family, friends, and distracting sense objects; cittaviveka is when meditative practitioners remain “aloof” or “secluded” from greed (**RĀGA**), hatred (**DVE A**), and delusion (**MOHA**). In some **MAHĀYĀNA** texts, the slavish pursuit of viveka is explained as a violation of the bodhisattva ideal, because the devotion to solitude impedes the bodhisattva’s vow to save others from their suffering. In Buddhist tantras, such as the **GUHYASAMĀJĀTANTRA**, the practice of the three isolations of body (kāyaviveka), speech (**VĀG VIVEKA**), and mind (cittaviveka) precedes the practice of illusory body (**MĀYĀKĀYA**), clear light (**PRABHĀSVARA**), and union (**YUGANADDHA**).

Vô Ngôn Thông () (d. 826). Vietnamese monk regarded by tradition as the founder of the second principal school of **THIÊN (CHAN)** in Vietnam. According to the Vietnamese genealogical history, **THIÊN UYÊN TẬP ANH**, Vô Ngôn Thông originally came from Guangzhou (China) and entered the Buddhist order at Shuanglinzi in Wuzhou. Because he was known for his ability to silently comprehend and realize the nature of things, his contemporaries called him “Wordless Realization” (V. Vô Ngôn Thông; C. Wuyantong). He is reputed to have studied under **BAIZHANG HUIHAI**. In 820, Vô Ngôn Thông came to Kiền Sơ Monastery in northern Vietnam and took up residence there to practice Chan. He generally sat facing the wall (see **BIGUAN**), without uttering a word. A disciple, Cam Thanh, served him for many years and received the transmission of his full teaching.

V jiputraka. (P. Vajjiputtakā; C. Baqizi; J. Batsugishi; K. Palgija). In Sanskrit, “Sons of Vji”; a group of monks condemned at the second Buddhist council (**SA GĪT**; see **COUNCIL SECOND**), the council at **VĀŚĀLĪ**, for what were judged to be ten violations of the **VINAYA**, the most serious of which was accepting gold and silver from the laity. Other violations included carrying a provision of salt, using a fringed sitting mat, eating after noon, eating meals from two different villages on the same day, and performing an ecclesiastical act (**SA GHAKARMA**) without a sufficient number of monks being present. According to Pāli sources, after their condemnation, these monks seceded to form the **MAHĀSĀ GHĪKA** school. See also **VĀTSĪPUTRĪYA**; **YĀSAS**.

Vulture Peak. See **G DHRĀKŪ APARVATA**.

vyākara a. (P. veyyākara a; T. lung bstan pa; C. shouji/piqielluo; J. juki/bigara; K. sugi/pigara 説/). In Sanskrit, “prediction” or “prophecy”; a statement made by a buddha indicating the course of future events, especially regarding when, where, and with what name a **BODHISATTVA** will become a buddha. The most famous instance of such prophecy in the **MAHĀYĀNA** sūtras appears in the **SADDHARMAPU ARIKASŪTRA** (“Lotus Sūtra”), where the Buddha makes predictions that the great **ARHATS**, beginning with **ŚĀRIPUTRA**, will all eventually achieve buddhahood. ¶ Vyākara a is also used to refer to one of the nine (**NAVA GA**) (Pāli) or twelve (**DVĀDAŚĀ GAPRAVACANA**) (Sanskrit) categories (**A GA**) of Buddhist scripture according to their structure or literary style, where it refers to prophetic teachings or expositions. In the ninefold Pāli division, **BUDDHAGHOSĀ** defines veyyākara a as something of a default category, which comprises the entire **ABHIDHAMMAPI AKA**, all suttas that do not contain verses, and any teaching of the Buddha that does not fall into any of the other eight categories.

Vyākhyāyukti. (T. Nnam par bshad pa'i rigs pa). In Sanskrit, “Principles of Exegesis,” a treatise by **VASUBANDHU** preserved only in Tibetan translation. In the broadest sense, the text deals with scriptural interpretation, touching on a wide range of related issues, including the authenticity of the **MAHĀYĀNA** sūtras as the word of the Buddha (**BUDDHĀVACANA**), which Vasubandhu upholds. The work is a companion to another work by Vasubandhu, the **Vyākhyāyuktisūtrakha āsata** (“One Hundred Extracts from the Sūtras for the Principles of Exegesis”), a collection of 109 passages presented without identification and without comment, all of which derive from “mainstream” (that is, non-Mahāyāna) sources, in most cases from the canon of the **MŪLASARVĀSTIVĀDA**. These passages serve as the basis for the discussion in the **Vyākhyāyukti**, which states that sūtras are to be explained according to (1) their purpose, (2) their summarized meaning, (3) their sense, (4) their sequence, and (5) objections and responses. In discussing the sense or meaning of a sūtra passage, he considers thirteen terms that have multiple meanings, including **DHARMA RŪPA** and **SKANDHA**. In his explication of technical terminology, Vasubandhu explains four distinct aspects of “the meaning of the words” (padārtha): synonyms (paryāya), definition (lak a a), etymology (nirukti), and their subdivisions (prabheda; perhaps implying subsidiary meanings, or “connotations,” in this context). In the course of the discussion, several Mahāyāna sūtras are quoted. The work was influential in late Indian scholastic circles, eliciting a commentary by Gu amati; it was also cited by such scholars as **HARIBHADRA**. It was highly praised by such luminaries as **SA SKYAPA ITA** and **BU STON** in Tibet, where it was used to establish principles for the translation of Buddhist texts from Sanskrit into Tibetan. See also **NETTIPAKARA A**; **PE AKOPADESA**; **SANFEN KEJING**.

vyāpāda. (T. gnod sems; C. chen; J. shin; K. chin). In Sanskrit and Pāli, “malice” or “ill will”; the ninth of ten unwholesome courses of action (**AKUŚALA KARMAPATHA**), referring to the hateful wish that harm will befall another. The ten courses of action are divided into three groups according to whether they are performed by the body, speech, or mind. Malice is classified as an unwholesome mental action (**AKUŚALA KARMA**), and forms a triad along with covetousness (**ABHIDHYĀ**) and wrong views (**MITHYĀD I**). Only extreme forms of defiled thinking are deemed an unwholesome course of mental action, such as the covetous wish to misappropriate someone else’s property, the harmful intent to hurt someone, or the adherence to pernicious doctrines. Lesser forms of defiled thinking are still unwholesome (akuśala), but do not constitute a course of action. ¶ “Malice” is also listed as one of the five hindrances (**NIVARA A**) to **DHYĀNA**, obstructing the dhyāna factor of rapture (**PRĪTĪ**). Malice is fostered by unwise attention (**AYONISOMANASKĀRA**) to objects causing aversion and is removed through frequent wise attention to loving-kindness (**MATRI**), developing the meditation on loving-kindness, and recognizing the fact that every person’s actions are his or her own and acknowledging the futility of anger. Malice is countered by faith (**ŚRADDHĀ**), the first of the five spiritual faculties (**INDRIYA**), and by the enlightenment factors (**BODHYA GA**) of physical rapture (prīti) and equanimity (**UPEK A**). “Malice” is also included among the ten fetters (**SA YOJANA**) and is completely overcome only upon becoming an **ARHAT**.

vyāpti. (T. khyab pa; C. bian/bianzhi; J. hen/henshi; K. p’yŏn/p’yŏnji /). In Sanskrit, “pervasion” or “concomitance”; a term used in logic to indicate the relation that obtains between the reason and the predicate in a correct syllogism (**PRAYOGA**). There is positive concomitance (anvaya) and negative concomitance (**VYATIREKA**). For example, in order for the syllogism (**PRAYOGA**) “Sound is impermanent because of being produced” to be correct, it must be true that whatever is impermanent must necessarily be produced. That is, the category of the reason must either be coextensive with or subsume the category of the predicate. In Tibetan monastic debate, the term figures in one of three answers that the defender of a position may give. When presented with a syllogism or consequence (**PRASA GA**) by the challenger, the defender may (1) accept the thesis (‘dod), (2) state that the reason is not a quality of the subject (rtags ma grub), or (3) state that there is no pervasion between the reason and the predicate (ma khyab).

vyatireka. (T. ldog pa; C. lizuofa; J. risahō; K. ijakpōp). In Sanskrit, in Buddhist logic, “exclusion” or negative concomitance, as compared with positive concomitance (anvaya); in the syllogism (**PRAYOGA**) “Sound is impermanent because of being produced,” the negative concomitance is whatever is permanent is not produced; the positive concomitance is whatever is produced is impermanent. The term also is used in the discussion of “reverse” (vyāv tta; T. ldog pa), a term that occurs in epistemology and logic treatises to describe how thought (as opposed to direct perception, viz., **PRĀTYAK A**) apprehends its object via a negative route,

whereby, for example, the idea of “chair” is arrived at through the exclusion of everything that is “nonchair.” This “non-nonchair” would be called the “reverse” (vyāv tta) of chair and the object of the concept of “chair.” See also [APOHA](#).

vyavadāna. (P. vodāna; T. mam byang; C. jing; J. jō; K. chŏng). In Sanskrit, “purification” or “cleansing”; often contrasted with [SA KLEŚA](#), meaning impurity, defilement, stain, or pollution. This vyavadāna/sa kleśa dichotomy is used in a variety of ways. These are understood to be two distinct and opposite modes of causation that condition one’s future—one leading to suffering and other to the end of suffering. A being’s consciousness ([VJNĀNA](#)) is constantly entering into either the process of purification (vyavadāna) or defilement (sa kleśa), depending upon actions and thoughts at any given moment. The process of purification may be undertaken by way of morality ([ŚILA](#)), concentration ([SAMĀDHI](#)), or wisdom ([PRAJÑĀ](#)). Purification is evidenced by the resultant presence of tranquillity ([PRAŚRABDHI](#)). In some [MAHĀYĀNA](#) texts, it is emphasized that the ultimate result of the process of purification is the realization that all phenomena ([DHARMA](#)) are ultimately devoid of any distinction between pure and impure. The term vyavadāna may also be used independently of sa kleśa, as, for example, where a [BODHISATTVA](#)’s understanding of the [DHARMA](#) is said to be vyavadāna—pure and without blemish.

vyavahāra. (T. tha snyad; C. sudi/yanyu; J. zokutai/gongo; K. sokche/ŏnŏ /). In Sanskrit, “convention” or “designation”; often with the connotation of something superficial. Generally, this term refers to matters involved with the mundane or worldly realm, as opposed to those of the sacred or supramundane realm. Vyavahāra has two general applications in a Buddhist context. First, it is used to indicate the established social conventions, experiences, and practices of the quotidian world. In Buddhism, these conventions are contrasted with the strict moral practices that conform to the ultimate truth ([PARAMĀRTHASATYA](#)) perceived by noble beings ([ĀRYA](#)). In this sense of a “conventional truth,” vyavahārasatya is synonymous with [SA V TISATYA](#). Second, and rather more commonly, this term is used in the context of language and discourse to indicate those conventional words used by ordinary, unenlightened beings to designate reality as they (mis)understand it. Here, again, the terms and the objects that they designate are merely conventional truths (sa v tisatya); the term vyavahārasatya sometimes is used as a synonym. Since, according to the doctrine of emptiness ([ŚŪNYATĀ](#)), all phenomena are devoid of any inherent, unchanging nature, the linguistic expressions used to designate the things of this world are purely conventional designations and cannot contain or communicate the true nature of those phenomena. Through the power of their practice, buddhas and [BODHISATTVA](#)s have an inherent understanding of all such linguistic expressions (see [NIRUKTI](#); [PRATIBHĀNA](#)) and use that knowledge to communicate the [DHARMA](#) to unenlightened beings. Buddhas and bodhisattvas, however, understand both the true and ineffable nature of the language they use, as well as the phenomena that language is meant to describe.

Vyavahārasiddhi. (T. Tha snyad grub pa). In Sanskrit, “Proof of Convention”; a work attributed to [NĀGĀRJUNA](#); it is no longer extant, but six stanzas are cited by [ŚĀNTARAK ĪTA](#) in his [MADHYAMAKĀLA KĀRAV TTI](#). The verses state that a [MANTRA](#) is composed of letters just as a medicine is composed of ingredients, but the mantra and the medicine are neither the same as nor different from the elements of which they are comprised. Because they are dependently arisen, they cannot be said to be either existent or nonexistent; instead, they exist conventionally. This fact is true of all phenomena, including cessation ([NIRODHA](#)), which were set forth by the Buddha for specific purposes.

vyaya. (T. jig pa; C. mie; J. metsu; K. myŏl). In Sanskrit and Pāli, “disintegration” or “destruction”; a close synonym of [ANITYA](#), viz., “desinence” or “impermanence.” In the [SARVĀSTIVĀDA ABHIDHARMA](#), “disintegration” or “desinence” constitutes the final of the four characteristics ([CATURLAK A A](#)) of compounded phenomena ([SA SK TADHARMA](#)), along with production or origination ([JĀTI](#)), continuance or maturation ([STHITI](#)), and “senescence” or decay ([JARĀ](#)). Vyaya refers to the inevitable tendency of all compounded things to disintegrate, once the cause and conditions that sustain them vanish. The various abhidharma systems disagree as to whether these four conditioned characteristics are natural qualities inherent in all compounded things; or whether they are external factors that act upon those things, such as through “forces dissociated from thought” ([CITTAMPRAYUKTASA SKĀRA](#)). They also disagree as to whether the four occur successively over a period of time or whether they are four perspectives on a single instant ([K A A](#)).

Wachirayanwarorot. [alt. Wachirayan Warot] (Thai) (1860–1921). See [VAJIRANĀ AVARORASA](#).

wajō. (). An alternate Japanese transcription of the Sanskrit term [UPĀDHYĀYA](#) or “preceptor,” which is also pronounced kashō in the [TENDAISHŪ](#). This term is often interchangeable with [OSHŌ](#). See [HESHANG](#).

wall contemplation. See [BIGUAN](#).

Wanfosi. (J. Manbutsuji; K. Manbulsa). In Chinese, “Monastery of Myriad Buddhas”; located outside the western gate of the old city wall of Chengdu in Sichuan province; currently only an archeological site. The monastery was founded during the Eastern Han period (25–220CE) and survived through the end of the Ming dynasty (1368–1644), changing its name several times in the course of its history. It was known as Anpusi during the Liang dynasty (502–556), [JINGZHONGSI](#) during the Tang dynasty (618–907), Jingyinsi during the Song dynasty (960–1279), and Zhulinsi, Wanfusi, and, finally, Wanfosi, during the Ming dynasty (1368–1644), after which it fell into disrepair. Since the rediscovery of the site in 1882, some two hundred sculptures and other sacred objects have been uncovered during successive excavations, most of which are currently kept in the Sichuan Provincial Museum. The sculptures date mainly from the North–south Dynasties through the Tang periods. During the Tang, when the monastery was known as Jingzhongsi, it was the residence of the early [CHAN](#) monk [CHŌNGJUNG MUSANG](#) (680–756, alt. 684–762), a Korean monk from the Unified Silla dynasty (668–935), whose prosperous Sichuan Chan lineage came to be known as the [JINGZHONG ZONG](#) line. His toponym Chōngjung (Jingzhong) comes from this monastery of Jingzhongsi.

Wangnyunsa. (). In Korean, “Royal Wheel Monastery”; a major doctrinal [KYO](#) monastery located on Mt. Songak in the Koryŏ capital of Kaesŏng. It was one of the ten monasteries built in the capital in 919 by Wang Kŏn (T’aejo, r. 918–943), the first king of the Koryŏ dynasty, in conjunction with his policy to establish his new state on the foundations of the religious power of Buddhism. This monastery was the site for the ecclesiastical examinations ([SŬNGKWA](#)) for monks in the Doctrinal (Kyo) school, which were established during the reign of King Kwangjong (r. 949–975). Such important Koryŏ Kyo monks as the state preceptor ([KUKSA](#)) Chigwang Haerin (984–1067) and the royal preceptor ([WANGSA](#)) Hyedŏk Sohyŏn (1038–1096) were appointed to their positions after taking the examinations at Wangnyunsa. Although Wangnyunsa seems not to have been as heavily patronized by the royal family as some of the other monasteries in Kaesŏng, the *Koryŏsa* (“History of Koryŏ”) notes a number of religious ceremonies that were held there during the dynasty. The monastery burned to the ground in 1236 during the Mongol invasion of the Korean peninsula and was subsequently rebuilt in 1275 by King Ch’ungnyŏl (r. 1274–1308). Wangnyunsa seems to have received special patronage during the reign of King Kongmin (r. 1351–1374). After his queen Noguk’s (d. 1365) death, Kongmin sited her memorial hall of Inhŭi chŏn at Wangnyunsa; his own memorial hall, Hyemyŏng chŏn, was built in 1376 at the west of the campus, the last reference to the monastery to appear in Korean historical materials. See also [KWANGMYŎNGSA](#).

Wang o Ch’ŏnch’ukuk chŏn. (C. Wang wu Tianzhuguo zhuan). In Korean, “Memoir of the Pilgrimage to the Five Regions of India”; composed by the Korean monk-pilgrim [HYECHŎ](#) (d.u.; c. 704–780). After being ordained in Korea, Hyech’o left for China sometime around 721 and spent perhaps three years on the mainland before departing for India (the Ch’ŏnch’ukuk of the title) via the southern sea route in 724. After landing on the eastern coast of the subcontinent, Hyech’o subsequently spent about three years on pilgrimage to many of the Buddhist sacred sites, including [BODHGAYA](#), [KUSINAGARI](#), and [SĀRNĀTH](#), and on visits to several of the major cities in north central India. He then traveled in both southern and western India before making his way toward the northwest, whence he journeyed on into [KASHMIR](#), [GANDHĀRA](#), and Central Asia. Making his way overland across the Central Asian [SILK ROAD](#), Hyech’o arrived back in Chinese territory in December of 727, where he spent the rest of his life. Like other pilgrims before him, Hyech’o kept detailed notes of his pilgrimage, and his travelogue does not differ significantly in terms of style and content from the earlier and more famous records left by [FAXIAN](#) and [XUANZANG](#); unfortunately, unlike their works, only fragments of his account survive. His text is largely organized according to the kingdoms, regions, and pilgrimage sites that Hyech’o visited. Hyech’o offers a general description of the geography, climate, economy, customs, and religious practices of each place he visited, and, when necessary, he clarifies whether [MAHAYĀNA](#), [HINAYĀNA](#), or some combination of the two traditions was practiced at a specific site. Although Hyech’o is known to have been the disciple of [VAJRABODHI](#) and [AMOGHAVAJRA](#), considered by some as patriarchs of esoteric Buddhism, he makes no mention in his travelogue of tantric texts or practices. Hyech’o does note the dilapidated state of some major [STŪPAS](#) and monasteries, the advance of the Turkic tribes into Buddhist areas, and the absence of any Buddhist practice in Tibet at that early date. In these and other respects, Hyech’o’s memoir serves as a valuable resource for the study of Buddhism and regional history along the Silk Road.

Wang Rixiu. () (d. 1173). Chinese lay Buddhist during the Song dynasty (960–1279), who played an important role in revitalizing the [PURE LAND](#) ([JINGTU](#)) tradition, also known by his Buddhist name of Longshu. Although Wang was an accomplished Confucian scholar, he renounced all aspiration for civil office and instead devoted himself to pure land devotions, charitable activities, and a daily regimen of one thousand prostrations. Wang is best known as the author of *Longshu zhengguan jingtu wen* (“Longshu’s Extended Writings on the Pure Land”), written in 1160, an extensive compendium of materials on the [SUKHĀVĀTĪ](#) pure land of [AMĪTĀBHA](#), drawn from sūtras, commentarial writings, and biographical materials, with Wang’s own exegeses. The collection offers practical instructions on how to have faith, and achieve rebirth, in the pure land, as well as a series of edifying tales about the successful rebirths and miracles that others generated through their own devotions.

wangshen. (J. bōshin; K. mangsin). In Chinese, lit., “loss of body,” viz., “self-immolation.” See [SHESHEN](#).

wangsheng. (J. ōjō; K. wangsang). In Chinese, “going to rebirth”; referring especially to rebirth in [AMĪTĀBHA](#)’s [PURE LAND](#) of [SUKHĀVĀTĪ](#). In its broadest sense, the term is sometimes used to refer to rebirth in either the three realms of existence ([LOKADHĀTU](#)) or other buddhas’ or [BODHISATTVAS](#)’ pure lands, such as the [ABHIRATI](#) pure land of the buddha [AK OBHYA](#) or the [TU ITA](#) heaven of the bodhisattva [MATREYA](#). The term has a distinctive usage in the East Asian [PURE LAND](#) traditions, however, where it refers specifically to rebirth in sukhāvatī. The seminal pure land sūtra, the [SUKHĀVĀTĪYŪHASŪTRA](#), regards this kind of rebirth as the achievement of the stage of nonretrogression (S. [AVANĀRTIKA](#)), one of the stages of the [BODHISATTVA](#) path. The *Wangsheng lun zhu*, a commentary by [TANLUAN](#) on [VASUBANDHU](#)’s [WULIANGSHOU JING YOUNPOTISHE YUANSHENG JI](#) (**Aparimitāyū sūtropadeśa*), says that rebirth in sukhāvatī is to be distinguished from the cycle of rebirth in the three realms of existence, because birth in the pure land frees one from any prospect of subsequent rebirths in [SA SĀRA](#). In order to go to rebirth in sukhāvatī, the pure land tradition offered the simple practice of chanting the buddha Amitābha’s name (C. [NIAN FO](#); K. yŏmbul; J. [NENBUTSU](#); see also [NAMU AMDABUTSU](#)). Ritual practices associated with taking rebirth in the pure land also include the deathbed recitation of the name of Amitābha, which is introduced in the *Sukhāvatīyūhasūtra* as the eighteenth of the forty-eight vows that [DHARMĀKĀRA](#) made before he attained enlightenment. According to this vow, a person may be reborn in sukhāvatī by sincerely calling out Amitābha’s name a mere ten times. The quality of rebirth in the pure land will be dependent on the practitioner’s level of achievement, viz., as superior, average, or inferior. Superior disciples are those who arouse the thought of enlightenment ([BODHICITTA](#)) and maintain mindfulness of Amitābha, while cultivating meritorious qualities. Average disciples are those who arouse the thought of enlightenment and maintain mindfulness of Amitābha, but who do not cultivate meritorious qualities to the same extent as do superior disciples. Inferior disciples are those who arouse the thought of enlightenment and maintain mindfulness of Amitābha, but who have not yet consistently begun to cultivate meritorious qualities. Several collections of testimonials regarding the efficacy of wangsheng practice exist in China, including the seventh-century *Wangsheng zhuan* by Jiakai (fl. c. 627) and the [FAYUAN ZHULIN](#) by Daoshi (d. 683).

Wangsheng Jingtu zhuan. (). In Chinese, “Biographies of Those Who Have Gone to Rebirth in the Pure Land.” See [JINGTU ZHUAN](#).

Wang Wei. (J. Ō I; K. Wang Yu) (701–761). Chinese poet, painter, and musician during the Tang dynasty and close associate of masters in the early [CHAN](#) school; his cognomen was Mojie. In 721, Wang Wei passed the imperial civil service examination and was appointed as assistant director of the Imperial Music Office. By 759, shortly after the An Lushan rebellion, he had risen to the high bureaucratic rank of right assistant director of the Department of State Affairs. Wang Wei is known to have maintained close relationships with several major figures in the thriving Chan tradition and wrote the funerary inscriptions for such monks as [JINGJUE](#) (683–c. 760), author of the [LENGQIE SHIZI JI](#), and the sixth patriarch ([LIUZU](#)) [HUINENG](#). Although there is no direct evidence of Buddhist influences in his writing, it is commonly asserted that his close relations with these Chan figures contributed to Wang Wei’s subtle and reflective descriptions of nature in his landscape poetry.

wangxiang. (J. mōzō; K. mangsang). In Chinese, “deluded thoughts,” “fantasies,” viz., thoughts that arise from ignorance ([AMIDYĀ](#)), craving ([T Ā](#)), conceptualization ([VĪKALPA](#)), or inverted views ([VPARYĀSA](#)), which must be eliminated in order to achieve enlightenment. The Chinese term corresponds variously to such Sanskrit terms as [PARIKALPITA](#) (imaginary), [VĪKALPA](#) (thought or conception), and [KALPANĀ](#) (conceptual construction). In Korean [SŌN](#) Buddhism, distracting thoughts or fantasies that arise during meditation practice, no matter how salutary, are denigrated as mangsang. The term has also entered vernacular Korean to mean “daydreaming,” “flights of fancy,” or even “paranoia.”

Wangyal, Geshe. (1901–1983). Tibetan monk-scholar of the [DGE LUGS](#) sect who played an important role in the transmission of Tibetan Buddhism to the United States. He was born in the region of Kalmykia of Czarist Russia, whose Mongol population practiced Tibetan Buddhism, and became a novice monk at the age of six. He was selected by [AGVAN DORZCHIEV](#) to continue his studies in [LHASA](#), enrolling at the Sgo mang college of [BRAS SPUNGS](#) monastery in 1922. After nine years of

study, he traveled to Beijing and then to Calcutta, where he served as translator for Sir Charles Bell (1870–1945), British colonial official for Sikkim, Bhutan, and Tibet, during his travels in China and Manchuria. In India, he met the British mountaineer Marco Pallis, with whom he spent four months in England in 1937. With the Chinese invasion of Tibet, he left Tibet for India, coming to the United States in 1955 at the invitation of the Kalmyk community of New Jersey. In 1958, he founded the Lamaist Buddhist Monastery of America, known in Tibetan as the Bslab gsum bshad grub gling (Labsum Shedrup Ling), in Freewood Acres, New Jersey, the first Tibetan Buddhist monastery in the United States. At the monastery and subsequently at Retreat House (later named Tibetan Buddhist Learning Center) in Howell, New Jersey, he brought a number of monks to the United States and gave teachings to a large number of students, several of whom went on to become scholars of Buddhism. His full name was Dge bshes Ngag dbang dbang rgyal.

Wanshan tonggui ji (J. Manzen dōkshū; K. Mansōn tonggwi chip). In Chinese, “The Common End of Myriad Good Practices,” in three rolls; a primer of Buddhist thought and practice composed by the Song-dynasty **CHAN** master **YONGMING YANSHOU** (904–975). Written largely in catechistic style, the *Wanshan tonggui ji* relies heavily upon scriptural quotations to answer questions raised concerning everything from meditation and making offerings of flowers to reciting the name of the buddha **AMITABHA** (see **NIANFO**). The overall message of the text is that all practices done properly return to the “true mark” of reality (shixiang), and this message is often interpreted as supporting the notion of “the unity of Chan and the teachings” (Chan jiao yizhi) and that of “sudden awakening (followed by) gradual cultivation” (**DUNWU JIANXU**).

Wanshousi. (). In Chinese, “Long Life Monastery”; located on Mt. Jing, Hangzhou prefecture, in present-day Zhejiang province of China; the first of the so-called “five mountain” (wushan, cf. **GOZAN**) monasteries of the **CHAN** tradition in China. Wanshousi, also known as Jingshansi, was established by the Chan master **FAQIN** during the Tianbao reign (742–756) of the Tang dynasty. During the Song dynasty, the monastery was designated as a public monastery, or “monastery of the ten directions” (**SHIFANG CHA**), and was renamed on several occasions as Chengtian Chanyuan (Upholding Heaven Chan Cloister), Nengren Chansi (Sākyamuni Chan Monastery), and Xingsheng Wanshou Chansi (Flourishing of Holiness, Long Life Chan Monastery). Wanshousi attracted many eminent abbots, such as **DAHUI ZONGGAO** and **WUZHUN SHIFAN**, and flourished under their supervision. The famous Japanese pilgrims **DŌGEN KIGEN** and **ENNI BEN'EN** also studied at Wanshousi. The monastery was destroyed in a conflagration at the end of the Yuan dynasty but was reconstructed during the Hongwu era (1368–1398) of the Ming dynasty. Largely through the efforts of the abbot Nanshi Wenxiu and others, Wanshousi regained some of its past glory.

Wanthadipani. (P. Va sadīpanī). In Burmese, “Lamp on the History [of the Religion]”; the first of four Burmese thathanawin, or Buddhist chronicles, that were composed in Burma (Myanmar) during the Konbaung dynasty (1752–1885). Written c. 1799 in the Burmese language by the monk Mehti **SAYADAW**, the text records the history of the **THERAVĀDA** sa gha (S. **SA GHA**) from its inception during the lifetime of the Buddha, through cycles of decline and restoration in ancient India, Sri Lanka, and Burma, up through a reformation of the Burmese sa gha begun at the capital **AMARAPURA** in 1784, of which Mehti Sayadaw himself was a leader. The text relies heavily on the Pāli chronicles **SAVANTAPĀSĀDIKĀ** and **MAHĀVA SA** for its account of the ancient tradition in India and Sri Lanka. It takes its material for the history of Buddhism in Burma among the Pyu, Myamma (ethnic Burmans), and Mon peoples from a variety of indigenous sources, including the **KALYĀṆĪNSCRPTIONS** (1479), the **YAZAMIN-KYAW** (1502), and U Kala's **MAHAYAZAMIN-GYI** (c. 1730). The text concludes with an account of Mehti Sayadaw's missionary activities in the city of Taungoo, where he was dispatched to propagate the new monastic reforms among the local sa gha.

Warren, Henry Clarke (1854–1899). One of the first American scholars of Buddhism, known for his translations from the Pāli; born in Boston, Massachusetts, in 1854. Warren suffered a crippling injury as a result of a childhood fall that left him with permanent spinal damage and excruciating physical pain throughout his life. After graduating from Harvard University in 1879, Warren studied with the eminent Sanskrit scholar Charles Lanman at Johns Hopkins University and, together with Lanman, founded the Harvard Oriental Series. Warren visited Oxford in 1884, where he met T. W. **RHYS-DAVDS** and joined the **PĀLI TEXT SOCIETY** around the time of its foundation; he also made a substantial financial donation to the organization. Warren's best known work is an extensive anthology of Pāli materials, *Buddhism in Translations*, published in 1896 as the third volume in the Harvard Oriental Series. He also published an edition of **BUDDHAGHOSHA**'s **VISUDDHIMAGGA** as volume 41 in that series. Warren died in Cambridge, Massachusetts, at the age of forty-five as a result of his debilitating spinal injury.

wat. In Thai, Khmer, and Lao, the most common term for a **VIHĀRA** or monastic complex. Wat is derived from the Pāli term vatta, meaning “practice, function, observance,” which by extension comes to be interpreted as a “place where practice is performed,” and thus a “monastery” (wat). Although Pāli regulations technically require a complex to have at least three monks in residence to be classified as a vihāra, the term wat is used in Thailand to refer to the deserted ruins of monasteries as well as to Hindu temples and Christian churches.

Wat Arun. In Thai, “Monastery of the Dawn,” deriving from the Sanskrit and Pāli Arua, the personification of dawn; located in Bangkok on the west bank of the Chao Phraya River. After defeating the Burmese in 1767, King Taksin (Boromrāja IV) is said to have arrived at the Wat Makok (“Olive Monastery”) at dawn and renamed it Wat Jaeng (“Bright Monastery”). King **RĀMA IV** bestowed on the monastery its present name. The monastery is best known today for its tall prang, or Khmer-style tower, which was constructed during the reigns of kings Rāma II and Rāma III. The central tower is 250 feet tall and symbolizes Moun **SUMERU**. The temple was briefly the seat of the Emerald Buddha (see **PHRA KAEW MORAKOT**) before the image was moved to **WAT PHRA KAEW** in 1784.

Wat Benchamabophit. In Thai, “Monastery of the Fifth King,” deriving from the Sanskrit Pañcamapavitra, with pañcama (Thai, benchama) meaning fifth, and pavitra (Thai, bophit/bophitra) meaning holy or beneficent one, a synonym for “king”; the monastery is commonly known in English as the “Marble Temple.” Located in Bangkok, it is one of the most renowned modern monasteries in Thailand. Construction began in 1900 at the request of the eponymous **RĀMA V** (Chulalongkorn), and the complex is built from Italian marble. It houses a large bronze statue of the Buddha called Phra Phuttha Chinnarat (Buddhajinārāja), which is a replica of the original. The ashes of Rāma V are enshrined under the image.

Wat Bowonniwet [alt. Wat Bovoranives]. In Thai, “Monastery of Excellent Abode” (P. Pavarānivesa); the royal monastery that is the Bangkok headquarters of the **THAMMAYUT** sect of Thai Buddhism. Built in 1829, it is most famous as the monastery where Prince Mongkut, the future king **RĀMA IV** and leader of the Thammayut reform movement, served as abbot, beginning in 1836, before he ascended the throne in 1851. The future king lived as a monk (his ordination name was Vajirāṇa a) for twenty-seven years, fourteen of which he spent as abbot of this monastery, before he returned to lay life in order to assume the throne of the Chakri dynasty. Subsequent members of the royal family have served the traditional period of temporary ordination as monks of this monastery; his son, the eminent scholar-monk **VAJIRĀṆA AVARORASA** (1860–1921), was the long-time abbot of the monastery. The main temple enshrines the buddha image called Phra Phuttha Chinnasi (Buddhajinaśī), said to date from 1357. Wat Bowonniwet is also the home of Mahamakut Buddhist University, one of Thailand's two public Buddhist universities.

Water and Land Ceremony. See **SHUILU HUI**.

Wat Mahathat. In Thai, “Monastery of the Great Relic” (P. Mahādhātu); the abbreviated name of several important Thai monasteries. ¶ Wat Mahathat in the ancient Thai capital of **AYUTHAYA** was constructed in 1374 and served as the seat of the **SA GHARĀJA** of the Kamavasi (P. Gāmaṇṇī, lit. “city-dweller”) sect. The temple complex was expanded and restored several times before the city was sacked by the Burmese in 1767; it remains in ruins. Excavations in 1956 unearthed relics. ¶ Wat Phra Mahathat Woromaha Vihan (P. Mahādhātuvaramahāvihāra), located in Nakhon Si Thammarat and thus also known as **WAT PHRA THAT NAKHON SI THAMMARAT**, was founded c. 757 CE and was originally a **ŚRĪMADVA MAHĀYĀNA** Buddhist monastery. Its famous **STŪPA**, modeled on the **MAHĀTHŪPA** in Sri Lanka, was built in the early thirteenth century to house a tooth relic of the Buddha brought back from the island. ¶ The best-known of the contemporary wats with this name, Wat Mahathat Yuwaraja Rangasiri Raja Woramaha Vihan (P. Mahādhātuvarāja [Thai, Rangasiri] Rājavaramahāvihāra), dates from the Ayuthaya period (when it was called Wat Salak), and was named the relic temple for Bangkok in 1803. Because of its location near the palaces, it has often been used for royal ceremonies. Mahachulalongkornrajavidyalaya, Thailand's largest Buddhist university, was located on its grounds until 2008, when the main campus was moved to Wangnoi, Ayuthaya.

Wat Pho. In Thai, “Monastery of Awakening” (P. **BODHI**); also known as Wat Phra Chetuphon (P. **JETAVANA**); the oldest and largest monastery in Bangkok, constructed in the sixteenth century and occupying twenty acres of land. It was extensively rebuilt in 1781 by King Rāma I and renovated in the first half of the nineteenth century by King Rāma III. The site also houses Thailand's largest reclining buddha image and the largest number of buddha images in the country. The reclining buddha image, constructed in the reign of King Rāma III, is 153 feet (forty-six meters) long and fifty feet (fifteen meters) high. Modeled out of plaster around a brick core, the image is finished in gold leaf, with mother-of-pearl inlay in the eyes. The feet display the 108 different auspicious characteristics of a buddha. In all, the monastery contains over a thousand buddha images, many from the ruins of the former capitals of **AYUTHAYA** and **SUKHOThai**, and a total of ninety-five **STŪPAS** of various sizes. Other features are a series of 152 marble slabs depicting the second half of the epic Rāmākian story (the Thai version of the Hindu epic the *Rāmāyaṇa* a), as well as numerous chapels, rock gardens, statues, and bell towers. Sometimes referred to as Thailand's first university, Wat Pho also contains an encyclopedic collection of engravings and paintings dealing with astrology, botany, herbal medicine, massage, and yoga. The wat is still a center for teaching traditional Thai massage.

Wat Phra Kaew [alt. Wat Phra Kaew]. In Thai, “Temple of the Emerald Buddha,” perhaps the most famous Buddhist temple in Thailand, located on the grounds of the royal palace in Bangkok. Much of the construction had been completed when Rāma I moved the Thai capital to Bangkok in 1785. It is a large-walled complex, containing dozens of golden pagodas, many shrines, and two libraries. Unlike most other Buddhist temples in Thailand, the complex does not include monastic quarters because of its location inside the palace grounds. The temple is best known as the site of the Emerald Buddha, or **PHRA KAEW MORAKOT**, the most sacred

buddha image in Thailand; Kaew is an indigenous Thai word for “glass” or “translucent”; morakot derives from the Sanskrit word for emerald (S. marakata).

Wat Phra Pathom Chedi. (P. Pa hamacetī). In Thai, “Temple of the First Reliquary”; the monastery built at the site of what is said to be the tallest Buddhist [CAITYA](#) (P. cetī) in the world at over 394 feet (120 meters); located in the Thai town of Nakhon Pathom. See [PHRAPATHOMCHEDI](#).

Wat Phra Phutthabat. In Thai, “Monastery of the Buddha’s Footprint” (P. [BUDDHAPĀDA](#)); a Thai monastery located in Saraburi province. In the seventeenth century, a hunter encountered a large puddle of water that appeared to be a footprint of the Buddha (buddhapāda). Once this identification was verified, a monastery was built to enshrine the footprint. Visiting this monastery is considered a source of great merit, and it is traditional for the Thai king to make an annual pilgrimage to the site to pay homage to the relic.

Wat Phra Thammakai. (Thai). See [DHAMMAKĀYA](#).

Wat Phra That Doi Suthep In Thai, “Monastery of the Relic at Mt. Sudeva” (‘That’ is the Thai word for relic [P. dhātu], Suthep is the Thai pronunciation of the Pāli proper name Sudeva, and Doi is a non-Thai northern word for mountain). A famous mountain monastery in northern Thailand, built on a site that has long been considered sacred and the home of guardian spirits. According to legend, the site was chosen in 1371 CE by a white elephant that was sent out by local monks to find an auspicious location for enshrining a relic ([DHĀTU](#); [ŚĀRIRA](#)). The site has been expanded several times with the addition of buildings, murals, bells, and parasols. See also [KHRUBA SI WICHA](#).

Wat Phra That Nakhon Si Thammarat In Thai, “Monastery of the Relic (P. Dhātu) in Nakhon Si Thammarat” (P. *Nagara-Siri-Dhammarāja), also known as Wat Phra Mahathat Woramaha Wihan (Mahādhātuvaramahāvihāra); the oldest and most revered Buddhist site in southern Thailand. The monastery dates to 757CE and was originally a [ŚRĪMĀYĀMAHĀYĀNA](#) Buddhist monastery. Its famous [STŪPA](#), modeled on the [MAHĀTHŪPA](#) in Sri Lanka, was built in the early thirteenth century to house a tooth relic brought back from the island. See also [WAT MAHATHAT](#).

Wat Phra That Phanom In Thai, “Monastery of the Relic (P. [DHĀTU](#)) in the city of Phanom” (Phanom is the Lao and Khmer term for mountain); the most revered Buddhist shrine in northeast Thailand, located in the town of Nakhon Phanom. The [STŪPA](#) on the site has a history dating back some fifteen hundred years, according to some local traditions, while other legends claim that it was originally built in 535 BCE, eight years after the death of the Buddha, as a reliquary for his breastbone. The structure is Lao in style, with a square base surmounted by slender tapering vertical columns in the shape of an elongated lotus bud. Its present appearance dates from 1977, after its predecessor collapsed under heavy rains in 1975, and is modeled after [WAT THAT LUANG](#) in Vientiane, Laos.

Wat Phu. [alt. Wat Phou; Vat Phu]. In Lao, “Mountain Monastery”; an important Khmer monastery complex located in Champassak province on the Mekong River in southern Laos. The first monastery was probably constructed in the fifth centuryCE, although the surviving structures (now largely in ruins) date from the eleventh through the thirteenth centuries. Originally a Śaiva temple, the ruins contain a shrine to Śiva’s bull Nandin, as well as pediments depicting [INDRA](#), K ā, and Vi u. The temple complex was converted to Buddhist use in the thirteenth century, with Buddhist images added to many of the shrines. In 2001, the site was designated a UNESCO World Heritage Site.

Wat Suthat Thepwararam. [alt. Wat Suthat]. In Thai, “Beautiful Noble Garden of the Devas” (P. Sudassanadevavarārāma); an important Thai monastery in Bangkok, founded by King Rāma I in 1807. It houses an image of the Buddha seated in the “earth-touching” ([BHŪMSPARŚAMUDRĀ](#)) pose. The image, known as Phra Sisakayamuni (derived from Śrī [ŚĀKYAMUNI](#)), is considered the largest (over twenty-five feet tall) and oldest bronze buddha image in Thailand; it was brought from [SUKHOTHA](#) by boat. The monastery is also known for its intricately carved wooden doors, created during the reign of Rāma II (r. 1809–1824) and now housed in the National Museum, and its murals of the Buddha’s previous lives, from the reign of Rāma III (r. 1824–1851). The large ordination hall of the monastery is considered one of the most beautiful in Thailand. The temple grounds also contain twenty-eight pagodas, representing the twenty-eight buddhas of the auspicious eon. The temple is the traditional seat of the brāhmaṇa priest who oversees important Thai royal ceremonies, such as the annual plowing ceremony. In front of the monastery is a giant swing, once used in an annual festival in which young men tried to swing high enough to retrieve a sack of gold suspended at a height of seventy-five feet. The festival was banned in the 1930s because of the number of deaths that resulted from the competition.

Wat That Luang. In Lao, “Monastery of the Royal [STŪPA](#)”; located in the Laotian capital of Vientiane, it is one of the most important Buddhist sites in Laos. According to legend, the original monastery was founded by monks sent by [AŚOKA](#) in the third century BCE. Relics from the early twelfth century have been uncovered, although these may derive instead from a site in modern-day northern Thailand. The prestige of That Luang may have been enhanced due to its proximity to earlier Buddhist sites. The present monastery was constructed on a small hill south of the city in 1818 during the reign of King Manthaturat (r. 1817–1836). It is said to have been built partially from branches of a [BODHI TREE](#) located near Wat Keo Fa. The large bronze and gilded buddha in the nave was transferred from the now defunct Wat Ahm Mungkun, located a short distance from That Luang. That Luang has long been one of the important ritual sites in Laos for Buddhist, folk, and royal ceremonies. There are two large [STŪPAS](#) on the grounds. The golden funerary stūpa in front of the main hall contains the ashes of the popular and last crowned Laotian king, Sisavang Vong (r. 1904–1959). The grand stūpa, which towers over the rear of the main hall, dates from 1818 and is said to contain relics ([DHĀTU](#); [ŚĀRIRA](#)) of the Buddha. The wat also contains a number of smaller stūpas that contain ashes of kings, other members of the royal family, and a variety of other dignitaries. The wat has one of Vientiane’s larger communities of monks and novices.

Wat Traimit. In Thai, “Monastery of the Three Friends” (S. Traimitra), so named because it was founded by three friends who emigrated from southern China; its full name is Wat Traimit Wittayaram Wora Wihan (S. Traimitravidyārāmavaravihāra). This monastery is located in the Thai capital of Bangkok and is commonly known in English as “The Temple of the Golden Buddha.” It contains what is said to be the world’s largest gold buddha image, named Phra Phuttha Maha Suwan Patimakon (P. Buddhamaḥāsuva āpa imā), seated in the “earth-touching” ([BHŪMSPARŚAMUDRĀ](#)) pose. The image itself is almost ten feet tall and is claimed to be composed of over five tons of solid gold. The statue, in the [SUKHOTHA](#) style, is believed to have been originally installed in the ancient Thai capital of Sukhothai, perhaps in the thirteenth century. In order to protect it from being plundered by Burmese invaders, it was covered with a layer of plaster. The plastered statue was eventually installed in Wat Phraya Krai during the reign of King Rāma III (r. 1824–1851). When that monastery fell into disrepair around 1931, the image was placed in storage. When it was being moved to its present location in the mid-1950s, the plaster cracked, revealing the golden buddha image inside.

Watts, Alan. (1915–1973). A widely read British Buddhist writer. Born in Kent, Watts was inspired to study Buddhism after reading such works as W. E. Holmes’ *The Creed of the Buddha*. At the age of fifteen, he declared himself a Buddhist and wrote to the Buddhist Lodge of the Theosophical Society in London, becoming a student and protégé of the head of the Lodge (later the Buddhist Society), [CHRISTMAS HUMPHREYS](#). At the age of nineteen, Watts wrote his first book, *The Spirit of Zen*, largely a summary of the writings of [DAISETZ TEITARO SUZUKI](#). Shortly thereafter, he assumed the editorship of the journal *Buddhism in England* (later to become *The Middle Way*). In 1938, he married the American Eleanor Everett, the daughter of Ruth Fuller Everett (later [RUTH FULLER SASAKI](#)). They immigrated to the United States during World War II (Watts, a pacifist, did not serve) and lived in New York, where Watts studied briefly with Shigetzu Sasaki, a Japanese artist and Zen practitioner known as Sokei-an. Watts gave seminars in New York and published a book entitled *The Meaning of Happiness*. Shortly after his wife had a vision of Christ, Watts decided to become a priest and entered Seabury-Western Theological Seminary near Chicago. He became an Episcopal priest and served for five years as chaplain at Northwestern University, ultimately resigning from the priesthood shortly after his wife had their marriage annulled. He later worked for six years at the newly founded American Academy of Asian Studies in San Francisco. He published *The Way of Zen* in 1957, followed by *Nature, Man, and Woman* in 1958, and *Psychotherapy East and West* in 1961. He supported himself as a popular author and speaker and played a leading role in popularizing Buddhism and Zen until his death in 1973.

weikza. [alt. weikza-do]. In Burmese, a “wizard,” deriving from the Pāli vijjādhara (S. [VIDYĀDHARA](#)). In Burmese popular religion, the weikza is portrayed as a powerful thaumaturge possessed of extraordinarily long life, whose abilities derive from a mastery of tranquility meditation (P. samatha; S. [SAMATHA](#)) and a variety of occult sciences such as alchemy (B. ekiya), incantations (P. manta; S. [MANTRA](#)), and runes (B. ing, aing). Collectively, these disciplines are called weikza-lam or “the path of the wizard.” Training in this path is esoteric, requiring initiation by a master (B. saya), and votaries typically are organized into semisecret societies called weikza-gaing (P. vijjāga a). Although concerned with the acquisition of supernatural powers and an invulnerable body, these attributes are ultimately dedicated to the altruistic purpose of assisting good people in times of need and protecting the Buddha’s religion from evil forces. In this regard, weikza practitioners often act as healers and exorcists, and in the modern era weikza-sayas with large followings are among the country’s notables, who have built monumental pagodas and restored national shrines. The perfected weikza has the ability to live until the advent of the future buddha Metteya (S. [MAITREYA](#)), at which time he can choose to pass into nibbāna (S. [NIRVĀ A](#)) as an enlightened disciple (P. sāvaka arahant; S. [ŚRĀVAKA ARHAT](#)), vow to become himself a solitary buddha (P. paccekabuddha; S. [PRATYĒKABUDDHA](#)) or a perfect buddha (P. sammāsambuddha; S. [SAMMAKSA BUDDHA](#)), or simply continue living as a weikza. Weikza practitioners typically eschew the practice of insight meditation (P. [VIPASSANĀ](#); S. [VIPAŚYANĀ](#)) on the grounds that this might cause them to attain nibbāna too quickly. Although largely domesticated to the prevailing worldview of Burmese [THERAVĀDA](#) orthodoxy, weikza practice and orientation ultimately derive from outside the Pāli textual tradition and show striking similarities to the Buddhist [MAHĀSIDDHA](#) tradition of medieval Bengal.

Weimojie suoshuo jing zhu. (J. Yuimakitsu shosetsukyōchū; K. Yumahil sosöl kyōng chu

). An influential commentary on the [VĪMALAKĪRTINIRDESA](#). The

commentary is attributed to [KUMĀRAJĪVA](#), but it was actually written by his disciple [SENG ZHAO](#), who recorded the interpretations of his teacher and combined them with those offered by other of Kumārajīva's disciples, such as [DAOSHENG](#) and Daorong. The commentary offers a paragraph-by-paragraph analysis of the sūtra and follows the order of Kumārajīva's Chinese translation of the sūtra. It is the first of the many commentaries on this famed rendering of the *Vimalakīrtinīrdeśa* and is still the most frequently cited.

weinuo. [alt. weina] (S. *karmadāna/*karmādāna; T. las su bsko ba; J. ina/ino; K. yuna /). In Chinese, “rector”; a term designating either the process of overseeing, or the specific supervisor of, such crucial monastic activities as apportioning dwellings, managing the refectory, arranging sleeping quarters, cleaning the monastery grounds, etc. According to various [VINAYA](#) codes and Chinese pilgrimage accounts such as [YIJING](#)'s [NANHAI JIGUI NEIFA ZHUAN](#), it was the rector's duty to strike instruments, such as gongs or chimes ([GHA A](#)), to remind others of the monastic schedule. Assemblies, meals, and services were conducted with the help of the rector's announcements. Because of his formal role in maintaining the monastic schedule, the rector may have thus come to serve as the principal supervisor or manager of daily activities in the monastery. The Sanskrit term *karmadāna does not appear in the extant corpus of Indian Buddhist literature, although it is attested in the [MAHĀVYŪTIPATI](#) Sanskrit-Tibetan lexicon, and the reconstruction is confirmed in Chinese transcriptions. In India, however, karmadāna may not necessarily have referred to a specific monastic office, but rather to the general act of “assigning” (lit. giving, [DĀNA](#)) “duties” (lit. action, viz., [KARMAṆ](#)) within the monastery. The Chinese term weinuo, however, clearly refers to a monastic office. The term is typically parsed as a combination of a lexical translation and phonetic transcription, and means something like “regulating (wei) the [dā]na,” an interpretation related to the literal sense of the Sanskrit term as “assigning duties,” and becomes used in East Asian Buddhism as the specific title of a monastic administrator who delegates responsibilities within the monastery—and thus a “rector.” According to the Chinese monastic codes ([QINGGUI](#)), the rector was responsible for all matters regarding the [SA GHA](#) and especially the sa gha hall ([SENGTANG](#)). The rector not only was in charge of the physical maintenance of the hall itself, but he also was called upon to settle issues, such as the determination of relative seniority or the appropriate punishment for transgressions committed by residents of the sa gha hall. The rector had the responsibility for appointing various low-ranking positions within the monastery, such as attendants, and conducted the tea ceremony. The weinuo also was in charge of leading the formal chanting at daily services, which involved much use of gongs and percussion instruments; weinuo is thus sometimes translated as functionally equivalent to the Western monastic office of “precentor,” the leader of the monastic choir. In Korean monasteries, the yuna serves as a “rector” in that he has formal responsibility for enforcing discipline, making work assignments, and arranging the time for group work; in addition, however, he also serves as nominal head of the meditation compound in the monastery and spiritual advisor to the meditation monks.

Weishan jingce. (J. Isan Kyōsaku [alt. Keisaku]; K. Wisan Kyōngch'aek) See [GUISHAN JINGCE](#).

Weishan Lingyou. (J. Isan Reiyū; K. Wisan Yōngu) (771–853). Alternate Chinese pronunciation of [GUISHAN LINGYOU](#), cofounder of the [GUIYANG ZONG](#) [alt. Weiyang zong] of the mature [CHAN](#) tradition. See [GUISHAN LINGYOU](#).

Weituo tian. (J. Idaten; K. Wit'a ch'ŏn). A Buddhist guardian deity, who is especially popular in East Asia, where he is often designated as a [BODHISATTVA](#) (pusa) or divinity ([DEVA](#); C. tian). Weituo is connected to the god Kārtikeya, also known as Skanda, whom the Buddhist tradition appropriated from the Hindu pantheon. Kārtikeya, the six-headed son of Śiva, is a Hindu god of war who helps defend the gods; in Buddhism, he became one of the many guardian deities who protect the dispensation, its sacred objects, and its sacred spaces. Weituo is the spirit commander of the thirty-two divine generals subordinate to the four heavenly kings ([CATURMAHĀRAJA](#); see [LOKAPĀLA](#)), as well as one of the eight generals under [VIRU HAKA](#), the heavenly king of the southern quarter of the world. He is also identified with [KUMĀRABHŪTA](#) (C. Dongzhen). His East Asian name “Weituo” is apparently a mistaken Sinographic transcription from “Sijiantuo” or “Jiantuo tian,” both Chinese transcriptions of Skanda. Weituo's role as a dharma protector ([DHARMAPĀLA](#)) is reflected in a story from the *Daoxuan lüshi gantong lu* (“Preceptor Daoxuan's Record of Miraculous Stories,” c. seventh century), written by the Chinese [VINAYA](#) master [DAOXUAN](#) (596–667), which relates that Weituo was instructed by the dying Buddha to protect the dharma whenever it was disturbed by demonic forces ([MĀRA](#)). From the Tang dynasty onward in China, Weituo was considered the guardian of monasteries and Buddhist practitioners, as well as a symbol of fierce determination in spiritual training. One of Weituo's specific roles was to protect the [STŪPAS](#) that enshrine the Buddha's relics ([ŚĀRIRA](#)). In a popular story involving Weituo, a group of malevolent demons steals one of the Buddha's tooth relics immediately following his death and cremation. Weituo battles the demons, saves the relic, and thereby earns a reputation as a fierce protector of the dharma. Weituo is typically depicted as a young man in full armor, with the headgear of a Chinese general. He is also often shown leaning on his weapon, sometimes a sword, but usually a [VAJRA](#). In many East Asian monasteries, Weituo's image is found to one side of, and facing, the Buddha image in the main shrine hall ([TAELŪNG CHŎN](#)). Weituo is also seen in the company of, and sometimes back to back with, [AVALOKITEŚVARA](#) and [MATREYA](#). His visage also frequently appears at the end of Chinese editions of the [SŪTRAS](#), as a reminder of his role in protecting the dharma.

Weixin jue. (J. Yuishinketsu; K. Yusim kyŏl). In Chinese, “Essentials of Mind Only”; an exposition on [CITTAMĀTRA](#) by the [CHAN](#) master [YONGMING YANSHOU](#). In this short treatise, Yongming launched a critique of more than 120 differing Buddhist positions, and argued instead that these variant views are but manifestations of a single, true mind. By cutting through to this mind, Yongming argued that all conceptual dichotomies (e.g., gain and loss, right and wrong, sudden and gradual) would be brought to an end and an inconceivable awakening would be attained.

weixin jingtu. (J. yuishin no jōdo; K. yusim chŏng'to). In Chinese, “the mind-only [PURE LAND](#)”; an interpretation of the pure land influential in the [PURE LAND](#), [CHAN](#), [HUAYAN](#), [TIANTAI](#), and esoteric schools; synonymous with the phrase “[AMITĀBHA](#) Buddha of one's own nature/mind” (zixing Mituo/weixin Mituo/jixin Mituo). Rather than seeing Amitābha's pure land of [SUKHĀVĀTI](#) as a physical land located to the west of our world system, this interpretation suggests that the pure land is actually identical to, or coextensive with, the mind itself. One understanding of this interpretation is that the concept of “pure land” is simply a metaphor for the innate brilliance and eternality of one's own mind. In this case, “the mind-only pure land” stands in distinction to the idea of the pure land as an objective reality, and many pure land exegetes rejected this interpretation for implying that the pure land existed only metaphorically. In other interpretations, a pure land is understood to manifest itself differently to beings of different spiritual “grades.” In this case, “mind-only pure land” is the highest level, which is accessible or visible only to those enlightened to the true nature of the mind; by contrast, the objectively real pure land is an emanation of the true pure land that manifests itself to unenlightened practitioners, but nonetheless is still a literal realm into which one could be reborn. In this case, “the mind-only pure land” is one level of the pure land, which does not, however, negate the reality of an external pure land. Such an interpretation was more amenable to pure land devotees and was sometimes incorporated into their exegetical writings.

Weiyang zong. (J. Igyōshū; K. Wiang chong). Alternate Chinese pronunciation of the [GUIYANG ZONG](#), one of the so-called “five houses” (wu jia; see [WU JIA QI ZONG](#)), or distinct lineages, that developed within the mature [CHAN](#) tradition during the late-Tang dynasty. See [GUIYANG ZONG](#).

Wencheng. (T. Grgya mo bza' kong jo, C. Wencheng gongzhu) (d. 680). The Tang-dynasty Chinese princess who married the Tibetan king [SRONG BTSAN SGAM PO](#). Although she was in fact a person of little historical significance, she figures prominently in competing Tibetan and Chinese versions of the introduction of Buddhism into Tibet and of Sino-Tibetan relations. According to Tibetan sources, she was given in marriage to the Tibetan king under threat of invasion and became one of the king's five wives: three Tibetans, one Nepalese, and one Chinese. The Nepalese and Chinese brides were Buddhists and converted their husband to the faith. Each also brought a buddha image as part of their dowry. Princess Wencheng brought the [JOBO SHĀKYAMUNI](#), eventually housed in the [JO KHANG](#) in [LHASA](#), and considered the most sacred buddha image in Tibet. The Nepalese princess [BH KUTĪ](#) brought the [JO BO MI BSKYOD RDO RJE](#), housed at [RAMO CHE](#). The journey of the Chinese princess and her statue was fraught with difficulties, as the giant demoness (srin mo), whose supine body is the landscape of Tibet, tried to impede their progress. As a result, the king built a series of temples to pin down her body ([MTHA' DUL GTSUG LAG KHANG](#)). Later sources would identify the Chinese princess as an incarnation of the bodhisattva [TARA](#). Chinese sources depict the princess as a kind of cultural ambassador, helping to introduce Han culture into the wilds of Tibet and convincing her husband to abandon a variety of barbaric customs. This view of Princess Wencheng has been promoted in various Chinese media (including martial arts films) since the Chinese invasion of Tibet in 1950. Contrary to both versions, it appears that Princess Wencheng arrived at the Tibetan court as a twelve-year-old girl, intended as the bride of Srong btsan sgam po's son, who had died by the time that she arrived. Srong btsan sgam po, by then an old man, made her one of his wives, dying himself a few years later. She did not produce a royal heir and does not seem to have played a significant role at court.

wenda. (J. mondō; K. mundap). In Chinese, lit. “question and answer”; pedagogical technique used in the [CHAN](#) (J. [ZEN](#); K. [SŌN](#)) school that involves an “exchange” or “dialogue” between a Chan master and a disciple regarding the Buddhist teachings. The exchange often consists of questions from the disciple and the master's response, but sometimes the master would also question the disciple to check his or her level of understanding and attainment. The master's answers are typically not a theoretical or discursive response to the question, but instead will employ logical contradiction, contextual inappropriateness, and illocutionary uses of language in order to challenge the understanding of the student. The master's answer might not even be a verbal response at all but might instead employ “the stick and the shout” ([BANGHE](#)) as a way of goading the student out of his conventional ways of comprehension. The ultimate goal is to prompt not mere intellectual understanding but an experience of awakening (C. [WU](#); J. [SATORI](#)). The recorded sayings ([YULU](#)) of eminent Chan masters often include a section on their wenda. These wenda constitute a major part of the [GONG'AN](#) literature of the Chan tradition, and the practice of wenda is itself performed using phrases drawn from the gong'an texts. During the Song dynasty in China, Chan monks were appointed to monastic positions, such as “interrogating monk” (wenseng) or “Chan receptionist” (chanke), whose responsibility was to ask questions of the master on behalf of the congregation, transforming wenda into a formal, ritualized occasion.

Wenyan. (C) (). See [YUNMEN WENYAN](#).

Wenji. (C) (). See [FAYAN ZHONG](#).

wenzi Chan. (J. monjizen; K. muncha Sŏn (). In Chinese, “lettered Chan”; a designation coined by [JUEFAN HUIHONG](#) (1071–1128) during the Northern Song dynasty (960–1127) to refer to a literati style of Chan exegesis that valorized belle lettres, and especially poetry, in the practice of [CHAN](#). Huihong himself traces the origins of “lettered Chan” to the “five ranks” ([WUWEI](#)) of [CAOSHAN BENJI](#) (840–901), although Caoshan himself attributes the five ranks to his teacher [DONGSHAN LIANGJIE](#) (807–869); in these ranks, Huihong finds the first evidence within the Chan tradition that the manipulation of language in the analysis of the sayings attributed to the ancient Chan masters can bring about awakening. This style of Chan is especially emblematic of monks in the [HUANGLONGPAI](#) collateral lineage of the [LINJI ZONG](#).

Wesak. (S. Vaisākha; P. Vesākha; T. Sa ga zla ba). A modern rendering of Vesākha, the Pāli name for the fourth lunar month of the traditional Indian calendar (thus corresponding to April–May in the solar calendar); by extension, the term refers to the important event(s) in the life of the Buddha that occurred during that month and to their annual commemoration. According to the [THERAVĀDA](#) and Tibetan traditions, it was on the full moon of the fourth lunar month that the Buddha was born, was enlightened, and passed into [PARINIRVĀ A](#). This date is therefore the most important in the Buddhist calendar of many traditions. Wesak is widely celebrated across much of the Buddhist world, but especially in Southeast Asia, where it is considered an especially important time to perform meritorious deeds. According to many East Asian traditions, the full moon of the fourth lunar month marks only the date of the Buddha’s birth, with his enlightenment and passage into [PARINIRVĀ A](#) occurring in the twelfth and eleventh lunar months, respectively; Wesak is therefore not nearly as important in the East Asian calendar as it is in Southeast Asia and Tibet.

Wŏlchŏngsa. (). In Korean, “Lunar Essence Monastery”; the fourth district monastery ([PONSŬ](#)) of the contemporary [CHOGYE CHONG](#) of Korean Buddhism, located on Odaesan (see [WUTASHAN](#)) in Kangwŏn province. The monastery’s history is closely linked to the [VINAYA](#) master [CHAJANG](#) (fl. c. 590–658). While Chajang was on pilgrimage at Wutaishan in China, he came across a mysterious old monk who interpreted a prophetic dream he had had and gave him relics (K. sari; S. [ŚARĪRA](#)) of the buddha to take back to Korea with him. Seven days later, a dragon told him to return to Odaesan in Korea to build a monastery; in 643, Chajang arrived at Odaesan, where he eventually constructed Wŏlchŏngsa. Wŏlchŏngsa’s main shrine hall, Chŏkkwang chŏn (Calm Radiance Hall), enshrines an image of [ŚĀKYAMUNI](#) as well as a mysterious statue that was found in the diamond pond south of the monastery. This statue, delicately carved in a style common to the eleventh century, is believed to be of [BHAI AYAGURU](#). In front of the main hall is a nine-story octagonal pagoda, fifty feet (15.2 meters) high, that was constructed in the tenth century. Skillfully carved and multiangled, it is representative of Koryŏ-era [STŪPAS](#). In front of the stūpa is a seated [BODHISATTVA](#), perhaps [MAÑJUŚRĪ](#), making an offering. The statue has been carved with detailed attention to ornamental accessories and clothing. The Chŏngmyŏl pogung (Precious Basilica of Calm Extinction) houses the relics of the Buddha that Chajang brought back to Korea and is one of four major shrine halls in Korea that does not enshrine a buddha image (the relics take the place of an image). One of Wŏlchŏngsa’s most famous residents during the twentieth century was the monk [HANAM CHUNGWŎN](#) (1876–1951), who helped save some of its buildings from soldiers who had been ordered to burn them down during the Korean War (seventeen buildings were unfortunately burned and had to be reconstructed). Sangwŏnsa, one of Wŏlchŏngsa’s branch monasteries ([WALSA](#)), is famous among Korean monasteries for its spectacular scenery and is a popular tourist stop.

Wŏnbulgyo. (). In Korean, “Wŏn Buddhism” or “Consummate Buddhism”; a modern Korean new religion, founded in 1916 by [PAK CHUNGBIN](#) (1891–1943), later known by his sobriquet [SOT’AESAN](#). Based on his enlightenment to the universal order of the “one-circle image” ([IRWŎNSANG](#)), Sot’aesan sought to establish an ideal world where this universal order could be accomplished in and through ordinary human life, rather than the specialized institution of the monastery. After perusing the scriptures of various religions, Sot’aesan came to regard the teachings of Buddhism as the ultimate source of his enlightenment and in 1924 named his new religion the Pulpŏp Yŏn’gu hoe (Society for the Study of the Buddhaharma); this organization was later renamed Wŏnbulgyo in 1947 by Sot’aesan’s successor and the second prime Dharma master of the religion, Chŏngsan, a.k.a. Song Kyu (1900–1962). Since the tenets and institutions of Wŏnbulgyo are distinct from those of mainstream Buddhism in Korea, the religion is usually considered an indigenous Korean religion that is nevertheless closely aligned with the broader Buddhist tradition. Sot’aesan used the “one-circle image” as a way of representing his vision of the Buddhist notion of the “[DHARMAKĀYA](#) buddha” ([pŏpsinbul](#)), which was reality itself; since this reality transcended all possible forms of conceptualization, he represented it with a simple circle, an image that is now displayed on the altar at all Wŏnbulgyo temples. Sot’aesan’s religious activities were also directed at improving the daily lot of his adherents, and to this end he and his followers established thrift and savings institutions and led land reclamation projects. Wŏnbulgyo has focused its activities on the three pillars of religious propagation ([kyohwa](#)), education ([kyoyuk](#)), and public service ([chasŏn](#)): for example, the second prime master Chŏngsan established temples for propagation, schools such as Wŏn’gwang University for education, and social-welfare facilities such as hospitals and orphanages. These activities, along with international proselytization, were continued by his successors Taesan, Kim Taegŏ (1914–1988), who became the third prime master in 1962, Chwasan, Yi Kwangjŏng (b. 1936), who became the fourth prime master in 1994, and Kyŏngsan, Chang Ŭngch’ŏl (b. 1940), who became the fifth prime master in 2006. The two representative scriptures of Wŏnbulgyo are the *Wŏnbulgyo chŏngjŏn* (“Principal Book of Wŏn Buddhism”), a primer of the basic tenets of Wŏnbulgyo, which was published by Sot’aesan in 1943, and the *Taejonggyŏng* (“Scripture of the Founding Master”), the dialogues and teachings of Sot’aesan, published in 1962 by his successor Chŏngsan. Wŏnbulgyo remains an influential religious tradition in Korea, especially in the Chŏlla region in the southwest of the peninsula; in addition, there currently are over fifty Wŏnbulgyo temples active in over fourteen countries.

Wŏnch’ŭk. (T. Wen tsheg; C. Yuance; J. Enjiki ()) (613–695). In Korean, “Consummate Keeness”; Silla-dynasty monk renowned for his expertise in Sanskrit and [YOGĀCĀRA](#) doctrine, who was influential in Chinese and in later Tibetan Buddhism. Wŏnch’ŭk is said to have left for Tang-dynasty China at the age of fifteen, where he studied the writings of [PARAMĀRTHA](#) and the *She lun*, or [MAHĀYĀNĀSA GRAHA](#), under Fachang (567–645). Wŏnch’ŭk later became the disciple of the Chinese pilgrim-translator [XUANZANG](#) who, in accordance with the new Yogācāra teachings of [DHARMAPĀLA](#) that he had brought back from India (see [FAXIANG ZONG](#)), denounced the existence of the ninth “immaculate consciousness” ([AMALAVIJÑĀNA](#)), which Paramārtha had advocated, and taught instead the innate impurity of the eighth “storehouse consciousness” ([ĀYAVIJÑĀNA](#)). These crucial doctrinal issues are said to have caused a split between the major disciples of Xuanzang: Wŏnch’ŭk and his followers came to be known as the Ximing tradition in honor of Wŏnch’ŭk’s residence, [XIMINGSI](#), and was said to have been more open to positions associated with the earlier [SHE LUN ZONG](#); and the lineage of his fellow student and major rival [KUIJI](#) (632–682), which came to be known as the Ci’en tradition after Kuji’s monastery, [Da CI’ENSI](#), and honed more rigidly to Xuanzang and Dharmapāla’s positions. Wŏnch’ŭk’s famed *Haesimilgyŏng so* (C. *Jieshenmi jing shu*), his commentary on Xuanzang’s translation of the [SA DHINIRMOCCANASŪTRA](#), includes traces of Wŏnch’ŭk’s earlier training in She lun zong thought and Paramārtha’s expositions on the controversial notion of amalavijñāna. Wŏnch’ŭk regarded the amalavijñāna as simply another name for the inherent purity of the āyavijñāna, but, unlike Xuanzang, he considered the āyavijñāna to be essentially pure in nature. He also disagreed with Xuanzang’s contention that the [ICCHĀNTIKĀ](#) could not attain buddhahood. Hence, his work seems to be an attempt to reconcile the divergences between the old Yogācāra of Paramārtha and the new Yogācāra of Xuanzang. Wŏnch’ŭk’s commentary to the *Sa dhinirmocanasūtra* was extremely popular in the Chinese outpost of [DUNHUANG](#), where [CHOS GRUB](#) (Ch. Facheng; c. 755–849) translated it into Tibetan during the reign of King [RAL PACAN](#) (r. 815–838). Only nine of the ten rolls of the commentary are still extant in Chinese; the full text is available only in its Tibetan translation, which the Tibetans know as the “Great Chinese Commentary” (Rgya nag gi ’grel chen) even though it was written by a Korean. Five centuries later, the renowned Tibetan scholar [TSONG KHAPA](#) drew liberally on Wŏnch’ŭk’s text in his major work on scriptural interpretation, [LEGS BSHAD SNYING PO](#). Wŏnch’ŭk’s views were decisive in Tibetan formulations of such issues as the hermeneutical stratagem of the three turnings of the wheel of the dharma ([DHARMAKAPPAVARTANA](#)), the nine types of consciousness ([VIJÑĀNA](#)), and the quality and nature of the ninth “immaculate” consciousness (amalavijñāna). Exegetical styles subsequently used in all the major sects of Tibetan Buddhism, with their use of elaborate sections and subsections, may also derive from Wŏnch’ŭk’s commentary. Consequently, Wŏnch’ŭk remains better known and more influential in Tibet than in either China or Korea. Wŏnch’ŭk also wrote a eulogy to the [PRAJNĀPARAMITĀH DAYASŪTRA](#), and commentaries to the [RENWANG JING](#) and Dharmapāla’s “[VĪJÑĀPTIMĀTRATĀSIDDHI](#),” the latter of which is no longer extant.

Wōndon sōngbul non (). In Korean, "The Perfect and Sudden Attainment of Buddhahood"; posthumous publication on the convergence of **HWAŌM** (C. **HUAYAN**) and **SŌN** (C. **CHĀN**) thought and practice by the mid-Koryŏ reformer **POJO CHINUL** (1158–1210). The *Wōndon sōngbul non* is said to have been found in a wooden box belonging to Chinul after his death and published posthumously by his disciple **CHINGAK HYESIM**. The text provides Chinul's most sustained presentation of his views on Hwaŏm thought and practice, which were profoundly influenced by **LI TONGXUAN**'s (635–730) idiosyncratic commentary on the **AVATA ŚAKASŪTRA**, the **HUAYAN JING HELUN**. Chinul seeks to demonstrate that the sudden understanding-awakening (K. *haeo*; C. **JIEWU**; viz., knowing that one is a buddha) is attained at the first level of the ten stages of faith (*sipsin*), which were usually thought to be a preliminary stage of training, rather than at the first arousing of the thought of enlightenment (**BODHICITTOTPAḌA**), which occurred at the first of the ten stages of abiding (*sipchu*). Chinul supports this argument by drawing on the Hwaŏm concept of "nature origination" (**XINGQI**), which he finds superior to the alternative Hwaŏm theory of the conditioned origination of the dharmadhātu (**FAJIE YUANQI**). This Hwaŏm understanding at the very inception of practice that one is endowed with the fundamental nature of buddhahood is compared to the **CHĀN** and **SŌN** notion of "seeing one's nature and attaining buddhahood" (**JIANXING CHENGFO**). But because Chan/Sŏn does not sanction the prolix conceptual descriptions of this experience that are found in the Hwaŏm school, it is the true "perfect and sudden" school. See also **YUANDUN JIAO**.

Wōn'gam Kuksa. (K) (). See **MIRAM CH'UNGJI**.

Wōn'gwang. (C. Yuanguang) (542–640). In Korean, "Consummate Brilliance"; Silla-dynasty monk known as an early exponent of the **WŌNAYA** tradition in Korea. Wōn'gwang went to the Chinese kingdom of Chen and studied various texts such as the **TATTVAŚIDDHI** and the **MAHĀPARINIRVĀ ASŪTRA**. After the fall of the Chen dynasty, Wōn'gwang traveled to Chang'an, where he attended lectures on **ASA GA'S MAHĀYĀNĀSA GRAHA** delivered by the monk Tanqian (542–607). Wōn'gwang returned to Korea in 600 and devised a set of lay precepts known as the "five secular injunctions" (*Sesok ogye*) at the request of two "flower youths" (*hwarang*) named Kwisan (d.u.) and Ch'uhang (d.u.). These injunctions adapted Confucian and Buddhist moral codes to the needs of a militant society involved in the ongoing peninsular reunification wars. The five are (1) loyalty, (2) filial piety, (3) trust, (4) not killing wantonly, and (5) not retreating in battle. According to his biography in the **HAEDONG KOSŬNG CHŌN**, Wōn'gwang was also a renowned thaumaturge and tamer of autochthonous spirits. He passed away at the royal monastery of **HWANGNYONGSA**. Two commentaries on the **TATHĀGATAGARBHASŪTRA**, the *Taebangdŭng yŏraejanggyōng so* and *Yŏraejanggyōng sagi*, are attributed to Wōn'gwang, but neither is extant.

Wōnhyo. (C. Yuanxiao; J. Gangyō) (617–686). In Korean, "Break of Dawn"; famous monk of the Silla dynasty and probably one of the two most important monks in all of Korean Buddhist history, who was renowned for both his scholastic achievements and his efforts to propagate Buddhism among the common people. He is reputed to have written over one hundred commentaries, of which some twenty are extant. According to the hagiographical accounts of Wōnhyo in the **SONG GAOSENG ZHUAN** and the **SAMGUK YUSA**, Wōnhyo tried, but failed, to travel to China with his friend **ŬISANG** in order to study with the Chinese translator and **YOGĀCĀRA** exegete **XUANZANG**. While on the road, Wōnhyo is said to have attained enlightenment after a traumatic experience in which he discovered that the earthen sanctuary in which the two travelers had taken refuge one stormy night was in fact a tomb. This experience prompted his awakening that all things are created by mind, which led Wōnhyo to realize that he did not need to continue on to China in order to understand Buddhism. (Ŭisang did travel to the mainland, where he studied with the early **HUAYAN** exegete **ZHIYAN**.) As the legends about Wōnhyo's enlightenment experience evolve, this story becomes even more horrific: Wōnhyo is said to have discovered that the sweet water he drank in the tomb to slake his thirst was actually offal rotting in a skull, a traumatic experience that immediately prompted his realization that the mind creates all things. Wōnhyo spent much of his life writing commentaries to the many new translations of Buddhist scriptures then being introduced into the Korean peninsula. A brief affair with the widowed princess of Yosŏk palace led to the birth of a son, who would grow up to become the famous literatus, Sŏl Ch'ong (c. 660–730), the creator of *Idu* ("clerical writing"), the earliest Korean vernacular writing system. After the affair, Wōnhyo changed into lay clothes and traveled among the peasantry, singing and dancing with a gourd he named *Unhindered* (*Muae*) and practicing "unconstrained conduct" (K. *muae haeng*; C. **WU'A XING**). ¶ In Wōnhyo's many treatises, he pioneered a hermeneutical technique he called "reconciling doctrinal controversies" (**HWAJAENG**), which seeks to demonstrate that various Buddhist doctrines, despite their apparent differences and inconsistencies, could be integrated into a single coherent whole. This "ecumenical" approach is pervasive throughout Wōnhyo's works, although its basic principle is explained chiefly in his *Simmun hwajaeng non* ("Ten Approaches to the Reconciliation of Doctrinal Controversy," only fragments are extant), **TAESŬNG KISILLON SO** ("Commentary to the 'Awakening of Faith According to the Mahāyāna'"), and **KŬMGANG SAMMAEYŎNG NON** ("Exposition of the **VAJRASĀDHIŚŪTRA**"). Wōnhyo was versed in the full range of Buddhist philosophical doctrines then accessible to him in Korea, including **MADHYAMAKA**, **YOGĀCĀRA**, Hwaŏm, and **TATHĀGATAGARBHA** thought, and *hwajaeng* was his attempt to demonstrate how all of these various teachings of the Buddha were part of a coherent heuristic plan within the religion. Since at least the twelfth century, Wōnhyo's *hwajaeng* exegesis has come to be portrayed as characteristic of a distinctively Korean approach to Buddhist thought.

wōnju. (C. yuanzhu; J. inju). In Korean, lit. "chief of the campus"; the preferred term in Korean monasteries for the "prior." See **JIANYUAN**.

Wōnmyo Yose. () (1163–1240). In Korean, "Consummate Sublimity, Knower of the World"; monk during the mid-Koryŏ dynasty, who is considered an influential figure in the revitalization of the Korean **CHŌNTAE** (C. **TIANTAI**) tradition. Yose also played a major role in the popularization of a movement known as the **PAENGNYŌN KYŎLSA**, or White Lotus retreat society (see also **JIESHE**; **BAILIAN SHE**). Yose was ordained by the monk Kyunjŏng (d.u.) at the monastery of Ch'ŏllaksa in present-day Hapch'ŏn. In 1185, he passed the clerical examinations (**SŬNGKYWA**) and led a retreat at a monastery known as Changyŏnsa on Mt. Yŏngdong. The eminent **SŌN** monk **POJO CHINUL** is known to have sent Yose a letter with a poem at that time, inviting Yose to his "Samādhi and Prajñā retreat society" (**CHŌNGHYE KYŎLSA**) at Kōjosa. Yose subsequently joined the society and practiced Sŏn meditation with Chinul, but left the society when Chinul moved the society to the monastery of Kilsangsa (present-day **SONGGWANGSA**). With the support of some prominent lay followers, Yose restored a group of dilapidated buildings on Mt. Mandŏk and established a White Lotus Society there in 1211. Yose continued to reside at the site after the restoration was completed five years later in 1216. He was posthumously awarded the title of state preceptor (K. *kuksa*; C. **QUOSHI**) and given the funerary name Wōnmyo. He is the reputed author of the *Samdaebu chōryo*, which is no longer extant.

Wōnyung chong. (). In Korean, "Consummate Interfusion school"; an alternate name for the Hwaŏm (C. **HUAYAN**) school in Korea. See **KYO**.

World Fellowship of Buddhists The first international Buddhist organization, founded in Colombo, Sri Lanka, in 1950, by representatives from twenty-seven countries, and headed by **GUNAPALA PIYASENA MALASEKERA** (1899–1973). Although most Buddhist traditions around the world are actively involved in the organization, **THERAVĀDA** Buddhists of Southeast Asia have traditionally played a central role: all its previous and current headquarters have been located in countries where the Theravāda tradition predominates (e.g., Sri Lanka, Myanmar, and Thailand) and all its presidents have also come from those countries. The WFB has more than 130 regional centers in over thirty countries, including India, Australia, the United States, Korea, Japan, and some African and European countries. The organization aims to promote the teachings of the Buddha, strengthen collegiality among Buddhists of different national traditions, and contribute to world peace by participating in social, educational, and humanitarian activities. The current headquarters is located in Bangkok, Thailand.

wu. (J. satori; K. 오) In Chinese, "awakening," "enlightenment"; one of the common Chinese translations for the Sanskrit term **BODHI** (awakening); often seen in English through its indigenous Japanese pronunciation of **SATORI**. The precise content of this awakening differs according to the various schools of Buddhism. In the East Asian tradition, wu could typically involve a gradual awakening (**JIANWU**), but it is more commonly associated with "sudden awakening" (**DUNWU**), especially in the **CHĀN ZONG** (J. **ZEN**; K. **SŌN**). Sudden awakening refers to the view that the mind is inherently enlightened (cf. "buddha-nature," or **FOXING**) and thus does not need to be purified of its afflictions (**KLEŚA**) in order for that buddha-nature to be realized. Gradual awakening, by contrast, refers to the view that enlightenment is the result of a process of purifying the mind of its afflictions over a series of stages, which may take several lifetimes to complete. The Chan scholiasts **GUIFENG ZONGMI** and **POJO CHINUL**, following earlier taxonomies of awakening in the **HUAYAN ZONG**, distinguish between two kinds of awakening: an initial sudden understanding-awakening (**JIEWU**), i.e., the instant when one first comes to know that one is innately a buddha; and, following a lengthy period of gradual cultivation (*jianxiu*), a final realization-awakening (**ZHENGWU**), when one is able fully to act on the potential inherent in one's initial awakening and not only be a buddha but also act like one. This description of the soteriological process is called sudden awakening followed by gradual cultivation (see **DUNWU JIANXIU**). Chan authors discuss many other possible permutations in this awakening and cultivation binary, including gradual cultivation/gradual enlightenment, sudden awakening/sudden cultivation, etc. Although the **SUDDEN-GRADUAL ISSUE** is most commonly associated with the **CHĀN** school, there are precedents in Indian Buddhism. The so-called **BSAM YAS DEBATE**, or Council of Lha sa, that took place in Tibet at the end of the eighth century is said to have pitted the Indian monk **KAMALASILA** against the Chan monk Heshang **MOHEYAN** in a debate over the issue of whether enlightenment occurs gradually or suddenly.

wu. (J. mu; K. 무). In Chinese, a Sinograph meaning "not have," "without," "no," and, as a philosophical term, "nonbeing," "nothingness." Exegetes in the Dark Learning (**XUANXUE**) school of Chinese philosophy, which was influential in early Chinese Buddhist thought, first explored the philosophical implications of the term wu. Based on their reading of the *Daode jing* ("The Way and Its Power"), a seminal Daoist classic traditionally attributed to the legendary Laozi, they interpreted wu as meaning either (1) "nonexistence" or "nonbeing," in distinction to the Sinograph *wu*, viz., "existence," or "being"; or (2) the metaphysical substratum of the universe, viz., "nothingness," which transcended the dichotomy of you and wu. Wu in this second denotation did not indicate simply voidness or negation; it rather referred to the source of the **DAO** itself or the principle underlying all existence. In this sense, wu was inseparable from you, the phenomenal expressions of the dao. This wu was termed "original nothingness" (*benwu*), because it served as the ultimate foundation of the myriad of existing things in the universe, and thus represented a preconceptual reality that transcended dichotomous existence (*you*). Wang Bi (226–249), traditionally regarded as the founder of Xuanxue, defined a person who attained wu as a sage (*shengren*). ¶ Early Chinese Buddhist thinkers, such as **DAOAN** (312–385) and Zhu Fatai (320–387), drew on this Xuanxue concept of *benwu* to

under the Buddhist concept of emptiness (*SŪNYATĀ*); *SĒNGZHĀO* (374–414) in his *ZHĀO LUN* also equates the original nothingness (*benwu*) with the dharma-nature (*DHARMATĀ*). As Chinese Buddhists gradually refined their understanding of the Buddhist notion of emptiness, prompted especially by the influence of *KUMĀRAJĪVA*'s translations of the *PRAJÑAPĀRAMITĀ* texts, this rendering of *sūnyatā* as *wu* was ultimately replaced by the new term *kong* (emptiness). ¶ In the context of the *CHĀN ZONG*, *wu* was often used to emphasize the mental state of nonattachment. However, ever since the character *wu* (pronounced *mu* in Japanese and Korean) was singled out by Chan master *DAHUI ZONGGAO* as a meditative topic (*HUATOU*) in Chan practice, Chan adepts began to use “*wu*” as an aid in their “questioning meditation” (*KANHUA CHAN*). This meditative topic was derived from a popular *GONG'AN* (*KOAN*) attributed to *ZHAOZHOU CONGSHEN*: “Does a dog have buddha nature, or not?” Zhaozhou answered, “*wu*” (“no,” lit. “it does not have it”). The Sinograph *wu* was also a frequent subject of monochrome brushstroke calligraphy, which was and is still often hung on the walls of the abbot's quarters (*FANGZHANG*) in Chan monasteries. See *WU GONG'AN*; *GOUZI WU FOXING*.

wu'ai xing. (J. *mugegyō*; K. *mu'ae haeng*). In Chinese, “unhindered action” or “unconstrained conduct”; one of the types of practice of a *BODHISATTVA-MAHĀSATTVA* as expounded especially in the *AVATĀ SAKASŪTRA*, referring to a conduct that is not constrained by the restrictions of customary morality or mundane societal expectations. Other related terms that are described as unhindered include “unhindered physicality” (*wu'ai shen*), “unhindered *SAMĀDHI*” (*wu'ai sanmei*), “unhindered wisdom” (*wu'ai zhi*), “unhindered dharma” (*wu'ai fa*), “unhindered path” (*wu'ai dao*), etc. The actions of a *bodhisattva-mahāsattva* conform to those of the buddhas themselves and any merit forthcoming from them are freely transferred (*huixiang*) to other sentient beings to help them with their salvation; for this reason, their actions are free from any kinds of hindrances. The *MAHĀYĀNĀSA GRAHA* (*She Dasheng lun*) also explains “unhindered action” as the merit of a buddha, which is obtained through the purest of wisdom. Unhindered action sometimes refers to a particular stage or practice of a *bodhisattva-mahāsattva*: the *BODHISATTVAHŪM* (*Pusa shanjie jing*) presents it as the tenth of the twelve conducts of a *bodhisattva-mahāsattva*, along with such advanced practices as the signless practice, untainted practice, practice-less practice, and contented practice. In this context, unhindered action refers to the stage where a *bodhisattva* cultivates the realm of reality (*DHARMADHĀTU*) that transcends all discrimination and teaches the true dharma (*SADDHARMA*) for the sake of innumerable sentient beings. This status is said to correspond specifically to the ninth of the ten *bodhisattva* stages (*DASABHŪM*), and the *bodhisattva* on this stage is described as being endowed with four types of analytical knowledges (*PRATISĀ VID*), which in Chinese were known as the four “unhindered knowledges” (C. *si wu'ai jie*): i.e., unhindered knowledge of (1) phenomena (*DHARMA*), viz., one makes no mistakes in one's teachings; (2) meaning (*ARTHA*), viz., to be unhindered with regard to the content and meaning of one's teachings; (3) etymology or language (*NIRUKTI*), viz., the ability to comprehend all languages; and (4) eloquence (*PRATIBHĀNA*), viz., ease in offering explanations. *CHENG GUAN* (738–839) states in his massive *HUAYAN JING SHU* (“Commentary to the *AVATĀ SAKASŪTRA*”) that the *bodhisattva* is able to abide in unhindered action (lit. “unhindered abiding”) because he no longer has any cognitive obstructions (*JNEYĀVARA*). The practice of unconstrained conduct has been a prominent, if controversial, feature of Korean Buddhism throughout its history. Several eminent Korean monks were known as practitioners of unconstrained conduct, including *WŎNHYO* (617–686), Chinmuk (1562–1633), and *KYŎNGHŎ SŎNGU* (1849–1912), and they followed ways of life that disregarded the standards of conduct typically incumbent upon ordained monks.

Wubai wenlun shiyi. (C) (). See *FAHUA WUBAI WENLUN*.

wuchong xuanyi. (J. *gojūgengi*; K. *ojung hyŏnnŭi*). In Chinese, “five layers of profound meaning” according to the *TIANTAI* school. See *FAHUA WUCHONG XUANYI*.

wudao song. (J. *godōju*; K. *odo song*). In Chinese, lit. “hymn on awakening to the way (*DAO*)”; an “enlightenment hymn.” See *YU*.

wufa. (J. *gohō*; K. *obŏp*). In Chinese, “the five [aspects of] dharmas.” According to various Chinese scholastic traditions, deriving from translations of the *LA KĀVĀTĀRASŪTRA* and *YOGĀCĀRA* materials, these five delineate the full ontological and epistemological range of all dharmas: phenomena (*SHI*), characteristics (*xiang*), conceptual discrimination (*fenbie*), correct knowledge of the way things are (*zhengzhi*), and suchness (*ZHENRU*). The first three aspects are called “factors associated with delusion/unenlightenment” (*mifa*) because the multiplicity, duality, and reality of “phenomena” and “characteristics” are merely “imagined” and “superimposed” by the discriminatory property of the unenlightened mind (which is covered by the third aspect, *fenbie*, viz., *PARIKALPITA*). In contrast, the last two aspects are called “factors associated with enlightenment” (*wufa*), with “knowledge” being the ability to discern the true “suchness” of things without conceptual superimpositions.

wu gong'an. (J. *mukōan*; K. *mu kongan*). In Chinese, “the case ‘no’”; an influential *CHAN* case or precedent (*GONG'AN*) associated with the Tang-dynasty Chan master *ZHAOZHOU CONGSHEN* (778–897). In this exchange, once a student came to Zhaozhou and asked, “Does a dog have the buddha-nature (*FOXING*), or not?” Zhaozhou answered, “No” (lit. “It does not have it”). The complete exchange from which this *gong'an* is drawn continues: “Everything has buddha-nature, from the buddhas above, to the ants below. Why wouldn't a dog have it?” Zhaozhou replied: “Because he has the nature of karmically conditioned consciousness.” This response seems to be associated with Chan debates concerning the Sinitic Buddhist doctrine of the “buddha-nature of the insentient” (*wuqing foxing*), which presumed that all insentient things, including rocks and tiles, trees, and grass, were also endowed with the buddha-nature; thus, if even rocks have the buddha-nature, why not dogs? Since the answer to the student's question should unequivocally be “Yes, a dog does have the buddha-nature,” Zhaozhou's enigmatic response, which *Wumen* calls a “checkpoint of the patriarchs,” seems to challenge one of the foundational beliefs of East Asian Buddhism; in so doing, it engenders a question in the student's mind, which will help to foster inquiry and ultimately a sense of doubt (*YIQING*). This answer “*WU*” (“no”) became a popular meditative topic (*HUATOU*) in the Chan meditation practice of “questioning meditation” (*KANHUA CHAN*) and is one of the most important *gong'ans* used in *kanhua Chan* training, especially in the Chinese *LINJI ZONG* and Japanese *RINZAISHŪ* lineages, as well as in the Korean *CHOGYE CHONG*. The *wu gong'an* is the first case collected in the *gong'an* anthology *WUMEN GUAN* (“Gateless Checkpoint”), and its use in *kanhua* practice was popularized by the Chinese *Linji* teacher *DAHUI ZONGGAO* (1089–1163). See also *GOUZI WU FOXING*.

wuhui nianfo. (J. *goe nenbutsu*; K. *ohoe yŏmbul*). In Chinese, “five-tempo intonation of [the name of] the buddha” (see *NIANFO*). A method of intoning the name of the buddha *AMITĀBHA* devised by the Tang-dynasty monk *FAZHĀO* (d.u.). While in *SAMĀDHI*, Fazhao is said to have received instructions for the *wuhui nianfo* technique directly from *Amitābha* himself. The practice seems to be based on the larger *SUKHĀVĀTĪYOHASŪTRA*, which speaks of the bejeweled trees that produce music in five tempos when swayed by the wind. The first tempo is a leisurely chant performed in a high tone (*ping*). The second tempo is a high and rising tone (*pingshang*). The third tempo is neither leisurely nor rapid, and the fourth gradually becomes rapid. The fifth tempo is a rapid and repetitious recitation of the four characters “A-mi-tuo-fo,” the Chinese pronunciation of *Amitābha*. According to Fazhao, the practical aim of this practice is to focus on the three jewels (*RATNATRAYA*) until one attains “no-thought” (*WUNIAN*) and nonduality (*ADVAYA*). Fazhao recommends *wuhui nianfo* for both clergy and lay who wish to rid themselves of the five types of suffering and the five hindrances, or to purify the five sense organs (*INDRIYA*) and attain the five powers (*BALA*). The ultimate purpose of the practice is to attain rebirth in the *PURE LAND* of *SUKHĀVĀTĪ*. Two manuals by Fazhao detailing the practice of *wuhui nianfo*, the *Jingtu wuhui nianfo lüefa shiyi canben* (“Praise for the Abbreviated Ritual Manual of the Pure Land Five-Tempo Intonation of [the Name of] the Buddha”) and the *Jingtu wuhui nianfo songjing guanxing yi* (“Rite for Intoning the Buddha's Name, Reciting Scripture, and Performing Meditation According to the Five Tempos of the Pure Land”), were recovered in the *DUNHUANG* manuscript cache.

wujiao. (C) (). In Chinese, the “fivefold taxonomy of the teachings” according to the *Huayan* school. See *HUAYAN WUJIAO*.

Wujiao zhang. (C) (). See *HUAYAN WUJIAOZHANG*.

wu jia qi zong. (J. *goke shichishū*; K. *oga ch'ilchong*). In Chinese, “five houses and seven schools.” According to the traditional historical narratives of the *CHAN* tradition, the lineages of the sixth patriarch (*LIUZU*) *HUINENG*'s two major disciples *NANYUE HUARANG* and *QINGYUAN XINGSI* grew into five houses and eventually seven schools. The five houses refer to the lineages of the *GUIYANG* [alt. *Wei yang*] *ZONG*, *LINJI ZONG*, *CAODONG ZONG*, *YUNMEN ZONG*, and *FAYAN ZONG* of the Tang dynasty. Each of these “houses” (*jia*) is said to have had its own unique teaching style (*jiafeng*) and was respectively named after its purported founder or “patriarch”: the *Guiyang* was named after *GUISHAN LINGYOU* and his disciple *YANGSHAN HUIJI*, the *Linji* after *LINJI YIXUAN*, the *Caodong* after *DONGSHAN LIANGJIE* and his disciple *CAOSHAN BENJI*, the *Yunmen* after *YUNMEN WENYAN*, and the *Fayan* after *FAYAN WENYI*. Among these houses, the *Linji* became predominant during the Song dynasty, when it further split into two separate lineages known as the *HUANGLONG PAI* (named after *HUANGLONG HUINAN*) and the *YANGQI PAI* (named after *YANGQI FANGHUI*). These two Song-dynasty lineages, together with the original listing of five houses, constitute the so-called seven schools. According to the Chan historian *GUIFENG ZONGMI*, the early Chan lineages known as the *NIUTOU ZONG*, *Heze zong* (see *HEZE SHENHUI*), *JINGZHONG ZONG*, *BAOTANG ZONG*, *BEI ZONG*, and *NAN ZONG* were eventually supplanted by the flourishing lineages of *Nanyue*'s disciple *MAZU DAOYI* (i.e., the *Guiyang* and *Linji*) and *Qingyuan*'s disciples *SHITOU XIQIAN* (i.e., the *Caodong* and *Yunmen*) and *XUEFENG YICUN* (i.e., the *Fayan*).

wujinzang yuan. (J. *mujinzōin*; K. *mujinjang wŏn*). In Chinese, “inexhaustible storehouse cloister”; the emblematic institution of the Third Stage Sect *ŚANJIE JIAO*, a major school of Buddhism during the Tang dynasty. The *wujinzang yuan* was established at *Huadusi* (Propagation and Salvation Monastery) in the capital *Chang'an* early in the Tang dynasty, probably between 618 and 627. The institution was based on the concept of “merit-sharing,” i.e., that one could enter into the universal inexhaustible storehouse of the dharma realm, as articulated by the sect's founder *XINXING* (540–594), by offering alms to the *wujinzang yuan* on behalf of all sentient beings. By 713, when the Tang emperor *Xuanzong* (r. 712–756) issued an edict closing it due to charges of embezzlement, the *wujinzang yuan* had served as a major agency for promoting the sect for almost a century. Drawing on the *AVATĀ SAKASŪTRA* and the *VIMALAKĪRTINIRDEŚA*, the sect interpreted the Sinographs *wujin* (inexhaustible) to mean that both the field of reverence—viz., the three jewels (*RATNATRAYA*)—and the field of compassion—viz., sentient beings—were inexhaustible. The *wujinzang yuan*, therefore, was the place where the sect's sixteen kinds of almsgiving (*DĀNA*) were to be practiced, through offerings made to (1) the buddha, (2) the dharma, (3) the *sa gha*, and (4) all sentient beings; (5) works that serve to ward off evil; (6) works that serve to do good; and offerings of (7) incense, (8) lamps,

(9) the monks' baths, (10) bells and chants, (11) clothing, (12) dwellings, (13) beds and seats, (14) receptacles for food, (15) coal and fire, and (16) food and drink. There were two kinds of offerings made to the wujinzang yuan: (1) regular offerings collected in the form of a daily levy and (2) offerings received at particular times of the year. A Sanjie jiao text discovered at [DUNHUANG](#) says that a person is expected to offer one fen (a hundredth of a tael) of cash or one ge (a tenth of a pint) of grain per day, or thirty-six qian (a tenth of a Chinese ounce) or 3.6 dou (pecks) of grain per annum. However, the offerings were mostly made at specific times of the year, such as on the fourth day of the first lunar month, the day commemorating Xinxing's death, and the [ULLAMBANA](#) festival on the fifteenth day of the seventh lunar month. For those adherents who could not make offerings directly at Huadu monastery, the sect would temporarily open local branches, called "merit offices" (gongde chu), especially at the time of the Ullambana festival. The assets of the wujinzang yuan consisted for the most part of such tangible assets as money, cloth, gold and silver, and jade. The offerings were used, for example, to fund the restoration of monasteries and the performance of religious services (i.e., the reverence field of merit, jingtian), and to provide alms to the poor (i.e., the compassion field of merit, beitian; see [PU YAK ET RA](#)). People could also receive loans from the wujinzang, a function comparable to today's microloans made to help raise people out of poverty. During the reign of Empress Wu, Fuxiansi in Luoyang was for a brief time also the site of a wujinzang yuan. See also [XIANGFAJUHEYI JING](#).

[Wuliangshou jing](#). (J. Muryōjyū; K. Muryangsu kyōng). In Chinese, "Sūtra of Infinite Life." See [SUKHĀVATĪVYŪHASŪTRA](#).

[Wuliangshou jing lun](#). (C) (). See [WULIANGSHOU JING YOUTPOTISHE YUANSHENG JI](#).

[Wuliangshou jing youpotishe yuansheng ji](#). (J. Muryōjyū upadaisha ganshōge; K. Muryangsugyōng ubajesa wōnsaeng ke). In Chinese, "Verses on the Wish for Rebirth and the Exposition of the Limitless Life Scripture"; also known as the [Wuliangshou jing lun](#) ("Commentary on the Limitless Life Scripture"), *Jingtu lun* ("Treatise on the Pure Land"), *Wangsheng lun* ("Treatise on Rebirth"), and *Yuansheng ji* ("Verses on the Wish for Rebirth"). The [Wuliangshou jing youpotishe yuansheng ji](#) is attributed to [VASUBANDHU](#) and was translated into Chinese by [BODHIRUCI](#) at the monastery of [YONGNINGSI](#) in 529. The text is largely a commentary on the larger [SUKHĀVATĪVYŪHASŪTRA](#) and is comprised of a twenty-four-line verse and prose commentary. The verse section begins with an exhortation to be reborn in the country of peace and happiness ([ANILEGUO](#)) or [PURE LAND](#) ([JINGTU](#)) of the buddha [AMTĀBHA](#), which it subsequently describes in detail, and ends with the dedication of merit ([PARI ĀMANA](#)). The prose commentary explains the ritual means of rebirth in terms of "five gates of recollection" (wu nianmen). These five gates are veneration (libai), praise (cantan), vow (zuoyuan), discernment (guancha), and dedication (huixiang). The text came to be held in high regard in China and Japan after the eminent Chinese monk [TANLUAN](#) composed an influential commentary on the text. Along with the shorter and longer *Sukhāvatīvyūhasūtras* and the [GUAN WULIANGSHOU JING](#), the Japanese monk [HONEN](#) recognized the *Wuliangshou jing youpotishe yuansheng ji* as a central scripture of the school now known as the [JŌDOSHŪ](#). See also [JINGTU LUN](#).

[Wuliang yi jing](#). (J. Muryōgikyō; K. Muryang ūi kyōng). In Chinese, "Sūtra of Immeasurable Meanings," one of the "Three [Sister] Sūtras of the 'Lotus'" ([RAHUA SANBU JING](#)), along with the [SADDHARMAPU ARIKASŪTRA](#) ("Lotus Sūtra") itself and the [GUAN PUXIAN PUSA XINGFA JING](#) ("Sūtra on the Procedures for Contemplating the Practices of the Bodhisattva [SAMANTABHADRA](#)"). The *Wuliang yi jing*, is presumed to be the prequel to the influential *Saddharmapu arikasūtra*, while the *Guān Puxian pusa xingfa jing* is usually considered its sequel. The extant version of the scripture, in one roll, is attributed to the Indian translator *Dharmāgatayaśas of the Southern Qi dynasty (479–502), and is claimed to have been translated in 481; the [LIDA SANBAO JI](#) scriptural catalogue also refers to a second, nonextant translation. There is, however, no evidence that a scripture with this title ever circulated in India, and no such text is ever cited in Indian sources. In addition, there are issues with the biography of the alleged translator (*Dharmāgatayaśas is otherwise unknown and this is his only attributed translation), and peculiar events in the transmission of the scripture, which suggest that attempts were made to obscure its questionable provenance. The scripture also includes unusual transcriptions and translations of Buddhist technical terminology, and peculiar taxonomies of Indian doctrinal concepts. Because of these problematic issues of provenance and content, the sūtra is now suspected of being an indigenous Chinese composition (see [APOCRYPHA](#)). Such Chinese exegetes as Huiji (412–496) and [TIANTA ZHIYI](#) (538–597) presumed that this scripture was the otherwise-unknown [MAHĀYĀNA](#) sūtra titled "Immeasurable Meanings" that is mentioned in the prologue to the *Saddharmapu arikasūtra*, which the Buddha is said to have preached just prior to beginning the "Lotus Sūtra" proper. The *Wuliang yi jing* is in three chapters (pin). The first chapter is the prologue, where the bodhisattva "Great Adornment" (Dazhuangyan pusa) offers a long verse paean describing the Buddha's many virtues. The second chapter is the sermon itself, where the Buddha explains the doctrine of immeasurable meanings as being the one teaching that will enable bodhisattvas to quickly attain complete, perfect enlightenment ([ANUTTARASAMYAKSA BODHI](#)). This doctrine reveals that all phenomena ([DHARMA](#)) are void and calm in both their natures and their characteristics and thus are empty and nondual ([ADVAYA](#)). Hence, the immeasurable meanings of all descriptions of dharmas derive from the one dharma that is free from characteristics. The final chapter is the epilogue, which describes the ten kinds of merit that accrue from hearing the sūtra.

[Wumen guan](#). (J. Mumonkan; K. Mumun kwan). In Chinese, lit., "Gateless Checkpoint," or "Wumen's Checkpoint"; compiled by the [CHAN](#) master [WUMEN HUIKAI](#), after whom the collection is named, also known as the *Chan zong Wumen guan* ("Gateless Checkpoint of the Chan Tradition"). Along with the [BIYAN LU](#) ("Blue Cliff Record"), the *Wumen guan* is considered one of the two most important [GONG'AN](#) (J. kōan; K. kongan) collections of the Chan tradition. In the summer of 1228, at the request of the resident monks at the monastery of Longxiangsi, Wumen lectured on a series of forty-eight cases (gong'an) that he culled from various "transmission of the lamplight" ([CHUANDENG LU](#)) histories and the recorded sayings ([YULU](#)) of previous Chan masters. His lectures were recorded and compiled that same year and published with a preface by Wumen in the following year (1229). Another case (case 49), composed by the layman Zheng Qingzhi, was added to the *Wumen guan* in 1246. The *Wumen guan* begins with a popular case attributed to [ZHAOZHOU CONGSHEN](#), in which Zhaozhou replies "WU" (no) to the question, "Does a dog have buddha nature, or not?" (see [WU GONG'AN](#)). Wumen himself is known to have struggled with this case, which was given to him by his teacher Yuelin Shiguan (1143–1217). The Japanese monk [SHINICHI KAKUSHIN](#), who briefly studied under Wumen in China, brought the *Wumen guan* to Japan. Although the collection was once declared to be heretical by the [SŌTOSHŪ](#) in the mid-seventeenth century, many Japanese commentaries on the *Wumen guan* were composed at the time, testifying to its growing influence during the Edo period.

[Wumen Huikai](#). (J. Mumon Ekai; K. Mumun Hyegae) (1183–1260). In Chinese, "Gateless, Opening of Wisdom"; [CHAN](#) master in the [LINJI ZONG](#); author of the eponymous [WUMEN GUAN](#) ("Gateless Checkpoint"), one of the two most important collections of Chan [GONG'AN](#) (J. kōan; K. kongan). A native of Hangzhou prefecture in present-day Zhejiang province, Huikai was ordained by the monk "One Finger" Tianlong (d.u.), who also hailed from Hangzhou (see also [YIZHI CHAN](#)). Wumen later went to the monastery of Wanshousi in Jiangsu province to study with Yuelin Shiguan (1143–1217), from whom Huikai received the [WU GONG'AN](#) of [ZHAOZHOU CONGSHEN](#); Huikai is said to have struggled with this gong'an for six years. In 1218, Huikai traveled to Baoyinsi on Mt. Anji, where he succeeded Yuelin as abbot. He subsequently served as abbot at such monasteries as [TIANNINGSI](#), [Pujisi](#), [Kaiyuansi](#), and [Baoningsi](#). In 1246, Huikai was appointed as abbot of Huguo Renwangsi in Hangzhou prefecture, and it is here that the Japanese [ZEN](#) monk [SHINICHI KAKUSHIN](#) studied under him. Emperor Lizong (r. 1224–1264) invited Huikai to provide a sermon at the Pavilion of Mysterious Virtue in the imperial palace and also to pray for rain. In honor of his achievements, the emperor bestowed upon him a golden robe and the title Chan master Foyan (Dharma Eye).

[wunian](#). (T. bsam pa med pa; J. munen; K. munyōm). In Chinese, "no-thought"; a Chinese meditative term that appears in the sixth-century [DASHENGQIXIN LUN](#) but finds its locus classicus in the eighth-century [CHAN](#) classic, the [LIUZU TAN JING](#). The putative author of the *Liuzu tan jing*, the sixth patriarch ([LIUZU](#)) [HUINENG](#), defines "no-thought" as "not to think even when involved in thought." Thought, therefore, is not the issue, but rather the attachment to thought, which would encourage the proliferation of conceptualization throughout all of one's sensory experience and thus render one a hapless victim of the conceptualizing tendency (cf. [PRAPAÑCA](#)). The *Liuzu tan jing* also explains no-thought in terms of "non-form" (wuxian) and "non-abiding" (wuzhu) and parses the term as follows: wu ("no") refers to the absence of duality and nian ("thought") to thinking about thussness ([TATHATĀ](#)). [HEZE SHENHUI](#) used the term "no-thought" to criticize the teaching of the "transcendence of thoughts" (linian) espoused by [SHENXIU](#) and his followers in the so-called Northern school ([BEI ZONG](#)). According to Shenhui, whereas the "transcendence of thoughts" (linian) emphasized the progressive wiping away of afflictions ([KLEŚA](#)) and conceptual thinking, "no-thought" (wunian) by contrast implied that there was no need for such effort since one had only to "see one's nature" ([JIANXING](#)) in order to attain enlightenment. Thus, wunian became a central feature of those who espoused a "sudden" theory of enlightenment (see [DUNWU](#)). In some radical cases, the notion of wunian was used as theoretical justification for the abandonment of all ritual and practice, including meditation and the conferral of monastic precepts. This extreme form of "no-thought" doctrine played an important role in the [LIDA FABAO JI](#) and the antinomian teachings of the Sichuan early-Chan lineages of the [JINGZHONG ZONG](#) and [BAOTANG ZONG](#), the latter of which may have had some influence in the development of [RDZOGS CHEN](#) thought in Tibet.

[Wunian dahui](#). (C) (). See [WUZHE HUI](#).

[wushi](#). (J. goji; K. osi). In Chinese, "the five periods [of the Buddha's teaching]"; the [TIANTA](#) school's temporal taxonomy of Buddhist doctrines ([JIAOXIANG PANSHI](#)), according to which the Buddha's teachings differ because he preached them at different points during his pedagogical career. The initial account of his awakening that the Buddha taught immediately after his enlightenment was described in the [AVATA SAKASŪTRA](#); this stage is thus termed the [HUAYAN](#) period (huayan shiqi). This account of the experience of buddhahood was, however, so unadulterated and sublime that many [ŚRĀVĀKA](#) disciples were utterly unable to comprehend its message. The Buddha therefore began his teaching anew in a second period that was termed Luyuan shiqi (after the Deer Park [M. GADĀVA](#), where many of the [ĀGAMA](#) scriptures were taught) or ahan shiqi (after the āgamas, which were the compilation of the Buddha's words from this period). This period was said to be an explicit attempt on the part of the Buddha to accommodate those disciples who were confounded during the first period, by teaching his insights in their most elementary form. The third period is called fangdeng ([VĀPULYA](#)) shiqi, where the "[HINAYĀNA](#)" teachings of the second period were superseded by teaching the aspiration for the [MAHĀYĀNA](#). Various sūtras that explicitly compare Mahāyāna favorably to "hīnayāna"—such as the [ŚRĪMĀĀDEVSĪ HANĀSĪSŪTRA](#) and the [VĪMALĀKĪRTINĪRDEŚA](#)—were supposedly products of

the period. The fourth period is termed the bore shi, after its eponymous sūtras, the [PRAJNĀPĀRAMITĀ](#), which was the stage of the Buddha's teaching career where he began to remove the boundaries separating Mahāyāna and "hīnayāna" by leading his audience from the presumption that there were two separate vehicles to instead a common realization of emptiness ([ŚŪNYATĀ](#)). The final period is called Fahua Niepan shiqi, after its two representative sūtras, the [SADDHARMAPU ARIKASŪTRA](#) and the [MAHĀPARINIRVĀ ASŪTRA](#). The teachings associated with this period are described as the "consummate" or "perfect" teachings ([YUANJIAO](#)) because they espouse the idea of one vehicle (or the one buddha vehicle; C. [YISHENG](#); S. [EKAYĀNA](#)), which Tiantai claimed was the truest form of the Buddha's original intention (benyuan; see [PŪRVAPRA IDHĀNA](#)). The Tiantai school also compares these five stages of the teachings to the five stages in the clarification of milk (see [WUWEI](#), "five tastes"). See also [TIANTAI BAIJIAO](#).

wushi bajiao. (J. goji hakkyō; K. osi p'algyo). In Chinese, "five periods and eight teachings"; a classification of teachings ([PANJIAO](#)) attributed to the [TIANTAI](#) systematizer [TIANTAI ZHIYI](#). A detailed explanation of the wushi bajiao is found in the text by the Korean exegete CHEGWAN, the [CH'ŌNTAE SAGYO ŬI](#) (C. *Tiantai sijiao yi*). The five periods correspond to what is believed to be the five major chronological periods ([WUSHI](#)) of the Buddha's teaching career (represented by the name of a [SŪTRA](#) or group of sūtras preached during each period), namely, (1) Huayan ([ĀVATA SAKASŪTRA](#)), (2) [ĀGAMA](#), (3) [VĀPULYA](#), (4) [PRAJNĀPĀRAMITĀ](#), and (5) Lotus ([SADDHARMAPU ARIKASŪTRA](#)) and Nirvā a ([MAHĀPARINIRVĀ ASŪTRA](#)). According to Zhiyi, the Buddha also employed different techniques of conversion or pedagogical modes (huayi) for audiences of varying capacities, which are broadly divided into four: the sudden, gradual, indeterminate, and secret. The sudden and gradual teachings are distinguished by their variant uses of skillful means ([UPĀYA](#)), and indeterminate refers to the differing levels of the understanding of individuals. Zhiyi's contribution to these well-established categories was his further division of the indeterminate teachings into "secret" and "manifest" based on the awareness of the presence of others in the assembly. The content of the Buddha's teachings (huafa) is further described in terms of the four categories of [TRIPI AKA](#), common, distinct, and consummate. This division is based on whether the teachings are that of [TRIPI AKA](#) (viz. [HINAYĀNA](#)), [MAHAYĀNA](#) (distinct), both (joint), or neither (consummate). Zhiyi referred to the central sūtra of his own Tiantai school, the *Saddharmapu arikasūtra*, as consummate. Zhiyi's own classification system is based on those of earlier exegetical traditions of the north (wujiao shizong) and south (sanjiao), which he sought to unite and ultimately transcend. See [TIANTAI BAIJIAO](#).

wushi jiao. (C) (). See [WUSHI](#).

Wutaishan. (). In Chinese, "Five-Terraces Mountain"; a sacred mountain located in northern Shanxi province, which, together with [EMEISHAN](#), [PUTUOSHAN](#), and [JIUHUASHAN](#), is one of the "four great mountains" (sidamingshan) of Buddhism in China. The name Wutai is derived from its five treeless, barren peaks (one in each cardinal direction and the center) that resemble terraces or platforms. During the Northern Wei dynasty (424–532), Wutaishan came to be identified with the mythic Mt. Qingliang (Clear and Cool) of the [ĀVATA SAKASŪTRA](#), which speaks of a mountain to the northeast where the bodhisattva [MAÑJUŚRĪ](#) is said to be constantly preaching the [DHARMA](#). From the time of the identification of Mount Wutai as Mt. Qingliang, numerous testimonies to the manifestation of Mañjuśrī on the mountain have been reported. Mt. Wutai thus came to be known as the primary abode and place of worship for Mañjuśrī and for this reason drew pilgrims from across the continent, including South Asia and, later, Tibet. Numerous monasteries and hermitages of both Buddhists and Daoists occupy its peaks. The first Buddhist monastery on Wutaishan, Da Futu Lingjiusi (Great Buddha Vulture Monastery), is claimed to have been built by [KĀŚYAPĀMĀTA GA](#) (d.u.) and Dharmaratna (d.u.) sometime during the first century (see also [BAIMASI](#) and [SISHIFER ZHANG JING](#)). The name of the monastery was changed to Xuantongsi and then to (Da) Huayansi during the Tang dynasty to reflect its role as the center of [HUAYAN](#) studies. The Huayan patriarch [CHENG GUAN](#) (738–839) composed his great [HUAYANJING SHU](#) at this monastery. The esoteric monk [AMOGHAVAJRA](#) also assisted in the establishment of another monastery on Mt. Wutai, which was given the name Jingesi (Gold Pavilion Monastery) in 770 after its gilded tiles. Emperor Daizong (r. 762–779) declared Jingesi as an important center for the new esoteric teachings ([MJIAO](#)) brought to China by Amoghavajra. The monk [FAZHAO](#) also established the monastery of Zhulinsi (Bamboo Grove Monastery) on the model of a majestic monastery that Mañjuśrī had revealed to him in a vision. The monasteries Qingliangsi, Beishansi, Manghaisi, and Da Wenshusi are also located on the mountain. During a pilgrimage to Wutaishan by the Korean monk [CHAJANG](#) (d.u., c. mid-seventh century), he had a vision in which Mañjuśrī guided him to a Korean analogue of the mountain; that mountain is now known as Odaesan (the Korean pronunciation of Wutaishan) and is itself a major pilgrimage center of Korean Buddhism. During the Qing dynasty, Wutaishan was also the major center for the study of Tibetan Buddhism in China.

wuwei. (J. mui; K. muwi). In Chinese, lit., "nonaction," "effortless action," in later contexts "uncompounded"; a key term that appears in early Chinese classics such as the *Lunyu* ("Analects of Confucius"), the *Daode jing* ("The Way and Its Power"), and the *Zhuangzi*. "Nonaction" suggests action that takes place naturally or without artifice; thus variously interpreted as "effortless action," "unattached action," etc. Nonaction thus refers to the ideal mode of behavior for a sage, in which the sage "does nothing and yet there is nothing not done" (wuwei er wu buwei). Rather than acting by fiat, the sage acts by establishing a "sympathetic resonance" ([GANYING](#)) with the natural movements of heaven, which brings everything naturally to perfection, just as a tree grows naturally without making any effort to grow. The term is frequently used in indigenous Chinese texts in the context of good governance, where wuwei thus refers to the ultimate type of "soft power": by "practicing nonaction," a ruler creates an appropriate environment in which "the people are able to look after themselves" (*Daode jing*, chapter 49); he does not impose his point of view but instead allows common cause with his constituency to develop naturally. In certain Chinese contexts, wuwei could also connote something that was "unproduced," and the early Chinese Buddhists drew on this connotation to translate the seminal Sanskrit term [NIRVĀ A](#) and nirvā a's putative "inactivity"; this misleading translation was eventually abandoned in favor of the phonetic transcription niepan. The Buddhists did however retain the term wuwei in this denotation to translate the concept of "uncompounded" or "unconditioned" factors ([ASA SK TADHARMA](#)), such as nirvā a and in some schools space ([ĀKĀŚA](#)), which are not conditioned ([SA SK TA](#)) and are thus not subject to the inevitable impermanence ([ANITYA](#)) to which all conditioned dharmas are subject.

wuwei. (J. goi; K. owi). In Chinese, lit., "five ranks"; a doctrinal formula generally attributed to the [CHAN](#) master [DONGSHAN LIANGJIE](#) (807–869), the putative cofounder of the [CAODONG ZONG](#) of the mature Chan tradition. The antecedents of these five ranks are traced to [SHITOU XIQIAN](#)'s [CANTONG QI](#), which discusses the mutual "turning back on one other" (huihu) of the terms brightness and darkness. This dichotomy is eventually generalized as "relative" (pian), lit., "askew" or "partial," referring to that which is bright, conceivable, effable, and phenomena ([SHI](#)); and absolute (zheng), lit., "upright," correlating with what is dark, inconceivable, ineffable, and principle ([LI](#)). Although these two valences of relative and absolute may be discrete, they are interconnected, interdependent, and mutually defining, thus constantly "turning back on one other." The five ranks are systematized by Dongshan in his "Verses on the Five Ranks" (*Wuwei song*) as follows. (1) The relative within the absolute (zhengzhong pian): this valence suggests that the ordinary person constantly abides in original enlightenment ([BENJUE](#)), but is unaware of it. (2) The absolute within the relative (pianzhong zheng): the practitioner may have become aware of the reality of original enlightenment, but still treats it as an object to be understood conceptually, rather than directly experienced. (3) [The relative] emerging from the absolute (zhengzhong lai): as the Chan practitioner experiences the pervasiveness of emptiness, that emptiness turns back on itself and transforms into a more dynamic and luxuriant way of experience of reality. (4) [The relative and the absolute] jointly accessible (jianzhong zhi): as the reality of each and every independent phenomenon (shi) is experienced, the reality of principle (li) is simultaneously accessed. (5) Integration of the absolute and the relative, or lit. "arriving within together" (jianzhong dao): the bifurcations between relative and absolute, the experiencing subject and the object experienced, the realizer and the realized, etc., all drop away, so that the practitioner continues to practice but now without practicing anything, and seeks buddhahood while understanding that there is no buddhahood to be sought. In some interpretations, the first two ranks evoke the famous passage in the [PRAJNĀPĀRAMITĀH DAYASŪTRA](#): "form is emptiness, emptiness is form" (see [RŪPA ŚŪNYATĀ ŚŪNYATAVA RŪPAM](#)). The third rank implies the bodhisattva practice of returning to the world after his or her attainment of enlightenment ([BODHI](#)). Similarly, the fourth and fifth ranks imply the bodhisattva vow to save all living beings so that they may all access [NIRVĀ A](#) together. Despite the use of the term "rank," a systematic progression is not necessarily implied, and some commentators suggest that all five ranks may be experienced simultaneously in a moment of sudden awakening ([DUNWU](#)); thus, the five ranks may be an attempt to demonstrate how gradual and sequential outlines of Buddhist soteriology can be integrated with the more subitist soteriologies that become emblematic of the mature Chan tradition. The five ranks are also sometimes correlated with the five wisdoms ([PAÑCAJĀNĀNA](#)) of a buddha in the [MAHAYĀNA](#), and specifically in the [YOGĀCĀRA](#) school. Dongshan's "five ranks" were frequently used in East Asian [GONGAN](#) collections as a means of checking a student's level of understanding. In one of the modern Japanese [RINZAI SHU](#) systematizations of kōan training, the final stage in the practice that follows initial sudden awakening (J. [SATORI](#), C. dunwu) also involves mastery of the five ranks (J. goi).

wuwei. (J. gomi; K. omi). In Chinese, lit. "five tastes"; an originally Indian list of the five stages in the clarification of milk that is derived from the [MAHĀPARINIRVĀ ASŪTRA](#): milk, cream, curds, butter, and ghee. This list was used in the [TIANTAI ZONG](#) as a simile for the five chronological periods ([WUSHI](#)) in the Buddha's preaching of the dharma. According to this school's taxonomy of the teachings ([JIAOXIANG PANSHI](#)), the various teachings of Buddhism may be categorized according to these five "tastes": milk symbolizes the [ĀVATA SAKASŪTRA](#) period; cream, the [ĀGAMA](#) period; curds, the [VĀPULYA](#) period; and butter, the [PRAJNĀPĀRAMITĀ](#) period; the subtlest and more clarified form of milk, the flavor of ghee (tihuwei; see [MA A](#)), is finally compared to the "consummate" period of the [SADDHARMAPU ARIKASŪTRA](#) and the [MAHĀPARINIRVĀ ASŪTRA](#).

Wuwei sanzang chanyao. (J. Mui sanzō zen'yō; K. Muoe samjang sōnyo). In Chinese, "Essentials of Meditation by the [TREPI AKA ŚUBHĀKARASI HA](#)"; a relatively short treatise that purportedly records a sermon that the esoteric master Śubhākarasi ha prepared for a debate he had with [CHAN](#) master [SHENXIU](#)'s disciple Jingxuan (660–723) sometime after 716. The sermon is largely concerned with the conferral of the [BODHISATTVA](#) precepts, repentance, the threefold pure precepts ([SANJU JINGJIE](#); see [ŚILATRAYA](#)), and what Śubhākarasi ha calls the secret essentials of meditation. Śubhākarasi ha critiques Jingxuan and other fellow practitioners of meditation for their adherence to the doctrine of "no-thought" ([WUNIAN](#)) and offers instead a meditation technique that involves uttering a series of [DHĀRA](#)s, gesturing in a series of [MUDRĀs](#), mindful breathing, and visualizing a lunar disk.

wuwei zhenren. (J. mui no shinnin; K. muwi chinin). In Chinese, "true man of no rank"; a [CHAN](#) expression attributed to [LINJI YIXUAN](#) (d. 867), which is used to

offer to the sentient, or “numinous awareness” ([LINGZHI](#)), of the mind, thus constantly moves the sense faculties, thus enabling sensory experience; equivalent to the buddha-nature ([FOXING](#)). Linji contrasts this true man of no rank with the “lump of red flesh” ([CHIROUTUAN](#)), the physical body that is constantly buffeted by sensory experience. The term *zhenren* is also used within the Daoist tradition to refer to a Daoist “perfected,” who has realized perfect freedom both mentally and physically by achieving immortality and transcending all dichotomies. See also [GANSHIJUE](#).

Wuxiang. (C) (). See [CHÖNGJUNG MUSANG](#).

wuxiang jie. (J. *musōkai*; K. *musang kye*). In Chinese, “formless precepts”; a type of precept mentioned in the [LIUJU TAN JING](#), where they are said to help constrain practitioners so that they are able to gain enlightenment. The formless precepts reflect the early [CHAN](#) community’s effort to offer its own understanding of the [MAHĀYĀNA](#) precepts. Although no clear explanation of exactly what these precepts are is provided in the text, the *wuxiang jie* are said to be the premier type of precepts, which are superior to the usual types of constraints taught in earlier types of Buddhism, which sought to develop wholesome ways of action and deter unwholesome actions. The conferral of these precepts appears to have occurred at the start of a kind of initiation ceremony, which subsequently followed with acceptance of the four great vows ([SI HONGSHIYUAN](#)), repentance (*chan*), the three refuges ([TRISĀRA A](#)), and [PRAJÑĀPĀRAMITĀ](#).

wuxin. (J. *mushin*; K. *musim*). In Chinese, lit. “no-mind.” The term *wuxin* appears in the Chinese classic the *Zhuangzi* and was adapted by the early Chinese Buddhists exegetes of [PRAJÑĀPĀRAMITĀ](#) literature as a gloss on the Madhyamaka notion of [SŪNYATĀ](#) or “emptiness.” These exegetes were collectively known as the “school of the nonexistence of mind” (*xinwu zong*) and belonged to the larger tradition known as “Dark Learning” ([XUANXUE](#)). In later Buddhist treatises, most notably those belonging to the [CHAN](#) tradition, “no-mind” came to refer ambiguously either to a state in which all mental activity had ceased or one in which the mind was free of all discrimination, making it effectively equivalent to nonconceptualization (see [NI PRAPAṆCA](#)). In this latter sense, the term is closely synonymous with “no-thought” ([WUNIAN](#)). See also [WUXIN LUN](#).

Wuxin lun. (J. *Mushinron*; K. *Musim non*). In Chinese, “Treatise on No-Mind”; an early [CHAN](#) treatise attributed by tradition to the legendary monk [BODHIDHARMA](#), which, in both content and style, resembles [NIUTOU FARONG’S JUEGUAN LUN](#). As the title indicates, the treatise is concerned with the notion of [WUXIN](#), or “no-mind,” which the text attempts to elucidate by enumerating a long list of dichotomies, such as visible and invisible, bright and dark, and differentiated and undifferentiated. The treatise appears largely in catechistic format that the attainment of no-mind engenders a state that is unmarred by the myriad afflictions ([KLEŚA](#)), birth and death, and even [NIRVĀ A](#). The treatise was largely unknown until its rediscovery in the manuscript cache at the [DUNHUANG](#) caves at the end of the nineteenth century.

Wuxue Zuyuan. (J. *Mugaku Sogen*; K. *Muhak Chowōn*) (1226–1286). Chinese [CHAN](#) master in the [LINJI ZONG](#), who was the founder of the influential monastery of [ENGAKUJI](#) in Kamakura, Japan; also known as *Ziyuan*. On the advice of his brother, Wuxue entered the Chinese monastery of Jingcisi, where he was ordained by [Beijian Jujian](#) (1164–1246). Wuxue later became the student of the Linji Chan master [WUZHUN SHIFAN](#) (1178–1249) and received his seal of transmission ([YINKE](#)). Wuxue also studied under [XUTANG ZHIYU](#) (1185–1269) and [Wuchu Daguan](#) (1201–1268) and spent the next few decades residing at various monasteries in Zhejiang prefecture. In 1275, Wuxue left for Nengrensi to avoid the invading Mongol troops of the Yuan dynasty. In 1279, at the invitation of [Hōjō Tokimune](#) (1251–1284), the eighth regent of the Kamakura shogunate, Wuxue reluctantly left China for Japan. Upon his arrival in Kamakura, Wuxue was appointed abbot of [KENCHŌJI](#), succeeding the third abbot [LANXI DAOLONG](#). In 1282, Tokimune established Engakuji to commemorate the defeat of the invading Mongol troops and installed Wuxue as its founding abbot (J. *kaisan*; C. *KAISHAN*). Serving as administrator of the two most powerful Buddhist institutions in Japan at the time, Wuxue established a firm foundation for the success of the [RINZAIŠŪ](#) in Japan. Wuxue was given the posthumous title state preceptor (J. *kokushi*, C. [GUOSHI](#)) *Bukkō* (Buddha Radiance). His students included Japan’s first female Zen master, [MUGA NYODAI](#) (1223–1298), and [KOHŌ KENNICHI](#) (1241–1316), the son of Emperor Gosaga (r. 1242–1246) and the teacher of [MUSŌ SOSEKI](#). Wuxue’s teachings appear in his *Bukkō kokushi goroku*.

wuyun shijian. (J. *goun seken*; K. *oon segan*). In Chinese, “the world of the five aggregates.” See [SATVALOKA](#).

Wu Zetian. (J. *Bu Sokuten*; K. *Mu Ch’ŭkch’ŏn*) (624–705). Chinese concubine and empress who was an important patron of Buddhism during the Tang dynasty and the short-lived Zhou-dynasty interregnum (684–704). Wu Zetian entered the palace as a concubine of Emperor Taizong (r. 626–649) while she was still in her teens. After the emperor’s death, she became a Buddhist nun, but was summoned again to the palace as a concubine of Taizong’s successor and son, the Gaozong emperor (r. 649–683). She bore Gaozong a son in 652 and began to exert much influence in court. Despite fierce opposition from court officials, Gaozong enthroned Wu Zetian as the new empress in 655. Wu Zetian quickly exiled all her foes in court and had the former empress Wang killed. In 657, she reinstated Luoyang as the capital of the empire and permanently moved the entire court there after Gaozong’s death in 683. She subsequently exiled the Zhongzong emperor (r. 683–684, 705–710) and established her own dynasty named Zhou (684–704). Wu Zetian was an ardent supporter of Buddhism. She associated with such eminent monks as [XUANZANG](#), [SHENXIU](#), [FAZANG](#), and [YIJING](#). In an attempt to legitimize her reign, Wu Zetian also ordered the circulation of the [MAHĀVEGAŚĀSŪTRA](#) (“Great Cloud Sūtra”), which described a female reincarnation of [MATREYA](#) and her rule over the whole world. She also arranged for the construction in every prefecture of the empire of monasteries all known as [DAYUNSI](#) (Great Cloud Monastery). In 705, she abdicated the throne to the restored Emperor Zhongzong.

wuzhe hui. (J. *mushae*; K. *much’a hoe*). In Chinese, “unrestricted assembly”; an assembly hosted by the reigning monarch to make offerings to clergy and laity regardless of their status or station in life. The assembly was typically held every five years and is therefore also known as the “five-year great assembly” (C. *wunian dahui*; S. *pañcavārīkapatī ad*). The first such assembly is attributed to King [AŚOKA](#). Emperor Wu of the Liang dynasty ([LIANG WUDI](#)) is known to have held a *wuzhe dahui* in 529 for an assembly said to have numbered fifty thousand. The famous pilgrim [XUANZANG](#) also witnessed an unrestricted assembly during his travels along the [SILK ROAD](#). In 596, Empress Suiko (554–628) held the first reported unrestricted assembly in Japan. In 732, [HEZE SHENHUI](#) organized an unrestricted great assembly (*wuzhe dahui*) at the monastery of [DAYUNSI](#) in Henan prefecture, where he attacked [SHENXIU](#) and his followers.

Wuzhensi. (). In Chinese, “Awakening to Truth Monastery”; located in the Wuzhen Valley of [ZHONGNANSHAN](#) near the capital of Chang’an (present-day Xi’an). The monastery is comprised of two compounds, known as the upper and lower monasteries. The upper monastery is also named *Zhulinsi*, or Bamboo Grove Monastery, because of the bamboo forest surrounding it. Wuzhen Monastery was founded by the Sui-dynasty Buddhist monk [Jingye](#) (564–616), who stayed there from 595 to 608. He was accompanied by other eminent monks including [Huichao](#) (546–622), a disciple of the [Tiantai](#) master [Huisi](#) (515–568), and [Facheng](#) (563–640). The latter was instrumental in expanding the monastery by building the Huayan Hall and another hall to enshrine images of a hundred buddhas. He also inscribed Buddhist verses on cliffs surrounding the monastery and along its roads. Due to his efforts, Wuzhen monastery became renowned during the Tang dynasty for its majesty and became a favorite haunt of literati. Eminent [SAN LUN ZONG](#) monks such as [HUIYUAN](#) (523–592), [Baogong](#) (542–592), and [Huiyin](#) (539–629) also either resided here or were affiliated with the monastery. It was either at Wuzhensi or [LONGCHISI](#) that the [HUAYAN](#) master [FAZANG](#) (643–712), at the behest of the Ruizong emperor of Tang (r. 684–690, 710–712), is said to have famously performed a ritual to pray for snow in order to stave off a severe drought the region was experiencing. During the Song dynasty, the monastery was renamed [CHONGFASI](#), or Monastery of the Esteemed Dharma.

wuzhong xuanyi. (J. *goshu no gengi*; K. *ojong hyŏnŭi*). In Chinese, “five categories of profound meaning”; a list of five general hermeneutical issues that should be addressed prior to undertaking an in-depth exegesis of any [SŪTRA](#), attributed to [Tiantai Zhiyi](#) (538–597) and emblematic of scriptural exegesis in the [Tiantai SCHOOL](#). These five are (1) explicating the meaning of the text’s title (*shiming*), (2) analyzing the fundamental intent of the sūtra (*bianben*), (3) clarifying its principal themes or doctrines (*mingzong*), (4) expounding the sūtra’s “function” or impact on its audience (*lunyong*), and (5) classifying the sūtra ([PANJIAO](#)), viz., delineating its place within the entire corpus of sūtras expounded by the Buddha. These five issues typically would be addressed by the commentator prior to beginning the exegesis of the sūtra proper. See also [SANFEN KEJING](#); [JIAOXIANG PANSHI](#).

Wuzhu. (C) () (714–774). See [BAOTANG WUZHU](#).

Wuzhun Shifan. (J. *Bujun Shihan*/*Bushun Shibān*/*Mujun Shihan*; K. *Mujun Sabŏm*) (1178–1249). Chinese [CHAN](#) master in the [LINJI ZONG](#). After his ordination in the winter of 1194, Wuzhun studied under a series of famed Chan masters, including [FOZHAO DEGUANG](#) and [Po’an Xuzian](#). Wuzhun eventually attained awakening under [Po’an](#) and succeeded his lineage. During his illustrious career at such important monasteries as [WANSHOUSI](#) on Mt. Jing, Wuzhun also taught the Japanese pilgrims [Hōshin](#) (d.u.), [Dōyū](#) (1201–1258), and the famed [ENNI BENEN](#), who is now regarded as the first exponent of [ZEN](#) in Japan. Wuzhun was later summoned by Emperor Lizong (r. 1224–1264) to provide a public lecture at the Pavilion of Benevolent Illumination in the imperial palace. The emperor later bestowed upon him the title Chan master *Fojian* (Buddha Mirror). Wuzhun left many famous disciples such as [WUXUE ZUYUAN](#) and [Mu’an Puning](#), both of whom went to Kamakura in Japan and served as abbots of the powerful monastery of [KENCHŌJI](#).

Wuzu Fayān. (J. *Goso Hōen*; K. *Ojo Pōbyŏn*) (d. 1104). Chinese [CHAN](#) master in the [LINJI ZONG](#). Wuzu was a native of Mianzhou prefecture in present-day Sichuan province. After being ordained at the age of thirty-four, Fayān studied [YOGĀCĀRA](#) doctrine in his home province, but later went south where he studied under [Huilin Zongben](#) (1020–1099), [Fushan Fayuan](#) (991–1067), and [BAYUN SHOUDUAN](#). Fayān eventually became [Bayun’s](#) disciple and inherited his Linji lineage. After staying at various monasteries in Anhui province, Fayān moved to Mt. Wuzu (also known as East Mountain) in Hubei province, where he acquired his toponym. The mountain itself received its name, Wuzu (fifth patriarch), from its most famous past resident, the fifth patriarch of Chan, [HONGREN](#). Mt. Wuzu thus became an important center for the Linji lineage, and it was there that Fayān taught his famous disciples [YUANWU KEQIN](#), [Taiping Huiqin](#) (1059–1117), and [Foyan Qingyuan](#) (1067–1120),

known collectively as the “three Buddhas of East Mountain.” Wuzu’s teachings are recorded in the *Wuzu Fayan chanshi yulu*.

xiala. (C) (). See [JIELA](#).

xiangdai miao. (C) (). See [DAIJUE ERMAO](#).

xiangfa. (J. zōhō; K. sangpōp). In Chinese, “semblance dharma” or “counterfeit dharma”; a term related to the Sanskrit [SADDHARMAPRATIRŪPAKA](#). The Sanskrit term has a range of uses, including as a designation for the [BUDDHADHARMA](#) after the buddha has passed into [PARINIRVĀ A](#). In the East Asian context, xiangfa came to designate the second and middle period of a buddha’s teaching. The first period, that of the [SADDHARMA](#) (C. zhengfa), is the period of the true dharma after a buddha’s passage into parinirvā a, during which time it is still possible to achieve enlightenment by following his teachings. The second period, of xiangfa, is a time during which the achievement of enlightenment is still possible, but the practice of the dharma has generally been reduced to rote repetition of the teachings and practices; there are also signs of laxity in both monastic and lay practice developing during this period. The third period, that of [MOFA](#) (cf. [SADDHARMAMPRALOPA](#)), or the final dharma, is a time of degeneration and decline, during which the practice of the dharma is no longer efficacious, due largely to the diminished capacities of humans. This division into three periods of the dharma seems to have originated in China and was widely influential in East Asian Buddhism.

Xiangfa jueyi jing. (J. Zōbō ketsugikyō; K. Sangpōp kyōrui kyōng). In Chinese, the “Scripture on Resolving Doubts Concerning the Semblance Dharma”; an indigenous Chinese Buddhist scripture (see [APOCRYPHA](#)), dating from the mid-sixth century. The *Xiangfa jueyi jing* is set against the background of the Buddha’s [PARINIRVĀ A](#). At the request of a [BODHISATVA](#) named Changshi (Constant Giving), the Buddha offers instructions on the practice of giving ([DĀNA](#)), in which he declares charity to be the most appropriate practice during the age of the semblance dharma ([XIANGFA](#); [SADDHARMAPRATIRŪPAKA](#)). The semblance-dharma period is characterized as an age of degeneration, during which both clergy and laity begin to transgress the precepts and slander the Buddha’s teaching. The *Xiangfa jueyi jing* emphasizes the importance of collective rather than individual giving during this age, and especially giving to the impoverished and underprivileged, rather than just to the three jewels ([RAṬNATRAYA](#)) of Buddhism. These and other ideas from the *Xiangfa jueyi jing* were especially influential in the teachings of the Third-Stage school ([SANJIE JIAO](#)) and that school’s emblematic institution, the [WUJINZANG YUAN](#) (inexhaustible storehouse cloister). Such eminent monks as [TIANTAI ZHIM](#), [JIZANG](#), and [HÖNEN](#) also held the *Xiangfa jueyi jing* in high regard.

Xiangguosi. (). In Chinese, “Minister of the State Monastery”; located in eastern Henan in the city of Kaifeng. Originally built in 555CE and named Jianguosi, it was subsequently destroyed during a battle. It then became a private residence and garden; but later, when a monk named Huiyun saw a reflection of a monastery in its garden pool, he collected enough subscriptions to buy the residence and turn it back into a monastery in 711. It was renamed Xiangguosi by the Ruizong emperor of the Tang (r. 684–690, 710–712). The monastery was well supported by Tang and Song emperors, as evidenced by the campus’s extensive grounds and the lavish materials used in its accoutrements, such as using gold dust to decorate images, icons, and paintings. It is well known for its layout, including its use of twin pagodas ([STŪPA](#)). Xiangguosi also became famous for its frescoes, painted by famous contemporary artists from the neighboring region. Artists at the Song Painting Academy painted much of the Buddhist imagery at this monastery. Xiangguosi reached the zenith of its influence during the Song dynasty, when it became an outpost for foreign monks visiting China.

xiangjiao. (J. zōkyō; K. sanggyo). In Chinese, “teaching [viz., religion] of images”; a pejorative term coined by Confucians to refer to Buddhism, derived from the emphasis in Buddhism on bowing before images during rituals and ceremonies. Confucianism, in turn, was called the “teaching [viz., religion] of names” (mingjiao), to demonstrate by contrast that it was based on intellectual inquiry and the “rectification of names” (zhengming) rather than on worship of images of Confucius and the teachers within the tradition.

Xiangmo Zang. (T. Bḍud ’dul snying po; J. Gōma Zō; K. Hangma Chang) (d.u.). In Chinese, “Demon-Subduer Zang.” Chinese monk and leading disciple of the [CHAN](#) master [SHENXIU](#), in the Northern school ([BEIZONG](#)). At an early age, Xiangmo Zang acquired the nickname “demon-subduer” (xiangmo) by dwelling in deserted houses and open fields. Later, he learned to recite the [SADDHARMAPU](#) [ARIKASŪTRA](#) and studied the [VINAYA](#) after he became a monk. He is said to have had an awakening experience after listening to a lecture on the “theories of the Southern school” ([NANZONG](#) lun) and, abandoning his scriptural studies, became a student of Shenxiu. As Shenxiu’s disciple, Xiangmo Zang became the target of [HEZE SHENHUI](#)’s polemical attack on the Northern school of Chan. Xiangmo Zang also appears in the [BSAMGTAN MGSGRON](#) by [GNUMS.CHEN](#) [SANGS RGYAS YE SHES](#) along with a certain Wolun (d.u.) and [MOHEYAN](#) and others of the Northern school, whose teachings may have exerted some influence on [MAHĀVOGA](#) in Tibet.

Xiangshansi. (). In Chinese, “Fragrant Mountain Monastery”; located on [SONGSHAN](#) in Ruzhou, Henan province. It is not known when the monastery was first established, but it is thought to have been built c. 516 CE during the Northern Wei dynasty (386–584). One source credits the founding of a Xiangshan monastery in Xiangzhou to a certain general named Liu Qingzhi, but no further mention is made of either the general or the monastery. The current Xiangshansi underwent a major renovation around 1068 during the Northern Song dynasty, and special attention was paid to restoring its Dabai ta (Great Compassion pagoda), which still stands today; housed in the pagoda is a thousand-armed and thousand-eyed form of [GUANYIN](#) ([SĀHASRABHŪJASĀHASRANETRĀVALOKITEŚVARA](#)). Xiangshansi, like [SHANG TIANZHUSI](#), is known for being a major pilgrimage site for Guanyin ([ĀVALOKITEŚVARA](#)) worship. It became associated with the Princess [MIAOSHAN](#) incarnation of Guanyin, whose legend is inscribed on a stele at the monastery. The stele was commissioned in 1100 by a minor civil servant, Jiang Zhiqi (1031–1104), who was the prefect of Ruzhou. Jiang had the legend reinscribed on another stele at the Shang Tianzhusi when he moved to Hangzhou four years later.

xiangxu wuchang. (C) (). See [ER WUCHANG](#).

Xiangyan Zhixian (J. Kyōgen Chikan; K. Hyangōm Chihan) (d. 898). Chinese [CHAN](#) master in the [GUIYANG ZONG](#) of the Chan tradition. Zhixian entered the monastery under [BAIZHANG HUAHAI](#) and later became a student of [YANGSHAN HUIJI](#). Zhixian dwelled for a long time at Mt. Xiangyan, whence his toponym. One day while he was sweeping the garden, Zhixian is said to have attained awakening when he heard the bamboo brush against the roof tiles. He is best known for the [GONG’AN](#) case “Xiangyan Hanging from a Tree”: A man is dangling by his mouth from the branch of a tall tree, his hands tied behind his back and nothing beneath his feet. Someone comes under the tree branch and asks, “Why did [BODHIDHARMA](#) come from the West?” If he keeps his mouth clenched and refuses to answer, he is rude to the questioner; but if he opens his mouth to answer, he will fall to his death. How does he answer? Upon Zhixian’s death, he was given the posthumous title Chan master Xideng (Inheritor of the Lamplight).

xiang zong. (J. sōshū; K. sang chong). In Chinese, “characteristics school”; also known as the [FAXIANG ZONG](#) or “Dharma Characteristics” school. Both these names were used polemically by rival scholiasts to polarize certain trends in Buddhist thought. In distinction to the [XING ZONG](#), or “nature” school, [FAZANG](#) in the [HUAYAN ZONG](#) uses the term xiang zong to refer to those monk-scholars whose scholarship focused on the changing form of phenomena and reality. Monks of the Faxiang or [YOGĀCĀRA](#) tradition tended to be categorized as this characteristics school. Maintaining a strict distinction between the xing and the xiang trends was called xingxiang juepan (differentiation of nature and characteristics), while a scholastic approach that attempted to harmonize the two trends was characterized as xingxiang ronghui (harmonizing nature and characteristics).

Xianzong ji. (J. Kenshūki; K. Hyōnjong ki 顯宗記). In Chinese, “Notes on Revealing the Cardinal Principle,” attributed to [HEZE SHENHUI](#); also known as the *Heze dashi xianzong ji* (“Notes on Revealing the Cardinal Principle of Great Master Heze”) and *Xianzong lun* (“Treatise on Revealing the Cardinal Principle”). A simpler version of the *Xianzong ji*, entitled *Dunwu wusheng bore song* (“Verses on Sudden Enlightenment, the Unborn, and Prajñā”), was also discovered at [DUNHUANG](#). As the title of the Dunhuang version makes clear, in this treatise Shenhui expounds on the notions of no-thought ([WUNIAN](#)), the unborn, or nonarising ([ANUTPĀDA](#)), and wisdom (prajñā), which all seem to function as synonyms for emptiness ([ŚŪNYATĀ](#)). Shenhui also mentions the Indian patriarch [BODHIDHARMA](#)’s transmission of this “secret teaching” to China and his conferral of the patriarchal robe as a mark of transmission. The *Xianzong ji* was later included in the genealogical history of the Chan tradition, the [JINGDE CHUANDENGLU](#).

Xiaodao lun. (J. Shōdōron; K. Sodo non). In Chinese, “Laughing at the Dao Treatise”; an anti-Daoist polemical treatise composed by Zhen Luan (d.u.) and presented to Emperor Wu (r. 560–578) of the Northern Zhou dynasty in 570. In response to the Daoist contentions in the [LAOZI HUAHU JING](#) that the Chinese sage Laozi went to India and became [ŚĀKYAMUNI](#) Buddha in order to convert the Western barbarians, the *Xiaodao lun* attempts to expose the inconsistencies in Daoist thought, cosmological perspectives, practice, and ritual, and to demonstrate that the Daoists actually borrowed heavily from Buddhism. The treatise so displeased the emperor that he is said to have immediately ordered the text burned.

xiaoguo. (C) (). In Chinese, “minor misdeed.” See [DU K TA](#).

xiaomiao. (). In Chinese, lit. “small temple”; a Songdynasty term for private monasteries whose control was passed within a single monastic lineage. The term is used in distinction to the large public monasteries, or “monasteries of the ten directions” ([SHIFANGCHA](#)).

[Xiaozheng jiao](#). (C) (). See [HUAYAN ZHAOJIAO](#).

[xiayu](#). (C) (). See [AGYO](#).

[Xiao zhiguan](#). (C) (). See [XIUXI ZHIGUAN ZUOCHAN FAYAO](#).

[xilai yi](#). (J. seiraii; K. sōrae ūi 西來語). In Chinese, lit. “the meaning of coming from the west”; in [CHAN](#) literature, a common allusion to the question “What was the meaning of [Bodhidharma’s] coming from the west?” (*xilai yi ruohe*), i.e., “Why did [BODHIDHARMA](#), the founding patriarch of Chan, come from India to propagate Chan?” This question was commonly asked in Chan [GONG’AN](#) exchanges to test the spiritual depth of a teacher or disciple and as a meditative topic in “questioning meditation” ([KANHUA CHAN](#)). The phrase is found in [HUANGBO XIYUN](#)’s (d. c. 850) [CHUANXIN FAYAO](#), and the use of the question is well displayed in a famous exchange involving [MAZU DAOMI](#) (709–788) and his disciple Hongzhou Shuiliao (d.u.): when Shuiliao asks Mazu this question, Mazu encourages him to come closer, whereupon he kicks him to the ground, and Shuiliao immediately jumps up, enlightened. [ZHAOZHOU CONGSHEN](#)’s (778–897) answer to this question is the famous gong’an: “Cypress tree in front of the courtyard” ([TINGQIAN BOSHUZI](#)). Some of the other answers that appear in Chan literature include “sitting for a long time is a bother” ([BIYAN LU](#), case no. 17), “there is no meaning in Bodhidharma’s coming from the west” (*Biyan lu*, case no. 20), and “Zang’s head is white, Hai’s head is black” (*Biyan lu*, case no. 73).

[xilai yi ruohe](#). (C) (西來語). See [XILAI YI](#).

[Ximingsi](#). (). In Chinese, “Luminosity of the West Monastery,” located in the Tang capital of Chang’an (presentday Xi’an). There are two founding narratives. The first credits the Gaozong emperor (r. 649–683) with establishing the monastery at his old residence in 658 and installing [DAOXUAN](#) (596–667), founder of the Nanshan [VINAYA](#) school ([NANSHAN LÜ ZONG](#)), as its abbot. It is there that Daoxuan is said to have compiled the [DA TANG NEIDIAN](#) (“Great Tang Catalogue of Inner [viz., Buddhist] Classics”) as an inventory of scriptures for the newly established library at the monastery. Daoxuan also assisted [XUANZANG](#) (600/602–664) in translating preceptive texts, collaborated with his brother Daoshi (d. c. 683) in publishing [VINAYA](#) texts, and wrote his collection of essays in defense of Buddhism entitled the [GUANG HONGMING JI](#). A second narrative instead credits Xuanzang with founding the monastery. According to this story, the grounds were originally the residence of an imperial prince, and at first it was proposed to build both a Buddhist and a Daoist monastery there. After Xuanzang surveyed the site, he pronounced the site too small for two establishments, and thus only a Buddhist monastery was built. When Xuanzang settled there, the Gaozong emperor (r. 649–683) is said to have donated land, silk, and cotton to sustain it. ¶ Regardless of which account is correct, Ximingsi quickly became a major center of Buddhist scholarship and housed the most comprehensive library of Buddhist texts in the country. The monastery is said to have been built to match the dimensions of [JETAVANA](#) in India and, at one point, housed sixty-four cloisters. Because of its location in the Tang capital, several eminent monks resided and worked there. For example, the Tang emperor Xuanzong (r. 713–756) is said to have invited [SUBHAKARASI HA](#) to stay at Ximingsi, where [YIXING](#) (683–727) assisted him in his translation work. [YIJING](#) (635–713) also translated there the Sanskrit manuscripts he brought back with him from his pilgrimage to India. The Korean monk [WŎNCH’ŬK](#) (613–695) worked with Xuanzang at Ximingsi (to the point that his lineage of scholastic interpretation is sometimes called the Ximing lineage, see [XIMING XUEPAI](#)), and the Japanese monk [KŪKAI](#) (774–835) is also known to have studied at the monastery.

[Ximing xuepai](#). (C) (西明學派). In Chinese, “the Ximing scholastic lineage” of the [FAXIANGZONG](#), associated with [WŎNCH’ŬK](#). See [FAXIANGZONG](#).

[xindi](#). (S. cintābhūmikā; J. shinji; K. simji 心地). In Chinese, lit. “mind-ground” or “mind as ground”; a common metaphor used in [MAHĀYĀNA](#) literature to suggest that mind or thought is the source, or “ground,” of all phenomena. The *Dasheng bensheng xindi guan jing* (“Sūtra on the Great-Vehicle Contemplation of the Innate Mind Ground”), for example, metaphorically refers to the minds of the sentient beings of the three realms of existence as a “mind-ground,” since all phenomena—whether mundane ([LAUKIKA](#)) or supramundane ([LOKOTTARA](#)), and including all virtuous and nonvirtuous dharmas, as well as the five rebirth destinies ([GATI](#)) and the states of a [PRATYEKABUDDHA](#), [BODHISATVA](#), or even a buddha—are generated from the mind of sentient beings, just as all grains and fruits are generated from soil. A commentary to the [MAHĀVĀIROCANĀBHISATVA BODHISŪTRA](#) (*Darī jing shu*) says that the mind is also metaphorically referred to as a “ground,” since the practice of bodhisattvas relies on the mind, just as activities of ordinary people rely on the ground. In the [FANWANGJING](#) (“Brahmā’s Net Sūtra”), the mind-ground refers to the bodhisattva precepts ([PUṢA JIE](#)), which help to restrain the activities of body, speech, and mind; the precepts are the mind-ground because the activities of mind, or thought, are the basis for actions performed via body and speech. The buddha Vairocana says in the sūtra that he achieved complete, perfect enlightenment ([SAMYAKSA BODHI](#)) only after cultivating the mind-ground over a hundred incalculable eons ([ASA KHYEYAKALPA](#)). The Korean monk [WŎNHYO](#) (617–686), in his *Pōmmanggyōng Posal kyebon sagi* (“Personal Exposition on the Bodhisattva Precepts Text of the ‘Brahmā’s Net Sūtra’”), described three different denotations of mind-ground in terms of the abider and the ground on which that abider resides. These are (1) the fifty stages of the bodhisattva path (the ten [BODHISATVA BHŪM](#), plus the forty stages preliminary to the bhūmis), which is the ground on which the thought of enlightenment ([BODHICITTA](#)) of the bodhisattva abides; (2) the three categories of precepts ([ŚILATRAYA](#)), which is the ground on which the enlightened mind abides; and (3) the realm of reality ([DHARMADHĀTU](#)), which is the ground on which the practitioner abides. In the [CHAN ZONG](#), the mind that was transmitted by [BODHIDHARMA](#), the putative founder of Chan, is termed the mind-ground, and his teaching of the one (enlightened) mind is called the dharma teaching of the mind-ground (*xindi famen*). [HUANGBO XIYUN](#) (d. 850) says in his [CHUANXIN FAYAO](#) that the “dharma teaching of the mind-ground means that all dharmas are constructed depending upon this mind.” Finally, [GUIFENG ZONGMI](#) in his [CHANYUAN CHUCHUANJI TUXU](#) (“Prolegomenon to the Comprehensive References to the Fountainhead of Chan Collection”) equates mind-ground with the buddha-nature ([FOXING](#)): “the originally enlightened true nature of sentient beings is called both buddha-nature and mind-ground.”

[xingjiao](#). (J. angya; K. haenggak 行脚). In Chinese, lit., “wandering on foot,” i.e., “pilgrimage”; a term used especially in the [CHAN](#) tradition to refer to a pilgrimage, often performed by a young monk who is in search of a teacher. Traditionally, this pilgrimage is made to numerous monasteries, most often located deep in the mountains, in hopes of having an interview with the resident master. In Japan, angya nowadays refers to the trip that young monks (known as unsui; see [YUNSHUI](#)) who have just completed their initial training at a provincial temple make to a major Zen training monastery, where they can continue their studies with a senior teacher ([RŌSHI](#)).

[xingju shuo](#). (J. shōgusetsu; K. sŏnggu sŏl 性具說). In Chinese, the “nature-replete theory”; also known as *liju sanqian*, or “principle is replete with the trichilocosm ([TRISĀHASRAVĀHĀSĀHASRALOKADHĀTU](#)).” According to [Tiantai](#) doctrine, everything within the three realms of existence ([TRADHĀTUKA](#)) is all contained within the original nature of all sentient beings. This theory is said to be based on [Tiantai Zhiyi](#)’s notion of [YINIAN SANQIAN](#), or “the trichilocosm in a single thought.” During the [SHANJIA SHANWAI](#) debate of the eleventh-century Tiantai community, the xingju theory came to connote the trichilocosm that was replete within myriad phenomena and was distinguished from the [HUAYAN](#) doctrine of [XINGQI](#).

[xingli](#). (J. anri; K. haengni 行履). In Chinese, lit., “practice hidden”; a contraction of *qiongxing lijian*, which literally means “assiduous practice and hidden conduct.” In the [CHAN](#) traditions, xingli generally refers to the daily conduct of a monk, which includes a whole gamut of activities from walking, sitting, and keeping silence to drinking tea and eating food. As such, the term can also refer to the progress of a monk’s training or to the history of his activities.

[xingqi](#). (J. shōki; K. sŏnggi 性起). In Chinese, “nature origination”; an important [HUAYAN](#) soteriological and ontological theory, which emphasizes the common ground of all phenomenal appearances in the true nature of the mind. The term xingqi probably derives from the “Baowang rulai xingqi pin” (“Chapter on the ‘Nature Origination’ of the Tathāgata Jeweled King”), the thirty-second chapter of [BUDDHABHADRA](#)’s (359–429) sixty-roll translation of the [ĀVATA SAKASŪTRA](#), which seems to translate the Sanskrit term *tathāgatagotrasa bhava* (the arising of the lineage of the tathāgata). Its philosophical origins lie in the [TATHĀGATAGARBHA](#) corpus of literature, which maintains that all sentient beings are fundamentally identical to the buddhas, since they share the same buddha-nature ([FOXING](#)), and the term finds its antecedents in such earlier theories as the “conditioned origination of the true nature” (*zhenxing yuanqi*) proposed by the Southern [DILUN ZONG](#) master [JINGYING HUIYUAN](#) (523–592). ¶ The term “nature origination” was coined by the second Huayan patriarch [ZHIYAN](#) (602–668), and its implications were elaborated by the “third patriarch” [FAZANG](#) (643–712) in his [HUAYANJING TANXUAN JI](#) and especially the “fifth patriarch” [GUIFENG ZONGMI](#) (780–841). In Zhiyan’s soteriological interpretation of the xingqi, as elucidated in his influential treatise, [HUAYAN JING NAZHANGMEN DENG ZAKONGMU ZHANG](#), “nature” (*xing*) refers to the “essence” ([TI](#)) and “origination” (*qi*) to the appearance of that essence in the “mind-ground” ([XINDI](#)). Zhiyan explicitly contrasts nature origination with the soteriological formulations of dependent origination (C. *yuanqi*; S. [PRATITYASAMUTPĀDA](#)); unlike dependent origination, which explains the specific conditions through which the experience of enlightenment occurs—and thus inevitably distinguishes the ordinary realm of [SA SĀRA](#) from the enlightened realm of [NIRVĀ A](#)—nature origination operates entirely on the level of fruition to explain how enlightenment can “originate” only from within the very “nature” of this world itself. Enlightenment is therefore not something that needs to be produced, for it is the inherent nature of the mind itself. Zongmi subsequently provides a more ontological explanation of the xingqi, by explaining that “nature” refers to the one mind ([YIXIN](#)) as discussed in the [DASHENG QIXIN LUN](#) (“Awakening of Faith According to the Mahāyāna”) and “origination” refers to the process by which that nature is made manifest in the world at large. Thus, in distinction to the “conditioned origination of the [DHARMADHĀTU](#)” ([FAJIE YUANQI](#)), which explains how all phenomena in the universe are mutual conditioning, and conditioned by, all other phenomena, “nature origination” instead clarifies that all those phenomena simultaneously derive from the common ground that is the nature. Nature origination thus provides a description of causality from the standpoint of the “dharmadhātu of the unimpeded interpenetration of principle and phenomena” ([LISHI WU’AI FAJIE](#)).

[Xingsi](#). (C) (性寺). See [QINGYUAN XINGSI](#).

Xingtao. (C) (). See [MU'AN XINGTAO](#).

xingzhe. (J. anja; K. haengja 行者). In Chinese, “postulant.” According to the *Shishi yaolan*, a postulant refers to an unordained lay practitioner, a minimum of sixteen years of age, who works in a monastery until he or she is formally ordained. Within the [CHAN](#) traditions of East Asia, the sixth patriarch ([LIUZU](#)) [HUIYEN](#) (638–713) is usually presumed to have been a postulant at the time he achieved enlightenment and received transmission from the fifth patriarch [HONGREN](#). In premodern China, a postulant referred to a layperson who lived and worked in the monastic compounds before ordination; the postulant was still permitted to grow his or her hair and might in some cases even have a spouse. Postulants were expected to observe the five lay precepts (C. wujie; S. [PAÑCAŚILA](#)), but with the third precept against improper sexual conduct strengthened to require celibacy. In Korea, postulants (haengja) work in the monastery for at least six months before being allowed to ordain as novices. In Japan, a postulant (anja) may or may not be expected to ordain and works under the guidance of the administrative monks (yakusō) at the monastery or temple. ¶ The term xingzhe may also be used generically to refer to anyone who studies or practices Buddhism.

xing zong. (J. shōshū; K. sŏng chong 性宗). In Chinese, the “school of the nature”; also known as the [FAXING ZONG](#), or “Dharma Nature” school. In distinction to the [XIANG ZONG](#), or “characteristics school,” which mainly involved the analysis of phenomena, the xing school refers to those Buddhist intellectual traditions that studied the underlying essence or “nature” of reality. While the xiang school, i.e., the [FAXIANG](#) or “Dharma Characteristics” school, was a pejorative term referring to the Chinese [YOGĀCĀRA](#) school established on the basis of the new Yogācāra texts introduced from India by [XUANZANG](#) (600/602–664) and elaborated by his lineage, the name “xing zong” was used polemically to refer to the [MADHYAMAKA](#) teachings of the [SAN LUN ZONG](#), the [TATHĀGATAGARBHA](#) teachings, or the last three of the five teachings in the [HUAYAN](#) school’s hermeneutical taxonomy (see [JIAOXIANG PANSHI](#)): the advanced teachings of Mahāyāna (Dasheng zhongjiao), i.e., the sudden teachings ([DUNJIAO](#)) and the perfect teachings ([YUANJIAO](#)). Maintaining a strict differentiation between the xing and xiang tendencies was called xingxiang juepan (differentiation between nature and characteristics); a scholastic approach that sought to harmonize the two trends was characterized as xingxiang ronghui (harmonizing nature and characteristics).

Xin Huayan jing lun. (C) (). See [HUAYAN JING HELUN](#).

xinman chengfo. (C) (). See [YUANRONG](#).

xinxin. (J. shinjin; K. sinsim 信心). In Chinese, “mind of faith” or “faith in mind”; the compound is typically interpreted to mean either faith in the purity of one’s own mind or else a mind that has faith in the three jewels ([RATNATRAYA](#)) and the principle of causality. The “mind of faith” is generally considered to constitute the inception of the Buddhist path ([MĀRGA](#)). In the elaborate fifty-two stage path schema outlined in such scriptures as the [AVATA SAKASŪTRA](#), the [RENWANG JING](#), and the [PUSAYINGLUO BENYE JING](#), “mind of faith” (xinxin) constitutes the first of the ten stages of faith (shixin), a preliminary level of the [BODHISATTVA](#) path generally placed prior to the generation of the thought of enlightenment ([BODHICITTOTPĀDA](#)) that occurs on the first of the ten abiding stages (shizhu). The [MAHĀPARINIRVĀ ASŪTRA](#) also says that the buddha-nature ([FOXING](#)) can be called the “great mind of faith” (da xinxin) because a bodhisattva-mahāsattva, through this mind of faith, comes to be endowed with the six perfections ([PĀRAMITĀ](#)). ¶ In the [PURE LAND](#) traditions, the mind of faith typically refers to faith in the vows of the buddha [AMTĀBHA](#), which ensures that those who have sincere devotion and faith in that buddha will be reborn in his pure land of [SUKHĀVĀTĪ](#). [SHANDAO](#) (613–681) divided the mind of faith into two types: (1) faith in one’s lesser spiritual capacity (xinji), which involves acceptance of the fact that one has fallen in a state of delusion during myriads of rebirths, and (2) faith in dharma (xinfa), which is faith in the fact that one can be saved from this delusion through the vows of Amitābha. [SHINRAN](#) (1173–1262) glosses the mind of faith as the buddha-mind realized by entrusting oneself to Amitābha’s name and vow. ¶ The term xinxin is also used as a translation of the Sanskrit [ŚRADDHĀ](#) (faith), which is one of the five spiritual faculties ([INDRIYA](#)), and of [ADHYĀSA](#) (lit. “determination,” “resolution”), which is used to describe the intention of the bodhisattva to liberate all beings from suffering. See also [XINXIN MING](#).

Xinxing. (J. Shingyō; K. Sinhaeng 信行) (540–594). In Chinese, “Practice of Faith”; founder of the “Third-Stage Sect” ([SANJIE JIAO](#)), a school of popular Buddhism that flourished during the Tang dynasty. Born in Ye in presentday Henan province, Xinxing ordained as a novice monk by the age of seventeen, after which he wandered the country, studying Buddhism and reading such Buddhist scriptures as the [SADDHARMAPU ARIKASŪTRA](#) (“Lotus Sūtra”), [VIMLAKĪRTINIRDEŚA](#), and [MAHĀPARINIRVĀ ASŪTRA](#). Feeling guilty for accepting from the laity offerings that he did not believe he deserved, Xinxing eventually abandoned monastic life, participating in various state labor projects and cultivating ascetic practices. He is also known to have bowed to all he met on the street, following the teachings of the [SADĀPARIBHŪTA](#) chapter of the *Saddharmapu arikasūtra*. It is uncertain exactly when Xinxing established the Third-Stage Sect, but it was probably sometime around 587. In 589, at the behest of Emperor Wendi, he entered Chang’an, the capital city of the Sui dynasty, and stayed at Zhenjisi (Authentic Quiescence Monastery, later renamed Huadu monastery), where he promoted actively the teachings of the school until his death in 594. Xinxing had about three hundred followers, including Sengyong (543–631) and Huiyu (d. c. 618). Due to the proscription of the sect during the Tang dynasty, only a few fragments of Xinxing’s writings are extant. These include the *Sanjie fofa* (“Buddhadharma during the Third Stage”), in four rolls, and sections of the *Duigen qixing fa* (“Principles on Practicing in Response to the Sense-Bases”) and the *Ming Dasheng wujinzang fa* (“Clarifying the Teaching of the Mahāyāna’s Inexhaustible Storehouse”). ¶ Xinxing’s teachings derive from the doctrines of the degenerate dharma ([MOFA](#)) and the buddha-nature ([FOXING](#)); they emphasize almsgiving (S. [DĀNA](#)) as an efficient salvific method, which contributed to the development of the school’s distinctive institution, the [WUJINZANG YUAN](#) (inexhaustible storehouse cloister). Because people during the degenerate age (mofa) were inevitably mistaken in their perceptions of reality, it was impossible for them to make any meaningful distinctions, whether between right and wrong, good and evil, or ordained and lay. Instead, adherents were taught to treat all things as manifestations of the buddha-nature, leading to a “universalist” perspective on Buddhism that was presumed to have supplanted all the previous teachings of the religion. Xinxing asserted that almsgiving was the epitome of Buddhist practice during the degenerate age of the dharma and that the true perfection of giving ([DĀNAPĀRAMITĀ](#)) meant that all people, monks and laypeople alike, should be making offerings to relieve the suffering of those most in need, including the poor, the orphaned, and the sick. In its radical reinterpretation of the practice of giving in Buddhism, even animals were considered to be a more appropriate object of charity than were buddhas, bodhisattvas, monks, or the three jewels ([RATNATRAYA](#)). Particularly significant were offerings made to the inexhaustible storehouse cloister (Wujinzang yuan), which served the needs of the impoverished and suffering in society—especially offerings made on the anniversary of Xinxing’s death. See also [XIANGFA JUEYI JING](#).

Xinxin ming. (J. Shinjinmei; K. Sinsim myŏng 信心銘). In Chinese, “Inscription on the Mind of Faith” (or “Faith in Mind”); attributed to the dubious third patriarch of the [CHAN](#) tradition, the otherwise-unknown [SENGCAN](#). The *Xinxin ming* is a relatively short poem that praises nonduality and the method for attaining that experience. The last stanza, for instance, states that “faith and mind” (xinxin) are not two, and nonduality (lit. “not two”) is the “perfected mind” (xinxin). According to the *Xinxin ming*, the method of attaining nonduality largely involves the cultivation of detachment, especially from words and thoughts. Along with the [ZHENGDAO GE](#), [CANTONG QI](#), and [BAOJING SANMEI](#), the *Xinxin ming* has been regarded as one of the seminal statements of the Chan understanding of the dharma. Numerous commentaries on the poem were composed in East Asia. The *Xinxin ming* is still recited aloud in some Chan and [ZEN](#) monasteries.

xinxun zhongzi. (C) (). In Chinese, “newly acquired seeds.” See [BLA](#).

Xiqian. (C) (). See [SHITOU XIQIAN](#).

Xitan ziji. (J. Shittan jiki; K. Siltam chagi 息曇自記). In Chinese, “Notes on the [SIDDHAM](#) Syllabary,” by the Chinese monk Zhikuang (d.u.); an influential primer of the Indian Siddham writing system. The *Xitan ziji* is said to be based on the teachings of a certain South Indian monk named Prajñābodhi. The main purpose of the *Xitan ziji* is to explain briefly the morphological operation of combining vowels and consonants. Zhikuang begins by discussing short and long syllables (e.g., a and ā). He then provides a detailed explanation of each vowel, their pronunciations, their various inflections, and their names. His coverage then extends to the syllables formed from the combination of consonants and vowels.

Xiuxin yao lun. (J. Shushin yōron; K. Susim yo non 修心要論). In Chinese, “Treatise on the Essentials of Cultivating the Mind,” attributed to the fifth patriarch of the [CHAN](#) school, [HONGREN](#); an important text on meditative practice in the early Chan tradition. The edition of the *Xiuxin yao lun* used within the Chan school was published at the Korean monastery of Ansimsa in 1570 during the Chosŏn dynasty under the title [CHOESANGSŬNGNON](#) (“Treatise on the Supreme Vehicle”) and again in 1907 as part of an edited volume of [SŌN](#) materials known as the [SŌNMUN CH’WARYŎ](#). With the recent discovery of some earlier versions of the text at [DUNHUANG](#), a more nuanced history of the *Xiuxin yao lun* has emerged. Overall, the different recensions all seem to share the common goal of establishing “guarding the mind” (shouxin) as an authentic and effective practice in Chan. Largely written in dialogic format, the *Xiuxin yao lun* emphasizes the inherent purity of the mind, which the author likens to suchness ([TĀTĀTĀ](#)). The practice of “guarding the mind” seems to be related to or even derived from the fourth patriarch [DAOXIN](#)’s “guarding the one” (shouyi), a practice that Daoxin probably borrowed from indigenous Chinese materials. The *Xiuxin yao lun* also emphatically notes the superiority of shouxin over the popular practice of reciting the buddha’s name ([NIANFO](#)) and a (misguided) experience of [SAMĀDHI](#), suggesting a polemical context for its composition.

Xiuxi zhiguan zuochan fayao. (J. Shujū shikan zazenhōyō; K. Susŏp chigwan chwasŏn pŏbyo 修習止觀坐禪要法). In Chinese, “Essentials for Sitting in Meditation and Cultivating Calmness and Contemplation”; also known as the *Tongmeng zhiguan* (“Calming and Contemplation for Neophytes”) and the (*Tiantai*) *Xiao zhiguan* (“Shorter Calming and Contemplation of [Tiantai]”). The monk [TIANTAI ZHIYI](#), the systematizer of the [TIANTAI ZONG](#), is known to have composed this treatise as a guide for training his brother Zhen Zhen. The treatise was composed sometime after his *Shi chan boluomi cidi chanmen* (571) and [MOHE ZHIGUAN](#) (594). Despite its popular designation as the *Xiao zhiguan*, the relatively short *Xiuxi zhiguan zuochan fayao* borrows heavily from the *Shi chan boluomi cidi chanmen* and seems to have no direct relation to Zhiyi’s massive *Mohe zhiguan*. A preface to the *Xiuxi zhiguan zuochan fayao* was prepared by the monk Yuanzhao (1048–1116) and was

applied together with the precept in 1095. The treatise is divided into ten chapters: (1) necessary conditions, (2) rebuking desires, (3) discarding obstructions, (4) regulation, (5) expedient methods ([UPĀYA](#)), (6) proper cultivation, (7) manifestation of the (roots of) virtue ([KUSĀLAMŪLA](#)), (8) recognizing [MĀRA](#), (9) healing ailments, and (10) attainment of fruits. The practice of meditation outlined in the treatise is based on the twenty-five preparatory expedient methods of the [DAZHIDU LUN](#) and the *Shi chan boluomi cidi chanmen*. As the title makes clear, the general purpose of the treatise is to provide the essentials for the concurrent practice of calming ([SAMĀTHA](#)) and insight ([VIPĀSYANĀ](#)). The treatise is still widely used in various Buddhist traditions as a practical manual for beginning meditators.

[Xiyu ji](#). (C) ([禪](#)). See [DATANG XIYU JI](#).

[xuanmen](#). (C) ([禪](#)). See [SHI XUANMEN](#).

[Xuansha sanbing](#). (J. Gensha sanbyō; K. Hyōnsa sambyōng [禪](#)). In Chinese, “Xuansha’s Three Infirmities”; a famous sermon attributed to the [CHAN](#) master [XUANSHA SHIBEI](#). Different versions of the sermon are found in the [BIYAN LU](#) (case 88), [JINGDE CHUANDENG LU](#) (roll 18), [KAIAN KOKUGO](#) (roll 6), etc. One day, Xuansha asked the assembly what they would do should a blind, mute, and deaf person come to them for teaching, since the blind cannot see them raise their whisk, the mute cannot reply, and the deaf cannot hear. On a different occasion, the Chan master [YUNMEN WENYAN](#) demonstrated how this could be done. When a monk stepped back as Yunmen was about to hit him, the master whimsically noted that the monk was not blind. When the monk approached at his bidding, Yunmen then noted that the monk was not deaf. Finally, Yunmen asked the monk if he understood, and when the monk gave him a negative reply, Yunmen declared that he was not mute.

[Xuansha Shibei](#). (J. Gensha Shibi; K. Hyōnsa Sabi [禪](#)) (835–908). Chinese [CHAN](#) master in the lineage of [QINGYUAN XINGSI](#) (d. 740) and a predecessor in the [FAYAN ZONG](#) of the classical Chan school; he was a native of Min (presentday Fujian province). Xuansha left home to study with the Chan master Lingxun (d.u.) on Mt. Furong and later received the monastic precepts in 864 from the [VINAYA](#) master Daoxuan (d.u.) at the monastery KAYUANSI in Jiangxi province. Two years later, he visited the Chan master [XUEFENG YICUN](#) and became his disciple. Xuansha’s adherence to the precepts is said to have been so strict that he was given the nickname Bei Doutuo, or “[DHUTA GA](#) Bei.” He subsequently left Xuefeng’s side and established a cloister on Mt. Sheng (also known as Mt. Xuansha) in Fujian province, named Xuansha (Sublime Sand). In 898, he was summoned to live in the cloister of Anguoyin in Fujian by the king of Min. Emperor Zhaozong (r. 888–904) gave Xuansha the title of Great Master Zongyi (Tradition’s Best). Luohan Kuichen (867–928) was one of his disciples. His sayings were published in the *Xuansha guanglu* and *Xuansha Shibei chanshi yulu*, and sporadic references to some of his more popular sayings (e.g., [XUANSHA SANBING](#)) can also be found in the [BIYAN LU](#).

[Xuansu](#). (C) ([禪](#)). See [HELIN XUANSU](#).

[Xuanxue](#). (J. Gengaku; K. Hyōnhak [禪](#)). In Chinese, “Dark Learning,” or “Profound Learning”; a Chinese philosophical movement of the third through sixth centuries CE, which provided a fertile intellectual ground for the emergence of early Chinese forms of Buddhism. It is sometimes known as “Neo-Daoism,” although the target audience of Xuanxue literati was fellow elite rather than adherents of the new schools of religious Daoism that were then developing in China. The social and political upheaval that accompanied the fall of the Han dynasty (206 BCE–220 CE) prompted many Chinese intellectuals to question the traditional foundations of Chinese thought and society and opened them to alternative worldviews. Buddhism, which was just then beginning to filter into Chinese territories, found a receptive audience among these groups of thinkers. Xuanxue scholars critiqued and reinterpreted the normative Chinese teachings of Confucianism by drawing on the so-called “three dark [treatises]” (*sanxuan*), i.e., the *Yijing* (“Book of Changes”), *Daode jing* (“The Way and Its Power”), and the *Zhuangzi*. Xuanxue designates a broad intellectual trend that sought a new way of understanding the “way” ([DAO](#)). Xuanxue philosophers explored the ontological grounding of the changing and diverse world of “being” (C. *you*) on a permanent and indivisible substratum called “nothingness” or “non-being” (C. *wu*). Xuanxue thinkers such as Wang Bi (226–249), who is regarded as the founder of the movement, and Guo Xiang (d. 312), who is often considered to represent its apex, explored how this ontological stratum of nothingness still was able to produce the world of being in all its diversity. This process was clarified by adopting the mainstream Chinese philosophical bifurcations between (1) the ineffable “substance” or “essence” ([TI](#)) of things and the ways in which that substance “functions” ([YONG](#)) in the phenomenal world; and (2) the “patterns” or “principles” ([LI](#)) that underlie all things and their phenomenal manifestations ([SHI](#)). These distinctions between *ti/yong* and *li/shi* proved to be extremely influential in subsequent Chinese Buddhist exegesis. Also according to Xuanxue interpretation, the sage (*shengren*) is one who understands this association between being and nothingness but realizes that their relationship is fundamentally inexpressible; nevertheless, in order to make it intelligible to others, he feels “compelled” to describe it verbally. This emphasis on the inadequacy of language resonated with Buddhist treatments of the ineffability of spiritual experience and the necessity to deploy verbal stratagems ([UPĀYA](#)) in order to make that experience intelligible to others. The sage was able to manifest his understanding in the phenomenal world not by conscious intent but as an automatic “response” (*ying*) to “stimuli” (*gan*); early Chinese Buddhist thinkers deploy the compound “stimulus and response” ([GANYING](#)) to explain the Buddhist concepts of action ([KARMA](#)) and of grace (i.e., the “response” of a buddha or [BODHISATTVA](#) to a supplicant’s invocation, or “stimulus”). Xuanxue thinkers also began to explore parallels between their ideas of “nonbeing” (*wu*) and the notion of emptiness ([ŚŪNYATĀ](#)) in the [PRAJÑĀPĀRAMITĀ](#) corpus, which was just then being translated into Chinese. Xuanxue exegesis has often been described in the scholarly literature as a “matching concepts” ([GEYI](#)) style of interpretation, where Buddhist concepts were elucidated by drawing on indigenous Chinese philosophical terminology, though this interpretation of *geyi* has recently been called into question. Although Xuanxue vanished as a philosophical movement by the early sixth century, its influence was profound on several pioneering Chinese Buddhist thinkers, including [ZHI DUN](#) (314–366) and [SENGZHAO](#) (374–414), and on such early philosophical schools of Chinese Buddhism as the [SAN LUN ZONG](#) and [DI LUN ZONG](#), and eventually on the [TIANTA ZONG](#) and [HUAYAN ZONG](#) of the mature Chinese tradition.

[Xuanzang](#). (J. Genjō; K. Hyōnjang [禪](#)) (600/602–664). Chinese monk, pilgrim, and patriarch of the Chinese [YOGĀCĀRA](#) tradition ([FAXIANG ZONG](#)) and one of the two most influential and prolific translators of Indian Buddhist texts into Chinese, along with [KUMĀRAJĪVA](#) (344–413); in English sources, his name is seen transcribed in a variety of ways (now all outmoded), including Hsüan-tsang, Hsien Tsiang, Yuan Chwang, etc. Xuanzang was born into a literati family in Henan province in either 600 or 602 (although a consensus is building around the latter date). In 612, during a state-supported ordination ceremony, Xuanzang entered the monastery of Jingtusi in Luoyang where his older brother was residing as a monk. There, Xuanzang and his brother studied the [MAHĀPARINIRVĀ ASŪTRA](#) and various [MAHĀYĀNA](#) texts. When the Sui dynasty collapsed in 618, they both fled the capital for the safety of the countryside. In 622, Xuanzang was given the complete monastic precepts and was fully ordained as a monk ([BHIKṢU](#)). By this time Xuanzang had also studied earlier translations of the [MAHĀYĀNASĀ GRAHA](#), [JĀNĀPRASTHĀNA](#), and [*TATTVAŚIDDHI](#) under various teachers but came to doubt the accuracy of those translations and the veracity of their teachings. In order to resolve his doubts, Xuanzang embarked on an epic journey to India in 627, in flagrant disregard of the Taizong emperor’s (r. 626–629) edict against traveling abroad. His trek across the [SILK ROAD](#) and India is well known, thanks to his travel record, the [DA TANG XIYU JI](#), his official biography, and the famous Ming-dynasty comic novel based on Xuanzang’s travels, [XIYU JI](#) (“Journey to the West”). (See “Routes of Chinese Pilgrims” map.) According to these sources, Xuanzang visited the various Buddhist pilgrimage sites of the subcontinent (see [MAHĀSTHĀNA](#)) and spent years at [NĀLANDĀ](#) monastery mastering Sanskrit, including fifteen months studying the texts of the Indian Yogācāra tradition under the tutelage of the 106-year-old [ŚĪLABHADRA](#). In 645, Xuanzang returned to the Tang capital of Chang’an with over six hundred Sanskrit manuscripts that he had acquired in India, along with images, relics, and other artifacts. (These materials were stored in a five-story stone pagoda, named the [DAYAN TA](#), or Great Wild Goose Pagoda, that Xuanzang later built on the grounds of the monastery of [DA CI ENSI](#); the pagoda is still a major tourist attraction in Xi’an.) The Taizong and Gaozong emperors (r. 649–683) honored Xuanzang with the title [TREPI AKA](#) (C. *sanzang fashi*; “master of the Buddhist canon”) and established a translation bureau (*yijing yuan*) in the capital for the master, where Xuanzang supervised a legion of monks in charge of transcribing the texts, “rectifying” (viz., clarifying) their meaning, compiling the translations, polishing the renderings, and certifying both their meaning and syntax. Xuanzang and his team developed an etymologically precise set of Chinese equivalencies for Buddhist technical terminology, and his translations are known for their rigorous philological accuracy (although sometimes at the expense of their readability). While residing at such sites as HONGFUSI, Da ci’ensi, and the palace over an eighteen-year period, Xuanzang oversaw the translation of seventy-six sūtras and śāstras in a total of 1,347 rolls, nearly four times the number of texts translated by Kumārajīva, probably the most influential of translators into Chinese. (Scholars have estimated that Xuanzang and his team completed one roll of translation every five days over those eighteen years of work.) Xuanzang’s influence was so immense that he is often recognized as initiating the “new translation” period in the history of the Chinese translation of Buddhist texts, in distinction to the “old translation” period where Kumārajīva’s renderings hold pride of place. Among the more important translations made by Xuanzang and his translation team are the foundational texts of the Yogācāra school, such as the [CHENG WEISHI LUN](#) (“*Vijñaptimātratāsiddhi*”), [ASA GA](#)’s [MAHĀYĀNASĀ GRAHA](#), and the [YOGĀCĀRABHUMŚĀSTRA](#), and many of the major works associated with the [SARVĀSTIVĀDA](#) school of [ABHIDHARMA](#), including definitive translations of the *Jñānaprasthāna* and the encyclopedic [ABHIDHARMAMAHĀVIBHĀṬĀ](#), as well as complete translations of [VASUBANDHU](#)’s [ABHIDHARMAKOSĀBHĀ YĀ](#) and [SA GHABHADRA](#)’s [*NYĀYĀNUSĀRA](#). He translated (and retranslated) many major Mahāyāna sūtras and śāstras, including the massive [MAHĀPRAJÑĀPĀRAMITĀSŪTRA](#), in six hundred rolls; this translation is given a place of honor as the first scripture in the East Asian Buddhist canons (see [DAZANGJING](#); [KORYŌ TAEJANGGYŌNG](#)). Also attributed to Xuanzang is the Chinese translation of the famed [PRAJÑĀPĀRAMITĀH DAYASŪTRA](#), or “Heart Sūtra,” probably the most widely read and recited text in East Asian Buddhism. Because Xuanzang himself experienced a palpable sense of the Buddha’s absence while he was sojourning in India, he also translated the *Nandimitrāvadāna* (*Da aluohan Nantimiduo luo suoshuo fazhu ji*,

abbr. *Fazhu ji*, “Record of the Duration of the Dharma Spoken by the Great Arhat ([NANDIMITRA](#))”, the definitive text on the sixteen [ARHAT](#) protectors (see [O ASASTHAMRA](#)) of Buddhism, which became the basis for the LOUHAN cult in East Asia.

Xuanzhong ming. (J. Genchūmei; K. Hyŏnjung myŏng) In Chinese, “Inscription on the Center of Mystery,” by the Chinese [CHAN](#) master [DONGSHAN LIANGJIE](#). In this poem, Dongshan sings of the “mystery” of subtle reciprocity (*huihu wanzhuan*), simultaneous illumination of phenomena and principle ([SHILLI](#) *shuangming*), and the unimpededness of essence and function ([TILYONG](#) *wuzhi*), which he likens to the activities of a sage. The *Xuanzhong ming* is found in Dongshan’s recorded sayings, the *Dongshan yulu*.

Xuedou Chongxian. (J. Setchō Jūken; K. Sŏltu Chunghyŏn) (980–1052). Chinese [CHAN](#) master in the [YUNMEN ZONG](#) of the mature Chan tradition; also known as Yinzhi. Xuedou was a native of Sichuan province. After his ordination under Renxian (d.u.) of the cloister of Pu’anyuan, Xuedou received doctrinal training from Yuanying (d.u.) of Dacisi and Guyin Yuncong (965–1032) of Shimen. During his travels in the south, Xuedou visited the Yunmen master Zhimen Guangzuo (d.u.) in Hubei province and became his leading disciple. Xuedou later resided on Cuiwei peak near Tongting Lake and the monastery of Zishengsi on Mt. Xuedou in Zhejiang province, whence he acquired his toponym. During his residence in Zishengsi, Xuedou acquired more than seventy students and composed his famed collection of one hundred old cases (*gucē*, viz., [GONGAN](#)) known as the *Xuedou songgu*, which in turn formed the basis of Chan master [YUANWU KEQIN](#)’s influential [BIYAN LU](#). Xuedou also composed the *Tongting yulu*, *Xuedou kaitang lu*, *Puquan ji*, *Zuying ji*, and various other texts. Xuedou’s successful career as a teacher is often considered a period of revitalization of the Yunmen tradition.

Xuefeng Yicun. (J. Seppō Gison; K. Sŏlbong Ŭijon) (822–908). Chinese [CHAN](#) master in the lineage of [QINGYUAN XINGSI](#) (d. 740); a native of Min (presentday Fujian province). He was ordained at the age of seventeen and given the dharma name Yicun, but temporarily returned to lay clothing during the severe persecution of the [HUICHANG FANAN](#) and studied under Furong Lingxun (d.u.). After a brief stay with [DONGSHAN LIANGJIE](#), Xuefeng left at Dongshan’s direction to study with [DESHAN XUANJIAN](#) (780/2–865). Xuefeng then embarked on a journey with his colleagues Yantou Quanhao (828–887) and Qinshan Wensui (d.u.). With the help of Yantou, Xuefeng is said to have had his first awakening experience during a snowfall on Mt. Ao in Hunan. Xuefeng and Yantou became Deshan’s leading disciples. Xuefeng later established a monastery with the support of the king of Min on what came to be known as Mt. Xuefeng in Fujian province. The mountain was originally known as Mt. Xianggu (Elephant Bone) but acquired its new name after a famous exchange at the mountain between the king of Min and the monk Xuefeng. Xuefeng’s monastery was given the name Chongshengsi and Yingtian Xuefeng Chanyuan. In 882, Emperor Xizong (r. 873–888) bestowed upon him the title Great Master Zhenjue (Authentic Enlightenment) and the purple robe. His disciples include [YUNMEN WENYAN](#) (the founder of the [YUNMEN ZONG](#) of the classical Chan school), [XUANSHA SHIBEI](#) (whose students eventually would go on to establish the [FAYAN ZONG](#)), Changjing Huileng (854–932), Baofu Congzhan (d. 928), and Gushan Shenyan (d. 943). His teachings are recorded in his *Xuefeng Zhenjue chanshi yulu*.

Xuemo lun. [alt. Xuemai lun] (J. Kechimyakuron; K. Hyŏlmaek non). In Chinese, “Treatise on the Blood-Vessel.” This short treatise has been traditionally attributed to the legendary Indian monk [BODHIDHARMA](#) and is also referred to as the *Damo dashi xuemo lun* (“Great Master [Bodhi]dharma’s Treatise on the Blood-Vessel”). Judging from its style of argumentation and doctrinal content, the treatise was most probably composed by a [CHAN](#) adept of the [HONGZHOU ZONG](#) or [NIUTOU ZONG](#) sometime during the ninth century, long after Bodhidharma’s death. The treatise begins with the claim that the three realms of existence ([TRAI DHĀTUKA](#)) return to the “one mind” ([YIXIN](#)), which was transmitted from one buddha to another without recourse to words or letters ([BULI WENZI](#)). From beginning to end, the treatise consistently underscores the importance of the inherent purity of the mind (*xin*) and claims that the mind is none other than the buddha, [DHARMAKĀYA](#), [BODHI](#), and [NIRVĀṆA](#). The treatise also polemically contends that the practice of chanting and being mindful of the buddha [AMTĀBHA](#)’s name ([NIANFO](#)), reading scriptures, and upholding the precepts may guarantee a better rebirth and intelligence but do not ensure the achievement of buddhahood. According to the treatise, only the practice of seeing one’s own nature ([JIANXING](#)) can lead to buddhahood (see [JIANXING CHENGFO](#)). The first known edition of the *Xuemo lun* was first published in Korea in 1473 and was republished on several subsequent occasions. It is often anthologized in larger compilations such as the [SŌNMUN CH’WARYŎ](#) and [SHŌSHITSU ROKUMON](#).

Xu gaoseng zhuan. (J. Zoku kōsōden; K. Sok kosŭng chŏn) In Chinese, “Supplement to the Biographies of Eminent Monks,” compiled by the [MNAYA](#) master [DAOXUAN](#); also known as the *Tang gaoseng zhuan*. As the title suggests, the *Xu gaoseng zhuan* “supplements” or “continues” the work of [HUIJIAO](#)’s earlier [GAOSENG ZHUAN](#) and records the lives of monks who were active in the period between Huijiao’s composition during the Liang dynasty and Daoxuan’s own time. The *Xu gaoseng zhuan* contains 485 major and 219 appended biographies, neatly categorized under translators (*yijing*), exegetes (*yijie*), practitioners of meditation (*xichan*), specialists of [VINAYA](#) (*minglŭ*), protectors of the [DHARMA](#) (*hufa*), sympathetic resonance ([GANTONG](#)), sacrifice of the body ([YISHEN](#)), chanters (*dusong*), benefactors (*xingfu*), and miscellaneous (*zake*). Although Daoxuan generally followed Huijiao’s earlier categorizations, he made several changes. In lieu of Huijiao’s divine wonders (*shenyi*), viz., thaumaturgists, Daoxuan opted to use the term sympathetic resonance, instead; he also subsumed Huijiao’s hymnodists (*jingshi*) and propagators (*changdao*) under the “miscellaneous” category. Daoxuan also introduced the new category of protectors of the dharma order to leave a record of disputes that occurred at court with Daoists. These adjustments seem to reflect ongoing developments within Chinese Buddhism in how to conceive of, and write, history. Other related biographical collections include [ZANNING](#)’s [SONG GAOSENG ZHUAN](#), Shi Baochang’s [BIQIUNI ZHUAN](#), the Korean [HAEDONG KOSŬNG CHŎN](#), and the Japanese [HONCHŌ KOSŌDEN](#).

Xutang Zhiyu. (J. Kidō Chigu; K. Hōdang Chiu) (1185–1269). Chinese [CHAN](#) master in the [LINJI ZONG](#); also known as Xijingsou. Xutang was ordained at age sixteen by Shiyun (d.u.) of Pumingsi and later became the disciple of [YUN’AN PUYAN](#) (1156–1226). He continued to visit various teachers throughout the country until he became the abbot of the monastery of Xingshengsi in 1229. Xutang also served as abbot of many other important Chan monasteries throughout his illustrious career, including BAOLINSI and [WANSHOUSI](#). The emperors Lizong (r. 1224–1264) and Duzong (r. 1264–1274) honored Xutang as their teacher. Among his disciples is the Japanese monk [NANPO JŌMYŌ](#) (1235–1308), to whom the abbots of [DATOKUJI](#) and [MYŌSHINJI](#) trace their lineage. The eminent Japanese monk and abbot of Daitokuji, [IKKYŪ SŌJUN](#), even went so far as to consider himself to be a reincarnation of Xutang and had numerous portraits of himself drawn in the likeness of Xutang.

Xuyun. () (1840–1959). In Chinese, “Empty Cloud”; [CHAN](#) monk of the modern period, renowned as one of the major reformers of modern Chinese Buddhism, especially of the Chan school; also known as Deqing. Xuyun was a native of Xiangxiang in Hunan province. He entered the monastery at the age of nineteen and received the precepts a year later from the monk Miaolian (d.u.). He then embarked on a long pilgrimage to famous mountains in China and to such distant sites as Tibet, India, and Sri Lanka, where he studied with teachers in a variety of Buddhist traditions. At the age of forty-three, Xuyun climbed [WUTAI SHAN](#), where he is said to have had a vision of the resident bodhisattva [MAÑJUŚRĪ](#). His awakening experience came at the drop of a teacup at the age of fifty-six. Xuyun was particularly renowned for his austerities and longevity. He became an important exponent of the convergence of “questioning meditation” ([KANHUA CHAN](#)) and recitation of the Buddha’s name ([NIANFO](#)), who was noted for using the meditative topic ([HUATOU](#)) “Who is reciting the Buddha’s name?” Xuyun spent the rest of his career propagating Buddhism throughout China until his death on Mt. Yunju in Jiangxi province at the advanced age of 120. See also [TAIXU](#); [YINGUANG](#).

yab yum. A Tibetan term, literally meaning “father-mother,” referring to the theme common in [VAJRĀYĀNA](#) iconography, especially that of [ANUTTARAYOGATANTRA](#), viz., male and female deities in sexual union. The deities are depicted either standing face-to-face or sitting, with the male deity in the [VAJRĀSĀNA](#) and the female deity seated on the male deity's lap, with her legs wrapped around his back, their arms embracing each other. Although interpreted in numerous ways, the male figure is generally understood to represent compassion ([KARUṂĀ](#)) and method ([UPĀYA](#)) and the female figure wisdom ([PRAJÑĀ](#)). Their union represents the indivisibility of these two qualities in the state of buddhahood. Although often described in such symbolic terms, numerous [SĀDHANAS](#) associated with the anuttarayogatantras include the practice of sexual union.

yak a. (P. *yakkha*; T. *gnod sbyin*; C. *yecha*; J. *yasha*; K. *yach'a*). In Indian mythology, a class of nature spirit, commonly serving as local guardians of the earth and of trees and the treasures hidden there. They possess supernatural powers—including the ability to fly, to change their appearance, and to disappear—which they can employ for good or for evil. They appear often in Buddhist texts, sometimes serving as benevolent protectors of and messengers for the Buddha and his disciples. The most famous of them is [VAJRAPĀṆĪ](#), who accompanies the Buddha as his bodyguard. They are commonly listed among the audience of the Buddha's sermons, with some attaining the rank of stream-enterer. There are also demonic yak as, especially the female yak as or yak ī ī, who devour infants and corpses and must be subdued by the Buddha, an [ARHAT](#), or a [BODHISATTVA](#). The continent of [UTTARAKURU](#) and the island of Sri Lanka were considered to be abodes of the yak as.

Yakushiji. (). In Japanese, “Medicine Buddha Monastery.” One of the seven great monasteries of Nara, Japan. Yakushiji is currently the headquarters (*daihonzan*) of the Hossō (C. [FAXIANG ZONG](#)) tradition. In 680, Emperor Tenmu (r. 673–686) ordered the construction of a statue of the Medicine Buddha ([BHAI AJYAGURU](#)) and a new monastery to pray for the recovery of his ill consort, who later succeeded him as Empress Jitō (r. 687–697). Due to the emperor's death and the lack of sufficient funds, construction began under Empress Jitō's reign in the old capital of Fujiwarakyō in present-day Kashihara city. Construction was completed in 697, but the monastery was physically relocated to the new capital Heijōkyō in 718 after the transfer of the capital in 710. The monastery originally consisted of two pagodas to the east and the west flanking a central golden hall (*kondō*) and a lecture hall (*kōdō*) behind it. After a great fire in 973, only the pagodas and the golden hall remained. The hall collapsed during a typhoon in 1445 and the west pagoda was lost to fire during a war in 1528. Reconstruction of the monastery took place during most of the late twentieth and early twenty-first centuries. The golden hall houses the famed Medicine Buddha triad from the Hakuō period (645–710), now designated a national treasure.

Yama. (T. *Gshin rje*; C. *Yanmo wang*; J. *Enma ō*; K. *Yōmma wang*). In the Buddhist pantheon, the lord of death and the king of hell. Among the six rebirth destinies ([A GATI](#)), Yama is considered a divinity ([DEVĀ](#)), even though his abode is variously placed in heaven ([SVARGA](#)), in the realm of the ghosts ([PRETA](#)), and in the hells (see [NĀRAKA](#)). Birth, old age, sickness, and punishment are said to be his messengers, sent among humans to remind them to avoid evil deeds and to live virtuously. Since [KARMA](#) functions as a natural law, with suffering resulting from unvirtuous actions and happiness from virtuous actions, the process of moral cause and effect should proceed without the need for a judge to mete out rewards and punishments. However, in Indian sources, Yama is sometimes described as the judge of the dead, who interrogates them about their deeds and assigns the wicked to the appropriate hell. This role of Yama was expanded in China, where he oversaw a quintessentially Chinese infernal bureaucracy. Yama is said to have organized the complex array of indigenous “subterranean prisons” (C. *diyu*) into a streamlined system of ten infernal courts, each presided over by a different king who would judge the incoming denizens. These judges were known collectively as the ten kings of hell (C. [SHIWANG](#)) and are the subject of the eponymous *Shiwang jing*, a Chinese indigenous scripture (see [APOCRYPHA](#)). See also [K. ITIGARBHA](#).

yāma. (T. *'thab bral*; C. *yemo tian*; J. *yamaten*; K. *yama ch'ŏn*). In Sanskrit and Pāli, proper name of a heaven in the sensuous realm ([KĀMADHĀTU](#)); also known as *suyāma* (“where the seasons are always good”). The yāma heaven is the third from the bottom of the six heavens located in the sensuous realm above Mount [SUMERU](#), between [TRĀYASTRĪ ŚĀ](#) below and [TU ITA](#) above. Like all Buddhist heavens, it is a place of rebirth and not a permanent post-mortem abode. Because this heaven is located in the sky, the divinities who inhabit it do not need to engage in combat with the [ASURAS](#) who dwell on the slopes of Mount Sumeru, hence the Tibetan interpretation of the name as “free from conflict.” (The Chinese is a Sinographic transcription of the Sanskrit.) The life span in this heaven is said to be two thousand years, with each day lasting two hundred human years.

yamabushi. (). In Japanese, lit. “those who lie down [or sleep] in the mountains”; itinerant mountain ascetics associated with the [SHUGENDŌ](#) (way of cultivating supernatural power) tradition; also known as *shugenja*, or “those who cultivate supernatural powers.” Records reveal that as early as the Nara period (although possibly before), yamabushi practiced a variety of severe austerities in the mountains, which were thought to be numinous places that housed the spirits of the dead. Thanks to the special powers accumulated through this training, such adepts were able to mediate with the realm of the dead, convert baleful spirits, and provide healing services. During this early period, the yamabushi were not formally ordained but instead operated independently, drawing freely from Buddhism, Daoism, and indigenous religious beliefs. In the mid to late Heian period (794–1185), such Shugendō sites as the mountains of Yoshino and [KUMANO](#) became affiliated with Japanese Tendai-shū ([TĪANTĀ](#)) and [SHINGONSHŪ](#) institutions, and yamabushi increasingly incorporated esoteric Buddhism into their training, whereby they strove to attain buddhahood ([SOKUSHIN JŌBUTSU](#)) through severe asceticism, such as immersion under waterfalls, solitary confinement in caves, fasting, meditating, and the recitation of spells ([MANTRA](#)). In addition, yamabushi guided people on pilgrimages through their mountain redoubts and performed powerful rites for the aristocratic nobility and royal court. During the Tokugawa period (1600–1868), they were forced because of temple regulations (J. *jin hatto*) to adopt permanent residences. While higher-ranking practitioners stayed at the mountain centers, many others settled down in villages, where they performed shamanic rituals and offered healing and prayers. Later in the Tokugawa period, many of these practices would provide the foundation for Japan's so-called new religions. When Shugendō was proscribed in 1872, yamabushi were forced to join either Buddhist or Shintō institutions and to forgo many of their former practices. When this ban was lifted in the late 1940s following World War II, yamabushi at some centers, including Mt. Haguro and Kumano, resumed their former practice, which continues to the present.

Yamaka. In Pāli, “Pairs”; one of the principal books of the Pāli abhidhammapīṭaka (see [ABHIDHAMMAPI ṬAKA](#)), which has no precise analogue in the abhidhammas of other [MAINSTREAM BUDDHIST SCHOOLS](#). The text belongs to the second stratum of Pāli abhidhamma works and is traditionally dated to the time of the third Buddhist council (see [COUNCIL, THIRD](#)) (c. third–second century BCE). The *Yamaka* is divided into ten chapters: (1) nine kinds of faculties or roots (*mūla*), for example, the three wholesome faculties (see [KUSĀLAMŪLA](#)), the three unwholesome faculties (see [AKUSĀLAMŪLA](#)), and the three neutral faculties; (2) five aggregates (see [SKANDHA](#)); (3) six sensory bases ([ĀYATANA](#)); (4) eighteen elements ([DHĀTUS](#)); (5) the [FOUR NOBLE TRUTHS](#); (6) conditioning factors (see [SA SKĀRA](#)) created by body, speech, and mind; (7) the proclivities (see [ANUSĀYA](#)); (8) mind ([CĪTTA](#)); (9) factors (see [DHARMA](#)); and (10) faculties ([INDRIYA](#)). Each of these chapters is organized into three sections: (1) delimitation of terminology, viz., the precise denotation of the terms covered in a chapter; (2) process, viz., discussions of how the terms are deployed in the course of abhidhamma analysis; and (3) penetration, viz., what understandings are generated through this analysis. The coverage proceeds through series of paired exchanges. An example is the opening discussion of the truth of suffering (P. *dukkhasacca*; S. [DU KHASATYA](#)). Exchange A asks: “Are painful sensations (P. *dukkha*; S. [DU KHA](#)) always included in the truth of suffering? Yes.” Exchange B asks: “Does the truth of suffering always refer to painful sensations? No, the truth of suffering involves other types of suffering apart from physical and psychological suffering.” Through this exchange, the text clarifies that the term *dukkha* cannot be limited solely to physical or psychological pain (see [DU KHADU KHATĀ](#)), but suggests that it may also involve the suffering caused by change (see [VIPARĪ ĀMADU KHATĀ](#)) and in fact lies at the very root of conditioning itself (see [SA SKĀRADU KHATĀ](#)). Perhaps because its format of paired exchanges does not readily lend itself to systematic analysis, the *Yamaka* has the dubious distinction of being probably the least read of all the works in the Pāli abhidhammapīṭaka.

yamakaprātihārya. (P. *yamakapā ihāriya*; T. *cho 'phrul ya ma zung*; C. *shuangshenbian*; J. *sōjinpen*; K. *ssangsinybyŏn*). In Sanskrit, “paired miracle” or “twin miracle”; this and the [MAHĀPRĀTĪHĀRYA](#) are the two most famous of the miracles performed by the Buddha during his career, which are frequently narrated in both canonical and commentarial literature and widely depicted in Buddhist art. Both types are generally understood to have taken place in the city of [ŚRĀVASTĪ](#) and thus are often referred to collectively in the literature as the [ŚRĀVASTĪ MIRACLES](#). The *yamakaprātihārya* involved the manifestation of the contrasting physical elements ([MAHĀBHŪTA](#)) of fire and water. After the Buddha established a rule preventing monks from displaying miraculous powers, he was challenged by a group of non-Buddhist yogins to a display of his own supernatural powers. As a buddha, he was exempt from this prohibition, so he accepted their challenge and stated that he would perform a miracle at the foot of a mango tree. To keep him from proceeding, his opponents uprooted all the mango trees in the vicinity, leading the Buddha to cause a great tree to grow spontaneously from a mango seed. At the appointed time, the Buddha created a bejeweled walkway in the sky and then proceeded back and forth on it, causing flames to emerge from the upper part of his body and streams of water from the lower part, then water from the upper part and flames from the lower part, then flames from the right side and water from the left side, then from his front and back, right eye and left eye, right ear and left ear, etc. He then created a double of himself (see [MANOMAYAKĀYA](#)), with whom he conversed. It is because of the simultaneous presence of fire and water (and perhaps because of his creation of his doppelgänger) that the event is called the “paired miracle.” After performing the miracle and preaching for sixteen days, the Buddha departed for the heaven of the thirty-three ([TRĀYASTRĪ ŚĀ](#)), where he spent the rains retreat ([VARA](#)) teaching the [ABHIDHAMMA](#) to his mother [MĀYA](#) (who had been reborn as a divinity in the [TU ITA](#)

heaven). This miracle is said to be performed by all buddhas (and only by a buddha) and always in Śrāvastī.

Yamāntaka. (T. Gshin rje gshed; C. Yanmandeja/Daweide mingwang; J. Enmantokuka/Daitoku myōō; K. Yōmmandōkka/Taewidōk myōngwang). In Sanskrit, “Destroyer of Death” (lit. “he who brings an end (antaka) to death (yama)”), closely associated with [BHAIRAVA](#) (“The Frightening One”) and [VAJRABHAIRAVA](#), one of the most important tantric deities. In Tibetan Buddhism, he was one of the three primary [YI DAM](#) of the [DGE LUGS](#) sect (together with [GUHYASAMAJA](#) and [CAKRASA VARA](#)). Yamāntaka is considered to be a fully enlightened buddha, who appears always in a wrathful form. He is depicted both with and without a consort; the solitary depiction, called “sole hero” (ekavīra), is particularly popular. Bhairava also appears in the Hindu tantric pantheon as a wrathful manifestation of the god Śiva. According to Buddhist mythology, [MAÑJUŚRĪ](#), the bodhisattva of wisdom, took the form of the terrifying bull-headed deity in order to destroy the Lord of Death ([YAMA](#)) who was ravaging the country; hence the epithet Yamāntaka (Destroyer of Death). Yamāntaka has nine heads, thirty-four arms, and sixteen legs, each arm holding a different weapon or frightening object, and each foot trampling a different being. Each of these receives detailed symbolic interpretation in ritual and meditation texts associated with Yamāntaka. Thus, his two horns are said to represent the two truths ([SATYADVAJA](#)) of [MADHYAMAKA](#) philosophy: ultimate truth ([PARAMĀRTHASATYA](#)) and conventional truth ([SA V TISATYA](#)). His nine heads represent the nine categories ([NAVA GAPĀVACANA](#)) of Buddhist scriptures. His thirty-four arms, together with his body, speech, and mind, symbolize the thirty-seven “factors pertaining to awakening” ([BODHIPĀK IKADHARMA](#)). His sixteen legs symbolize the sixteen emptinesses ([ŚUNYATĀ](#)). The humans and animals that he tramples with his right foot represent the attainment of the eight accomplishments, viz., supernatural abilities acquired through tantric practice, including the ability to fly, to become invisible, and travel underground. The birds that he tramples with his left foot represent the attainment of the eight powers, another set of magical abilities, including the ability to travel anywhere in an instant and the power to create emanations. His erect phallus represents great bliss, his nakedness means that he is not covered up with obstacles, and his hair standing on end symbolizes his passage beyond all sorrow ([DU KHA](#)). The Yamāntaka root tantras are the *Sarvatathāgata kāyavāgścittak ayamāntantra* (“Body, Speech, and Mind of All Tathāgatas: Black Enemy of Death Tantra”) in eighteen chapters; *Sarvatathāgata kāyavāgścittarakṭayamāntantra* (“Red Enemy of Death Tantra,” in large part, a different version of the same tantra in nineteen chapters); and the important *K ayamārimukhatantra*, also called the “Three Summaries Tantra” (T. *Rgyud sdom gsum*) because it has no chapters. Also included in the cycle is the *Yamāntakakrodhaviṣṭayatantra* (“Victorious Wrathful Yamāntaka Tantra”), a [CARYĀTANTRA](#). Based on these three works, in Tibet, the three varieties of Yamāntaka are called the “red, black, and the frightening” (T. dmar nag ‘jigs gsum) derived from Raktayamāri (Red Enemy of Death), K ayamāri (Black Enemy of Death), and Vajrabhairava.

yāna. (T. theg pa; C. sheng; J. jō; K. sūng). In Sanskrit, “vehicle,” “conveyance”; a common Sanskrit term for any means of transportation (in Pāli materials and in many of the [MAINSTREAM BUDDHIST SCHOOLS](#), the term is generally used in this literal sense). In [MAHĀYĀNA](#) literature, the term takes on great significance in the metaphorical sense of a mode of transportation along the path to enlightenment, becoming a constituent of the term Mahāyāna (“Great Vehicle”) itself. In Mahāyāna [SŪTRAS](#) and [ŚĀSTRAS](#), this rhetorical sense of the term is often put to polemical use, with the followers of the Buddha being placed into three or two vehicles. The three vehicles are the [BODHISATTVAYĀNA](#) or Mahāyāna, the [PRATYEKABUDDHAYĀNA](#), and the [ŚRĀVAKAYĀNA](#). The two vehicles are the Mahāyāna and the [HINAYĀNA](#) (the “lesser vehicle,” or even more disparagingly, “base vehicle” or “vile vehicle”), which subsumes the pratyekabuddhayāna and the śrāvakayāna. Other uses of the term yāna include the [BUDDHAYĀNA](#) and the [EKAYĀNA](#) (“one vehicle”), whose precise relationship to the bodhisattvayāna and the Mahāyāna is discussed in the scholastic literature. Among the Mahāyāna sūtras, the most celebrated expression of the rhetoric of the yānas occurs in the [SADDHARMAPU ĀRIKASŪTRA](#) (“Lotus Sūtra”) where, in the parable of the burning house, a father promises to reward his children with three different carriages (yāna) when in fact there is only a single magnificent carriage. With the rise of tantric Buddhism, the Mahāyāna itself is divided into two, the [PĀRAMITĀYĀNA](#) or “perfection vehicle,” referring to the path to buddhahood involving successive mastery of the perfections ([PĀRAMITĀ](#)) as set forth in the sūtras, and the [MANTRAYĀNA](#) or “mantra vehicle,” referring to the path to buddhahood as set forth in the [TANTRAS](#) (although some scholars have argued that the proper term here is not yāna, but naya, meaning “mode” or “principle”). The tantric teachings are also variously referred to as the [GUHYAMANTRAYĀNA](#) (“secret mantra vehicle”), the [PHALAYĀNA](#) (“fruition vehicle”), and, most famously, as the [VAJRAYĀNA](#) (“diamond vehicle” or “thunderbolt vehicle”).

yang ‘dul gtsug lag khang. (yangdul tsuklakang). In Tibetan, the four “extra-taming temples” or “extra-pinning temples” of [BU CHU](#), [MKHOMTHING](#), [DGE GYES](#), and [PRA DUM RTSE](#) said to have been constructed during the time of the Tibetan king [SRONG BTSAN SGAM PO](#) to pin down the limbs of the demoness (T. srin mo) who was impeding the introduction of Buddhism into Tibet. The [LHASA](#) temple (gtsug lag khang) pins down her heart and the four extra taming temples pin down her right and left elbows and right and left knees.

Yang le shod. (Yanglešhō). An important pilgrimage site south of the Kathmandu Valley in Nepal, sacred to Tibetan and Newar Buddhists as well as to Hindus, although the source and meaning of the name are unclear. According to traditional Buddhist accounts, [PADMASAMBHAVA](#) practiced meditation in a cave here, subdued [NĀGA](#) demons through the practice of [VAJRĀKILĀYA](#), and attained realization of [MAHĀMUDRĀ](#). Hindus relate the site to the avatāra of Vi ũ called Śe a Nārāya a.

Yangqi Fanghui. (J. Yōgi Hōe; K. Yanggi Panghoe) (992–1049). Chinese [CHAN](#) master and patriarch of the [YANGQI PAI](#) collateral line of the [LINJI ZONG](#); one of the two major Linji sublineages, along with the [HUANGLONG PAI](#). Yangqi was a native of Yuanzhou prefecture in present-day Jiangxi province. After studying under various teachers, he visited the Chan master Shishuang Chuyuan (986–1039), himself a successor of Fenyang Shanzhao (947–1024), and became one of Shishuang’s leading disciples. Yangqi was later invited to serve as abbot of the monastery Putong Chanyuan on Mt. Yung’ai. Among his many talented disciples, the most famous is [BAYUN SHOU DUAN](#) (1025–1072). His teachings are recorded in the *Yangqi Fanghui chanshi yulu*, *Yangqi Fanghui chanshi houlu*, and *Yangqi Hui chanshi yuyao*. See also [WU JIAQI ZONG](#).

Yangqi pai. (J. Yōgiha; K. Yanggi p’a). One of the two major branches of the [LINJI ZONG](#) of the [CHAN](#) school, which is listed among the five houses and seven schools ([WU JIAQI ZONG](#)) of the mature Chinese Chan tradition. The school is named after its founder, [YANGQI FANGHUI](#) (995–1049), who taught at Mt. Yangqi in what is now Yuanzhou province. Yangqi was a disciple of Shishuang Chuyuan (986–1039), a sixth-generation successor in the Linji school, who also taught [HUANGLONG HUINAN](#) (1002–1069), the founder of the [HUANGLONG PAI](#) sublineage of the Linji school. The Yangqi lineage flourished under its third-generation successors, Fojian Huiqin (1059–1117), Foyan Qingyuan (1067–1120), and [YUANWU KEQIN](#) (1063–1135), who promoted it among the literati, and it became one of the dominant schools of Song-dynasty Buddhism thanks to the decisive role played by Yuanwu’s disciple [DAHUI ZONGGAO](#) (1089–1163). It was especially within this lineage that the meditative technique of the Chan of investigating the meditative topic or questioning meditation ([KANHUA CHAN](#)) flourished. The Yangqi masters took a different approach to [GONGAN](#) (public case) training, criticizing “lettered Chan” ([WENZI CHAN](#)), a style of Chan developed by Yunmen and Huanglong masters, which gained popularity among the literati officials in the Northern Song period with its polished language and elegant verse explanations of the meaning of the gong’an. Dahui in particular presented the gong’an as a meditative tool for realizing one’s innate enlightenment, not to demonstrate one’s talent in clever repartee or one’s literary prowess; at the same time, he critiqued the approaches of rival Chan schools, criticizing such Huanglong masters as [JUEFAN HUIHONG](#) (1071–1128) for clinging to intellectual and literary endeavors and such [CAODONG ZONG](#) masters as [HONGZHI ZHENGJUE](#) (1091–1157) for clinging to tranquillity and simply waiting for one’s innate enlightenment to manifest itself. The school also produced many gong’an collections, including the [BIYANLU](#) (“Blue Cliff Record”), compiled by Yuanwu Keqin, and the [WUMEN GUAN](#) (“Gateless Checkpoint”), compiled by the seventh-generation successor [WUMEN HUIKAI](#) (1183–1260). The Yangqi lineage was formally introduced to Korea by [TAEGO POU](#) (1301–1382), who studied with the eleventh-generation Yangqi teacher Shiwu Qinggong (1272–1352); some modern Korean monks and scholars argue that the contemporary Korean Sōn tradition should be traced back to Taego and his Yangqi lineage, rather than to [POJO CHINUL](#) (1158–1210). The Yangqi school reached Japan in the thirteenth century through pilgrim monks, including Shunjō (1166–1227), who studied with the Yangqi teacher Meng’an Yuancong (1126–1209), and [NANPO JŌMYŌ](#) (1235–1309), better known by his imperially bestowed title Entsū Daiō Kokushi (“state preceptor,” see [GUOSHI](#)), who studied with the ninth-generation teacher [XUTANG ZHIYU](#) (1185–1269). All Linji lineages in contemporary Japan are affiliated with the Yangqi pai.

Yangshan Huiji. (J. Gyōzan/Kyōzan Ejaku; K. Angsan Hyejōk) (807–883). Chinese [CHAN](#) master and patriarch of the [GUIYANG ZONG](#) [alt. Weiyang zong]. Yangshan was a native of Shaozhou prefecture in present-day Guangdong province. According to his biography, Yangshan’s first attempt to enter the monastery at age fifteen failed because his parents refused to give their required permission. Two years later he cut off two of his fingers as a sign of his resolve to become a monk and became a [ŚRĀMA ERA](#) under the guidance of Chan master Tong (d.u.) of Nanhuasi. After he received his monastic precepts, Yangshan studied the [VINAYAPI AKA](#). Yangshan is said to have received the teachings of the circle diagrams from Danyuan Yingzhen (d.u.), and he later became a disciple of Chan master [GUISHAN LINGYOU](#) after serving him for fifteen years. He later moved to Mt. Yang in Yuanzhou prefecture (present-day Jiangxi province), whence he acquired his toponym, and established a name for himself as a Chan master. Yangshan later moved to Mt. Dongping in his hometown of Shaozhou, where he passed away in the year 883 (alternative dates for his death are 916 and 891). He was posthumously honored with the title Dengxu dashi (Great Master Clear Vacuity) and a purple robe. He was also named Great Master Zhitong (Penetration of Wisdom). His teachings are recorded in the *Yuanzhou Yangshan Huiji chanshi yulu*. The names of the mountains on which Yangshan and his teacher Guishan resided were used in compound to designate their lineage, the Guiyang.

Yangs pa can. (Yangpachen). The monastic residence of the [ZHAWADMAR](#) incarnations in Tibet, founded under the direction of the fourth Zhwa dmar Chos kyi grags pa (Chōkyi Drakpa, 1453–1524) and located near [MTSHUR PHU](#) monastery west of [LHASA](#); it was also known as Thub bstan Yangs pa can (Tuption Yangpachen). After the tenth Zhwa dmar was found guilty of treason, the monastery was converted to [DGE LUGS](#) and renamed Kun bde gling.

Yang Wenhui. (J. Yō Bunkai; K. Yang Munhoe) (1837–1911). Chinese Buddhist layman at the end of the Qing dynasty, renowned for his efforts to revitalize modern Chinese Buddhism. A native of Anhui province, Yang fled from the Taiping Rebellion to Hangzhou prefecture. In 1862, he serendipitously acquired a copy of

the [DASHENG QIXIN LUN](#) (Awakened Faith According to the Mahāyāna) and became interested in Buddhism. In 1878, he traveled to England, where he served at the Chinese Embassy in London, befriending the Japanese Buddhist scholar [NANJŌ BUNYŌ](#) (1849–1927), who helped him to acquire Chinese Buddhist texts that had been preserved in Japan. After his return to China, Yang established a publishing press called the Jingling Kejing Chu and published more than three thousand Buddhist scriptures. In 1893, [ANAGĀRIKA DHARMAPĀLA](#) visited Yang in Shanghai. In 1894, Yang and the British missionary Timothy Richard translated the [DASHENG QIXIN LUN](#) into English. In 1907, the Jingling Kejing Chu began to publish primers of Buddhism in various languages. In 1910, Yang also founded the Fojiao Yanjiu Hui (Buddhist Research Society), where he regularly lectured until his death in 1911.

Yanshou. (C) (). See [YONGMING YANSHOU](#).

yantra. (T. 'khrul 'khor; C. tuxiang; J. zuzō; K. tosang). In Sanskrit, “diagram” or “instrument.” Although the term can have many meanings in Sanskrit, within the Buddhist tradition it is most commonly used to refer to a picture made of images and/or geometric shapes, usually triangles, which are repeated in such a way that they form a pattern. Such magical diagrams are used in tantric rituals and meditations to depict in visual form the power of the invoked deities, representing the universe, or certain spiritual or cosmological powers in the universe. A yantra is commonly understood as rendering through lines and colors the sacred sound of a [MANTRA](#). Yantras are used for such purposes as gaining magical protection, worshipping tantric deities, or facilitating meditation. The term is in some cases interchangeable with a [MA ĀLA](#), although there are some differences: a yantra is typically small in size while a ma āla is variously sized and may even be large enough for a practitioner to enter during the rituals; a yantra, except for those under temple statues, is often portable, while a ma āla is not; and deity figures rarely appear on a yantra, while they are common on a ma āla. A yantra can be two- or three-dimensional and may range from such simple geometric designs as dots or triangles to more elaborate temple structures. Some texts suggest that merely seeing a ma āla or drawing or imagining a yantra also brings benefits. Yantra tattooing (Thai, yak sant) is a common practice in Southeast Asia among both monks and laity. It is generally performed by specialist monks using traditional needles.

yaoshi. (J. yakuseki; K. yaksök). In Chinese, lit. “herbal medicine (yao) and stone probes” (shi); “medicine stone,” the Chinese Buddhist euphemism for “supper.” The [VINAYA](#) restricts monks and nuns from eating after noon; anytime afterwards is an “improper time.” There are waivers allowed for certain types of “medicine,” however, which may legally be consumed. To circumvent this prohibition against eating after noon, the Chinese referred to food consumed after noon as “medicine,” and an evening meal therefore euphemistically came to be referred to as a “medicine stone.”

Yaśas. (P. Yaśa; T. Grags pa; C. Yeshe; J. Yasha; K. Yasa). An early [ARHAT](#) disciple of the Buddha. The son of a wealthy merchant of Vārāṇasī, Yaśas was brought up in luxury. He had three mansions, one for the winter, one for the rainy season, and one for the summer, and was attended by a troupe of female musicians. Once, he happened to awake in the middle of the night and witnessed his attendants sleeping in an indecorous manner. Greatly disturbed, he put on a pair of golden sandals and wandered in the direction of the Deer Park ([M. GADĀVA](#)) where the Buddha was dwelling, exclaiming, “Alas, what distress, what danger.” The Buddha saw him approach and, knowing what he was experiencing, called out to him, “Yaśas, come. Here there is neither distress nor danger.” Yaśas approached the Buddha, took off his golden sandals, and sat down beside him. The Buddha preached a graduated discourse ([ANUPUBBIKATHA](#)) to him, at the conclusion of which Yaśas became a stream-enterer ([SROTĀPANNĀ](#)). He thus became the Buddha’s sixth disciple and the first who had not known him prior to his achievement of enlightenment (as had his first five disciples, the bhaddravargīya or [PAÑCAVARGIKA](#)). Yaśas was also the first person to become an enlightened lay disciple ([UPĀSĀKA](#)), although he ordained a few minutes later. Later, Yaśas’s father, who had come searching for his son, arrived at the Buddha’s residence. The Buddha used his magical powers to make Yaśas invisible and, inviting his father to sit, preached a discourse to him. Yaśas’s father also became a stream-enterer, while Yaśas, who overheard the sermon from his invisible state, became an arhat. When the Buddha made Yaśas visible to his father, he informed him that, since his son was now an arhat, it would be impossible for him to return home to a householder’s life and he would have to become a monk. Yaśas thus became the sixth member of the Buddha’s monastic order. Yaśas accompanied the Buddha to his father’s house the next day to receive the morning meal. After the meal, the Buddha preached a sermon. Yaśas’s mother, [SUJĀTĀ](#), and other members of the household became stream-enterers, his mother thus becoming the first female disciple ([UPĀSIKĀ](#)) of the Buddha and the first woman to become a stream-enterer. At that time, fifty-four of Yaśas’s friends also were converted and entered the order of monks, swelling its ranks to sixty members. It was at this time that the Buddha directed his disciples to go forth separately and preach the dharma they had realized for the welfare and benefit of the world. ¶ There was a later monk, also named Yaśas, whose protest led to the second Buddhist council ([COUNCIL, SECOND](#)), held at [Vaiśālī](#). Some one hundred years after the Buddha’s death, Yaśas was traveling in Vaiśālī when he observed the monks there receiving gold and silver as alms directly from the laity, in violation of the [VINAYA](#) prohibition against monks touching gold and silver. He also found that the monks had identified ten points in the vinaya that were identified as violations but that they felt were sufficiently minor to be ignored. The ten violations in question were: (1) carrying salt in an animal horn; (2) eating when the shadow of the sundial was two fingerbreadths past noon; (3) after eating, traveling to another village to eat another meal on the same day; (4) holding several assemblies within the same boundary ([SĪMA](#)) during the same fortnight; (5) making a monastic decision with an incomplete assembly and subsequently receiving the approval of the absent monks; (6) citing precedent as a justification to violate monastic procedures; (7) drinking milk whey after mealtime; (8) drinking unfermented wine; (9) using mats with a fringe; and (10) accepting gold and silver. Yaśas told the monks that these were indeed violations, at which point the monks are said to have offered him a share of the gold and silver they had collected. When he refused the bribe, they expelled him from the order. Yaśas sought the support of several respected monks in the west, including Sambhūta, [SĀ AKAVASIN](#), and [REVATA](#). Together with other monks, they went to Vaiśālī, where they convened a council ([SA GĪTĪ](#)) at which Revata submitted questions about each of the disputed points to Sarvagāmin, the eldest monk of the day, who is said to have been a disciple of [ĀNANDA](#). In each case, he said that the practice in question was a violation of the vinaya. Seven hundred monks then gathered to recite the vinaya. Those who did not accept the decision of the council held their own convocation, which they called the [MAHĀSĀ GHĪKA](#) or “Great Assembly,” the rival group coming to be called the [STHAMRANIKĀYA](#), or “School of the Elders.” This event is sometimes referred to as “the great schism,” since it marks the first permanent schism in the order ([SA GHABHEDA](#)).

Yasenkanna. [alt. Yasenkanwa] (). In Japanese, “Idle Talk on a Night Boat”; a short meditative text composed by the [ZEN](#) master [HAKUIN EKAKU](#) in the [RINZAIŠŪ](#), and his most popular piece. The *Yasenkanna* was first published in 1757 and has remained in print ever since. The title seems to be an allusion to the popular saying, “night boat on the Shirakawa River” (Shirakawa yasen), which refers to the story of a man from the countryside and the lies he tells about his trip to Kyōto. Hakuin wrote the *Yasenkanna* to offer beginners of meditation an expedient technique for overcoming “Zen illness” (zenbyō) and fatigue. The *Yasenkanna* details Hakuin’s own bout with this illness and his miraculous recovery with the help of a secret technique known as inner discernment or visualization (naikan), which he purports to have learned from the obscure hermit Hakuyū. Different versions of this story also appear in Hakuin’s other writings, such as the *Kanzanshi sendai kimon*, *Orategama*, and *Itsumadegusa*.

Yaśodharā. (P. Yaśodharā; T. Grags 'dzin ma; C. Yeshutuolu; J. Yashudara; K. Yasudara). The Sanskrit proper name of wife of the prince and [BODHISATTVA](#), [SIDDHARTHA GAUTAMA](#), and mother of his son, [RĀHULA](#) (she is often known in Pāli sources as Rāhulamātā, Rāhula’s Mother); she eventually became an [ARHAT](#), who was declared by the Buddha to be foremost among nuns possessing the six superknowledges ([ABHIJĀNA](#); P. abhiññā). According to Pāli accounts, she was born on the same day as Prince Gautama and had skin the color of gold, hence another of her epithets, Bhaddā Kaccānā. She is also referred to in Pāli commentaries as Bimbā. Yaśodharā married the prince when she was sixteen, after he had proved his superior skill in archery and other manly arts. She was chief consort in a harem of forty thousand women. On the day her son, Rāhula, was born, the prince renounced the world and abandoned his wife, child, and palace to become a mendicant. According to another version of the story, Rāhula was conceived on the night of the prince’s departure and was not born until the night of the prince’s enlightenment, six years later. Yaśodharā was so heartbroken at her husband’s departure that she took up his ascetic lifestyle, eating only one meal per day and wearing the yellow robes of a mendicant. When the Buddha returned to his former palace in [KAPILAVASTU](#) after his enlightenment, Yaśodharā was allowed the honor of worshipping him in the manner she saw fit. After seven days, as the Buddha was about to depart, Yaśodharā instructed her son Rāhula to ask for his inheritance. In response, the Buddha instructed [ŚĀRIPUTRA](#) to ordain his son. As Rāhula was the first child to be admitted to the order, he became the first Buddhist novice ([ŚRĀMA ERA](#)). Yaśodharā and Rāhula’s grandfather [SIDDHODANA](#) were greatly saddened at losing the child and heir to the order; hence, at Siddhodana’s request, the Buddha passed a rule that, thenceforth, no child should be ordained without the consent of its parents. When later the Buddha allowed women to enter the order, Yaśodharā became a nun ([BHIK U Ī](#)) under [MAHĀPRAJĀPATĪ](#), who was chief of the nuns’ order and the Buddha’s stepmother. Yaśodharā cultivated insight and became an arhat with extraordinary supranormal powers. She could recall her past lives stretching back an immeasurable age and one hundred thousand eons without effort. The [JĀTAKA](#) records numerous occasions when Yaśodharā had been the wife of the bodhisattva in earlier existences. Also mentioned as the wife of the Buddha is Gopā, although it is unclear whether this refers to another wife or is another name for Yaśodharā.

Yaśomitra. (T. Grags pa bshes gnyen) (fl. c. late sixth century). Indian [ABHIDHARMIKA](#) scholastic, probably affiliated with the [SAUTRĀNTIKA](#) school, and author of the [SPHŪ ĀRTHĀ-ABHIDHARMAKŌŚAVĀKHYĀ](#), an important commentary on [VASUBANDHU](#)’s [ABHIDHARMAKŌŚABHĀ YA](#). His commentary is noted for its detail and clarity, and for its attempt to identify the adherents of the various doctrinal positions mentioned by Vasubandhu. The text is preserved in both Sanskrit and Tibetan. Yaśomitra’s text was among the first [ABHIDHARMA](#) works to be studied in Europe; it was one of the Sanskrit manuscripts sent by [BRIAN HOUGHTON HODGSON](#) from Kathmandu to Paris, where it was read by [EUGÈNE BURNOUF](#), who discusses it in his *Introduction à l’histoire du Bouddhisme indien* (1844).

Yasutani Hakuun. () (1885–1973). Japanese [ZEN](#) teacher in the [SŌTŌSHŪ](#), who was influential in the West. Born in Japan, Yasutani attended public school until he entered a Sōtō Zen seminary at the age of thirteen. Yasutani was trained as a teacher and taught elementary school. He was married at the age of thirty and raised five children before turning to a life dedicated to the work of a Sōtō priest. He met Sogaku Harada in 1924 while lecturing in Tōkyō. Yasutani began intensive study with Harada roshi and dedicated his life to teaching the dharma to laypeople. Yasutani organized a group called the Sanbō Kyōdan (Fellowship of the Three

Jews, which became independent of the Sōtō school in 1954. Yasutani was the teacher of [PHILIP KAPLEAU](#), who studied with him for eight years, and maintained a close relationship with him until 1967. Kapleau's *The Three Pillars of Zen* was based heavily on Yasutani's teachings. Yasutani traveled to the United States for the first time at the age of seventy-seven, three years after [SHUNRYŪ SUZUKI](#) arrived. For seven years, Yasutani taught Zen to many laypeople in the USA and, although he had prepared to live somewhat permanently in the country, a tuberculosis test prevented him from receiving a permanent visa. In his later years, Yasutani continued to travel in the United States as well as in India. He preferred to teach Zen in a nonmonastic environment. He died in Kamakura in 1973.

Yatana Htut-hkaung zedi. The Yatana Htut-hkaung Pagoda (Burmese, [JEDI](#); P. cetī; S. [CATYA](#)) is located on Min-wun Hill in the northern part of the Sagaing Hills in Upper Burma (Myanmar). It was built in 1315CE by Princess Soe Min-gyi, the daughter of Sagaing's founder, King Athinkaya Saw-yun. Over the course of time, the neighboring village, along with its monastery and line of [SAYADAMS](#) (abbots), came to be known as Htut-hkaung. One such abbot was Htut-hkaung Sayadaw, who flourished in the nineteenth century, was greatly respected by King [MINDON](#) (r. 1853–1878) for his learning and piety. The king built for the sayadaw a famous monastery named Mahādharmika Kyaung where he taught scripture and meditation to many hundreds of monks and nuns. This sayadaw was a prolific writer, and his catechisms are famous in Burmese literature. He received many titles from the King Mindon and was believed by some to have been an arahant (S. [ARHAT](#)).

yathābhūtajñānadarśana. (P. yathābhūtañā adassana; C. rushi zhijian; J. nyojitsu chicken; K. yōsil chigyōn). In Sanskrit, “knowledge and vision that accord with reality”; a crucial insight leading to deliverance (VMUKTI), which results in dispassion toward the things of this world because of seeing things as they actually are: i.e., as impermanence ([ANITYA](#)), suffering ([DU KHA](#)), and nonself ([ANĀTMAN](#)). “Knowledge and vision (jñānadarśana)” is usually interpreted to suggest the direct insight into things “as they are” (yathābhūta), meaning these three marks of existence ([TRILAKA](#)), or sometimes the [FOUR NOBLE TRUTHS](#). Yathābhūtajñānadarśana is presumed to be closely related to wisdom ([PRAJÑĀ](#)), but with one significant difference: yathābhūtajñānadarśana is the first true insight, but it is intermittent and weak, while prajñā is continuous and strong. Seeing things as they are, however, is intense enough that the insight so gleaned is sufficient to transform an ordinary person ([P. THAGJANA](#)) into an [ĀRYA](#). ¶ In the *Upaṇisāṣutta* of the [SA YUTTANIKĀYA](#), the standard twelvefold chain of dependent origination ([PRAṬṬYASAMUTPĀDA](#)) is connected to an alternate chain that is designated the “supramundane dependent origination” (P. lokuttara-pa iccasamuppāda; S. lokottara-praṭṭyasamutpāda), which outlines the process leading to liberation and prominently includes the knowledge and vision that accord with reality. Here, the last factor in the standard chain, that of old age and death ([JARĀMARAṬA](#)), is substituted with suffering (P. dukkha; S. [DU KHA](#)), which in turn becomes the first factor in this alternate series. According to the *Nettipakaraṇa*, a Pāli exegetical treatise, this chain of supramundane dependent origination consists of: (1) suffering (P. dukkha; S. du kha), (2) faith (P. saddhā; S. [ŚRADDHĀ](#)), (3) delight or satisfaction (P. pāmojja; S. prāmodya), (4) rapture or joy (P. pīti; S. [PRĪTĪ](#)), (5) tranquility or repose (P. passaddhi; S. [PRAŚRADDHĪ](#)), (6) mental ease or bliss ([SUKHA](#)), (7) concentration ([SAMĀDHI](#)), (8) knowledge and vision that accord with reality (P. yathābhūtañā adassana; S. yathābhūtajñānadarśana), (9) disgust (P. nibbidā; S. [NIRVEDA](#)), (10) dispassion (P. virāga; S. [VIRĀGYA](#)), (11) liberation (P. vimutti; S. VMUKTI), and (12) knowledge of the destruction of the contaminants (P. āsavakkhayañā; S. āsavak ayajñāna; see [ASRAVAKĀYA](#)). The *Kimatthiyasutta* of the [A GUTTARANIKĀYA](#) gives a slightly different version of the first links, replacing suffering and faith with (1) observance of precepts (P. kusalasīla; S. kuśalaśīla) and (2) freedom from remorse (P. avippa isāra; S. avipratīṣāra). In both formulations, yathābhūtajñānadarśana arises as a result of the preceding factor of meditative concentration (samādhi); it is regarded as the specific awareness ([JÑĀNA](#)) of the nature of reality, which is seen ([DARŚANA](#)) vividly and directly. In this context, yathābhūtajñānadarśana is essentially synonymous with insight ([VIPAŚYANA](#)). As this chain of transcendental dependent origination is sometimes interpreted, the stage of faith (P. saddhā; S. śraddhā) is made manifest through generosity ([DĀNA](#)) and observing precepts ([ŚĪLA](#)), which frees the mind from feelings of remorse and guilt (avipratīṣāra). The stage of delight or satisfaction (prāmodya) refers to a satisfied or relaxed state of mind, which is freed from any mental disturbances that might prevent concentration. The stages of rapture (prīti), bliss (sukha), and concentration (samādhi) are factors associated with the four levels of meditative absorption ([DHYĀNA](#)). The knowledge and vision that accord with reality arise in dependence on the preceding samādhi; it is able to destroy the afflictions ([KLEŚA](#)), rather than simply suppress them, as occurs in the state of concentration, and thus leads to liberation from [SA SĀRA](#). The fact that samādhi provides a basis for seeing things “as they are,” which generates an insight that can bring about liberation, demonstrates the explicitly soteriological dimensions of concentration in a Buddhist meditative context. ¶ In Pāli sources, such as the [VSUDDHIMAGGA](#), yathābhūtajñānadarśana is the fifteenth of eighteen principal types of superior insight (P. mahāvippassanā), which liberate the mind from delusions regarding the world and the self. The eighteen insights are contemplations of: (1) impermanence (aniccānupassanā); (2) suffering (dukkhānupassanā); (3) nonself (anattānupassanā); (4) aversion (nibbidānupassanā); (5) dispassion (virāgānupassanā); (6) extinction (nirodhānupassanā); (7) abandoning (pa inissaggānupassanā); (8) waning (khayānupassanā); (9) disappearing (vayānupassanā); (10) change (viparī āmānupassanā); (11) signlessness (animitānupassanā); (12) wishlessness (appa ihitānupassanā); (13) emptiness (suññatānupassanā); (14) advanced understanding into phenomena (adhipaṇṇādharmavipassanā); (15) knowledge and vision that accord with reality (yathābhūtañā adassana); (16) contemplation of danger (ādīnavānupassanā); (17) contemplation involving reflection (pa isa khānupassanā); and (18) contemplation of turning away (viva anānupassanā). The counterparts which are overcome through these eighteen insights are: (1) the idea of permanence, (2) the idea of pleasure, (3) the idea of self, (4) delighting, (5) greed, (6) origination, (7) grasping, (8) the idea of compactness, (9) the accumulation of action (kamma), (10) the idea of lastingness, (11) signs, (12) desire, (13) misinterpretation, (14) misinterpretation due to grasping, (15) misinterpretation due to confusion, (16) misinterpretation due to reliance, (17) nonreflection or thoughtlessness, (18) misinterpretation due to entanglement.

yathābhūtaparijñāna. (T. ji lta ba mkhyen pa'i ye shes). An alternate term for [YATHĀVADBHĀVIKĀJĀJÑĀNA](#) (knowledge of the mode).

yathāvadbhāvikajñāna. (T. ji lta ba mkhyen pa'i ye shes; C. ruli zhi; J. nyorichi; K. yōri chi). In Sanskrit, lit. “knowledge of the mode”; a buddha's knowledge of the single mode of being of the universe. This type of knowledge is typically mentioned in conjunction with the “knowledge of the multiplicities” ([YĀVADBHĀVIKĀJĀJÑĀNA](#)), a buddha's knowledge of each of the phenomena of the universe in its specificity. Only a buddha possesses these two knowledges and possesses them simultaneously; thus, only he is able to perceive all of the various phenomena of the universe as well as their ultimate nature. This joint awareness is referred to as the simultaneous knowledge of the two truths ([SATYADVAYA](#)).

yāvadbhāvikajñāna. (T. ji snyed pa mkhyen pa'i ye shes; C. ruliang zhi; J. nyoryōchi; K. yōryang chi). In Sanskrit, lit., “knowledge of the multiplicities” or “knowledge of the varieties”; a buddha's knowledge of each of the phenomena of the universe in its specificity. This type of knowledge is typically mentioned in conjunction with a buddha's “knowledge of the mode” ([YATHĀVADBHĀVIKĀJĀJÑĀNA](#)), which understands the single mode of being of the universe. Only a buddha possesses these two knowledges and possesses them simultaneously; thus, only he is able to perceive all of the various phenomena of the universe as well as their ultimate nature. This joint awareness is referred to as the simultaneous knowledge of the two truths ([SATYADVAYA](#)).

yavana. (T. yol ba; C. biandi; J. henji; K. pyōnji). In Sanskrit (from Greek Ionian), “peripheral” or “outlying regions”; referring to the regions beyond the civilizing influences of Buddhism and higher spiritual culture. The term was used to designate Greeks (Ionians) and later even Arab Muslims. In Buddhist cosmology, the term was used to designate regions north and west of India proper, which are inhabited by illiterate, barbaric peoples hostile to Buddhism. The birth into a “peripheral region” is considered to be one of the “insuperable difficulties” (see [AKA](#)) to the attainment of enlightenment in the present lifetime. See also [BIANDI](#).

Yazawin-kyaw. In Burmese, “Celebrated Chronicle”; the traditional title given to the [MAHĀSAMMATAVA SA](#), the oldest extant yazawin, or Burmese (Myanmar) royal chronicle. It was completed in two installments by the monk MAHĀSĪLAVA SA of [AVA](#), the first completed in 1502, the second in 1520. The chronicle is written in mixed Burmese and Pāli and contains the earliest surviving examples of the Burmese nissaya (Pāli to Burmese word-by-word translation) style of writing. The text follows roughly the outline of the [MAHĀVA SA](#) and devotes most of its coverage to the history of Buddhist dynasties in India and Sri Lanka. Only the last seventh of the work concerns the history of Burma from the time of the Buddha through the [PAGAN](#) (Bagan) and Ava periods. The text contains the assertion that the Buddhism of Burma was established by the elder Mahāpuṇa during the lifetime of the Buddha and hence is older and longer-lived than that of Sri Lanka. The Yazawin-kyaw concludes with an account of the meritorious deeds of Shwe-nan-kyaw-shin (r. 1502–1527), the king of Ava at the time the work was composed.

ye dharmā. In Sanskrit, lit. “those phenomena...”; the opening words of perhaps the most famous synopsis of the teachings of Buddhism; the full declaration in Sanskrit is “ye dharmā hetuprabhavā hetu te ā tathāgato hy avadat te ā ca yo nirodha, eva vādī mahāśrama a ”: “Of those phenomena produced through causes, the [TATHĀGATA](#) has proclaimed their causes ([HETU](#)) and also their cessation ([NIRODHA](#)). Thus has spoken the great renunciant ([ŚRAMA A](#)).” This statement plays a central role in the story of [ŚĀRIPUTRA](#)'s conversion. Śāriputra, who was a disciple of the agnostic teacher [SĀNJAYA VĀIRĀ ĪPUTRA](#), encountered one of the Buddha's five original disciples ([PAÑCAVARGIKA](#)), [ĀSVAJIT](#). Noticing Āsvajit's serene countenance, Śāriputra asked him who his teacher might be, to which Āsvajit replied that his teacher was the Buddha. When Śāriputra asked what it was that the Buddha taught, Āsvajit demurred, explaining that he had only recently renounced the life of a householder and was unable to present the teaching in full. Śāriputra asked Āsvajit to give him the gist of the Buddha's teaching. Āsvajit replied with this famous ye dharmā line. Immediately upon hearing these words, Śāriputra is said to have gained the rank of stream-enterer ([SROTAĀPANNA](#)), the first stage of sanctity ([ĀRYAMĀRGA](#)). He then asked the whereabouts of the Buddha and was ordained, going on to become the disciple most renowned for his wisdom. Āsvajit's précis points to the central importance of causality in the Buddha's teachings and provides a kind of summary of the [FOUR NOBLE TRUTHS](#). The Buddha has identified the causes (such as [KARMA](#) and [KLEŚA](#)) of those things that have causes (such as suffering, S. [DU KHA](#)), and he has also identified their cessation in the experience of [NIRVĀ A](#). What may therefore have begun as a simple statement to mollify an eager questioner eventually became a slogan and ultimately a [MANTRA](#), the very recitation of which was said to produce apotropaic powers. Like a mantra, the words of the ye dharmā slogan were often transcribed phonetically, rather than translated, into various languages across Asia. These words were also often written on strips of paper and enshrined in [STÜPAS](#); they thus became a dharmaverse relic ([ŚĀRĪRA](#)), serving as a substitute for a bodily relic of the Buddha.

Yellow Hats. (C. huangmao 黃帽). A popular designation in both European languages and Chinese for the [DGE LUGS](#) sect of Tibetan Buddhism, whose monks do

independent yellow hats. Although the term *yellow hat*, as “yellow hat,” does occur occasionally in Tibetan as a term of self-appellation for the Dge lugs, the Western and Chinese division of major Tibetan sects into Yellow Hats, [RED HATS](#), and [BLACK HATS](#) has no corollary in Tibetan Buddhism and should be avoided.

Yel pa bka' brgyud. (Yelpa Kagyü). One of the four major and eight minor subsects of the [BKA BRGYUD](#) sect of Tibetan Buddhism ([BKA BRGYUD CHE BZHI CHUNG BRGYAD](#)), originating with Ye shes brtsegs pa (b. 1134), a student of Bka' brgyud hierarch [PHAG MO GRU PARDORJE RGYAL PO](#). After a period of decline, it was revived by [CHOS KYI 'BYUNG GNAS](#) but was latter absorbed into [KARMABKA BRGYUD](#).

ye shes. (yeshe). In Tibetan, lit. “primordial knowledge,” with ye meaning “original” or “primordial.” The term renders the Sanskrit [Jñāna](#); in the [RNYING MA](#) sect of Tibetan Buddhism, it refers to the originally pure mind. See [RIG PA](#); [Jñāna](#).

Ye shes mtsho rgyal. (Yeshe Tsogyal) (c. 757–817). A renowned female Tibetan Buddhist master, generally regarded as a wisdom [Ākinī](#) and venerated especially as consort and disciple of the Indian adept [PADMASAMBHAVA](#). Ye shes mtsho rgyal was born into an aristocratic family in central Tibet, south of [LHASA](#). According to traditional biographical accounts, a nearby lake miraculously swelled at the time of her birth and she was thus given the name “victor of the lake” (mtsho rgyal). This lake, near the cave complex of [SGRAG YANG RDZONG](#), is believed to still hold Ye shes mtsho rgyal's life essence (bla). Her remarkable beauty even at a young age drew numerous suitors, but rather than submit to a marriage arranged by her father, she fled in order to undertake religious practice. She spent a brief period of time in the court of the Tibetan ruler [KHRI SRONG LDE BTSAN](#) (perhaps as one of his wives), after which she met Padmasambhava and was accepted as one of his chief disciples. In addition to receiving and practicing numerous tantric instructions, Ye shes mtsho rgyal helped to conceal many of Padmasambhava's treasure teachings ([GTER MA](#)), many of which are said to be her transcriptions of Padmasambhava's teachings. She is regarded as the first Tibetan to achieve buddhahood in a single lifetime. As a wisdom [ākinī](#), she is also known as Bde chen rgyal mo (“Great Bliss Queen”).

Ye shes 'od. (Yeshe Ō) (947–1024). A Tibetan king of the western region of [GU GE](#) credited with inspiring a revival of Buddhism that initiated the latter dissemination ([PHYI DAR](#)) of Buddhism in Tibet. He decried the state of Tibetan Buddhist practice, especially the practice of [TANTRA](#), in a famous ordinance (bka' shog), complaining that people were engaging in murder and illicit sex under the guise of the tantric practices of “liberation” (grol) and “union” (sbyor). According to a famous story, Ye shes 'od was captured by a Gar log Turk chieftain while seeking to raise the capital necessary to invite [ATĪṢA DĪPA KARASĪRĪJñĀNA](#) to Tibet. He then sacrificed his own life by commanding his grandnephew [BYANG CHUB 'OD](#) to use whatever gold had been accumulated not as a ransom for his own release, but rather as an offering to the Indian scholar. Atīṣa was so moved by the king's act of selflessness that, despite his previous declinations, he agreed to make the journey north. Traditional accounts also suggest that Ye shes 'od sponsored a group of twenty-two young scholars to study Indian languages and tantric literature in Kashmir (see [KASHMIR-GANDHĀRA](#)), of whom only two survived: the translators [RIN CHEN BZANG PO](#) and [RINGOG LEGS PAI SHES RAB](#). Both the story of his noble death for the sake of Atīṣa's invitation and the story of his sponsorship of Rin chen bzang po present difficulties in chronology, suggesting that they are embellishments. He is also credited with inspiring the establishment of numerous religious institutions, including [THOLING](#), [NYAR MA](#), and [TAPHO](#). He is also known as Lha bla ma (Lha Lama).

Ye shes sde. (Yeshe De) (fl. late eighth/early ninth century). A Tibetan translator ([LOTSĀBA](#)) during the early dissemination ([SNGADAR](#)) of Buddhism in Tibet; a native of Ngam shod of the Sna nam clan, also referred to by the clan name Zhang. He is said to have been a disciple of both [PADMASAMBHAVA](#) and [ŚRĪSĪ HA](#), from whom he received tantric instructions, especially in the [SEMS SDE](#) (mind class) of [RDZOGS CHEN](#). He collaborated with some fifteen Indian scholars, among them Jinamitra, Śilendrabodhi, and Dānaśīla, on the translation of as many as 347 different works, if the later canonical records are correct. His translations includes upwards of 163 Mahāyāna sūtras, among them the [PRAJñĀPĀRAMITĀ AVATA SAKASŪTRA](#), and [RATNAKŪ ASŪTRA](#) collections, translations of the [YOGĀCĀRABHŪM](#) and other basic [MADHYAMAKA](#) and [YOGĀCĀRA](#) treatises, as well as a number of works by his contemporaries [ŚĀNTARAK ĪTA](#) and [KAMALASĪLA](#). He is also credited with the translation of tantric works that would come to be known as the “old translations” used by the [RNYING MA](#) sect. He is said to have been a practitioner of the [VAJRAKĪLAYA](#) tantras. He is also author of a number of original compositions, among them the *Lta bai khyad par* (“Differences in Views”), preserved in both a [BSTAN 'GYUR](#) and [DUNHUANG](#) version, which divides the Madhyamaka school into Sautrāntika-Madhyamaka and Yogācāra-Madhyamaka. See also [DPAL BRTSEGS](#); [KLU'IRGYAL MTSHAN](#).

yi bao. (C) (). See [ER BAO](#).

yi dam. In Tibetan, a term often translated as “meditational deity” or “tutelary deity.” In the practice of Buddhist tantra, it is the enlightened being, whether male or female, peaceful or wrathful, who serves as the focus of one's [SĀDHANA](#) practice. One is also to visualize one's tantric teacher ([VAJRĀCĀRYA](#)) as this deity. The term is of uncertain origin and does not seem to be a direct translation of a Sanskrit term, although *ī adevatā* is sometimes identified with the term. The etymology that is often given sees the term as an abbreviation of *yid kyi dam tshig*, meaning “commitment of the mind.” Traditionally, the yi dam is selected by throwing a flower onto a [MA ALA](#), with the deity upon whom the flower lands becoming the “chosen deity.” However, when one receives a tantric initiation, the central deity of that tantra typically becomes the yi dam, with daily practices of offering and meditation often required. Through the propitiation of the deity and recitation of [MANTRA](#), it is said that the deity will bestow accomplishments ([SIDDHI](#)). In the practice of [DEVATĀYOGA](#), one meditates upon oneself as that deity in order to achieve buddhahood in the form of that deity. The yi dam is considered one of the three roots (rtsa gsum) of tantric practice, together with the [GURU](#) and the [ĀKINĪ](#); the guru is considered to be the source of blessings; the yi dam, the source of accomplishments; and the [ākinī](#), the source of activities. These three roots are considered the inner refuge, with the Buddha, [DHARMA](#), and [SA GHA](#) being the outer refuge, and the channels ([NĀ Ī](#)), winds ([PRĀ A](#)), and drops ([BINDU](#)) being the secret refuge.

yidashi. (). In Chinese, the “one great matter.” See [DASHI](#).

Yifu. (J. Gifuku, K. Ūibok) (661–736). Chinese [CHAN](#) master associated with the Northern school ([BEI ZONG](#)) of the early Chan tradition. Yifu was a native of Luzhou prefecture in present-day Shanxi province, who became a student of the lay master [DU FEI](#) (d.u.), the author of the [CHUAN FABAO JI](#), at Fuxiansi in Luoyang. After Yifu received the full monastic precepts in 690, he went to the monastery of [YUQUANSI](#) in Jingzhou prefecture to study with the eminent Chan master [SHENXIU](#). Yifu became Shenxiu's close disciple and continued to study under him probably until his master's death. Later, Yifu moved to the monastery of Huagansi on [ZHONGNANSHAN](#), where he lived for about twenty years. During his stay at Huagansi, Yifu attracted a large following. In 722, he moved again to the grand monastery of [DADIENSI](#) in Chang'an, where he was patronized by the upper echelons of Tang Chinese society. At the request of Emperor Xuanzong (r. 712–756), Yifu returned once again to Luoyang and resided at the monasteries of Fuxiansi and Nanlongxingsi. He received the posthumous title Chan Master Dazhi (Great Wisdom).

yi ge brgya pa. (yi ge gyapa). In Tibetan, “hundred-syllable [MANTRA](#)”; term used to describe a number of lengthy [MANTRAS](#), most commonly that of [VAJRASATTVA](#), recited as part of a Tibetan tantric confession and purification practice. This is one of the preliminary practices ([SNGON 'GRO](#)) of the [RNYING MA](#) sect of Tibetan Buddhism, involving one hundred thousand repetitions of the Vajrasattva mantra.

yiji. (J. yuige; K. yuge). In Chinese, “bequeathed verse” or “death verse”; a verse (C. jì; lit. S. [GĀTHĀ](#)) left by eminent monks and nuns, especially in the [CHAN](#) school, just before the moment of death, as a final expression of their enlightenment experience; also called a “taking leave of the world hymn” (cishi song) or, especially in the Korean tradition, a “moment of death gāthā” (imjongge). The verse may be either recited or written and is left as the master's last bequeathed teaching immediately before he passes away, often delivered as part of a final sermon. The final instructions of a buddha or a monk for the edification of his disciples are referred to as a “bequeathed teaching” (yijiao; see also [YIJIAO JING](#)), and the tradition of specifically bequeathing a verse as part of this final instruction is thought to have originated in the Tang-dynasty Chan tradition. Such bequeathed verses usually consisted of four lines of four, five, or seven Sinographs per line and thus are similar in format to other types of verses found within the Chan tradition, such as an “enlightenment hymn” (C. wudao song), the verse recited by a student upon achieving enlightenment, and “dharma-transmission gāthā” (C. chuanfa ji), the verse bestowed on a dharma successor as an authorization to teach. As an example of such a bequeathed verse, [HONGZHI ZHENGJUE](#) (1091–1157), a well-known teacher in the [CAODONG ZONG](#), is said to have written the following gāthā just before his death: “An illusory fantasy and a flower in the sky ([KHAPU PA](#))./ Are these sixty-seven years,/ A white bird fades into the mist/ The autumnal waters merge with the sky.” Not all renowned Chan masters left yiji and others derided the practice. The yiji of [DAHUI ZONGGAO](#) (1089–1163), the influential [LINJI ZONG](#) master and a contemporary of Hongzhi, expressed ironically his indifference to yiji: “Birth is thus./ Death is thus./ Verse or no verse./ What's the fuss?” In Japan, handwritten death verses were treasured as precious calligraphic art and a virtual relic of the deceased master. They were thus often hung in the abbot's quarters (J. hōjō, C. [FANGZHANG](#)) or in the retirement cloisters.

Yijiao jing. (J. Yuikyōgyō; K. Yugyo kyōng). In Chinese, “Scripture on the Bequeathed Teachings”; also known as *Foshuo banniepan jiaojie jing* (“Scripture on the Admonishments Taught by the Buddha [before] his [PARINIRVĀ](#)”) and *Fo yijiao jing* (“Scripture on the Teachings Bequeathed by the Buddha”). Sanskrit and Tibetan versions of this text are not known to have existed. The Chinese translation of this text is attributed to [KUMĀRAJĪVA](#), but the text is now widely assumed to be an indigenous Chinese Buddhist scripture (see [APOCRYPHA](#)). The sūtra is set against the backdrop of the Buddha's parinirvā a, when he imparts his final instructions to the gathered disciples. The Buddha instructs his disciples to uphold the precepts and regard them as their teacher after his entry into parinirvā a. He then instructs them to control sensuality ([KĀMA](#)) and cultivate serenity and [DHYĀNA](#). Finally, the Buddha asks the assembly if they have any questions regarding the [FOUR NOBLE TRUTHS](#). When no one replies, the Buddha succinctly expounds upon impermanence and the need to seek liberation ([VMOK A](#)). This sūtra bears striking resemblances in style and content to the [MAHĀPARINIBBĀNASUTTA](#) and [ĀSVAGHO A'S BUDDHACARITA](#). Along with the [SISHIER ZHANG JING](#) and [GUISHAN JINGCE](#), the *Yijiao jing* has been cherished by the [CHAN](#) tradition for its simple and clear exposition. Sometime during the late Tang and early Song dynasties, the three texts were edited together as the *Fozu sanjing* (“The Three Scriptures of the Buddhas and Patriarchs”) and recommended to Chan neophytes.

yijing. (C) (). In Chinese, lit. “scriptures of scriptures” or “scriptures of doubtful [providence].” See [APOCRYPHA](#).

Yijing. (J. Gijō; K. Ŭijōng) (635–713). Chinese Buddhist monk and pilgrim. Ordained at the age of twenty, Yijing dreamed of following in the footsteps of the renowned pilgrims [FAXIAN](#) and [XUANZANG](#). He eventually set out for India in 671 via the southern maritime route. After visiting the major Indian pilgrimage sites (see [MAHĀSTHĀNA](#)), Yijing traveled to the monastic university at [NĀLANDĀ](#), where he remained for the next ten years. On his return trip to China, Yijing stopped at [ŚRĪVĀJYA](#) (Palembang in Sumatra) to continue his studies. He praised the monks there for their high level of learning, describing them as primarily [HINAYĀNA](#) in affiliation. It was in Śrīvājya that he began to compose his record of his travels, the [NĀNHA JIGUI NEIFA ZHUAN](#), which remains an important source on the practice of Buddhism in the many regions where he traveled and for understanding the various [NIKĀYA](#) affiliations of the period. It was also during his time in Śrīvājya that Yijing began his translation of the massive [MŪLASARVĀSTIVĀDA VINAYA](#). When he ran out of paper and ink, he made a brief trip back to China in 689 to retrieve more writing supplies and then returned to Śrīvājya. After a thirty-year sojourn overseas, Yijing finally returned to China in 695 with some four hundred Sanskrit texts and three hundred grains of the Buddha’s relics ([ŚĀRIRA](#)). Yijing was warmly welcomed in the capital of Luoyang by Empress [WU ZETIAN](#), who appointed him to the monastery of Foshoujisi. Later, from 695 to 699, Yijing participated in [ŚIK ĀNANDA](#)’s new translation of the [ĀVĀTA ŚAKASŪTRA](#) and devoted the next decade or so to the translation of the scriptures that he had brought back with him from India. In addition to the Mūlasarvāstivāda vinaya, his translations also include several important [YOGĀCĀRA](#) treatises and [TANTRAS](#). His writings also include a collection of the biographies of renowned East Asian Buddhist pilgrims to India, the [DA TANG XIYU QIUFAGAOSENG ZHUAN](#).

yijing sanzang. (J. yakukyō sanzō; K. yōkkyōng samjang) . In Chinese, lit. “master of the three repositories, translator of scriptures.” See [TREPI AKA](#).

Yingluo jing. (C) (). See [PUSAYINGLUOBENYE JING](#).

Yinguang. (J. Inkō; K. In’gwang) (1862–1940). Chinese monk renowned for his efforts to revitalize modern Chinese Buddhism, especially of the [PURE LAND](#) tradition; also sometimes referred to as the thirteenth patriarch of the Chinese [JINGTU](#) school and as Chang Cankui Seng (Forever Ashamed Monk). Yinguang was a native of Geyang in Shaanxi province. At a young age, Yinguang suffered from an eye ailment, probably conjunctivitis, which he is said to have cured by studying the Buddhist scriptures. He was formally ordained later at the monastery of Xing’an Shuangqisi in his home province. Yinguang’s interest in pure land thought and practice is said to have been catalyzed by his encounter with the writings of the [CHAN](#) master Jixing Chewu (1741–1810), who came to be known as the twelfth patriarch of the pure land tradition in China. For more than twenty years, he resided in isolation at the monastery of Fayusi on the sacred mountain of [PUTUOSHAN](#), where he studied the scriptures and practiced the recitation of the name of the buddha [AMTĀBHA](#) ([NĀNFO](#); cf. [NAMU AMDABUTSU](#)). Yinguang’s reputation grew with the publication of his private correspondences and his collected essays known as *Jingtu jueyi lun* (“Treatise on Resolving Doubts about the Pure Land”). His writings were often critical of Chan and emphasized the efficacy of pure land practice instead. Yinguang also worked to restore monasteries and to republish important pure land writings until his death in 1940. See also [TAIXU](#); [XUYUN](#).

yingwu Chan. (J. ōmuzu; K. aengmu Sŏn) . In Chinese, lit. “parrot Chan”; a [CHAN](#) Buddhist expression referring to the way some practitioners merely parrot with their mouths the pithy sayings and [GONGAN](#) dialogues of the patriarchs and masters ([ZUSHI](#)), but fail to realize their true message and attain enlightenment for themselves. This pejorative description is also applied to pundits of the traditional Buddhist scholastic schools (C. jiao, see K. [KYO](#)), whose intellectual erudition and doctrinal prowess were caricatured as “parrot Chan,” in contrast to the Chan school’s supposed subitist spiritual approach that did not rely on mere intellectual understanding (see [BULI WENZI](#)). These pundits are likened to parrots in that they also mimic other people’s understanding through their doctrinal exegeses, but without comprehending it themselves. Cf. [KOUTOU CHAN](#).

yingyan. (). In Chinese, “responsive attestation.” See [GANYING](#).

ynian sangqian. (J. ichinen sanzen; K. illyŏm samch’ŏn) . In Chinese, lit. “the [TRICHILIOCOSM](#) in a single instant of thought”; a [TĪANTAI](#) teaching that posits that any given thought-moment perfectly encompasses the entirety of reality both spatially and temporally. An instant ([K A A](#)) of thought refers to the shortest period of time and the trichiliocosm ([TRISĀHASRAMAHĀSĀHASRALOKADHĀTU](#)) to the largest possible universe; hence, according to this teaching, the microcosm contains the macrocosm and temporality encompasses spatiality. Thus, whenever a single thought arises, there also arise the myriad dharmas; these two events occur simultaneously, not sequentially. Any given thought can be categorized as belonging to one of the ten realms of reality ([DHARMADHĀTU](#)). For example, a thought of charity metaphorically promotes a person to the realm of the heavens at that instant, whereas a subsequent thought of consuming hatred metaphorically casts the same person into the realm of the hells. Tiantai exegetes also understood each of the ten dharmadhātus as containing and pervading all the other nine dharmadhātus, making one hundred dharmadhātus in total (ten times ten). In turn, each of the one hundred dharmadhātus contains “ten aspects of reality” (or the “ten suchnesses”; see [SHI RUSHI](#)) that pervade all realms of existence, which makes one thousand “suchnesses” (qianru, viz., one hundred dharmadhātus times ten “suchnesses”). Finally the one thousand “suchnesses” are said to be found in the categories of the “five aggregates” ([SKANDHA](#)), “sentient beings” ([SATTVĀ](#)), and the physical environment (guotu). These three latter categories times the one thousand “suchnesses” thus gives the “three thousand realms,” which are said to be present in either potential or activated form in any single moment of thought. This famous dictum is attributed to the eminent Chinese monk [TĪANTAI ZHIYI](#), who spoke of the “trichiliocosm contained in the mind during an instant of thought” (sangqian zai yinian xin) in the first part of the fifth roll of his magnum opus, [MOHE ZHIQUAN](#). Zhiyi’s discussion of this dictum appears in a passage on the “inconceivable realm” ([ACINTYA](#)) from the chapter on the proper practice of [SAMĀTHA](#) and [VĪPAŚYANĀ](#). Emphatically noting the “inconceivable” ability of the mind to contain the trichiliocosm, Zhiyi sought through this teaching to emphasize the importance and mystery of the mind during the practice of meditation. Within the context of the practice of contemplation of mind ([GUANXIN](#)), this dictum also anticipates a “sudden” theory of awakening (see [DUNWU](#)). [TĪANTAI](#) exegetes during the Song dynasty expanded upon the dictum and applied it to practically every aspect of daily activity, such as eating, reciting scriptures, and ritual prostration. See also [SHANJIA SHANWAI](#).

yinke. (J. inka; K. in’ga) . In Chinese, lit. “seal of/in approval,” “certification” and often seen in Western sources in its Japanese pronunciation inka; a seal of approval, certification, or transmission, which is given by masters in the various [CHAN](#) traditions across East Asia to practitioners who, in their estimation, have attained a satisfactory level of awakening or maturity of understanding to serve as public exponents of their lineage. Because these lineages are presumed to trace back to [BODDHI DHARMA](#), the founder of the Chan school, and ultimately to the person of the Buddha himself, the person who receives such certification is considered to be qualified to speak for the current generation of Chan adepts on behalf of the Chan patriarchs, masters, and even the Buddha, to accept and train students, and to give them certification in turn once their training is complete. The manner of certification differs within traditions. Certification often entails admission into the master’s lineage; the conferral of such symbols of religious authority and memorial worship as robes, bowls, chowries ([BINGFU](#)), or portraits; and the right to serve in high ecclesiastical office in a sectarian monastery. In the modern [ZEN](#) traditions of Japan, certification is offered by a [RŌSHI](#), a teacher who has himself been previously certified. Especially in the Japanese traditions, receiving inka need not necessarily be testimony to the profundity of a person’s enlightenment experience, but may simply be public recognition that a student has sufficient maturity and ability to serve as abbot or hold other high ecclesiastical office in the monasteries and temples of a specific sectarian lineage. In some cases, yinke is an abbreviation for yinke zhengming, or “certification via seal of approval.” Certification is also known as yinding (seal of meditation), renke (acceptance and approval), and yinzheng (seal and certify). See also [CHUANFA](#); [FASI](#).

yinke zhengming. (J. inka shōmyō; K. in’ga chŭngmyōng) . In Chinese, “certification via a seal of approval.” See [YINKE](#).

yinsheng nianfo. (J. inshō nenbutsu/inzei nenbutsu; K. insŏng yŏmbul) . In Chinese, “intoning [the name of] the Buddha by drawing out the sound” (see [NĀNFO](#)); one of the “five-tempo intonations of [the name of] the Buddha” ([WUHIU NĀNFO](#)) devised by [FAZHAO](#). Yinsheng nianfo involves the long, drawn-out intonation of the name of the buddha [AMTĀBHA](#). Even before Fazhao, the practice of yinsheng nianfo is known to have been practiced by the [CHAN](#) master [CHŌNGJUNG MUSANG](#) (680–756 [alt. 684–762]), who recommended this practice for those who wished to attain “no recollection” (wuyi), “no thought” ([WUNIAN](#)), and “no forgetting” (mowang).

Yinyuan Longxi. (J. Ingen Ryūki) (1592–1673). Chinese [CHAN](#) master and founding patriarch of the Japanese [ŌBAKUSHŪ](#). Yinyuan was a native of Fuzhou, in present-day Fujian province. He began his training as a monk in his early twenties on [PUTUOSHAN](#) and was formally ordained several years later at Wanfusi on Mt. Huangbo. Yinyuan continued his training under the Chan master [MIYUN YUANWU](#) and, while serving under the Chan master [FEIYIN TONGRONG](#) at Wanfusi Yinyuan, was formally recognized as an heir to Feiyin’s lineage in 1633. Seven years later, in 1640, Yinyuan found himself at the monastery of Fuyansi in Zhejiang province and at Longquansi in Fujian province in 1645. The next year, in 1646, he returned to Mt. Huangbo and revitalized the community at Wanfusi. In 1654, at the invitation of Yiran Xingrong (1601–1668), the abbot of the Chinese temple of Kōfukuji in Nagasaki, Yinyuan decided to leave China to escape the succession wars and political turmoil that had accompanied the fall of the Chinese Ming dynasty. He was to be accompanied by some thirty monks and artisans. Due to political issues, however, Yinyuan was only allowed to enter Japan a year later in 1655. That same year, largely through the efforts of the Japanese monk Ryōkei Shōsen (1602–1670), the abbot of [MYŌSHINJI](#), Yinyuan was allowed to stay at Ryōkei’s home temple of Fumonji under virtual house arrest. The next year when Yinyuan expressed his wishes to return to China, Ryōkei arranged a visit to Edo and an audience with the young shōgun. At the end of 1658, Yinyuan made the trip to Edo and won the patronage of the shōgun and his ministers. With their support, Yinyuan began the construction of [MANPUKUJIS](#) in Uji in 1661. The site came to be known as Mt. Ōbaku, the Japanese pronunciation of his mountain home of Huangbo, and served as the center for the introduction of Ming-dynasty Chan into Japan. Yinyuan’s teachings, especially those concerning monastic rules, catalyzed institutional and doctrinal reform among the entrenched Japanese [ZEN](#) communities. In 1664, Yinyuan left his head disciple [MŪAN XINGTAO](#) in charge of all administrative matters involving the monastery and retired to his hermitage on the compounds of Manpukuji. Nine years later Emperor Gomizunoo (r. 1611–1629) bestowed upon him the title state preceptor (J. kokushi, C. [GUOSHI](#)) Daikō Fushō (Great Radiance, Universal Illumination). He died shortly

thereafter. Yinyuan brought many precious text objects with him from China, and composed numerous texts such as *Huangyue yulu*, *Hongjie fayi*, *Fushō kokushi kōroku*, *Ōbaku oshō fusō goroku*, *Ingen hōgo*, and *Ōbaku shingi*.

Yiqiejing yinyi. (J. Issaikyō ongi; K. Ilch'egyōng ūmū)). In Chinese, “Pronunciation and Meaning of All the Scriptures”; a specialized Chinese glossary of Buddhist technical terminology. As more and more Indian and Central Asian texts were being translated into Chinese, the use of Sanskrit and Middle Indic transcriptions and technical vocabulary increased, leading to the need for comprehensive glossaries of these abstruse terms. Because of the polysemous and sacred character of such Buddhist doctrinal concepts as [BODHI](#), [NIRVĀA](#), and [PRAJÑĀ](#), many Chinese translators also preferred to transcribe rather than translate such crucial terms, so as not to limit their semantic range to a single Chinese meaning. The Indian pronunciations of proper names were also commonly retained by Chinese translators. Finally, the spiritual efficacy thought to be inherent in the spoken sounds of Buddhist spells ([MANTRA](#)) and codes ([DHĀRAṬI](#)) compelled the translators to preserve as closely as possible in Chinese the pronunciation of the Sanskrit or Middle Indic original. By the sixth century, the plethora of different transcriptions used for the same Sanskrit Buddhist terms led to attempts to standardize the Chinese transcriptions of Sanskrit words, and to clarify the obscure Sinographs and compounds used in Chinese translations of Buddhist texts. This material was compiled in various Buddhist “pronunciation and meaning” (yinyi) lexicons, the earliest of which was the twenty-five-roll *Yiqiejing yinyi* compiled by the monk Xuanying (fl. c. 645–656). Xuanying, a member of the translation bureau organized in the Chinese capital of Chang'an by the renowned Chinese pilgrim, translator, and Sanskritist [XUANZANG](#) (600/602–664), compiled his anthology in 649 from 454 of the most important [MAHĀYĀNA](#), [ŚRĀVAKAYĀNA](#), [VINAYA](#), and [ŚĀSTRA](#) materials, probably as a primer for members of Xuanzang's translation team. His work is arranged by individual scripture, and includes a roll-by-roll listing and discussion of the problematic terms encountered in each section of the text. For the more obscure Sinographs, the entry provides the fanqie (a Chinese phonetic analysis that uses paired Sinographs to indicate the initial and final sounds of the target character), the Chinese translation, and the corrected transcription of the Sanskrit, according to the phonologically sophisticated transcription system developed by Xuanzang. Xuanying's compendium is similar in approach to its predecessor in the secular field, the *Jingdian shiven*, compiled during the Tang dynasty in thirty rolls by Lu Deming (c. 550–630). The monk Huilin (783–807) subsequently incorporated all of Xuanying's terms and commentary into an expanded glossary that included difficult terms from more than 1,300 scriptures; Huilin's expansion becomes the definitive glossary used within the tradition. Still another yinyi was compiled later during the Liao dynasty by the monk Xilin (d.u.). In addition to their value in establishing the Chinese interpretation of Buddhist technical terms, these “pronunciation and meaning” glossaries also serve as important sources for studying the Chinese phonology of their times.

yiqing. (J. giō; K. ūijōng). In Chinese, lit. the “sensation of doubt,” or simply “doubt”; a feeling of puzzlement and sense of questioning that is a crucial factor in the meditation technique of “questioning meditation” ([KANHUA CHAN](#)) as systematized by [DAHUI ZONGGAO](#) (1089–1163). In the *kanhua* technique, doubt refers to the puzzlement and perplexity that the meditator feels when trying to understand the conundrum that is the [GONGAN](#) (public case) or [HUATOU](#) (meditative topic). This doubt arises from the inability to understand the significance of the *huatou* through rational thought. This loss of confidence in one's conceptual and intellectual faculties releases the mind from the false sense of security engendered through habitual ways of thinking, creating a feeling of frustration that is often compared to “a mosquito trying to bite an iron ox.” The meditator's sense of self ultimately becomes so identified with the *huatou* that the intense pressure created by the doubt “explodes” (C. po), freeing the mind from the personal point of view that is the self. Hence, by cutting off conceptualization and producing a state of intense concentration, the sensation of doubt helps to impel meditation forward toward the experience of awakening ([WU](#)). The term “sensation of doubt” was not coined by Dahui. One of its earliest usages is in the enlightenment poem of Luohan Guichen (867–928), the teacher of [FAYAN WENYI](#) (885–958), which describes enlightenment as shattering the “ball of doubt” ([YITUAN](#)). Dahui's grandteacher, [WUZU FAYAN](#) (d. 1104), also taught his students to keep the great ball of doubt. But it was Dahui who put doubt at the core of his interpretation of *kanhua Chan* meditation; for him, the sensation of doubt becomes an effective antidote to conceptual thinking as well as the force that drives the student forward toward enlightenment. The Chinese term *yi* is also used as the translation for the Sanskrit term [VICKITSA](#), or skeptical doubt, which was one of the five hindrances ([NĪVARA](#)) to meditative absorption ([DHYĀNA](#)). But rather than being viewed as it had been in India as a hindrance, in Dahui's interpretation doubt instead plays a crucial role in the meditative process.

Yishan Yining. (J. Issan Ichinei; K. Ilсан Illyōng) (1247–1317). Chinese [CHAN](#) master in the [LINJI ZONG](#); a native of Taizhou prefecture in present-day Zhejiang province. At a young age, Yishan became a student of a certain Wudeng Rong (d.u.) at the monastery of Hongfusi on Mt. Fu near his hometown in Taizhou. He was later ordained at the monastery of Puguangsi in Siming in Zhejiang province and continued to study [VINAYA](#) at Yingzhensi and [TIANTAI](#) thought and practice at Yanqingsi. Yishan then began his training in Chan under several teachers. He eventually became a disciple of Wanji Xingmi (d.u.), a disciple of the Chan master [CAOYUAN DAOSHENG](#). In 1299, the Yuan emperor Chengzong (r. 1294–1307) bestowed upon him the title Great Master Miaoci Hongji (Subtle Compassion, Universal Salvation) and an official post as the overseer of Buddhist matters in Zhejiang. That same year, he was sent to Japan as an envoy of the court, but was detained temporarily at the temple of Shūzenji in Izu by the Kamakura shogunate. When the Hōjō rulers learned of Yishan's renown in China, Yishan was invited to reside as abbot of the powerful monasteries of [KENCHŌJI](#), [ENGAKUJI](#), and Jōchiji in Kamakura. In 1313, Yishan was invited by the retired Emperor Gouda (r. 1274–1287) to reside as the third abbot of the monastery [NANZENJI](#) in Kyōto. Yishan had many students in Japan including the eminent Japanese monk [MUSŌ SOSEKI](#). Yishan became ill and passed away in the abbot's quarters (J. hōjō; C. [FANGZHANG](#)) of Nanzenji in 1317. The emperor bestowed upon him the title state preceptor (J. kokushi; C. [GUOSHI](#)) Issan (One Mountain). Yishan is also remembered for his calligraphy and for introducing to Japan the new commentaries written by the great Neo-Confucian scholar Zhu Xi (1130–1200) to Japan. He and his disciples, such as Shiliang Rengong (1266–1334), Mujaku Ryōen (d.u.), Monkei Ryōsō (d. 1372), and Tōrin Yūkyū (d. 1369), contributed much to the development of [GOZAN](#) culture in Japan.

yishen. (J. yuishin; K. yusin). In Chinese, lit., “to let go of the body,” viz., “self-immolation.” See [SHESHEN](#).

Yisheng xianxing jiao. (C) (). See [HUAYAN WUJIAO](#).

yituan. (J. gidan; K. ūidan). In Chinese, “ball of doubt”; also referred to as *dayituan*, or “great ball of doubt.” Although the term appears in a verse recorded in the [JINGDE CHUANDENG LU](#) that is attributed to Luohan Guichen (867–928), the teacher of [FAYAN WENYI](#), it was the [CHAN](#) master [DAHUI ZONGGAO](#) who systematized and popularized its use. Dahui probably inherited the notion of a ball of doubt from his teacher [YUANWU KEQIN](#), whose teacher [WUZU FAYAN](#) also mentions a ball of doubt in his teachings. Dahui described the arousal of the sensation of doubt ([YIQING](#)) or the ball of doubt as an important tool in his meditative approach called [KANHUA CHAN](#), or investigation of the meditative “topic” ([HUATOU](#)).

yixin. (S. ekacitta; J. isshin; K. ilsim). In Chinese, “one mind”; the ground of being and the principle ([LI](#)) foundational to all phenomena ([SHI](#)). The [LA KĀVĀTĀRASŪTRA](#) and the [DASHENG QIXIN LUN](#) (“Awakening of Faith According to the Mahāyāna”), both central texts in the [TATHĀGATAGARBHA](#) corpus of literature, treat the “one mind” as a central doctrine. The *La kāvātārasūtra* states that the “calm extinction [of [NIRVĀA](#)] is called the one mind, and this one mind is called the tathāgatagarbha.” The *Dasheng qixin lun* presents all of Buddhism in terms of the one mind and its two aspects: the mind's true-thusness aspect (*xin zhenru men*) and production-and-cessation aspect (*xin shengmie men*). The *Dasheng qixin lun*, arguably the most influential tathāgatagarbha text within the East Asian Buddhist tradition, has long been considered the principal treatise outlining the doctrine of the one mind and its associations with the [YOGĀCĀRA](#) theory of consciousness and tathāgatagarbha thought. ¶ The exegeses to the *Dasheng qixin lun* by [JINGYING HUIYUAN](#) (523–592), [WŌNHYO](#) (617–686), and [FAZANG](#) (643–712), which the tradition has regarded as its three major commentaries (*san dashu*), have each elucidated in considerable detail the foundational role that the notion of the one mind plays in that text. Fazang, for example, glossed the one mind of the *Dasheng qixin lun* as the “one tathāgatagarbha mind” and thus identified the one mind with the tathāgatagarbha; the two aspects of the one mind, true thusness and production-and-cessation, were correlated, respectively, with either [MADHYAMAKA](#) and [YOGĀCĀRA](#) or principle (li) and phenomena (shi). Fazang thus places tathāgatagarbha thought above both the [SAN LUN ZONG](#) (the Chinese analogue of the Madhyamaka school) and the [FAXIANG ZONG](#) (Yogācāra) teachings in his doctrinal taxonomy (*panjiao*; see [JIAOXIANG PANSHI](#)). By contrast, Huiyuan's commentary treats the one mind within the context of the nine-consciousnesses theory of the [SHE LUN ZONG](#), an early Yogācāra-oriented strand of Chinese Buddhist thought. In his analysis of the two aspects of the one mind, Huiyuan correlates the true-thusness aspect of the one mind with the ninth “immaculate consciousness” ([AMALAVIJÑĀNA](#)); he correlates the production-and-cessation aspect of the one mind with the eighth “storehouse consciousness” ([ĀLAYAVIJÑĀNA](#)). Unlike Fazang's interpretation, tathāgatagarbha is here not identified with the one mind but is instead viewed as the production-and-cessation aspect of the mind. In Wōnhyo's case, rather than seeking as Fazang did to distinguish the Faxiang teachings of Yogācāra from tathāgatagarbha thought, he sought instead to reconcile the Faxiang perspective on consciousness with the *Dasheng qixin lun*'s analysis of mind. Like Huiyuan, Wōnhyo identified the tathāgatagarbha with the production-and-cessation aspect of the one mind. ¶ The one mind is also a central theme of the [ZONGJING LU](#), an encyclopedic [CHAN](#) anthology compiled by [YONGMING YANSHOU](#) (904–976) in the [FAYAN ZONG](#), which seeks to unify the various Chinese schools of Buddhism, including [HUAYAN](#), Yogācāra, and [TIANTAI](#), and to demonstrate the compatibility of doctrinal teachings and meditative practice. Yanzhou draws on the doctrinal classification schema of [GUIFENG ZONGM](#) (780–841), the Chan scholiast who was also the fifth patriarch of the Huayan school, in positing three broad strands of Buddhist teaching: dharma characteristics (*Faxiang zong*), destruction of characteristics (*Poxiang*), dharma nature ([FAXING ZONG](#)). Yanzhou states that the Faxing (dharma nature) teachings, which include both the Huayan and Chan schools and which are based on tathāgatagarbha thought, treat both aspects of true thusness or the one mind, that is, the aspect of “immutability” (*bubian*) and “adaptability” (lit., “according to conditions,” *suiyuan*); the Faxiang (dharma characteristics) teachings, by contrast, only treat the aspect of “adaptability.” ¶ In the [TIANTAI](#) school, one mind or sometimes one thought (*yinian*) is said to be the ground of all things in existence in both their tainted and pure manifestations, a notion expressed in the aphorism “one thought [contains] the [TRICHILIOCOSM](#)” ([YINIAN SANGUAN](#)), one of the main doctrines of the school. The Tiantai teaching that “one mind,” viz., a single instance of thought, contains all three “viewpoints” (*yixin sanguan*) also expresses how the three inseparable aspects of phenomena ([SANDI](#))—viz., the truth of emptiness (*kongdi*), the truth of being only provisionally real (*jiadi*), and the truth of the mean (*zhongdi*)—are each contained in one thought moment. In the [PURE LAND](#) tradition, one mind generally refers to single-minded recollection ([NIANFO](#)) of, especially, the buddha [AMITĀBHA](#), and is a synonym of one-pointedness of mind.

yixin chuanxin. (J. ishīn dēnshīn; K. isīm chōnsīm). In Chinese, “mind-to-mind transmission.” An oft-repeated phrase used mainly by the East Asian **CHAN** traditions to refer to a special transmission of the “mind” of the Buddha from master to disciple in a “telepathic” way that does not rely on words or letters (see **JIAOWAI BIECHUAN** and **BULI WENZU**). In an attempt to distinguish itself from the other Buddhist traditions that sought the teachings of the Buddha in sūtras and commentaries, the burgeoning Chan tradition of the eighth and ninth centuries emphasized the nonverbal transmission of the Buddha’s teachings. The notion of mind-to-mind transmission has thus served as an important trope in the self-fashioning of the Chan tradition. Mind-to-mind transmission is often explained by reference to a famous Chan legend that first appears in the *Tiansheng guangdeng lu*. While at Vulture Peak (**G DHRAKU APARVATA**), the Buddha is said to have raised a flower in front of a large assembly, whereupon the elder **MAHĀKĀŚYAPA** smiled in response. The Buddha then announced that he had thereby entrusted his “treasury of the true dharma eye” (**ZHENGFA YANZANG**) to Mahākāśyapa, thus recognizing him as the Buddha’s successor and first patriarch (**ZUSHI**). For this legend, see **NIANHUA WEIXIAO**.

Yixing. (J. Ichigyō; K. Irhaeng) (683–727). In Chinese, “Single Practice”; a famous student of **CHAN** and master of esoteric Buddhism (**MUJIAO**), translator, and distinguished astronomer. Yixing was a native of Julu prefecture in present-day Hebei province. He became a monk under the eminent Chan master **PUJI** (651–739) in the Northern school (**BEI ZONG**) of the early Chan tradition and also studied the **YINAYI** under a monk by the name of Huizhen (d.u.). Having made a name for himself at the monastery of Guoqingsi on Mt. Tiantai, in 717, Yixing was invited by Emperor Xuanzong (r. 712–756) to the palace in Luoyang. While residing at the palace, Yixing became a disciple of the **TREPI KA SUBHAKARASI HA** and, together, they translated the **MAHĀVAIROCANĀBHISA BODHISŪTRA**. Based on Śubhakarasi ha’s oral interpretations provided in the course of preparing their translation, Yixing also composed an important commentary on the sūtra, the *Darijing shu*. In 727, Yixing’s reputation in astronomy and calendrics prompted the emperor to have him devise a new calendar, which is known as the Dayan li. Yixing also devised an elaborate celestial globe, which used hydraulic power to portray the precise movements of the sun, moon, and constellations across the firmament. After his death, he was bestowed the posthumous title Chan master Dahui (Great Wisdom).

yixing sanmei. (S. ekavyūhasamādhī; J. ichigyō zanmai; K. irhaeng sammāe). In Chinese, “single-practice **SAMĀDHI**.” The term yixing sanmei seems to first appear in a passage in the Chinese translation of the **SAPTASATIKĀPRAJÑĀPĀRAMITĀSŪTRA**: “The **DHARMADHĀTU** has only a single mark; to take the dharmadhātu as an object is called one-practice samādhī.” Two practices are then recommended by the text for cultivating yixing sanmei, viz, the perfection of wisdom (**PRAJÑĀPĀRAMITĀ**) and recollection of the Buddha’s name (S. **BUDDHĀNUSM TI**; C. **NIANFO**). The concept of yixing sanmei was later incorporated into the apocryphal Chinese treatise **DASHENG QIXIN LUN** and the influential meditation manual **MOHE ZHIGUAN**. **TIANTAI ZHIM**, the author of the *Mohe Zhiguan*, identified the practice of constant sitting, the first of the so-called four kinds of samādhī (sīzhong sanmei), with yixing sanmei. Famous teachers of the early **CHAN** community, such as **DAOXIN**, **HUINENG**, and **HEZE SHENHUI**, also emphasized the importance of yixing sanmei, which they identified with seated meditation (**ZUOCHAN**) and the cultivation of prajñāpāramitā. According to the **LIUZU TANJING** (“Platform Sūtra of the Sixth Patriarch”), Huineng interpreted yixing sanmei as the maintenance of a straightforward mind (yīzhi xīn) while walking, standing, sitting, and lying. Shenhui identified yixing sanmei with “no mind” (**WUXIN**; see also **WUNIAN**).

Yixuan. (C) (). See **LINJI YIXUAN**.

yizhi Chan. (J. issi no zen; K. ilchi sŏn). In Chinese, “one-finger Chan”; the famous pedagogical technique used by the **CHAN** master Juzhi Yīzhi (c. ninth century) and his teacher Hangzhou Tianlong (d.u.) in the lineage of **MAZU DAOYI**. “One-finger Chan” refers to Juzhi’s propensity to answer any question he was asked by simply raising one finger, so as not to allow any conceptual understanding of Buddhism to arise in the student’s mind. The phrase appears in Case 19 of the **BIYAN LU** and Case 3 of the **WUMEN GUAN**, and is frequently cited in Chan sources. In one well-known Chan case (**GONGAN**), Juzhi is said to have cut off the finger of a boy who mimicked him without understanding the meaning of the gesture.

yizi guan. (J. ichijikan; K. ilcha kwan). In Chinese, “one-word checkpoint” or “one-word barrier”; a pedagogical device developed by **YUNMEN WENYAN** (864–949), the founder of the **YUNMEN ZONG** of the classical **CHAN** tradition, which used only a single utterance to respond to a student’s question. For example, once a monk asked him, “When you kill your parents, you repent before the Buddha. But when you kill the buddhas and patriarchs, to whom do you repent?” Yunmen answered, “Lu” (“exposed”). Another time a monk asked him, “What is the treasury of the true dharma eye (**ZHENGFA YANZANG**)?” Yunmen answered, “Pu” (“universal”). Such terse answers offered no basis for conceptual understanding, instead demanding that students have a direct realization of truth. These one-word checkpoints were highly praised by **DAHUI ZONGGAO** for fostering especially close concentration during **KANHUA CHAN** meditation: “Once you enter into the gate of the one-word **GONGAN**, even nine oxen wouldn’t be able to pull you out.”

yoga. (T. sbyor ba/mal ’byor; C. xiu/xiuxing/xiuxi/yuqie; J. shu/shugyō/shujū/yuga; K. su/suhaeng/susŭp/yuga / / /). In Sanskrit, “bond,” “restraint,” and by extension “spiritual discipline”; in Buddhism, a generic term for soteriological training or contemplative practice, including tantric practice.

Yogabhāvanāmārga. [alt. Bhāvanāyogamārga; Yogabhāvanāpatha] (T. Rnal ’byor bsgom pa’i lam). In Sanskrit, “Path of Yogic Cultivation”; a work on the **BODHISATTVA** path usually attributed to the eighth-century Indian master Jñānagarbha, who is known as the teacher of **ŚĀNTARAK ĪTA** (c. 725–788) and a disciple of Śrīgupta. It is presumed that the *Yogabhāvanāmārga* is an example of the later **MADHYAMAKA** school’s attention to the theme of the stages of meditative cultivation (**BHĀVĀNĀ**), as best exemplified by **KAMALĀSĪLA**’s three **BHĀVANĀKRAMAS**. There are two Jñānagarbha known to the tradition, one from the early ninth century and the other from the eleventh century. Some scholars suggest that the commentary to the Maitreya chapter of the **SA DHINIRMOCCANASŪTRA** should be attributed to the first Jñānagarbha, while authorship of the *Yogabhāvanāmārga* should be ascribed to the second. The *Yogabhāvanāmārga*, along with Jñānagarbha’s two other works, the *Satyadvayavibha ga* (“Analysis of the Two Truths”) and its autocommentary *Satyadvayavibha gav tti* (“Commentary on Analysis of the Two Truths”), are only extant in Tibetan translation.

Yogācāra. (T. Rnal ’byor spyod pa; C. Yuqixing pai; J. Yugagyōha; K. Yugahaeng p’a). In Sanskrit, “Practice of **YOGA**”; one of the two major **MAHĀYĀNA** philosophical schools (along with **MADHYAMAKA**) in India, known especially for its doctrines of “mind-only” (**CĪTAMĀTRA**) or “representation-only” (**VIJŪPTIMĀTRATĀ**), the **TRISVABHĀVA**, and the **ĀLAYAVIJŪĀNA**. In addition, much of the exposition of the structure of the Mahāyāna path (**MĀRGA**) and of the Mahāyāna **ABHIDHARMA** derives from this school. The texts of the school were widely influential in Tibet and East Asia. Although several of the terms associated with the school occur in such important Mahāyāna sūtras as the **DAŚABHŪMKASŪTRA**, the **LĀ KĀVĀTĀRASŪTRA**, and especially the **SA DHINIRMOCCANASŪTRA**, the exposition of the key doctrines was largely the work of two Indian scholastics of the fourth to fifth centuries CE, the half brothers **ASA GA** and **VASUBANDHU** and their commentators, especially **STHIRAMATI** and **DHARMAPĀLA**. Asa ga’s major works include the central parts of the **YOGĀCĀRABHŪM**, the **MAHĀYĀNASĀ GRAHA**, and the **ABHIDHARMASAMUCCAYA**. Vasubandhu’s most famous Yogācāra works are the **VI SATIKĀ** and the **TRĪ ŚIKĀ** (his most famous work of all, the **ABHIDHARMAKOŚABHĀ YA**, is said to have been composed prior to his conversion to the Mahāyāna). Among the “five books of **MAITREYA**” (see **BYĀMS CHOS SDE LŪGA**), three are particularly significant in Yogācāra: the **MADHYĀNTAMBHĀGA**, the **DHARMADHARMATĀMBHĀGA**, and the **MAHĀYĀNASŪTRĀLA KĀRA**. Important contributions to Yogācāra thought were also made by the logicians **DIGNĀGA** and **DHARMAKĪRTI**. Although Yogācāra and Madhyamaka engaged in polemics, in the latter phases of Buddhism in India, a synthesis of Yogācāra and Madhyamaka took place in the works of such authors as **ŚĀNTARAK ĪTA** and **KAMALĀSĪLA**; Tibetan doxographers dubbed this synthesis **YOGĀCĀRA-SVĀTANTRIKA-MADHYAMAKA**. ¶ Yogācāra authors offered detailed presentations and analyses of virtually all of the important topics in Buddhist thought and practice, built upon an edifice deriving from meditative experience. The school is perhaps most famous for the doctrines of “mind-only” (cittamātra) and “representation-only” (vijñaptimātra), according to which the conception of the objects of experience as existing external to and independent of the consciousness perceiving them was regarded as the fundamental ignorance and the cause of suffering. Instead of the standard six consciousnesses (**MUJĀNA**) posited by other Buddhist schools (the five sensory consciousnesses and the mental consciousness), some Yogācāra texts described eight forms of consciousness: these six, plus the seventh “afflicted mind” (**KLI AMANAS**), which mistakenly generates the false notion of a perduing self (**ĀTMAN**), and the eighth foundational, or “storehouse,” consciousness (ālayavijñāna). This foundational consciousness is the repository of seeds (**BJA**) or imprints (**VĀSĀNĀ**) produced by past actions (**KARMAN**) that fructify as experience, producing simultaneously consciousness and the objects of consciousness. The afflicted mind mistakenly regards the foundational consciousness as a permanent and independent self. The doctrine of the three natures (trisvabhāva), although variously interpreted, is also often explained in light of the doctrine of representation-only. The imaginary nature (**PARIKALPITA**) refers to misconceptions, such as the belief in self and in the existence of objects that exist apart from consciousness. The dependent nature (**PARATANTRA**) encompasses impermanent phenomena, which are products of causes and conditions. The consummate nature (**PARINI PANNA**) is reality, classically defined as the absence of the imaginary nature in the dependent nature. By removing these latent predispositions from the ālayavijñāna and overcoming the mistaken bifurcation of experience between a perceiving subject and perceived objects (**GRĀHYAGRĀHAKAVIKALPA**), a transformation of consciousness (**ĀŚRAYAPARĀV TTI**) occurs which turns the deluded mind of the sentient being into the enlightenment cognition of the buddhas (**BUDDHAJŪĀNA**), with the ālayavijñāna being transformed into the mirrorlike wisdom (**ĀDARŚAJŪĀNA**). In the realm of soteriology, much of what would become the standard Mahāyāna elaboration of the five paths (**PANCA MĀRGA**) and the bodies (**KĀYA**, e.g., **TRIKĀYA**) of a buddha is found in works by Yogācāra authors, although there are important differences between Yogācāra and Madhyamaka on a number of key soteriological questions, including whether there is one vehicle (**EKAYĀNA**) or three final vehicles (**TRĪYĀNA**), that is, whether all beings are destined for buddhahood, or whether some, such as the **ARHATS** of the mainstream Buddhist schools, are stuck in a soteriological dead end. ¶ Not all the scholastics regarded as Yogācāra exegetes adhered to all of the most famous doctrines of the school. The most common division of the school is into those who do and do not assert the existence of eight consciousnesses (and hence the ālayavijñāna). The former, who include Asa ga and Vasubandhu, are called “followers of scripture” (āgamanūsārin), and the latter, who include the famous logicians **DIGNĀGA** and **DHARMAKĪRTI**, are called “followers of reasoning” (nyāyānūsārin). Yogācāra strands of Buddhism were extremely influential in the development of indigenous East Asian schools of Buddhism, including the mature schools of **HUAYAN** and even **CHAN**. For specifically East Asian analogues of Yogācāra, see **FAXIANG ZONG**, **XIANGZONG**, **DI LUN ZONG**, and **SHE LUN ZONG**.

Yogācārabhūmiśāstra. [alt. Yogācārabhūmi] (T. Rnal 'byor spyod pa'i sa'i bstan bcos; C. Yujieshidi lun; J. Yugasajji non). In Sanskrit, "Treatise on the Stages of Yogic Practice"; an encyclopedic work that is the major treatise (**ŚĀSTRA**) of the **YOGĀCĀRA** school of Indian Buddhism. It was widely influential in East Asia and Tibet, being translated into Chinese by **XUANZANG** between 646 and 648 and into Tibetan circa 800. Authorship is traditionally ascribed to **ASA GA** (or, in China, to **MATREYA**), but the size and scope of the text suggest that it is the compilation of the work of a number of scholars (possibly including Asa ga) during the fourth century CE. The work is divided into five major sections. The first and longest, comprising approximately half the text, is called the "Multiple Stages" (Bahubhūmika or Bhūmivastu) and sets forth the stages of the path to buddhahood in seventeen sections. The two most famous of these sections (both of which are preserved in Sanskrit and which circulated as independent works) are the **ŚRĀVAKABHŪM** and the **BODHISATTVABHŪM**, the latter providing one of the most detailed discussions of the bodhisattva path (**MĀRGA**) in Indian literature. In this section, many of the central doctrines of the Yogācāra school are discussed, including the eight consciousnesses, the **ĀLAYA VJĀNA**, and the three natures (**TRISVABHĀVA**). The structures and practices of the paths of the **ŚRĀVAKA**, **PRATYEKABUDDHA**, and **BODHISATTVA** are presented here in the form that would eventually become normative among **MAHĀYĀNA** scholars in general (not just adherents of Yogācāra). The second section, "Compendium of Resolving [Questions]" (Vinīśayasa graha ṭi), considers controversial points that arise in the previous section. The third section, "Compendium of Interpretation" (Vyākhyānasa graha ṭi), examines these points in light of relevant passages from the sūtras; it is interesting to note that the majority of the texts cited in this section are Sanskrit **ĀGAMA**s rather than Mahāyāna sūtras. The fourth, called "Compendium of Synonyms" (Paryāyasa graha) considers the terms mentioned in the sūtras. The fifth and final section, "Compendium of Topics" (Vastusa graha), considers central points of Buddhist doctrine, including **PRATĪTYASAMUTPĀDA** and **BODHI**. This section also contains a discussion of **VINAYA** and (in the Chinese version) **ABHIDHARMA**.

Yogācāra-Svātantrika-Madhyamaka. (T. Rnal 'byor spyod pa'i dbu ma rang rgyud pa). According to Tibetan exegetes, who coined the term, one of the two branches of the **SVĀTANTRIKA** school of **MADHYAMAKA**, together with the **SAUTRĀNTIKA-SVĀTANTRIKA-MADHYAMAKA**. Its main proponents include **ŚĀNTARAK ĪTA** and **KAMALAŚĪLA**. Like **YOGĀCĀRA**, the school holds that external objects do not exist and that objects are of the nature of consciousness. Like **MADHYAMAKA**, the school holds that consciousness is empty of true existence. In its presentation of the three vehicles (**TRIVĀNA**), it correlates each vehicle with a different wisdom, thus bringing together the views of the **HINAYĀNA**, Yogācāra, and Madhyamaka. In order to achieve liberation from rebirth as an **ARHAT**, the **ŚRĀVAKA** must understand that a perduring self (**ĀTMAN**) does not exist. A **PRATYEKABUDDHA** must understand that objects, and hence the external world, do not exist separately from the consciousnesses that perceive them, thereby abandoning the **GRĀHYAGRĀHAKAVIKALPA**, the misconception of there being a bifurcation between subject and object. In order to achieve buddhahood, the **BODHISATTVA** must understand the emptiness (**SŪNYATĀ**) of all phenomena.

yogatantra. (T. rnal 'byor rgyud). One of the four traditional Indian categories of tantric texts. In a late Indian categorization of Buddhist **TANTRA**, a hierarchy was established that placed texts into one of four categories, in descending order: **ANUTTARAYOGATANTRA**, yogatantra, **CARYĀTANTRA**, and **KRIYĀTANTRA**. The precise meaning of these categories, their parameters, and their contents were widely discussed, especially in Tibet. In one influential description, yogatantra was said to emphasize internal yoga over external ritual practice and therefore did not employ the practice of sexual union. An examination of texts included in this category shows, however, that this description is somewhat arbitrary. Important texts classed as yogatantras include the **SARVATATHĀGATATĀTVASA GRAHA**, the **MAÑJUŚRĪMŪLAKALPA**, the **SARVADURGATIPARIŚODHANATANTRA**, and the **VAJRAŚĒKHARA MA ĀLA**s with the buddha **VAIROCANĀ** as the central deity occur often in the yogatantras.

yogin. (T. rnal 'byor pa; C. xiuxing ren; J. shugyōnin; K. suhaeng in). A male practitioner of **YOGA** (generally in the generic sense of meditative practice) who has gained some level of attainment in his practice. The term can be used to refer to any advanced Buddhist practitioner, although it refers especially to advanced practitioners of Buddhist **TANTRA**.

yoginī. (T. rnal 'byor ma). A female practitioner of **YOGA**, or contemplative practice, but used especially to refer to female adepts of Buddhist **TANTRA**, particularly those who engage in tantric rituals (including sexual rituals) with tantric **YOGINS**. The term is sometimes synonymous with **ĀKINĪ**.

yoginītantra. (T. rnal 'byor ma'i rgyud). Also known as "mother tantras" (**MĀT TANTRA**) and "wisdom tantras" (T. shes rab kyi rgyud), one of the two categories into which the **ANUTTARAYOGATANTRAS** are divided, the other being "father tantras" (**PIT TANTRA**). Developing in India from the **SIDDHA** tradition, the yoginītantras apparently receive this name because the majority (and in some cases all) of the deities in the tantra's **MA ĀLA** are female. According to a traditional explanation, these tantras emphasize wisdom (**PRAJÑĀ**), especially the mind of clear light (**PRABHĀSVARACITTA**), while father tantras emphasize method (**UPĀYA**), especially the illusory body (**MĀYĀDEHA**). See **CAKRASA VARATANTRA**.

yogipratyak a. (T. rnal 'byor mngon sum; C. dingguan zhi; J. jōkanchi; K. chōnggwan chi). In Sanskrit, "yogic direct perception"; a specific variety of direct perception (**PRATYAK A**) that is typically presumed to derive from meditative practice (**BHĀVĀNA**; **YOGA**). A direct intuition of the real obtained through meditative practice, this type of understanding was accepted as a valid means of knowledge by most of the traditional Indian religious schools. In Buddhism, the psychological analysis of the notion of yogipratyak a and the related yogijñāna (yogic knowledge or cognition) was undertaken by **DHARMAKĪRTI** (c. 600–670) in his **PRAMĀ AVĀRTTIKA** and **NYĀYABINDU**, as well as by his commentators. Dharmakīrti's predecessor **DIGNĀGA** (c. 480–540) had posited that there were only two reliable sources of knowledge (**PRAMĀ A**): direct perception (**PRATYAK A**) and logical inference (**ANUMĀNA**). Dharmakīrti, however, subdivided direct perception (pratyak a) into four subtypes, viz., sensory cognition (indriyājñāna), mental discrimination (**MANOMJĀNA**), self-awareness (**SVASA VEDANA**), and yogic cognition (yogijñāna). In Dharmakīrti's analysis, yogic cognition (yogijñāna) is a form of yogic perception (yogipratyak a), because it fulfills the two conditions of perception (pratyak a): (1) it is devoid of conceptual construction (**KALPANĀ**); and (2) it is a cognition that is "nonerroneous" (abhṛānta), viz., real. The treatment of yogipratyak a in the literature thus focuses on how yogipratyak a fulfills these two conditions of perception. Yogic knowledge is devoid of conceptual construction (kalpanā), Dharmakīrti maintains, because it is nonconceptual (akalpa; **NIRVIKALPA**) and thus "vivid" or "distinct" (spa a). This type of perception is therefore able to perceive reality directly, without the intercession of mental images or concepts. Since yogic cognition is said to be devoid of conceptual construction, this raises the issue of its second condition, its lack of error. Why is meditatively induced perception true and reliable? How does a meditator's yogic perception differ from the hallucinations of the deranged, since both of them presume they have a vivid cognition of an object? The reason, Dharmakīrti maintains, is that the objects of yogic knowledge are "true" or "real" (bhūta; sadbhūta), whereas hallucinations are "false" or "unreal" objects (abhūta; asadbhūta). The only true objects of yogic knowledge offered by Dharmakīrti are the **FOUR NOBLE TRUTHS**: that is, the perception of these truths is true and reliable because they enable one to reach the goal of enlightenment, not because they involve a perception of an ultimate substance. In this sense, Dharmakīrti's understanding of yogijñāna is more focused on the direct realization of the soteriological import of the four noble truths than on extraordinary sensory ability. Therefore, yogic direct perception is qualitatively different from the various forms of clairvoyance that are the byproducts of deep states of concentration that may be achieved by both Buddhist and non-Buddhist practitioners. Yogipratyak a is a form of insight (**VIPĀŚYANA**) possessed only by noble persons (**ĀRYAPUDGALA**); and among the five paths it occurs only on the path of vision (**DARŚANAMĀRGA**) and above. See also **DARŚANA**.

yojana. (T. dpag tshad; C. youxun; J. yujun; K. yusun). In Sanskrit, a "league"; a standard measure of distance in ancient India, and often used in Buddhist texts; it is said to be the distance a yoked team of oxen could travel in one day. Modern estimates of this distance vary widely, with the figure of eight miles often provided as an approximation, although estimates of from four to ten miles (six to sixteen kilometers) are also found.

Yōkan. () (1032–1111). Japanese **VINAYA** master of the Sanronshū (C. **SAN LUN ZONG**); also known as Eikan. Yōkan wrote two important works on **PURE LAND** doctrine known as the *Ōjōūin* and the *Ōjōkōshiki*. In contrast to the **TENDAISHŪ** and **SHINGONSHŪ** interpretation of the practice of **NENBUTSU** (C. **NIANFO**) as the contemplation of the buddha **AMTĀBHA**, Yōkan emphasized instead the efficacy of the vocal recitation of name of Amitābha (**NAMJ AMDABUTSU**). Doctrinally, Yōkan supported the view that enlightenment and afflictions, like buddhas and human beings, are not two but of a single essence. Yōkan or Eikan is also well known for the monastery in Kyōto that took his name, Eikandō, which is also called Zenrinji.

Yokawa. (). The northern of the three main subcomplexes of the **TENDAISHŪ** (C. **TIANTAI ZONG**) monastery **ENRYAKUJI** on **HIEIZAN** in Japan. In 848, the Japanese pilgrim-monk **ENNIN** established the Shūryōgon'in complex in Yokawa; subsequent expansion projects were undertaken by the monks **RYŌGEN** and **GENSHIN**. The Yokawa complex is famous for its central hall, now known as the Yokawa chūdō, also founded in 848, and the Eshin'in (or Eshindō) established by Genshin, which came to function as a special hall for practicing nenbutsu (C. **NIANFO**).

Yona. One of nine adjacent lands (P. paccantadesa) converted to Buddhism by missionaries dispatched by the elder **MOGGALIPUTTASSA** at the end of the third Buddhist council (see **COUNCIL, THIRD**), which was held in **PĀ ALIPUTRA** during the reign of **AŚOKA** in the third century BCE. The region is generally identified as located in northwestern India, homeland of the Bactrian Greeks, and is also known as Yonakā or **YĀVANA**. Yōna was converted by the elder Mahārakkhita, who preached the *Aggikkhandhopamasutta*. The third Buddhist council at Pā aliputra, and the nine Buddhist missions are known only in **STHAMRANIKĀYA** sources and are first recorded in the fifth-century **DĪPAVA SA**.

Yōndam Yuil. () (1720–1799). Korean **SŌN** master and exegete during the Chosŏn dynasty; also known as Mui. Shortly after his parents' death in 1737, Yōndam became a student of the monk Sŏngch'ŏl (d.u.) at the monastery of Pŏpch'ŏnsa on Mt. Sŭngdal and received the monastic precepts the next year from the **VINAYA** master Anbin (d.u.). In 1739, he began scriptural studies under the Sŏn master Pyŏkha Taeu (1676–1763), which he continued under Yongam Ch'ejo (1714–1779) and Sŏlp'a Sangŏn (1707–1791). In 1741, Yōndam began training in Sŏn meditation under Hoam Ch'ejong (1687–1748) and eventually became his disciple. Yōndam established himself as a talented exegete of Sŏn materials and was installed as the abbot of the monastery of Sŏbongsa in 1779. He left many writings, including the *Imha nok*, *Chabo haengŏp*, *Tosŏ kwamok pyŏngnip saqi*, *Sŏnyo saqi*, *Sŏjang saqi*, *Wŏn'gak saqi*, *Simsŏng non*, and others. In his influential *Imha nok*,

Yōdam addressed the anti-Buddhist polemics of Confucian scholars (sagi) on the [CHANYUAN ZHUQUANJIAN DUXI](#), [DAHUI SHUZHUANG](#), [CHANYAO](#), and [YUANJUE JING](#) are still widely used in Korean monastic seminaries, or kangwŏn.

yōndŭng hoe. (). In Korean, “lantern-lighting ceremony”; a Korean Buddhist celebration that originated sometime during the Koryŏ dynasty. To celebrate the lunar New Year, lanterns were lit on the fifteenth day of the first lunar month and kept lit for two nights. Although King Sŏngjong (r. 982–997) banned the ceremony, the ban was lifted in the first year of King Hyŏnjong’s (r. 1010–1031) reign and the ceremony was held again on the fifteenth day of the second lunar month and continued to be held on the second month from that point onward. In 1352, the celebration of the yōndŭng hoe took place in the palace on the traditional East Asian date of the Buddha’s birthday (the eighth day of the fourth lunar month) with one hundred monks in attendance, and the event was subsequently held on the Buddha’s birthday throughout the remainder of the Chosŏn dynasty. This custom of lighting lanterns to celebrate the Buddha’s birthday continues today in Korea.

yong. (J. yŭ; K. yong). In Chinese, “function,” or “application”; a term often deployed in the East Asian religious traditions, including Buddhism, as a philosophical pair with “essence” ([ti](#)). Chinese Daoist and “Dark Learning” ([XUANXUE](#)) texts first imbued the term with philosophical implications: the *Daode jing* refers to yong as the “attributes” of the way, and the *Daodejing zhu*, Wang Bi’s (226–249) commentary to the text, employs the term to indicate the functions or attributes of “nonbeing” ([wu](#)) or “voidness” ([xu](#)). However, yong, along with its companion ti, was not widely used until the Buddhists adopted both terms to provide a basic conceptual frame for reality or truth. For example, the [SAN LUN ZONG](#) master [JIZANG](#) (549–623) used ti and yong to explicate his theory of the middle way ([MADHYAMAPRATIPAD](#)). He connected the middle (zhong) to ti, which he described as “neither ultimate nor conventional” (feizhen feisu), and the provisional (jia) to yong, which he described as “ultimate and conventional” (zhensu). The ti and yong pair was often used in the [HUAYAN](#), [Tiantai](#), and [Chan](#) traditions. [GUIFENG ZONGMI](#) (780–841), a Tang-dynasty master of both the [HUAYAN ZONG](#) and Heze Chan traditions, provided a systematic explanation for yong and ti, based on the [DASHENG QIXIN LUN](#) (“Awakening of Faith According to the Mahāyāna”). In particular, he distinguished between two different types of function in his theory of mind: the “inherent function of the self-nature” (zixing benyong), which he called “numinous awareness” ([LINGZHI](#)), and the responsive functions that accord with conditions (suiyuan yingyong), which he described as the various mental functions that derive from the inherent function of the mind. Many Chinese and Korean Neo-Confucian thinkers, such as Cheng Yi (1033–1107), Zhu Xi (1130–1200), and Yi Hwang (1501–1570), applied Zongmi’s interpretation of this pair to their own philosophical systems.

Yongjia Xuanjue. (J. Yōka Genkaku; K. Yŏnga Hyŏn’gak) (675–713). Chinese [Chan](#) monk renowned for his writings on meditation, also known as Mingdao, Yishujue, and Great Master Zhenjue (True Awakening); Yongjia is his toponym, the name of his hometown in Zhejiang province. Yongjia made a name for himself at a young age as an expert on meditation and the [Tiantai](#) practices of calmness and insight (see [SAMATHA](#) and [VIPASYANA](#)). He is said to have later received a seal of approval ([YINKE](#)) from the sixth patriarch ([LIUZU](#)) of Chan, [HUINENG](#), after studying under the master for only one day and a night; hence, his cognomen Yishujue (Single-Night Enlightened, or Overnight Guest). His teachings are primarily known through the influential works attributed to him, such as the [ZHENGDAO GE](#) and *Yongjia ji*. Yongjia was given the posthumous title Great Master Wuxiang (No Marks).

Yongjusa. (). In Korean, “Dragon Pearl Monastery”; the second district monastery ([PONSŌ](#)) of the contemporary [CHOGYE CHONG](#) of Korean Buddhism, located on Mt. Hwa in Kyŏnggi province. The temple was constructed in 854 and originally named Karyangsa. It was rebuilt in 1790 to serve as the royal tomb of Prince Sado (1735–1762), the father of King Chŏngjo (r. 1776–1800). During the Japanese colonial period (1910–1945), Yongjusa became one of thirty-one head monasteries ([PONSŌ](#)) and it managed forty-nine branch temples (malsa) in several regions. A monks’ training school was established in 1955, followed by a meditation hall in 1969. Yongjusa’s main shrine hall ([TAEUNG CHŎN](#)) was constructed in 1790 and enshrines images of the buddhas [ŚĀKYAMUNI](#), [BHAI AJYAGURU](#), and [AMTĀBHA](#). Other cultural properties at the site include the main temple bell, bronze censers, and a hanging painting of the Buddha ([KWAEBUL](#)).

yongmaeng chŏngjin. (S. ārabdhaviṛya; T. brtson ’grus rtsom pa, C. yongmeng jingjin; J. yūmyōshōjin). In Korean, “ferocious effort”; an especially rigorous period of practice performed during a [SŌN](#) (C. [CHAN](#)) meditative retreat (K. kyŏlche; C. [JIEZHI](#)) in Korea. The term most commonly refers to a one-week period during the winter retreat and leading up to the enlightenment day of the Buddha (Puch’ŏnim sŏngdo il) on the eighth day of the twelfth lunar month (usually in early January), during which all the monks (or nuns) in the meditation hall will undertake the ascetic practice (see [DHUTA GA](#)) of constantly sitting and never lying down to sleep (K. [CHANGJWA PURWA](#)) for the entire seven days. This practice is a ritual reenactment of the Buddha’s own final fervent effort to awaken. The phrase has also come to refer more generally to an intense session of meditation carried out by a small group of elite monks during a three-year retreat (samnyŏn kyŏlsa). See also [SESSHIN](#); [RŌHATSU SESHIN](#).

Yongming Yanshou. (J. Yōmei Enju; K. Yŏngmyŏng Yŏnsu) (904–975). Chinese [Chan](#) master in the [FAYAN ZONG](#) during the Five Dynasties and Song dynasty periods; also known as Chongxuan and Baoyizi. Yongming was a native of Lin’an prefecture in Zhejiang province. At the age of twenty-seven, Yongming left his post as a minor official to become a monk under Cuiyan Lingcan (d.u.), a disciple of the Chan master [XUEFENG YICUN](#) (822–908); he subsequently studied under [TIANTAI DESHAO](#) (891–972) and inherited his Fayan lineage. Beginning in 952, Yongming served as abbot of a series of different monasteries, including Zishengsi on Mt. Xuedou, Lingyinsi (at the request of the king of Wuyue), and Yongmingsi, whence he acquired his toponym. Yongming was renowned for his advocacy of the simultaneous cultivation of Chan meditation and [NIANFO](#) (recitation of the Buddha’s name) and for his magnum opus [ZONGJING LU](#), a massive Chan genealogical history, in one hundred rolls. His writings also include the famous [WANSHAN TONGGUL JI](#) and the [WEIXIN JUE](#). Although Yongming’s Fayan lineage declined in China during the Song dynasty, thirty-six envoys sent by the Koryŏ king to study under Yongming returned with his teachings to Korea, where the line continued to flourish. Yongming was posthumously given the title Chan master Zhijue (Wise Awakening).

Yongningsi. (J. Eineiji; K. Yŏngnyŏngsa). In Chinese, “Eternal Peace monastery”; one of the most important monasteries in the Northern Wei capital of Luoyang. After the Wei rulers moved the Chinese capital to Luoyang, Empress Dowager Ling, the birth mother of Emperor Xiao Mingdi (r. 515–528), began construction of Yongningsi in 516. According to the [LUOYANG QIELAN JI](#), Yongningsi was a grand complex that could house more than a thousand monks and was located to the west of the imperial highway and south of the Changhe gate. In the northern precinct of the monastery was a buddha hall, which housed various golden images, and to the south, a triple-gated tower more than two hundred feet in height. A nine-story pagoda that rose a thousand feet supported a tall golden pole with golden disks to collect the dew. Golden bells were also hung from the pagoda. Since it overlooked the palace, only Emperor Xiao Mingdi and the Empress Dowager were allowed to climb the pagoda to gaze at the entire capital. All the scriptures and paintings from foreign countries available at the time are said to have been stored at the monastery. The eminent translator [BODHIRUCI](#) also translated many scriptures while in residence at Yongningsi. The monastery was devastated by a fire and was left in ruins after the capital was moved again to Ye. Several restorations were made during the Sui and Tang dynasties, but the monastery remains in ruins today.

Yŏngsanjae. (). In Korean, “Vulture Peak Ceremony”; a Korean Buddhist rite associated with the [SADDHARMAPU ARIKASŪTRA](#) (“Lotus Sūtra”), which has been performed in Korea since the mid to late Koryŏ dynasty (918–1392). This elaborate ritual is a loose reenactment of the *Saddharmapu arikasūtra* and is intended to depict the process by which all beings, both the living and the dead, are led to enlightenment. Its performance often occurs in conjunction with the forty-ninth day ceremony (K. sasipku [il] chae; C. [SISHUIJI JIRI ZHAI](#)), which sends a deceased being in the intermediate transitional state ([ANTARĀBHAVA](#)) on to the next rebirth. The Yŏngsanjae is renowned for including the most complete repertoire of Buddhist chant and dance preserved in the Korean tradition. The rite may last for between one day and a week, although it is rare nowadays to see it extend beyond a single day; briefer productions lasting a couple of hours are sometimes staged for tourists. The Yŏngsanjae is protected through the Korean Cultural Property Protection Law as an intangible cultural asset (Muhyŏng Munhwajae, no. 50), and the group responsible for protecting and preserving the rite for the future consists of monks at the monastery of [PONGWŌNSA](#) in Seoul, the headquarters of the [TAEGO CHONG](#). The monks at the monastery also train monks and nuns from other orders of Buddhism, as well as laypeople, in different components of the rite. In recent years, the dominant [CHOGYE CHONG](#) of Korean Buddhism has also begun to perform the Yŏngsanjae again, thanks to training from the Pongwŏnsa specialists in the tradition. ¶ The Yŏngsanjae is held in front of a large [KWAEBUL](#) (hanging painting) scroll depicting [ŚĀKYAMUNI](#) teaching at Vulture Peak ([G DHRĀKŪ APARVATA](#)), delivering the *Saddharmapu arikasūtra* to his followers. A day-long version of the ceremony starts with bell ringing and a procession escorting the attending spirits in a palanquin, which then proceeds to a ceremonial raising of the kwaebul. The rest of the day is made up of the following sequence of events: chanting spells (DHĀRA Ṭ) to the bodhisattva [ĀVALOKITEŚVARA](#) (K. Kwanseŭm posal); the cymbal dance, or [PARACH’UM](#), as monks chant the *Chŏnsu kyŏng* (C. [QIANSHOU JING](#)) dedicated to the thousand-handed incarnation of Avalokiteśvara (see [SĀHASRABHUVASĀHASRANETRĀVALOKITEŚVARA](#)); [PŌMP’AE](#); purification of the ritual site (toryanggye), during which the butterfly dance, or [NABICH’UM](#), is performed to entice the dead to attend the ceremony while the pŏmp’ae chants entreat the three jewels (RATNATRAYA) and dragons ([NĀGA](#)) to be present; the dharma drum dance, or [PŌPKOCH’UM](#), during which a large drum is beaten to awaken all sentient beings; a group prayer to the Buddha and bodhisattvas, where everyone in attendance has the chance to take refuge in the three jewels (ratnatraya); an offering of flowers and incense (hyanghwagye) to the Buddha and bodhisattvas is made by the nabich’um dancers, followed by offering chants; a chant hoping that the food offerings on the altar will be sufficient as the parach’um is performed again together with four dhāra ṭ chants; placing the offerings on the altar while chanting continues; culminating in a transfer of merit (kongdŏkkye) to all the people in attendance, including sending off the spiritual guests of the ceremony. The siktang chakpŏp, an elaborate ceremonial meal, is then consumed. A recitation on behalf of the lay donors who funded the ceremony (hoehyang ūsik) concludes the rite.

Yongsŏng Chinjong. () (1864–1940). Korean monk during the Japanese colonial period (1910–1945), also known as Paek Yongsŏng; leader of a conservative group of monastic reformers, and one of the thirty-three signatories to the Korean Declaration of Independence in 1919. Ordained at the monastery of [HAEINSA](#) in 1879, he received full monastic precepts five years later and became a disciple of Taeŭn Nango (1780–1841) at the hermitage of Ch’ilburam. Later, he had a great awakening while he was studying the [JINGDE CHUANDENGLU](#) at the monastery of [SONGGWANGSA](#), where he became a disciple of the [SŌN](#) master [HWANSŌNG](#)

CHIAN. One year after Korea was annexed by Japan, he established the Taegaksa (Taegakwon) in Seoul in an attempt to propagate Buddhism among a wider public. On March 1, 1919, he signed the Korean Declaration of Independence as a representative of the Buddhist community and was consequently incarcerated by the Japanese colonial government for eighteen months. During his year and a half in prison, he translated many sūtras (such as the voluminous *AVATA SAKASŪTRA*, or *Hwaomgyōng*) from literary Chinese into han'gŭl, the Korean vernacular script, in order to make more Buddhist texts accessible to ordinary Koreans. After his release from prison in March 1921, he established a community known as the Taegakkyo (Teaching of Great Awakening) and a translation center called Samjang Yōkhoe (Society for Translating the *TRIPITAKA*), and devoted most of his time to the translation of Buddhist scriptures. In 1928 he published the journal *Mua* ("No Self") and with *HANYŎNG CHŎNGHO* also published the journal *Puril* ("Buddha Sun"). In May 1929, he and 127 other monks submitted a petition to the Japanese colonial government asking for the restoration of the tradition of celibacy in the Buddhist monasteries. Because of his interest in ensuring the continuance of the *BHĪK U* and *BHĪK U Ī* traditions, Yongsōng personally established many ordination platforms and transmitted the complete monastic precepts (kujokkye) several times during his career. He also stressed the need for monasteries to be self-sustaining economically. In accordance with his plan for self-sustenance, he participated in the management of a mine in Hamgyōng province, and in 1922, he bought some land in Manchuria and ran a farm on the compounds of a branch of the Taegakkyo. He also started a Ch'amsōn Manil Kyōlsahoe (Ten-Thousand Day Meditation Retreat Society) at the monastery of Ch'ilbulsā and attracted many followers from other monasteries. Yongsōng was a prolific writer who left behind many works, including his famous *Kwiwŏn chōngjong* ("The Orthodox Teaching that Returns to the Source"), a tract that compared Buddhism to Confucianism, Daoism, and Christianity, a modern twist on the old "three teachings" syncretism of medieval East Asian philosophy. This work was one of the first attempts by Buddhists to respond to the inroads made by Christianity in modern Korea. In his treatment, he suggests that Confucianism presented a complete moral doctrine but was deficient in transcendental teachings; Daoism was deficient in moral teachings but half-understood transcendental teaching; Christianity was fairly close to the Buddhist ch'ŏn'gyo ("teachings of [humans] and divinities"), which taught the kinds of meritorious actions that would lead to rebirth in heavenly realms but was completely ignorant of the transcendental teaching. Only Buddhism, Yongsōng concluded, presented all facets of both moral and transcendental teachings. Yongsōng's other works include his *Kakhae illyun*, *Susim non*, and *Chōnggong wŏn'il*. See also *IMŎTKO*.

Yongzhong. (C) (J. Eichū; K. Yōngchung) (d.u.). Yuan-dynasty *CHAN* master in the *LINJIZONG*, also known as Jueji Yongzhong, and author of the *ZIMEN JINGXUN*.

yonī. (T. skye gnas; C. sheng; J. shō; K. saeng). In Sanskrit and Pāli, "modes of birth"; four modes by which sentient beings are born into the three realms of existence (*TRAI DHĀTUKA*): (1) oviparous birth (a ajayoni), viz., beings born from eggs, such as birds, reptiles, fish, and insects; (2) viviparous birth (jarāyuja-yoni), viz., beings born from a womb, such as mammals and human beings; (3) moisture-born (sa svedajayoni), viz., beings such as maggots generated by rotten meat or mosquitoes born from swamp water, which are understood to be born as the result of the combination of heat and moisture; (4) metamorphic birth (*UPAPĀDUKAYONI*), viz., spontaneously generated beings, such as divinities (*DEVĀ*), hungry ghosts (*PRETĀ*), denizens of hell (*NĀRAKA*), and those residing in the intermediate state (*ANTARĀBHAVA*). In some interpretations, even beings generally classified in one category may in certain circumstances be born through other modes. For example, although human beings are viviparously born, the five hundred sons of the king of Pāñcāla, one of the sixteen ancient kingdoms of India, are said to have been born from eggs, King Māndhāt was born from moisture, and the first humans to appear at the beginning of the *KALPA* are born by metamorphosis. Among animals, although the first three modes of birth are most common, there are also some animals born by metamorphosis, such as *NAGAS* and *GARU AS*. Finally, among beings that are born through metamorphosis, there are certain types of preta who are said to be born viviparously.

yonīśomanaskāra. [alt. yonīśomanasikāra] (P. yonisomanasikāra; T. tshul bzhin yid la byed pa; C. ruli zuoyi/zheng siwei; J. nyoraisai/shōshiyui; K. yōri chagŭi/chōng sayu /). In Sanskrit, "systematic attention"; attention directed to an object or a phenomenon purposely and thoroughly, without becoming entranced by its external marks (*LAK A A*) and secondary characteristics (*ANUVYĀJANA*). The term is used in the context of meditation to refer to the thoroughgoing reflection in which one traces an object or a phenomenon back to its cause or origin, so that one perceives how it arises and perishes in accordance with conditions. Thus, yonīśomanaskāra ultimately refers to attention directed to the *FOUR NOBLE TRUTHS*, which reveals that the things of this compounded world are fundamentally impermanent (*ANITYA*), suffering (*DU KHA*), and nonself (*ANĀTMAN*). While unsystematic attention (*AYONĪŚOMANASKĀRA*) to the characteristics of sensory objects creates false views, craving, and eventually subjection to the objective order of *SA SĀRA*, systematic attention instead brings this unsystematic attention to an end so that the practitioner perceives the true nature of things. Thus, because of systematic attention, as yet unarisen erroneous views (*MITHYĀD _I*) do not arise, already arisen ones cease, unarisen right views arise (*SAMVAGD _I*), and already arisen ones increase. Systematic attention is thus foundational to the path that leads to liberation from sa sara. See also *YUKTI*.

yōnji. (C. ranzhi; J. nenshi) In Korean, "finger burning." Although not officially sanctioned by the Korean Buddhist *SA GHA*, the ascetic practice of finger burning is sometimes performed by a handful of devoted Korean monks and nuns. Unlike a similar Chinese practice, the practice of finger burning is not performed in the context of ordination, and is held in high regard. The rationale for such a practice is often traced to the self-immolation of the bodhisattva *BHAI AJYARAJA* in the *SADDHARMAPU ARĪKASŪTRA* and the bodhisattva *SADĀPRARUDITĀ*'s self-mutilation in the *A ASĀHASRIKĀPRAJNĀPĀRAMĪTĀ*. See also *DEHADĀNA*; *SHESHEN*.

yon mchod. [alt. mchod yon] (yön chö). In Tibetan, "priest-patron," a term used to describe the relationship between various Tibetan Buddhist hierarchs and Mongol, Manchu, and Chinese rulers. The compound is composed of abbreviations of two terms. The first, "yon bdag," connotes a powerful benefactor or patron, often a political or military leader. The second "mchod gnas" connotes a religious official, such as a court chaplain. The relationship between Tibetan hierarchs and Mongol rulers is traced to the meeting of *SA SKYA PA _ITA* and Godan Khan (1206–1251, the grandson of Genghis Khan). When Mongol troops invaded Tibet, Sa skya Pa _ita led a delegation to the Mongol court in 1247, during which he cured Godan Khan of an illness and offered him religious instruction. Subsequently, Godan Khan became his disciple, sparing Tibet from further invasion and granting control of central Tibet to Sa skya Pa _ita. The classic example of the "priest-patron" relationship occurred when Sa skya Pa _ita's nephew *'PHAGS PA BLO GROS RGYAL MTSHAN* served as religious preceptor and close advisor to Qubilai Khan. Other Tibetan Buddhist hierarchs would serve in similar roles during the Ming and Qing dynasties. As often invoked in Tibetan sources, in the "priest-patron" relationship, the Tibetan Buddhist lama provides religious instruction and spiritual protection (through the performance of tantric rituals) to the Mongol, Manchu, or Chinese chieftain and in return the Mongol, Manchu, or Chinese ruler provides material support and military protection, while allowing Tibet to remain independent.

Yon tan rgya mtsho. (Yöntan Gyatso) (1589–1616). In Tibetan, "Ocean of Good Qualities"; the fourth *DALAI LAMA*. The *DGE LUGS* monk *BSOD NAMS RGYA MTSHO*, later recognized as the third Dalai Lama, visited the court of the Mongol ruler, the Altan Khan, in 1578. It was the Altan Khan who first used the term "Dalai Lama" to refer to this leader of the Dge lugs sect. The third Dalai Lama soon returned to Tibet but came back to Mongolia after the death of the Altan Khan, spending the next five years giving Buddhist teachings and founding monasteries before dying in 1588. His incarnation was identified by the Mongols among their own people, as the grandson of Altan Khan's successor. He was given the name Yon tan rgya mtsho. He was thus the only Dalai Lama who was not ethnically Tibetan. The Dge lugs hierarchy in Tibet did not immediately recognize the Mongol as the incarnation of Bsod nams rgya mtsho. To assuage their concerns, a Mongolian delegation was sent to Tibet in 1600 to invite a group of Dge lugs dignitaries to come to Mongolia and administer the traditional tests to determine the boy's identity. After the tests convinced the Tibetan delegation that he was indeed the fourth Dalai Lama, they took the boy back to *LHASA* in 1602, where he was ordained as a novice at the *JO KHANG*. He received *BHĪK U* ordination in 1614 from his tutor *BLO BZANG CHOS KYI RGYAL MTSHAN*, who would later become the first (or according to a different reckoning, the fourth) *PA CHEN LAMA*. Tibet was on the brink of civil war, with the king of Gtsang, a patron of the *KARMABKA RGYUD*, seeking to control central Tibet, where the Dge lugs were in power with the support of the Mongols. Although the young fourth Dalai Lama appears not to have been involved in politics, the fact that he was a foreigner seems to have been resented in some quarters. He died of uncertain causes in 1616 at the age of twenty-seven. The close relations that developed between the Mongols and the Dge lugs sect as a result of his selection as Dalai Lama would be an important factor in the eventual political ascendancy of his successor, the fifth Dalai Lama, *NGAG DBANG BLO BZANG RGYAMSHO*, in 1642.

Yōsai. (J) (). See *MYŌAN EISA*.

Yose. (K) (). See *WŎNMYO YOSE*.

Yu. (J. U; K. U). Ethnikon used in China for monks who hailed from *KHOTAN* (transcribed as Yutian in Chinese), an Indo-European oasis kingdom at the southern edge of the Takla Makhan desert in Inner Asia, along the northern slope of the Kunlun mountains. Khotan was a major center of Buddhism in Central Asia and an important conduit for the transmission of Buddhism from India to China along the *SILK ROAD*.

Yuandeng. (C) (). See [ZHANRAN YUANDENG](#).

yuandun jiao. (J. endongyō; K. wōndon kyo). In Chinese, “perfect and sudden teaching”; one of the highest levels of the various doctrinal taxonomies (panjiao; see [JIAOXIANG PANSHI](#)) deployed in the [Tiantai Zong](#), [Huayan Zong](#), and sometimes the [Chan Zong](#). The Tiantai school first introduced the term to refer to the highest form of the teachings. In the Tiantai analysis, “perfect” refers to “perfect teaching” or “consummate teaching” ([YUANJIAO](#)), the last of the four types of teachings according to content (huafa sijiao), while “sudden” refers to the “sudden teaching” ([DUNJIAO](#)), the first of the four modes of exposition (huayi sijiao) (see [Tiantai Baijiao](#)). The compound “perfect and sudden teaching” thus refers to the consummate vision of the ultimate truth of Buddhism that is expounded all at once without any provisional or gradual expedients. In the Tiantai zong, this “perfect and sudden teaching” may refer either to (1) the teachings of the Tiantai school itself, which provide an approach to Buddhist soteriology in which every stage, condition, and thought, whether defiled or pure, becomes the basis of enlightenment since it represents the perfect median truth (see [SANDI](#)); or (2) the teachings of the [Avata Sakasūtra](#), in which the Buddha expounded his consummate and unadulterated vision of reality immediately after his enlightenment without any consideration of the ability of his audience to understand that vision. The Huayan school follows closely the Tiantai concept of yuandun jiao. The Huayan and [Chan](#) teacher [Guifeng Zongmi](#) (780–841), for example, refers to the perfect and sudden teaching as the “huayi dun” (sudden teaching according to the method of exposition), correlating it with the teaching of the dharma-realm of the mutual and unobstructed interpenetration between phenomenon and phenomena ([Shishi Wu'ai Fa'jie](#)). The Korean [Sōn](#) (Chan) master [Pojo Chinul](#) (1158–1210), based on the works of [Li Tongxuan](#) (635–730), interpreted the term as referring to the perfect and sudden enlightenment to the truth of nature origination ([Xingqi](#)), which occurs through understanding Huayan doctrine from a Sōn perspective. In the Chan tradition, therefore, the “perfect and sudden teaching” may refer to the highest form of the Buddhist teachings rather than to the teachings of any specific scholastic school ([KYO](#)). See also [Wōndon Sōngbul Non](#).

yuanjiao. (). In Chinese, “perfect/consummate teaching.” See [Huayan Wujiao](#).

Yuanjue jing. (J. Engakukyō; K. Wōn'gak kyōng). In Chinese, “Scripture of Perfect Enlightenment”; also known as *Dafangguang yuanjue xiuduoluo liaoyi jing*, an influential indigenous Chinese sūtra (see [APOCRYPHA](#)). The *Yuanjue jing* was purportedly translated by a certain Buddhārāta (d.u.) at the monastery of [Baimsi](#) in 693, but no Sanskrit or Tibetan equivalent is known to have existed and the scripture is now recognized as being an apocryphon. While in a special [Sāmadhi](#) named “great illuminating repository of spiritual penetration” (shentong daguang mingzang), the Buddha is requested by twelve bodhisattvas including [Mañjuśrī](#), [Samantabhadra](#), and [Maitreya](#) to explain perfect enlightenment (yuanjue), the originally pure mind as its cause, and the different ways to cultivate it. The scripture focuses on [Sāmātha](#), [Sāmapatti](#), and [Dhāyāna](#) as the primary means of cultivation, and divides the spiritual capacity of sentient beings into three levels. The [Tathāgatagarbha](#) and original-enlightenment ([Benjue](#)) theories of the apocryphal [Dasheng Qixin Lun](#) seem to have influenced the composition of the *Yuanjue jing*. The scripture was especially influential in the writings of the [Chan](#) historian [Guifeng Zongmi](#), who wrote several commentaries and subcommentaries on the text, including his *Yuanjue jing lueshu*, *Yuanjue jing lueshu chao*, *Yuanjue jing daochang xiuzheng yi*, *Yuanjue jing dashu*, and *Yuanjue jing dashu chao*. Zongmi also wrote manuals, no longer extant, on the use of the *Yuanjue jing* in repentance rituals. The *Yuanjue jing* is one of a number of Chan-related texts that were translated into Uighur Turkish in the [Turfan](#) region.

Yuanmiao. (). See [Gaofeng Yuanmiao](#).

Yuanming lun. (J. Enmyōron; K. Wōnmyōng non). In Chinese, “Treatise on Perfect Illumination”; attributed to [Āśvagho A](#), but almost certainly a transcription of a lecture by a teacher associated with the Northern school ([Bei Zong](#)) in the nascent Chinese [Chan](#) tradition. Several copies of this text have been discovered at [Dunhuang](#), and a private copy is extant in Japan. The treatise consists of nine chapters written largely in catechistic format. The treatise elucidates the causes and results of the path, the nature of the [Dharmadhātu](#) as the manifestation of one's own mind, false and correct views, the importance of [Upāya](#), and the practice of meditation. The *Yuanming lun* serves as an important source on the teachings of the early Chan tradition before its coalescence around the mythology of the “sixth patriarch” ([Liu'zu](#)) [Huineng](#) and the so-called Southern school ([Nan Zong](#)).

Yuanren lun. (J. Genninron; K. Wōnin non). In Chinese, “Treatise on the Origin of Humanity”; by the eminent [Huayan](#) and [Chan](#) scholiast [Guifeng Zongmi](#). A preface to this relatively short treatise was prepared by Zongmi, as was another by his lay disciple Pei Xiu (787?–860). The treatise largely consists of four chapters: exposing deluded attachments, exposing the partial and superficial, directly revealing the true source, and reconciling root and branches. In his critique of deluded attachments, Zongmi offers a response to the different Confucian and Daoist theories of the way ([Dao](#)), spontaneity (ziran), primal pneuma (yuanqi), and the mandate of heaven (tianming). Zongmi then briefly summarizes the teachings of the different vehicles of Buddhism, such as [Hinayāna](#) and [Mahayāna](#), and expounds their different approaches to reality. Relying on the teachings of the [Avata Sakasūtra](#), Zongmi finally offers a Buddhist alternative to the theories of the Confucian and Daoist critics: the [Tathāgatagarbha](#) as the origin of humanity.

yuanrong. (J. ennyū; K. wōnyung). In Chinese, “consummate interfusion,” “perfectly interfused”; a term used in the [Huayan](#) and [Tiantai](#) traditions to refer to the ultimate state of reality wherein each individual phenomenon is perceived to be perfectly interfused and completely harmonized with every other phenomena. Yuanrong is contrasted with “separation” ([Geli](#)), the understanding of reality in terms of the discriminative phenomena of the conventional realm. ¶ The concept of yuanrong is deployed soteriologically as one of the two modes of describing the bodhisattva path in the Huayan tradition, viz., the “approach of consummate interfusion” (yuanrong men), also known as the “approach of consummate interfusion and mutual conflation” ([YUANRONG XIANGSHE MEN](#)); this mode is contrasted with the “approach of sequential practices” ([CIDI XINGBU MEN](#)). The approach of sequential practices refers to the different stages in the process of religious training, which progress through the fifty-two stages of the bodhisattva path ([Mārga](#)). By contrast, the yuanrong men focuses instead on the principle of equivalency (pingdeng) and indicates the way in which any one stage of training subsumes all stages of the path, or how the inception of the path is in fact identical to its consummation. According to this mode of description, then, the completion of the ten stages of faith (shixin), a preliminary stage of the mārga in the Huayan tradition, is often stated to be identical to the achievement of buddhahood ([XINMAN CHENGFO](#)). In the Huayan school's fivefold taxonomy of the teachings ([Huayan Wujiao](#)) as systematized by [Fazang](#) (643–712), the three vehicles are considered to represent the xingbu men, while the “consummate teaching” ([YUANJIAO](#)), the final and highest level of teaching in this schema, corresponds to the yuanrong men. ¶ Yuanrong is also used in accounts of contemplation practice in the Huayan school, as, for example, in the “contemplation on the consummate interfusion of the three sages” (sansheng yuanrong guan), which was treated by both [Chengguan](#) (738–839) and [Li Tongxuan](#) (635–730). In this Huayan meditation, the bodhisattvas [Mañjuśrī](#) and [Samantabhadra](#) represent the causal aspects of practice (yinfen), and the buddha [Vairocana](#) the fruition aspect (guofen); the consummate interfusion of the causal and effect aspects of practice thus indicates enlightenment. Samantabhadra and Mañjuśrī are juxtaposed as, respectively, the [Dharmadhātu](#) as the object of faith (suoxin) and the mind as the subject of faith (nengxin), as practice (xing) and understanding (jie), and as principle ([Li](#)) and wisdom (zhi). When these juxtaposed aspects are perfectly interfused with each other, the causal aspect is consummated and becomes perfectly interfused with the effect aspect. Thus Samantabhadra as the “empty [Tathāgatagarbha](#)” (kong rulaizang) and Mañjuśrī as the “nonempty tathāgatagarbha” (bukong rulaizang) are interfused with Vairocana Buddha's “comprehensive tathāgatagarbha” (zong rulaizang). ¶ In the Tiantai tradition, the “consummate interfusion of the three truths” (yuanrong sandi) is one of the two ways of interpreting the three truths ([SANDI](#)), viz., of emptiness (kongdi), provisionally real (jiadi), and the mean (zhongdi). The yuanrong sandi, also termed the “nonsequential three truths” ([BU CIDI SANDI](#)), refers to the notion that each truth (di) is endowed with all three of these truths together, and thus the particular and the universal are not separate from one another. This mode is distinguished from the “differentiated three truths” ([GELI SANDI](#)), also known as the “sequential three truths” (cidi sandi), where each truth is treated independently; in this mode, the first two truths represent the aspect of phenomena, while the last truth, of the mean, refers to the aspect of principle. In the Tiantai doctrinal taxonomy (see [Tiantai Baijiao](#); [Wushi Baijiao](#)), geli sandi and yuanrong sandi are said to correspond, respectively, to the “distinct teaching” (biejiao) and the “consummate teaching” (yuanjiao), the third and fourth of the “four types of teaching according to their content” (huafa sijiao) in the Tiantai doctrinal classification. ¶ In both the Huayan and Tiantai traditions, yuanrong is also employed as a defining characteristic of the “dharma realm” (fajie; S. dharmadhātu). The term “consummate interfusion of the dharma realm” (fajie yuanrong) describes both the infinitely interdependent state of the Huayan “dharmaadhātu of the unimpeded interpenetration of phenomenon with phenomena” ([Shishi Wu'ai Fa'jie](#)), as well as the Tiantai doctrine of “intrinsic inclusiveness” (xingju), in which each individual phenomenon is said to be endowed with the [Trichilocosm](#) ([SANQIAN DAQIAN SHUIE](#); see [Trisāhasramahāsāhasralokadhātu](#)), which represents the entirety of existence in the Tiantai cosmology. The Huayan “dharmaadhātu of the unimpeded interpenetration of phenomenon with phenomena” is systematized in the doctrine of the Huayan version of causality, the “conditioned origination of the dharmadhātu” ([FAJIE YUANQI](#)), and this Huayan causality of the dharmadhātu is also explained as the “consummate interfusion of the six aspects” ([LIUXIANG yuanrong](#)).

yuanrong sanguan. (). In Chinese, “three contemplations of consummate interfusion.” See [SANGUAN](#).

yuanrong xiangshe men. (). In Chinese, “approach of consummate interfusion and mutual conflation.” See [YUANRONG](#).

Yuanwu Kegin. (J. Engo Kokugon; K. Wōno Kūkkūn) (1062–1135). Chinese [Chan](#) master in the [Linji Zong](#); also known as Wuzhuo and Foguo. Yuanwu was a native of Chongning, Pengzhou prefecture, in present-day Sichuan province (northwest of the city of Chengdu). Little is known about his early career, but Yuanwu eventually became a disciple of the Chan master [Wuzu Fayan](#). According to legend, Yuanwu became ill after leaving Wuzu's side, and returned as Wuzu had predicted. Yuanwu then inherited Wuzu's Linji lineage. While traveling in the south, Yuanwu befriended the statesman [Zhang Shanying](#) (1043–1122) and also won the support of other powerful local figures, such as the governor of Chengdu. At their request, Yuanwu served as abbot of several monasteries, including Jiashansi and Daolinsi, where he lectured on the *Xuedou qonggu* by [Xuedou Chongxuan](#). These lectures were later edited together as the [Biyuan Lu](#) (“Blue Cliff Record”), an

influential collection of Chan texts ([GONGGAI](#)). Yuanwu was honored with several titles: Empress Huizong (r. 1100–1125) gave him the title Chan master Faguo (Buddha Fruition) and Gaozong the title Chan master Yuanwu (Consummate Awakening). The title Chan master Zhenjue (True Enlightenment) was also bestowed upon him. Among his hundred or so disciples, [DAHUI ZONGGAO](#), the systematizer of the [KANHUA CHAN](#) method of meditation, is most famous. Yuanwu's teachings are recorded in the *Yuanwu Foguo chanshi yulu* and *Yuanwu chanshi xinyao*.

yuganaddha. (T. zung 'jug; C. shuangru/shuangyun; J. sōnyū/sōun; K. ssangip/ssangun /). In Sanskrit and Pāli, lit., “yoked together,” sometimes translated as “union” or “joining.” The term is especially important in tantric literature, where it often refers to the union of two things, resulting in a state of nonduality ([ADVAYA](#)). However, the term appears in a variety of contexts where two elements are conjoined, including serenity ([ŚAMATHA](#)) and insight ([VIPĀSYANĀ](#)), wisdom ([PRAJÑĀ](#)) and method ([UPĀYA](#)), [SA SĀRA](#) and [NIRVĀ A](#), male and female, and subject and object. In Pāli literature, the term appears especially in the context of treatments of samatha and vipassanā, both in practices in which the meditator alternates between the two and practices in which the two are unified.

Yuimae. (C. Weimo hui; K. Yuma hoe /). In Japanese, “[VIMALAKĪRTI](#) ceremony.” One of the three great ceremonies (Nankyō san[n]e) held in the ancient Japanese capital of Nara. In 656, when the senior courtier Nakatomi no Kamatari (an ancestor of the Fujiwara clan) became seriously ill, the Paekche nun Pōmmyōng (J. Hōmyō) advised Empress Saimei to sponsor a reading of the “Inquiry about Illness” chapter of the [VIMALAKĪRTINIRDEŚA](#) in order to speed his recovery. The reading was successful and, out of gratitude, Kamatari and his family subsequently sponsored a lecture on the sūtra in 658 to commemorate the construction of the new monastery of Sankaiji. This ceremony was transferred to the Hossōshū (C. [FAXIANG ZONG](#)) monastery of [KOFUKUJI](#) in Nara in 712, where it was held periodically every two to five years; it is now observed annually on the tenth day of the tenth lunar month. For seven days, a lecture on the *Vimalakīrtinirdeśa* is offered to the public and offerings are made to the [SA GHĀ](#).

Yujōmsa. (/). In Korean, “Elm Hillock Monastery”; one of the four major monasteries located in the Diamond Mountains ([KŪMGANGSAN](#)) in present-day North Korea, and best known traditionally for its fifty-three buddha images. Yujōmsa claims to be one of the oldest monasteries on the Korean peninsula. According to its historical record, *Kūmgangsan Yujōmsa sajōkki*, written in 1297 by the Koryō official and diplomat Min Chi (1248–1326), icons of fifty-three buddhas drifted to the Silla seashore in the year 4 CE through the intercession of an Indo-Scythian [alt. Yuezhi, Rouzhi] king from the northwestern region of India. These images were originally cast by [MANJUŚRĪ](#) in the Indian city of [ŚRĀVASTĪ](#) and enshrined inside a large bell. After landing in Korea, the bell containing these fifty-three icons magically traveled inland and was eventually discovered in a branch of an elm tree by a Korean local official. To house these icons, the Silla king Namhae Ch'ach'aung (r. 4–24 CE) ordered the construction of this monastery, which he named after the elm tree in which the bell was discovered. Despite this legend of the monastery's origins, however, the main construction work at Yujōmsa could not have begun before 1168. In the thirteenth century, during the late Koryō period, the monastery enjoyed the patronage of the Mongol–Korean court, which raised its political status and importance. The fifty-three buddhas of Yujōmsa remained a popular destination for both literati tourists and Buddhist pilgrims to the Diamond Mountains throughout the Chosŏn dynasty. When the site was surveyed in 1912 by the Japanese scholar Sekino Tadashi (1867–1935), only fifty small gilt bronze icons were displayed in the Nūngin pojŏn on a unique screen altar that was ornamented with meandering tree branches. In contrast to Min Chi's description of the iconography, various other images, including bodhisattvas and monastic figures, were included along with the buddha icons. Stylistically, forty-three individual figures could be dated to the Unified Silla period, and the remaining seven were determined to be post-Koryō products. This incongruent mixture of styles is due to continuous devastations of the images by fire and theft and their subsequent restorations. Yujōmsa burned to the ground during the Korean War (1950–1953) and the current whereabouts of the fifty-three icons are unknown.

Yujōng. (K) (/). See [SAMŎNG YUJŎNG](#).

yukti. (P. yutti; T. rigs pa; C. daoli; J. dōri; K. tori /). In Sanskrit, “reasoning” or “argumentation”; the process of analytical reflection that results in correct understanding. The term often appears in conjunction with [ĀGAMA](#) (scripture), as criteria or tools deployed to verify a particular point of doctrinal correctness. Yukti is usually presumed to have two denotations in the literature, viz., “reasoning” and “rational principles,” although sometimes it is difficult to differentiate between these two senses in a particular text. ¶ The [MAHĀYĀNASŪTRĀLA KĀRA](#), for instance, refers to yukti as one of the four types of provisional establishment (prajñaptivyavasthāna), that is, provisional establishment of dharma (dharmaprajñaptivyavasthāna), truth (satyaprajñaptivyavasthāna), reasoning (yuktiprajñaptivyavasthāna), and vehicle (yānaprajñaptivyavasthāna). Yukti is itself subdivided into four types, that is, the yukti of reference (apek āyukti), defined as systematic attention ([YONISOMANASKĀRA](#)); efficacy (kāryakāra ayukti), defined as right view together with its fruits (samyagd i phalānvitā); valid proof (upapattisāadhanayukti), defined as analysis by means of correct cognition (pramā avicaya); and reality ([DHARMATĀ](#)yukti), defined as the inconceivable ([ACINTYA](#)). ¶ In such texts as the [YOGĀCĀRABHŪM](#), the [SA DHINIRMOCANASŪTRA](#), and the [ABHIDHARMASAMUCCAYA](#), the four types of yukti are described as tools or means for investigating Buddhist teachings and yukti thus carries the denotation of “rational principles” (see [VYĀKHYĀYUKTI](#)). In these scriptures, the principle of dependence (apek āyukti) is defined as the principle of dependent origination ([PRAṬITYASAMUTPĀDA](#)); thus, in dependence on the seed, the shoot emerges. The principle of efficacy (kāryakāra ayukti) is defined as the way in which particular causes are associated with specific effects; thus, visual consciousness affects vision but not hearing. The principle of valid proof (upapattisāadhanayukti) is defined as the three types of valid knowledge ([PRAMĀ A](#)), that is, direct perception ([PRATYAK A](#)), logical inference ([ANUMĀNA](#)), and scripture (āgama). The principle of reality (dharma-tā-yukti) is defined as the generic properties and natures of dharmas, such as the property of water falling downward, or the sun rising in the east. The *Sa dhinirmocanasūtra*'s emphasis on the third yukti of valid proof ultimately led to a narrowing of the term to refer to the three types of valid knowledge (pramā a). After [DIGNĀGA](#) (c. 480–540), who accepted only two pramā as—that is, direct perception (pratyak a) and logical inference (anumāna), but not scripture (āgama)—yukti is subsequently confined to only these two types of pramā as. In the [ABHIDHARMAKOŚABHĀ YA](#), Vasubandhu advocates that the wisdom obtained through reflection ([CINTĀMAYIPRAJÑĀ](#)), the second of the three modes of wisdom (prajñā) (along with the wisdom obtained through listening/learning [[ŚRUTĀMAYIPRAJÑĀ](#)] and the wisdom obtained through meditative practice [[BHĀVANĀMAYIPRAJÑĀ](#)]) is produced from investigation by means of yukti (yuktinidhyānā). Since Vasubandhu presents all three modes of wisdom as arising from meditative concentration ([SAMĀDHI](#)), yukti in this context seems to have been understood in relation to meditative practice, not purely intellectual reasoning. ¶ The Pāli equivalent yutti, which appears in the [NETTIPPAKĀRA A](#), is presented as one of the sixteen categories (hārā) of scriptural exposition, referring to (logical) fitness, right construction, or correctness of meaning.

yuktikāya. (T. rigs tshogs). In Sanskrit, literally “corpus of reasoning,” or “collection of reasoning”; a term used in the Indian and Tibetan traditions to refer collectively to six works that traditionally constitute [NĀGĀRJUNA](#)'s philosophical oeuvre. The six works are the [MŪLAMADHYAMAKĀKĀRIKĀ](#), [YUKTI A IKĀ](#), [ŚŪNYĀTASAPTATI](#), [VIGRAHAYĀVARTANĪ](#), [VAIDĀLYAPRAKARA A](#), and [RATNĀVALĪ](#). (Some versions list only five works in the corpus, eliminating the *Ratnāvalī*; others substitute the [AKUTOBHAYĀ](#) in place of the *Ratnāvalī* as the sixth work.) This group of texts is often referred to in connection with the [STĀVAKĀYA](#), or “corpus of hymns,” the devotional works attributed to Nāgārjuna. There are traditionally four works in this group of hymns, known collectively as the [CATU STĀVA](#): the [LOKĀTĪTASTĀVA](#), [NIRĀUPAMASTĀVA](#), [ACINTYASTĀVA](#), and [PĀRAMĀRTHASTĀVA](#), although a number of other important hymns are also ascribed to Nāgārjuna. These two collections of Nāgārjuna's works figure prominently in the “self-emptiness, other emptiness” ([RANG STONG GZHAN STONG](#)) debate in Tibetan Buddhism, where the parties disagree on the question of which corpus represents Nāgārjuna's final view.

Yukti a ikā. (T. Rigs pa drug cu pa; C. Liushisong ruli lun; J. Rokujūju nyoriron; K. Yuksipsong yōri non /). In Sanskrit, “Sixty Stanzas of Reasoning”; one of the most famous and widely cited works attributed to [NĀGĀRJUNA](#), traditionally counted as one of the texts in his “corpus of reasoning” ([YUKTIKĀYA](#)). Although lost in the original Sanskrit, the work is preserved in both Tibetan and Chinese; a number of the Sanskrit stanzas have however been recovered as citations in other works. Sixty-one stanzas in length, the work is a collection of aphorisms generally organized around the topic of [PRAṬITYASAMUTPĀDA](#). It begins with the famous homage to the Buddha, “Obeisance to the King of Sages who proclaimed dependent origination, this mode by which production and disintegration are abandoned.” The work argues throughout that the world that is subject to production and disintegration is an illusion created by ignorance and that the path taught by the Buddha is the means to destroy this illusion and the suffering it creates. Individual stanzas are quoted by such commentators as [BHĀVAMEKA](#), [CANDRAKĪRTI](#), and [ŚĀNTARAK ĪTA](#) in support of some of the central debates in [MADHYAMAKA](#), such as whether [ARHAT](#)s must understand the Madhyamaka conception of emptiness ([ŚŪNYATĀ](#)) in order to be liberated from rebirth and whether Nāgārjuna held that external objects do not exist (the thirty-fourth stanza can be read to suggest that he held this view).

Yukti a ikāv tti. (T. Rigs pa drug cu pa'i 'grel pa). “Commentary on [[NĀGĀRJUNA](#)]'s Sixty Stanzas of Reasoning,” by [CANDRAKĪRTI](#). See [YUKTI A IKĀ](#).

Yulan Guanyin. (C) (/). See [MALANG FU](#).

yulanben. (T. yongs su skyob pa'i snod; J. urabon; K. uranbun /). In Chinese, lit. “yulan vessel,” referring to the “ghost festival.” The Sinographs “yulan” have typically been interpreted by scholars to be a transcription of a hypothetical [BUDDHIST HYBRID SANSKRIT](#), Middle Indic, or perhaps even Iranian form [ULLAMBANA](#), which is presumed to correspond to the Sanskrit avalambana (lit. “hanging downward,” “suspended”); the term refers to the “Ghost Festival,” a ritual that sought the salvation of beings condemned to the unfortunate fate of being “suspended” in hell. This explanation of yulan is questionable, however, since this connotation of the Sanskrit term avalambana is unknown in Indian Buddhist contexts. The Tibetan translation of yulanben as yongs su skyob pa'i snod, or “vessel of complete protection,” also does not fit any connotations of “hanging down”; the Tibetan rendering does, however, seem to fit better an alternate explanation of the derivation of yulan(ben) as the Buddhist Hybrid Sanskrit term ullupana (sometimes mistakenly transcribed as ullupana, ullumbana, etc.), lit. “rescuing, extracting [from an unfortunate fate].” The Sinograph “ben” (“bowl”) is less problematic; it refers to the bowl in which offerings are placed during the [PRAVĀRA Ā](#) festival in order to rescue one's ancestors from their unfortunate destinies. A more recent hypothesis is that “yulan” is a transcription of the Sanskrit and Pāli term odana (cooked rice) and “ben” a native word for bowl; the compound “yulanben” is thus not a transcription of the hypothetical Sanskrit word ullambana but actually means a “rice bowl,” perhaps even a special kind of

rice bowl for making offerings on the pravāra ā day. The term *yulanben jing* is now used to refer to the “ghost festival,” a popular ceremony in medieval China, Korea, and Japan, when offerings were made to the [SA GHA](#) of the ten directions ([DASADĪS](#)) on behalf of one’s ancestors. A bowl was filled with all kinds of flavorful foods and fruits and offered on behalf of seven generations of one’s deceased parents and ancestors. The festival was held on the full moon of the seventh lunar month, when the *sa gha* performed the pravāra ā ceremony, ending the summer rains retreat ([VAR Ā](#)). The origin myth and practices associated with the ghost festival are found in various sources, including popular stories known as [BIANWEN](#) and such Buddhist apocryphal scriptures as the [YULANBEN JING](#) and [BAO’EN FENGBEN JING](#) (“Sūtra for Offering Bowls to Repay Kindness”). The Japanese [OBON FESTIVAL](#) (alt. Obon) derives from this term; it is celebrated in either mid-July or mid-August in order to honor the spirits of one’s deceased ancestors.

Yulanben jing. (T. ‘Phags pa yongs su skyobs pa’i snod ces bya ba’i mdo; J. Urabongyō; K. Uranbun kyōng). In Chinese, “Book of the Yulan Vessel”; an influential indigenous Chinese Buddhist scripture (see [APOCRYPHA](#)), often known in English as the *Ullambana Sūtra* or simply the *Yulanben Sūtra*. Along with the [BAO’EN FENGBEN JING](#) (“Scripture for Offering Bowls to Repay Kindness”), the *Yulanben jing* details the practice of the ghost festival ([YULANBEN](#)) and its origin myth. Little is known about the provenance of either text. Both are now generally presumed to be indigenous Chinese works, although some scholars continue to maintain that they are of Indian or Central Asian origin. They are thought to have been composed sometime between the fourth and fifth centuries and were included in the Chinese Buddhist canon as early as the sixth century. The origin myth recounted in the scripture describes the pious efforts of Mulian (S. [MAHĀMAUDGALYĀYANA](#)), one of the two main disciples of the Buddha, to save his mother from the tortures of her rebirth as a hungry ghost ([PRETA](#)). The Buddha explains to Mulian that it is impossible for an individual on his own to save his ancestors from their suffering; instead, one should place offerings in a bowl for the entire [SA GHA](#) of the ten directions, and these offerings will be sufficient to liberate up to seven generations of one’s parents and ancestors from their unfortunate rebirths. At least six commentaries were written on the *Yulanben jing*, although only two survive, including an influential exegesis by [GUIFENG ZONGMI](#). The Tibetan translation of the scripture, made in the Chinese outpost of [DUNHUANG](#) sometime in the early ninth century by ‘GOS CHOS GRUB (C. Facheng; c. 755–849), is rendered directly from the Chinese recension and is extant in only three manuscript editions of the Tibetan canon ([BKA’ GYUR](#)). See also [YULANBEN](#).

yulu. (J. goroku; K. ōrok). In Chinese, “discourse records” or “recorded sayings,” also known as yuben (lit. “edition of discourses”) or guanglu (“extensive records”); compilations of the sayings of [CHAN](#), [SON](#), and [ZEN](#) masters. This genre of Chan literature typically involved collections of the formal sermons ([SHANGTANG](#)), exchanges ([WENDA](#)), and utterances of Chan masters, which were edited together by their disciples soon after their deaths. The yulu genre sought to capture the vernacular flavor of the master’s speech, thus giving it a personal and intimate quality, as if the master himself were in some sense still accessible. Often the recorded sayings of a master would also include his biography, poetry, death verse ([YU](#)), inscriptions, letters ([SHUZHANG](#)), and other writings, in addition to the transcription of his lectures and sayings. For this reason, Chan discourse records are the Buddhist equivalent of the literary collections (wenji) of secular literati. The term first appears in the [SONG GAOSENG ZHUAN](#), and the genre is often associated particularly with the Chan master [MAZU DAOMI](#) (709–788) and his [HONGZHOU](#) line of Chan. Among the more famous recorded sayings are the *Mazu yulu* (a.k.a. *Mazu Daoyi chanshi guanglu*), [LINJI YIXUAN](#)’s [LINJI LU](#), and [HUANGBO XIYUN](#)’s [CHUANXIN FAYAO](#). Recorded sayings written in Japanese vernacular are also often called a hōgo (dharma discourse).

Yum bu bla sgang. (Yumbu Lagang). A palace and adjacent tower purported to be Tibet’s oldest building, established according to legend by the first Tibetan king Gnya’ khri btsan po (Nyatri Tsenpo) in central Tibet’s Yar klungs (Yarlung) Valley. It may have served as the residence for the earliest Tibetan rulers and was likely renovated by the twenty-eighth king, Lha Tho tho ri gnyan btsan (Lha Tōthori Nyentsen, b. 433) during the mid-fifth century. Legends state that this king received the first Buddhist scriptures while residing at the Yum bu bla sgang as they miraculously descended from the sky, heralding the eventual religious conversion of the country. According to one early Tibetan historian, however, the texts were actually transported by the Indian cleric Buddhakṛita; the king, unable to read the Indic script, declared their miraculous descent in order to keep secret their foreign origins. The texts were therefore called the gnyan po sgang ba, “the sacred secret,” and indeed remained a secret until the advent of king [SRONGBTSAN SGAMPO](#) in the seventh century.

Yum chen mo. In Tibetan, lit., “great mother”; a Tibetan epithet for a goddess who is the deified embodiment of the [PRAJÑĀPĀRAMITĀ](#), or perfection of wisdom. The term is also used to refer to the [ŚĀTASĀHASRIKĀPRAJÑĀPĀRAMITĀ](#) (“Perfection of Wisdom in One Hundred Thousand Lines”), or to any other prajñāpāramitā sūtra. Finally, Yum chen mo is also an honorific term used to refer to the mother of the [DALAI LAMA](#).

Yun’an Puyan. (J. Unnan Fugan; K. Unam Poam) (1156–1226). Chinese [CHAN](#) master in the [LINJI ZONG](#); a native of Siming in present-day Sichuan province. After studying under Shigu Xiyi (d.u.) and Wuyong Jingquan (1137–1207) following his ordination, Yun’an traveled to the monastery of Zhengzhao Chanyuan on Mt. Yang in 1184 and continued his training under the Chan master Songyuan Chongyue (1132–1202), who early in his vocation had been a student of [DAHUI ZONGGAO](#). When Songyuan was moved to Guangxiao Chansi in Jiangsu province and again to Shiji Chanyuan in Anhui province, Yun’an followed and continued to serve the master for eighteen years. Yun’an eventually became Songyuan’s successor. In 1202, after Songyuan’s death, Yun’an was invited to reside in a new hermitage established by the master’s brother in Yun’an’s hometown in Siming. This hermitage was named Yun’an, whence he acquired his toponym. In 1206, Yun’an moved to Dasheng Puzhao Chansi in Jiangsu province, where he trained many eminent disciples, such as [XUTANG ZHIYU](#). His disciples edited his sayings together in the *Yun’an Puyan chanshi yulu*.

Yungang. (J. Unkō; K. Un’gang). A complex of some fifty-three carved Buddhist caves located at the southern foot of Mt. Wuzhou some ten miles west of the city of Datong, in the Chinese province of Shaanxi. The Yungang grottoes extend roughly half a mile from east to west and were carved over a fifty-year period between the fifth and sixth centuries CE under the patronage of the Northern Wei dynasty (386–534) court. The caves themselves contain roughly fifty thousand Buddhist sculptures, which are noted for their rich variety. The grottoes at Yungang are divided into eastern, western, and central zones. Most of the best-preserved grottoes are found in the western zone, although Grotto No. 1 in the eastern section still contains numerous sculptures in relief. Grotto No. 5, located inside the entrance to the site, contains a giant buddha statue. Grottoes 16–20 are especially renowned for their five colossal buddha images. The iconographical features of the sculptures preserved at the Yungang caves are similar to those found in the contemporaneous cave complex at [DUNHUANG](#); unlike Dunhuang, however, the Yungang caves contain no paintings. Since their completion, the Yungang grottoes have fallen victim to both war and natural disasters. After the People’s Republic of China was founded in 1949, the Chinese government took an interest in the site, officially placing it under state protection in 1961. In December 2001, the Yungang grottoes were listed as a UNESCO World Heritage site.

Yunjusi. (). In Chinese, “Cloud Dwelling Monastery”; monastery that is the home of the [FANGSHAN SHUJING](#) (stone scriptures). The monk Jingwan (?–639) allegedly founded this monastery in 631, but a stone inscription dated to 669 is the earliest written record of its existence. The monastery was also known as Xiyusi (Western Valley or Western Region Monastery), and in the seventh-century *Mingbaoji* (“Records of Miraculous Retribution”) it is called Zhichuansi (Fount of Wisdom Monastery). On the nearby hill of Shijingshan (Stone Scriptures Hill) just to the east of Yunjusi, nine cave libraries stored the Fangshan lithic canon: its total of 14,278 lithic blocks of 1,122 Buddhist scriptures represent textual lineages that derive from recensions that circulated during the Tang and Khitan Liao dynasties. The carving of the lithic scriptures started during the Sui dynasty under the monk Jingwan with the support of Empress Xiao (r. 604–617), and continued through the late Ming dynasty. The monastery itself is famous for its pagodas, which were closely associated with the engraving of the lithographs. Seven stone pagodas date from the Tang, of which the single-story one at the top of Stone Scriptures Hill, with an inscription dated to 898, is noted for both its architecture and carved decorations. Two of the five pagodas from the Liao are especially significant. Built in 1117, the octagonal Southern Pagoda has eleven stories and pointed eaves and includes a depository of Buddhist scriptures beneath it. The Northern Pagoda is uniquely shaped: the bottom half is octagonal with bracketed eaves and carved niches, while the upper half is cone-shaped and decorated with nine circular bands. Its surface is decorated with more than thirty groups of brick reliefs depicting scenes of dancing and singing, the most interesting example of which is a goddess strumming a three-stringed instrument, one of the rare extant examples for the study of Liao musical culture. The Northern Pagoda is surrounded by smaller stone pagodas dating from the Tang dynasty, several of which resemble the Xiaoyanta (Small Wild Goose Pagoda; see [DACI’ENSI](#)) in the ancient Chinese capital of Chang’an (modern Xi’an).

Yunmen Wenyan. (J. Unmon Bun’en; K. Unmun Munōn) (864–949). Chinese [CHAN](#) monk and founder of the [YUNMEN ZONG](#), one of the so-called five houses and seven schools ([WU JIAQI ZONG](#)) of the classical Chinese Chan tradition. Yunmen was a native of Jiaxing in present-day Zhejiang province. He was ordained at the age of sixteen by the [VINAYA](#) master Zhideng (d.u.) of the monastery Kongwangsi and two years later received the full monastic precepts at the precept platform in Piling (present-day Jiangsu province). After his full ordination, Yunmen returned to Kongwangsi and studied the [DHARMAGUPTAKA](#) vinaya ([SIFEN LU](#)) under Zhideng. Later, Yunmen visited Muzhou Daoming (d.u.), a prominent disciple of the eminent Chan master [HUANGBO XIYUN](#), and continued his studies of Chan under [XUEFENG YICUN](#). Yunmen eventually became Xuefeng’s disciple and inherited his lineage. Taking his leave of Xuefeng, Yunmen continued to visit other Chan masters throughout the country, and in 911 he visited the funerary [STŪPA](#) of the sixth patriarch ([LIUZU](#)) [HUINENG](#) on [CAOXISHAN](#). Yunmen then visited Lingshu Rumin (d. 918), a famed disciple of the Chan master Fuzhou Da’an (793–883), at his monastery of Lingshu Chanyuan in Shaozhou (present-day Guangdong province) and continued to study under Lingshu until his death in 918. Yunmen was then asked by the ruler of the newly established Nan Han state (917–971), Liu Yan (r. 917–942), to succeed Lingshu’s place at Lingshu Chanyuan. In 923, he established a monastery on Mt. Yunmen in the region, whence he acquired his toponym. He continued to reside on Mt. Yunmen for thirty years and frequently visited the palace of the Nan Han state to preach. In 938, Liu Cheng (943–958), monarch of the Nan Han, bestowed on him the title Great Master Kuangzhen (Genuine Truth). According to his wishes, no funerary stūpa was prepared for Yunmen and his body was left in his abbot’s quarters ([FANGZHANG](#)). Yunmen was especially famous for his so-called one-word barriers ([YIZI GUAN](#)), in which he used a single utterance to respond to a student’s question. For example, once a monk asked him, “When you kill your parents, you repent before the Buddha. But when you kill the buddhas and patriarchs, to whom do you repent?” Yunmen answered, “Lu” (“exposed”). Eighteen of Yunmen’s most famous Chan cases ([GONG’AN](#)) are collected in the [BIYAN LU](#) (“Blue Cliff Record”); his

Yunmen zong. (J. Unmonshū; K. Unmun chong). In Chinese, “Cloud Gate school”; one of the so-called five houses and seven schools (*WU JIA QI ZONG*) of the mature Chinese *CHAN* tradition. It is named after the mountain, located in Shaozhou (present-day Guangdong province), where its founder *YUNMEN WENYAN* (864–949) taught. Yunmen Wenyan was famous for his “one-word barriers” or “one-word checkpoints” (*YI ZI GUAN*), in which he responded to his students’ questions by using only a single word. The school became one of the dominant Chan traditions in the Five Dynasties (Wudai) and early Song dynasty, producing such prominent masters as *DONGSHAN SHOUCHU* (910–990), Dongshan Xiaocong (d. 1030), *XUEDOU ZHONGXIAN* (980–1052), and Tianyi Yihuai (992–1064). Yunmen masters played a major role in the development of classical Chan literature. Xuedou Zhongxian’s earlier collection of one hundred old cases (guc, viz., *GONGAN*), known as the *Xuedou songgu*, served as the basis for the famous *BIYAN LU* (“Blue Cliff Record”), which added the extensive commentaries and annotations of the Linji master *YUANWU KEQIN* (1063–1135) to Zhongxian’s original compilation. Several Yunmen masters were closely associated with the Song-dynasty intelligentsia. Dajue Huailian (1009–1090), for example, was as personal friend of the Song literocrat (shidafu) and poet Su Shi (1036–1101). Fori Qichong (1007–1072) asserted the fundamental harmony of Confucianism and Buddhism, explaining Confucian philosophical concepts using Buddhist terminology. *CHANGLU ZONGZE* (fl. c. late eleventh to early twelfth century) institutionalized the practice of reciting the name of the Buddha (*NIANFO*) into the routine of Chan monastic life and wrote an influential text on Chan monastic regulations or “rules of purity” (*QINGGU*), the *CHANYUAN QINGGU* (“Pure Rules for the Chan Grove”). The Yunmen school survived for about two centuries before it was eventually absorbed into the *LINJI ZONG*.

Yunqi fahui. (). In Chinese, “Anthology of the Teachings of Yunqi.” See *YUNQI ZHUHONG*.

Yunqi Zhuohong. (J. Unsei Shukō; K. Unsō Chugoeng) (1535–1615). Chinese *CHAN* master of the *LINJI ZONG* and one of the so-called four great monks of the Ming dynasty, along with *HANSHAN DEQING* (1546–1623), *DAGUAN ZHENKE* (1543–1603), and *OUYI ZHIXU* (1599–1655); also known as Fohui and Lianchi. Yunqi was a native of Renhe, Hangzhou prefecture (present-day Zhejiang province). In 1566, Yunqi abandoned his family and his life as a Confucian literatus and was ordained by Xingtianli (d.u.) of West Mountain. Yunqi wandered throughout the country in search of prominent teachers and attained his first awakening at Dongchang in present-day Shandong province. In 1571, he arrived at Mt. Yunqi in Hangzhou, whence he acquired his toponym. There, he was able to restore Yunqi monastery with the help of local followers. His reputation grew after he successfully brought rain and drove tigers from the area. Yunqi remained on the mountain and composed over thirty major works. With the help of his Confucian background, Yunqi was able to draw a large public to his Chan teachings, and he also promoted the practice known as *NIANFO* Chan in what was at the time the largest lay society in China. His influential works, such as the *CHANGUAN CEJIN*, *Zizhi lu* (“Record of Self-Knowledge”), *Sengxun riji*, and *Zimen chongxing lu*, were edited together as the *Yunqi fahui* (“Anthology of the Teachings of Yunqi Zhuohong”).

yunshui. (J. unsui; K. unsu). In Chinese, lit. “clouds and water”; a term abbreviated from the phrase “moving clouds and flowing water” (C. xingyun liushui; J. kōun ryūshi; K. haengun yusu), which is used to refer to an itinerant Buddhist practitioner who, like clouds or water, is always on the move and never settles down. The term is especially associated with the *CHAN* (K. *SŎN*; J. *ZEN*) school, where it refers to a Chan monk in training. The term implies that a novice monk is expected to travel to various monasteries and learn from different teachers as part of his training, rather than remaining attached to one specific monastery or teaching. In contemporary Japanese Zen usage, unsui refers to neophyte priests who undergo training as novices and live in a sōdō (*SA GHA* hall, see *SENGTANG*) at a Zen training center. A “cloud robe” (J. unno), by extension, refers to a monk’s robe that is worn and ragged from following an itinerant lifestyle. During the Edo period (1600–1868), the term unsui became popularized to mean liberated, blissful travel, as exemplified in the novel, *Tōkaidōchū hizakurige* (“Traveling the Eastern Highway on a Chestnut Pony”) by Jippensha Ikku (1765–1831). Unsui is also contrasted with the term “dragons and elephants” (C. longxiang; J. ryūzō; K. yongsang; see *S HASTINĀGA*), which is commonly found in Chan texts to refer to an advanced adept of Chan.

yuntang. (). In Chinese, “cloud hall”; a monastic residential hall. See *SENGTANG*.

Yuquansi. (). In Chinese, “Jade Spring Monastery”; important meditative center located on Mt. Yuquan in Jingzhou prefecture (present-day Hubei province). During the Daye reign period (605–617) of the Sui dynasty, a name plaque for the monastery was prepared by the King of Jin, and the eminent monk *TIANTAI ZHIMU* lectured there on his *FAHUA XUYANJI* and *MOHE ZHIGUAN*. Yuquansi soon became a prominent center for meditators in China. The monastery became even more famous when the *CHAN* master *SHENXIU* of the Northern school (*BEI ZONG*) took up residence at the site sometime in the last quarter of the seventh century. The famed Chan master *NANYUE HUARANG* is also said to have ordained at Yuquansi.

Yu sim allak to. (C. Youxin anledao; J. Yūshin anrakudō). In Korean, “Wandering the Path to Mental Peace and Bliss”; traditionally attributed to the Korean monk *WŎNHYO*, its authorship remains a matter of debate. No early references to this text are found in Korean canonical catalogues, and the earliest extant version was found in the library of the Raigōin in Kyōto, Japan. The prevailing scholarly view is that the text was composed in tenth-century Japan, perhaps by an adherent of the *TENDASHŪ*, with the first half of the work taken virtually verbatim from Wōnhyo’s *Muryangsugyōng chongyo* (“Doctrinal Essentials of the *SUKHĀVĀTĪVĪHASŪTRA*”). The *Yu sim allak to* was influential in Japan, especially during the Kamakura period, when it was quoted in such texts as the *Kōmyō shingon dosha kanjinki* by *MYŌE KŌBEN*, *An'yōshū* by Minamoto Takakuni (1004–1077), *Ketsujō ōjōshū* by Chinkai (1087–1165), and the *SENCCHAKU HONGAN NENBUTSUSHŪ* by *HŌNEN*. The *Yu sim allak to* consists of seven sections: (1) the central tenet (i.e., the benefits of rebirth), (2) the whereabouts of the land of peace and happiness (*ANLEGUO*, viz., *SUKHĀVĀTĪ*), (3) clarification of doubts and concerns, (4) the various causes and conditions of rebirth in the *PURE LAND*, (5) the nine grades (*JIUPIN*) of rebirth, (6) the ease and difficulty of rebirth in the different buddha-fields (*BUDDHAK ETTRA*), (7) and the rebirth of women, those with dull faculties, and sinners. The last section also contains a *MANTRA* from the *Amoghapāśakalparājāsūtra* and an empowerment (*ADHI HĀNA*) ritual.

Yu-Sōk chirūi non. (). In Korean, “Treatise on Queries and Doubts concerning Yu (C. Ru, viz., Confucius) and Sōk (C. Shi, *ŚĀKYAMUNI*)”; a Buddhist “defense of the faith” against Neo-Confucian criticisms, written during the early Chosŏn period. Although the authorship of this text remains a mystery, the style and content of the treatise resemble the *HYŎNJŎNGNON* by *KIHWA* (1376–1433), and it is clear that its Buddhist author was well versed in both Confucian and Daoist thought. The *Yu-Sōk chirūi non* is written in catechetic style and consists of nineteen questions and answers, which largely address misleading views that Confucian scholars hold regarding Buddhism. Following a syncretic approach that seeks to reconcile the teaching of Confucianism, Buddhism, and Daoism, this work generally argues that these three teachings each have their own distinctive roles to play in people’s lives and need not be in conflict. Buddhism, Confucianism, and Daoism are explained as corresponding, respectively, to (1) nature (K. sŏng, C. xīng), mind (K. sim, C. xīn), and pneuma (K. ki, C. qì); (2) truth (K. chin, C. zhen), its traces (K. chōk, C. jì), and the connection between them; and so on. The treatise claims that these three teachings are ultimately in accord with one another because of their identical basis in the mind. The text also treats such traditional aspects of Chinese thought as yin-yang cosmology and the five phases (K. ohaeng, C. wuxing) (viz., the five traditional Chinese elements), as well as astrological and cosmological issues.

yūzūnenbutsu. (). In Japanese, lit. “consummate-interfusion recitation of the Buddha’s name”; a method of chanting Amida (S. *AMTĀBHA*) Buddha’s name (J. nenbutsu; C. *NIANFO*), devised by the founder of the *YŪZŪNENBUTSU* school, *RYŌNIN* (1072–1132). The principle of yūzūnenbutsu is derived from Kegonshū (C. *HUAYAN ZONG*) and *TENDASHŪ* (C. *TIANTAI ZONG*) philosophy, especially the Kegon teachings of “consummate interfusion” (J. yūzū, C. *YUANRONG*) and the unobstructed interpenetration of all phenomena (J. jiji muge; see C. *SHISHI WU/A FAJIE*) and the Tendai teaching of the mutual inclusion of the ten dharma-realms (J. jikkai goku; C. shijie hujū). The principle of yūzūnenbutsu builds upon this sense that each and every phenomenon is perfectly interfused with all other phenomena to propose that the merit coming from one person’s chanting of Amitābha’s name is transferred to all other persons and vice versa. When more people chant the Buddha’s name, more merit is thus transferred to all people, and the merit derived from these cooperative efforts reaches not only the dharma-realm (*DHARMADHĀTU*) in which it is created but also all other dharma-realms as well. Therefore, all things in all realms of existence receive benefit from any one individual’s practice of chanting the Buddha’s name. The practice of yūzūnenbutsu thus has two major characteristics: (1) the individual’s burden to practice is relieved because salvation is due not just to one’s own merit but to everyone’s merit; (2) the notion of “other power” (*TARIKI*) in this form of pure land means both the power of one’s fellow beings and the power deriving from Amitābha Buddha’s vow of compassion.

Yūzūnenbutsushū. (). In Japanese, “School of Consummate-Interfusion Recitation of the Buddha’s Name”; one of the first Japanese *PURE LAND* schools. The school was founded by the *TENDASHŪ* monk *RYŌNIN* (1072–1132), who claimed to have a direct revelation from the buddha Amida (S. *AMTĀBHA*) regarding the principle of *YŪZŪNENBUTSU*, in which every individual benefits from both his own and other’s chanting of the Buddha’s name (J. nenbutsu; C. *NIANFO*) through a mutual transfer of merit. Ryōnin traveled around Japan to teach the practice and spread the school, keeping a register of new adherents as he traveled. Indeed, carrying this register of adherents became a privilege of the leader of the school. Ryōnin also made Dainenbutsuji (Great Recitation of the Buddha’s Name Temple), in the Ōsaka area, the center for his campaign in 1127. ¶ The Yūzūnenbutsu school declined after six generations. When the sixth patriarch of the school Ryōchin (d. 1182) died without a successor, the register of adherents was entrusted to the Iwashimizu Hachiman shrine, in the hopes that the *HACHIMAN KAM* cum *BODHISATVA* resident there would select the next patriarch of the school. About 140 years later, the Yūzūnenbutsu school was revitalized through the efforts of Hōmyō (1279–1349), who claimed to have received a revelation from Hachiman. After becoming Ryōnin’s seventh successor in 1321, Hōmyō restored Dainenbutsuji and several other branch temples that had long been neglected. He also received imperial patronage from the monarch Godaigo (r. 1318–1339), who added his name and the names of many government officials to the school’s register of adherents. After Hōmyō’s death, the school declined again as other pure land schools gained popularity, until 1689, when Daitō (1649–1716) became the forty-sixth patriarch of the school. Daitō rejuvenated the school, ardently propagating the school’s teachings and the practice of chanting the Buddha’s name. Daitō systematized the school’s teachings: he established an academic institute and wrote two treatises, the *Yūzū enmonshō*

("Essay on the Complete Teachings of Perfect Interpenetration [*Yūzū*]" and the *Yūzūnenbutsu shingeshō* ("Essay on Faith and Understanding in the *Yūzūnenbutsu*"). In the former text, Daitsū lists five classifications of the Buddhist teachings in ascending order (the teaching of humans and divinities, [HINAYANA](#), gradual, sudden, and consummate teachings) and classified Yūzūnenbutsu teachings in the fifth category of the "consummate teachings" (see [YUANJIAO](#)); he also discusses the school's daily practice of chanting Amida Buddha's name ten times while facing west. The Yūzūnenbutsu school remains active today at its head temple of Dainenbutsuji, although it is relatively small in size compared to the major Japanese pure land schools of [JŌDOSHŪ](#) and [JŌDO SHINSHŪ](#). The [AVATA SAKASŪTRA](#) and the [SADDHARMAPU ARIKASŪTRA](#) are the principal scriptures of the school, with the three major pure land sūtras ([JINGTU SANBUJING](#)) of secondary importance.

Zanabazar (Mongolian). See [RJE BJSUN DAMPA](#).

Zangs mdog dpal ri (Sangdok Palri). In Tibetan, the “Glorious Copper-Colored Mountain”; the abode of [PADMASAMBHAVA](#). It is located on the island of Cāmara, one of the two “subcontinents” flanking the island of [JAMBUDVĪPA](#); Cāmara is sometimes identified as Sri Lanka. After leaving Tibet, Padmasambhava is said to have departed for the Copper-Colored Mountain. The island was inhabited by ogres ([RAK ASA](#)), whom he first had to subdue. He then constructed an octagonal palace, called “Lotus Light” (Padma ’od), at the summit of the mountain, where he will abide until the end of [SA SĀRA](#). In Tibetan Buddhism, Copper-Colored Mountain came to function as a [PURE LAND](#), although it is located on earth, and is not flat as pure lands are supposed to be. There are numerous prayers for rebirth on the Copper-Colored Mountain and numerous accounts of devotees being transported there in dreams and visions. Among the most common depictions of Padmasambhava in Tibetan painting are those of him enthroned on the Copper-Colored Mountain.

zangzhu. (J. zōshu/zōsu; K. changju). In Chinese, “library prefect.” One of the six prefects (C. [TOUSHOU](#)) at a [CHAN](#) monastery. The library prefect is in charge of the scriptures at the monastery. According to the [CHANYUAN QINGGUI](#), the library prefect prepares the reading desks and tea for those who wish to study the scriptures at the library or scriptorium.

Zanning. (J. Sannei; K. Ch’annyōng) (919–1001). Chinese [VINAYA](#) master and historian. Zanning was a native of Bohai in present-day Hebei province. Sometime between 926 and 930, he was ordained at the monastery of Xiangfusi in Hangzhou, Zhejiang province, and received his monastic precepts on Mt. Tiantai. Zanning then studied the “Four-Part Vinaya” ([SIFEN LÜ](#)) of the [DHARMAGUPTAKA](#) school and became an expert in the South Mountain vinaya lineage ([NANSHAN LÜ ZONG](#)). He thus came to be known as Lühu or “Vinaya Tiger,” and was given the title Great Master Mingyi (Bright Righteousness). In 978, he also received the title Great Master Tonghui (Penetrating Wisdom) and was invited to the monastery of Tianshousi. Upon the Emperor’s decree, Zanning compiled the influential Buddhist biographical record, the [SONG GAOSENG ZHUAN](#), which was completed and entered into the official canon ([DAZANGJING](#)) in 988. He also composed the [DA SONG SENG SHI LÜE](#), one of the earliest attempts to provide a comprehensive account of the history of Buddhism throughout Asia. His other writings include the *Neidian ji*, *jiuling shengxian lu*, and *Shichao yinyi zhigui*.

Zaō gongen. (). In Japanese, “Provisional Manifestation of the Matrix King,” also known as Zaō, Zaō bosatsu, and Kongō Zaō; proper name of a tutelary deity revered largely by followers of the Japanese [SHUGENDŌ](#) and [SHINGONSHŪ](#) traditions. Zaō gongen is said to have revealed himself to the legendary Japanese ascetic [EN NO GYŌJA](#), the reputed founder of Shugendō, on Mt. Kinbu in Nara. Zaō gongen is considered to be a [BODHISATTVA](#) who quells demons, as well as a [NIRMĀ AKĀYA](#) of the Buddha. Offerings and worship for Zaō gongen are conducted at the hall of Zaōdō on Mt. Kinbu. This wrathful deity is often depicted with three fearsome heads, with a three-pronged [VAJRA](#) in his right hand and his right leg suspended in the air.

Zaya Pa ita. [alt. Jaya Pa ita] (1599–1662). An important Mongolian monk of the [DGE LUGS](#) sect of Tibetan Buddhism. Born as the fifth son in a noble family of the Qoshot tribe, in 1615 he was selected by its leader to become a monk. He was sent to Tibet where he became a disciple of the first (also counted as the fourth) [PA CHEN LAMA](#), [BLO BZANG CHOS KYI RGYAL MTSHAN](#), studying both the scholastic curriculum and the tantric curriculum. In 1639, after twenty-two years in Tibet, on the instructions of the Pa chen Lama and the fifth [DALAI LAMA](#), he returned to his homeland, serving as a missionary among the Qoshot. During this period, he invented the *todorxoi üzüg* (clear script) for the transcription of the Oirad language. In 1650, he returned to Tibet to make offerings to the Dalai Lama and to visit the Pa chen Lama, and then continued his missionary work, going as far west as the Kalmyk region of the Volga. Zaya Pa ita died while en route back to Tibet in 1662. He was a distinguished translator, translating 177 works from Tibetan into the Oirad language. The title of Zaya Pa ita was given to masters of the five traditional sciences; there were at least two other important Mongolian monks who bore the title and had lines of incarnation. The monk described here can be distinguished by his Tibetan name, Nam kha’i rgya mtsho.

zazen. (J) (). See [ZUOCHAN](#).

Zazen wasan. (). In Japanese, “Praise of Seated Meditation”; a short song by the Japanese [ZEN](#) master [HAKUI ENKAKU](#) in the [RINZAISHŪ](#), which is probably his most popular work. The *Zazen wasan* is still printed in manuals for scripture recitation and is chanted at many Rinzai temples and monasteries today. In his song, Hakuin extols as the supreme virtues original enlightenment (J. [HONGAKU](#); C. [BENJUE](#)), seated meditation (J. *zazen*; C. [ZUOCHAN](#)), and seeing one’s own nature (J. *kenshō*; C. [JIANXING](#)).

Zazen yōjinki. (). In Japanese, “Notes on Employing the Mind during Seated Meditation,” by the [ZEN](#) master [KEIZAN JŌKIN](#) in the [SŌTŌSHŪ](#); published in 1680. Following the model of his teacher [DŌGEN KIGEN](#) and his meditation manual [FUKAN ZAZENG](#), Keizan composed this relatively short treatise of his own on seated Zen (J. *zazen*; C. [ZUOCHAN](#)) for the edification of clergy and laity alike. The *Zazen yōjinki* delineates the purpose, method, and technique of seated meditation, with an emphasis on what kinds of mental states should be maintained during practice. Sitting meditation is explained as being a technique designed to set aside all attachments and concerns so that one will be able to abide serenely in one’s true nature, or original face. Keizan also speaks of the specific impediments to meditative practice, such as deluded visions and sloth and torpor, and suggests some practical techniques for mitigating such problems.

zedi. (Burmese). See [JEDI](#).

Zen. (). In Japanese, “Meditation”; the Japanese strand of the broader East Asian [CHAN](#) school, which includes Chinese Chan, Korean [SŌN](#), and Vietnamese [THIÊN](#). Zen is the Japanese pronunciation of the Chinese term Chan, which in turn is a transcription of the Sanskrit term [DHYĀNA](#), or meditative absorption. More specifically, Zen denotes the Japanese Buddhist traditions that trace their origins back to the Chinese Chan school, or [CHAN ZONG](#). Currently three major traditions in Japan, [RINZAISHŪ](#), [SŌTŌSHŪ](#), and [ŌBAKUSHŪ](#), refer to themselves as Zen schools, and are thus known collectively as the Zen tradition (J. [ZENSHŪ](#); C. [CHAN ZONG](#)). The Rinzai school was first transmitted to Japan in the late twelfth century by [MYŌAN EISAI](#) (1141–1215), who visited China twice and received training and certification in the Chinese [LINJI ZONG](#). By the end of the Kamakura period, some twenty-one different Rinzai lineages had been transmitted to Japan. The Rinzai school came to be associated with the meditative practice of contemplating Zen “cases” (J. *kōan*; C. [GONGAN](#); see also J. *kanna Zen*; C. [KANHUA CHAN](#)). The foundation of the Sōtōshū is attributed to [DŌGEN KIGEN](#) (1200–1253), who is credited with transmitting the [CAODONG ZONG](#) of the Chinese [CHAN](#) teacher [Tiantong Ruojing](#) (1162–1227). Dōgen is said to have taught the technique of “just sitting” ([SHIKAN TAZA](#)), through which the mind would become stabilized and concentrated in a state of full clarity and alertness, free from any specific content. During the Tokugawa period, the Sōtō school developed into one of the largest Buddhist sects in Japan through the mandatory parish system ([DANKASEIDO](#)), in which every household was required to register as a member of a local Buddhist temple. By the middle of the eighteenth century, there were more than 17,500 Sōtō temples across the country. The Ōbaku school was founded by the émigré Chinese [CHAN](#) master [Yinyuan Longxi](#) (J. Ingen Ryūki; 1592–1673), who traveled to Japan in 1654/1655 to escape the succession wars and political turmoil that had accompanied the fall of the Ming dynasty. The Ōbaku school introduced exotic contemporary Chinese customs and monastic practices to the Japanese Zen Buddhism of the time. Although it remained much smaller than the Rinzai and Sōtō Zen traditions, the presence of the Ōbaku school compelled the monks of its two larger rivals to reevaluate their own practices and to initiate a series of important reform movements within their respective traditions (see [IN IN EKISHI](#)). In the modern era, largely through the efforts of such towering intellectual figures as [Daishetz Teitaro Suzuki](#) (1870–1966), [Nishida Kitarō](#) (1870–1945), and [Nishitani Keiji](#) (1900–1991), the term Zen has also come to connote a “pure experience” (*junsui keiken*) that transcends language and thought, which is sometimes argued to be the unique property of the Japanese people and their culture (cf. [KYOTO SCHOOL](#)). The cavalier way in which the term Zen is now deployed in generic Western writings (e.g., the myriad “Zen in the Art of” books) often has little to do with the traditional perspectives of the Zen tradition found in either Japan or the rest of East Asia. As in the case of Chan, in more common parlance, Zen can also denote the particular teaching style of a Zen master and is often expressed as “so-and-so’s Zen.” See also entries on the [SŌTŌSHŪ](#), [RINZAISHŪ](#), and [ŌBAKUSHŪ](#) and on specific Japanese Zen masters and monasteries.

zendō. (). In Japanese, “meditation hall.” See [SENGTANG](#).

Zenkōji. (). In Japanese, “Monastery of the Radiance of Goodness”; located in modern-day Nagano. According to the *Zenkōji engi*, the monastery was built at the beginning of the seventh century by a certain Honda Yoshimitsu to enshrine a famous Amida ([AMITĀBHA](#)) triad. In the ancient Indian kingdom of [VAISĀLI](#), a merchant by the name of Somachattrā is said to have warded off epidemic demons and cured his daughter by invoking the name of the buddha Amitābha ten times. Somachattrā was so moved by the appearance of Amitābha and his two attendants [AVALOKITEŚVARA](#) and [MAHĀSTHĀMAPRĀPTA](#) in the sky that he asked the Buddha for an icon to be made in their likeness. The triad was then forged with special gold from the dragon king’s palace and worshipped as a living manifestation of Amitābha and his attendants. Somachattrā was later reborn as King Sōng (r. 523–553) of the Korean kingdom of Paekche. The triad first traveled to Paekche to aid King Sōng, after which it was taken to Japan. Honda Yoshimitsu is said to have discovered the triad in the Naniwa Canal and enshrined it in his house, which was later transformed into a magnificent buddha hall by Empress Kōgyoku (r. 642–645). With support from the Hōjō bakufu, a Zenkōji cult proliferated especially during the Kamakura period and onwards, and numerous replicas of the “original” (Shinano) Zenkōji triad were made and enshrined in Shin (“New”) Zenkōji temples. For

Zenkōji, the (Shinonari, Nagano) remained the control of another powerful [TENDAI](#) monastery known as [MIIDERA](#). Zenkōji was devastated by fire in 1179, but legendary accounts testify to the miraculous escape of the “original” triad, which now remains as a secret buddha ([HIBUTSU](#)) image largely unavailable for public viewing. After the Japanese monk [IPPEN](#)’s visit to Zenkōji, several Shin Zenkōji temples also came to be associated with his tradition, the [JISHU](#).

Zenrin kushū (). In Japanese, “Phrase Collection of the [ZEN](#) Grove”; a lengthy collection of more than four thousand Zen phrases—specifically capping phrases ([JAKUGO](#)) or appended phrases ([AGYO](#))—culled from Buddhist [SŪTRAS](#), discourse records ([YULU](#)), kōan collections (see [C. GONG’AN](#)), and various Chinese belletristic classics. The collection was edited by a certain Jūshi in 1688. Jūshi’s collection is based on a shorter phrase book entitled the *Kuzōshi*, compiled by the Zen master Tōyō Eichō (1428–1504) of the [MYŌSHINJI](#) lineage of the [RINZAISHŪ](#). Beginning with single-character phrases, the Zen phrases in the *Zenrin kushū* are sequentially organized according to their number of Sinographs. The *Zenrin kushū* is one of the most commonly used collections in Japanese kōan training today.

Zenrin shōkisen (). In Japanese, “A Composition on the Images and Utensils of the Zen Grove”; compiled by the [ZEN](#) historian [MUJAKU DŌCHŪ](#) in the [RINZAISHŪ](#); a comprehensive catalogue of regulations, events, utensils, and accoutrements used by the Zen ([C. CHAN](#)) tradition. The preface was prepared by Mujaku in 1741. More than just a simple catalogue, Mujaku’s *Zenrin shōkisen* also meticulously notes the possible origin and history of each catalogued item and also expounds upon the significance of its implementation during his day, making it an invaluable tool for the study of Zen in practice. His research is based on an exhaustive list of sources (a total of 488 selections) beginning with sūtras and commentaries to Chinese and Japanese classics, lamplight histories (see [CHUANDENG LU](#)), and poetry. A handwritten copy of the text is currently housed at [MYŌSHINJI](#) in Kyōto.

Zenshū. (J) (). In Japanese, the school, lineage, or tradition of [CHAN](#). See [ZEN](#).

Zetawun Pagoda In Burmese, “Prince Jeta’s Grove” (P.[JETAVANA](#)); regarded as the oldest shrine in Sagaing. Zetawun Pagoda commemorates the Buddha’s legendary first visit to Burma (Myanmar) in the company of [ĀNANDA](#). According to tradition, the site was occupied by ninety-nine ogres (Burmese, *bilu*), the leader of whom was named Zeta. When they encountered the Buddha and Ānanda, the ogres welcomed them and, in return for their piety, the Buddha preached the dharma to them for seven days. All ninety-nine ogres became stream-enterers (P. *soṭāpanna*; S. [SROTĀPANNA](#)) while listening to these sermons. The Zetawun Pagoda purportedly contains the lower robe or waist cloth (P. *antaravāsaka*; S. [ANTARVĀSAS](#)) of the Buddha, which he is said to have presented to the ogres upon their entreaty to leave a token of his visit as an object of worship. The name Zetawun honors the ogre chief Zeta and recalls the fact that at the time of the Buddha’s visit this spot was covered by forests (Burmese, *wun*). To commemorate the spiritual attainment of the ogres, the village that grew up around the site became known as Thotapan Ywa or Sotāpanna Village. An annual pagoda festival is held in the village on the new moon day of the Burmese month of Waso (July–August). Adjacent to the Zetawun can also be found an ordination hall said to have been established by the Mon saint, Shin Arahān.

Zhabs dkar tshogs drug rang grol. (Shapkar Tsokdruk Rangdröl) (1781–1851). One of the most revered Tibetan preachers and saints of the nineteenth century. He was born in the Reb kong region of A mdo in the northeast of the Tibetan cultural domain. During his youth, he received instruction in [RDZOGS CHEN](#) and various treasure ([GTER MA](#)) cycles of the [RNYING MA](#) sect. He undertook a one-year retreat at the age of sixteen and was ordained at the age of twenty at Rdo bis, a [DGE LUGS](#) monastery. He maintained his monastic vows throughout his life but wore his hair long and piled on the top of his head in the manner of a tantric [YOGIN](#). His main teacher was Chos rgyal Ngag gi dbang po, but he studied with a variety of teachers, including those of the Dge lugs sect. He also studied traditional painting. An adept, pilgrim, and poet of the Rnying ma sect, he traveled throughout Tibet, undertaking retreats at such famous sites as Rma chen spom ra, [TSA RI](#), and Mount [KAILĀSA](#), including in a number of caves where [MILARAS PA](#) is said to have meditated. He became known as Zhabs dkar, or “white footprint,” because he meditated at Mount Kailāsa, where the Buddha is said to have left his footprints ([BUDDHAPĀDA](#)). He also traveled to Kathmandu, where he offered gold for the spire of the [BODHNĀTH STŪPA](#). He gained fame among all social classes through his wide-ranging activities as a Buddhist teacher and his enormous personal generosity and charisma. His autobiography, entitled *Snyigs dus ’gro ba yongs kyi skyabs mgon zhabs dkar rdo rje ’chang chen po’i mam par thar pa rgyas par bshad pa* (translated as *The Life of Shabkar*) is regarded as one of the masterworks of that genre of Tibetan literature.

Zhabs drung Ngag dbang mam rgyal. (Shapdrung Ngawang Namgyal) (1594–1651). A Tibetan Buddhist figure noted for unifying Bhutan as a Buddhist state. At a young age, Ngag dbang mam rgyal was installed as the eighteenth successor to the throne of [RWALUNG](#) monastery, seat of the [’BRUG PA BKA’ BRGYUD](#) sect of Tibetan Buddhism in central Tibet and its leaders, the [’BRUG CHEN INCARNATIONS](#). In 1616, at the age of twenty-three, he was forced to flee to Bhutan in a political dispute over his recognition as the reincarnation of the fourth ’Brug chen master, [PADMA DKAR PO](#). Ngag dbang mam rgyal initially gained control over the western region, with his forces eventually defeating his rivals and uniting the various regions into a single country under his leadership. He later successfully repelled an invasion of Bhutan by Tibetan forces mustered by the fifth [DALA LAMA](#). His title Zhabs drung (literally “at the feet”) refers to his great stature as a Buddhist master. He is famed for establishing a religious and political system of monastic and administrative centers called rdzong (fortress), which are still in use today in Bhutan. Ngag dbang mam rgyal is also considered the first master of a prominent Bhutanese incarnation lineage, the Zhabs drung incarnations.

zhai. (J. *sai*; K. *chae*). A polysemous Chinese term that means “fast,” “purify,” “make offerings to monks,” “festival,” or “vegetarian feast” (and often seen translated as “maigre feast”); it is also used to translate the Sanskrit term [UPO ADHA](#). The traditional [PRĀTIMOKA](#) prohibition against monks and nuns eating after noon was referred to in Chinese as zhai, hence its translation as “fast.” In China, zhai came to refer generally to meals offered at Buddhist rituals and events and more specifically to vegetarian feasts held at monasteries throughout the country. Monasteries often maintained special funds to be used for such purposes. These vegetarian feasts and festivals served as one of the primary means through which the laity made offerings to the monastic community. One of the most famous of such festivals in East Asia was the “Ghost Festival” ([YULAN BEN](#)).

Zhancha shan’e yebao jing. (J. *Senzatsu zen’aku gōhōkyō*; K. *Chōmch’al sōnak ōppo kyōng*). In Chinese, “Scripture of Divining the Requit of Good and Evil Actions”; an indigenous Chinese Buddhist scripture (see [APOCRYPHA](#)) compiled sometime during the late sixth century. The scripture seems to have been used by a community in Guangdong that was deemed heretical and whose practice of divination and repentance was banned in 593. The first roll of this scripture is largely concerned with the practice of divination, which is made possible through repentance. The scripture emphasizes the need for faith in this dharma-ending age ([MOFA](#)); the method of cultivating this faith is offered by the bodhisattva [K ITIGARBHA](#). This method largely involves the use of various spinning tops (lit. “wheels”) on which the possible fate and fortune of the client is written. A total of 189 possible fates are offered. The repentance rite in the *Zhancha shan’e yebao jing* seems to have been influenced by the *Upāsakaśīlasūtra* translated by [DHARMAKĒMA](#). The second roll of the scripture has been a subject of controversy, for it provides an early version of the monistic “one mind” ([YIXIN](#)) and [TATHĀGATAGARBHA](#) doctrine that came to dominate in the East Asian schools of Buddhism. Comparisons are often made between this second roll and the influential [DASHENG QIXIN LUN](#).

Zhang Sengyao. (C) () (d.u.; fl c. 502–549). The first Chinese artist to paint a rendering of the sixteen [ARHAT](#) protectors of Buddhism. See [O ĀSĀSTHAMRA](#).

Zhang Shangying. (J. *Chō Shōei*; K. *Chang Sangyōng*) (1043–1122). Influential Chinese Buddhist layman and statesman; also known as Tinajue and Wujin jushi (Layman Infinite). Born to a prominent literati family in Xinjin (present-day Sichuan province), Zhang Shangying began his illustrious career in 1065 after receiving his jinshi degree. He first made a name for himself through military expeditions against neighboring barbarian tribes in Yuzhou, after which he was given a high metropolitan post by the powerful grand counselor Wang Anshi (1021–1086). Zhang thus became a supporter of Wang’s administrative and fiscal reform attempts known as the “new policies” (*xinfa*). Even after Wang’s fall from power, Zhang maintained his support for reform, which eventually allowed him to become grand counselor himself in 1111. Due to political battles at court and his complaints regarding Emperor Huizong’s (r. 1100–1125) support of the Daoists’ anti-Buddhist polemics, Zhang’s tenure at court was cut short, and he spent the rest of his life in retirement. During this period of retirement, Zhang Shangying devoted much of his time to Buddhism. Throughout his life, Zhang befriended and studied under the most respected [CHAN](#) masters of his day, such as Dantang Wenzhun (1061–1115), Doushuai Congyue (1044–1091), Huitang Zuxin (1025–1100), [ZHENJING KEWEN](#), [YUANWU KEQIN](#), [DAHUI ZONGGAO](#), and [JUEFAN HUIHONG](#), and exchanged correspondence with many of them, some of which are still extant. Zhang was particularly fond of the [ĀVATA SAKASŪTRA](#) and commentaries on the text composed by the famous Tang dynasty layman [LI TONGXUAN](#); emulating Li, Zhang made a pilgrimage to [WUTAI SHAN](#). He also wrote a treatise entitled *Hufa lun* (“Arguments in Defense of the Dharma”) as a rebuttal to the growing anti-Buddhist polemics among the Daoists at court.

Zhanran. (C) (). See [JINGXI ZHANRAN](#).

Zhanran Yuandeng. (J. *Tannen Enchō*; K. *Tamyŏn Wŏnjing*) (1561–1626). Chinese [CHAN](#) master in the [CAODONG ZONG](#); also known as Sanmu daoren. Zhanran was a native of Huiji prefecture in Zhejiang province. In his early twenties, Zhanran became the student of the monk Miaofeng (d.u.) on Mt. Tianhuang and later received monastic precepts from the Chan master [YUNQI ZHUHONG](#), one of the most eminent Chan teachers of the Ming dynasty. In 1591, Zhanran became the disciple of Cizhou Fangnian (d. 1594) and inherited his Caodong lineage. Zhanran first made a name for himself while residing at the monastery of Shouxingsi and subsequently served as abbot of the monasteries [WANSHOU SI](#) on Mt. Jing, and Xianshengsi in his hometown of Huiji, as well as several other monasteries in different regions of Zhejiang province. Zhanran composed the [ZONGMEN HUOMEN](#), an influential treatise on Chan meditation, and his other teachings are recorded in the *Zhanran Yuandeng chansi yulu*.

zhao’er changji. (C) (). See [JI ER CHANG ZHAO](#).

Zhao lun. (J. Jōron; K. Chōron; 趙論). In Chinese, “(Seng)zhao’s Treatise”; an influential work by the eminent Chinese SENGZHAO (374–414), one of the major disciples of the important Kuchean translator KUMĀRAJĪVA (344–413). The *Zhao lun* was compiled sometime between 384 and 414 and brings together Sengzhao’s four major works. The first, *Wubuoqian lun* (“On the Immutability of Things”), explores the irrelevancy of time in explaining dharmas that are not subject to production and cessation. The second, *Buzhenkong lun* (“Emptiness of the Unreal”), explains how dharmas can simultaneously appear as both real and unreal. The *BORE WUZHĪ LUN* (“The Nescience of Prajñā”) explains that because wisdom (PRAJÑĀ) is quiescent, empty, and lacking a perduring essence, any conscious awareness of it, or emanating from it, is impossible. Finally, “Niepan wuming lun” (“The Anonymity of Nirvā a”) demonstrates that NIRVĀ A is fundamentally ineffable and therefore nameless. A chapter entitled “Zong benyi” (“Fundamental Meaning of the Major Tenets”) appears at the beginning of the *Zhao lun* and offers a succinct explanation of some important doctrinal matters, such as original nothingness (benwu), the true mark of reality (shixiang), dharma nature (faxing), and the emptiness of nature (xingkong). Letters exchanged between Sengzhao and the layman Liu Yimin (d. 410) of LUSHAN are appended at the end of the *Zhao lun*. Numerous commentaries on this text exist across the East Asian traditions.

Zhaozhou Congshen (J. Jōshū Jūshin; K. Choju Chongsim 趙州從諗) (778–897). One of the most renowned Chinese CHAN teachers of the Tang dynasty; his toponym Zhaozhou derives from the Zhaozhou region in Hebei province, where he spent much of his later teaching career. Zhaozhou was ordained in his youth at Hutongyuan in his hometown of Caozhou (in present-day Shandong province). At the age of eighteen, he met NANQUAN PUYUAN (748–835), a successor of MAZU DAOYI (709–788), and studied under him for several decades until that teacher’s death. Then in his fifties, Zhaozhou began to travel throughout China, visiting prominent Chan masters such as HUANGBO XUYUN (d. 850) and Daowu Yuanzhi (760–835). Having served as abbot of various monasteries on Mt. Huangbo, Baoshou, and Jia, Zhaozhou settled at the age of eighty in Guanyinyuan (ĀVALOKĪTĒSVARA Cloister) in Zhaozhou, and taught a small group of monks there for the next forty years. Zhaozhou did not use the iconoclastic pedagogical techniques, such as shouting and beating (BANGHĒ), made famous by other teachers of his era, but used his words to challenge his students and lead them to self-realization. The Song-dynasty Chan master YUANWU KEQIN (1063–1135) described this characteristic of Zhaozhou’s teachings when he said, “Zhaozhou’s Chan lies on the lips.” Zhaozhou is frequently cited in the collections of Chan GONG’AN (public cases), including five of the forty-eight gong’an collected in the WUMEN GUAN (“Gateless Checkpoint”) and twelve of the one hundred in the BIYAN LU (“Blue Cliff Record”). The most influential gong’an associated with Zhaozhou is the first case collected in the *Wumen guan*, the so-called WU GONG’AN: “Does a dog have the buddha-nature (FOXING) or not?” “No.” Zhaozhou’s “WU” (no; lit. “it does not have it”), became one of the most oft-cited statements in all of Chan, SŌN, and ZEN literature. Due in large part to the efforts of Chan master DAHUI ZONGGAO and his followers, Zhaozhou’s wu came to be used as one of the meditative topics (HUATOU) in the Chan meditation practice of “questioning meditation” (KANHUA CHAN). Although Zhaozhou had thirteen dharma heirs, his lineage soon died out. He posthumously received the title “Zhenji dashi” (Great Master Apex of Truth). The record of his teachings is contained in the three rolls of the *Zhenji dashi yulu* (“Discourse Record of Zhenji Dashi”) and in his *Zhaozhou lu*.

Zhe chen. (Shechen). One of the four main RNYINGMA monasteries in eastern Tibet, the others being KA THOG, RDZOGS CHEN, and DPAL YUL; founded in 1735 by the second ZHE CHEN RAB ‘BYAMS incarnation, ‘Gyur med kun bzang mam rgyal (Gyurme Kunsang Namgyel, 1710–1769). Zhe chen then became the seat for his subsequent incarnations, who all served as abbot, and a principal institution of the Rnying ma sect of Tibetan Buddhism. The monastery, comprised of several main temples and surrounding structures, was at times also governed by a line of regent lamas, the Zhe chen rgyal tshab (Shechen Gyaltsap) incarnations. The fourth Zhe chen rgyal tshab, Padma mam rgyal (Pema Namgyel, 1871–1926), formally recognized the young twentieth-century luminary DIL MGO MKHYEN BRITSE as one of five reembodiments of ‘JAMDBYANG MKHYEN BRITSE DBANG PO, a leading figure of the nineteenth-century RIS MED, or nonsectarian movement. The institution’s full name is Zhe chen bden gnyis dar rgyas gling (Shechen Dennyi Dargyeling).

Zhe chen rab ‘byams. (Shechen Rapjam). An important line of Tibetan incarnate lamas. The first Zhe chen rab ‘byams, Bstan pa’i rgyal mtshan (Tenpe Gyaltsen, 1650–1709), was a disciple of the fifth DALAI LAMA, NGAG DBANG BLO BZANG RGYA MTSHO, and Padma rig ‘dzin (Pema Rikdzin, 1625–1697)—the latter being the first RDZOGS CHEN INCARNATION and founder of RDZOGS CHEN monastery. The second Zhe chen rab ‘byams, ‘Gyur med kun bzang mam rgyal (Gyurme Kunsang Namgyel, 1710–1769), founded Zhe chen monastery in 1735. Subsequent incarnations served as the abbots of Zhe chen monastery.

zheng bao. (J. shōhō; K. chōngbo 正保). In Chinese “retribution proper,” the actions, or KARMA, directly affect the individual, conditioning one’s physical body and psychological makeup. See ER BAO.

Zhengdao ge. (J. Shōdōka; K. Chūngdo ka 正道歌). In Chinese, “Song of the Attainment of the Way”; attributed to YONGJIA XUANJUE (675–713); also known as the *Chanmen biyao jue* (“Secret Essentials of the Chan Tradition”). Along with the XINXIN MING, the *Zhengdao ge* is cherished by the CHAN tradition as one of the classic verse expressions on the process of meditation and the experience of enlightenment. Its contents purport to convey Yongjia’s awakening after only a single day and night of tutelage under the sixth patriarch (LIUZU) HUINENG, whence Yongjia’s cognomen Ishujue (“Single-Night Enlightened,” or “Overnight Guest”). The poem consists of fewer than two thousand Sinographs and follows a traditional regulated-verse style. The verse describes enlightenment as the realization that the true nature of all things is in fact the buddha-nature (FOXING), which is emptiness itself, transcending all the dichotomies of existence or nonexistence or truth and falsity. This enlightenment is said to occur suddenly, “in a snap of the fingers” (danzhi), the verse says, and it is this sudden enlightenment (DUNWU) that has been transmitted through the twenty-eight Indian and six Chinese patriarchs (ZUSHI) of the Chan tradition. Aspects of the style and vocabulary used in the poem, which seem to antedate the eighth century, have led to questions about the authenticity of its attribution to Yongjia. Several copies of this text were found at DUNHUANG, and numerous commentaries of this text are extant, dating from the Song dynasty. The Song-dynasty teacher DAHUI ZONGGAO claimed that the verse was held in such high esteem that it had even been back-translated into Sanskrit.

Zhengfayanzang. (J. Shōbōgenzō; K. Chōngpōbanjang 正法眼藏). In Chinese, “Treasury of the Eye of the True Dharma,” in three rolls, edited by the CHAN master DAHUI ZONGGAO and his lay disciples in 1147. The Zhengfayanzang is largely a collection of 661 cases or GONG’AN with Dahui’s prose commentary (pingchang), annotations (C. zuoyu/zhu; see J. JAKUGO), and instructions for the assembly. The zhengfayanzang of the title is a term used within Chan to indicate the school’s special repository of the “eye” or “mind” of the BUDDHADHARMA, which is independent from the scriptural tradition. (See JIAOWAI BIECHUAN). The exchanges between masters and disciples that Daohui covers in his collection are described as being the transmission of this eye. His *Zhengfayanzang* thus records the exchanges of a number of renowned Tang and Northern Song Chan masters and their disciples, including ZHAOZHOU CONGSHEN, DESHAN XUANJIAN, and XUEFENG YICUN, as well as the sermons of masters associated especially with the LINJI ZONG, including LINJI YIXUAN, YANGQI FANGHUI, and HUANGLONG HUINAN. Dahui strings together typically between three and six exchanges or sermons and, at the end of each section, adds his own brief prose commentary, often about twenty Sinographs in length, most starting with “Miaoxi says.” (Miaoxi is one of Dahui’s cognomens.) The *Zhengfayanzang* seems to have exerted some influence on the compilation of the ZONGMEN LIANGENG HUIYAO, by Dahui’s third-generation successor Huiweng Wuming (d.u.). The SHOBŌGENZŌ, the magnum opus of the Japanese SŌTOSHŪ monk DŌGEN KIGEN, bears the same title but in its Japanese pronunciation.

Zhengjue. (C) (). See HONGZHI ZHENGJUE.

Zhengnian. (C) (). See DAXU ZHENGNIAN.

zhengwu. (J. shōgo; K. chūngo 正悟). In Chinese, “realization-awakening”; the most advanced of the two types of enlightenment (WU; BODHI) discussed in some CHAN schools, equivalent to the achievement of buddhahood. This type of awakening is achieved at the consummation of the ten stages (BHŪM) of the bodhisattva path, rendering one a buddha in fact as well as in principle. The initial “seeing the nature” (JIANXING) of buddhahood catalyzes the “understanding-awakening” (JIEWU), in which the Chan adept comes to know that he is not a deluded sentient being but a buddha. This initial sudden awakening is not in itself sufficient, however, to bring an end to the habituations (VĀSANA) that have been engrained in the mind for an essentially infinite amount of time. It is only after a period of gradual cultivation (jianxiu) that these habitual tendencies will be removed and one’s actions will finally correspond with one’s understanding. That point where knowledge and action are fully integrated marks the final “realization-awakening” (ZHENGWU) and thus constitutes the complete, perfect enlightenment of buddhahood (ANUTTARASAMAKSA BODHI). This two-tiered approach to awakening is the hallmark of the sudden awakening/gradual cultivation (DUNWU JIANXIU) path (MĀRGA) schema of certain Chan masters, such as GUIFENG ZONGMI (780–841) in the Chinese Hoze school of Chan, and POJO CHINUL (1158–1210) of the Korean Sŏn tradition.

Zhenjing Kewen. (J. Shinjō Kokubun; K. Chinjōng Kūngmun 真經畵文) (1025–1102). Chinese CHAN master in the HUANGLONGPAI collateral line branch of the LINJI ZONG; also known as Yun’an, Baofeng, and Letan. Zhenjing was a native of Shanfu in present-day Henan province. He became a student of a certain master Guang of the North Pagoda in Fuzhou (present-day Hubei province) and was given the name Kewen. After receiving the monastic precepts at age twenty-four, Zhenjing began studying the sūtras and commentaries, but left for the South to seek out teachers of Chan. In 1065, Zhenjing spent a summer retreat on Mt. Dawei and had his first awakening experience upon hearing the words of the Chan master YUNMEN WENYAN from another monk. Zhenjing eventually became a disciple of the eminent Chan master HUANGLONG HUINAN (1002–1069) in Jicui and inherited his Linji lineage. At the request of the local king, Zhenjing moved to Jinleng, where he became the founding abbot of a monastery named Baoningsi. Zhenjing later retired to Gao’an, where he built a small hermitage named Toulao’an. Six years later, he moved to the monastery of Guizongsi on LUSHAN and again to Letan at the request of the famed statesman ZHANG SHANGYING. Along with his colleagues Huanglong Zuxin (1025–1100) and Donglin Changcong (1025–1091), Zhenjing helped to build their teacher Huanglong Huinan’s lineage into one of the most prosperous in China. He retired to the hermitage of Yun’an, where he passed away in 1102. Zhenjing left numerous disciples and students, many of whom were statesmen and officials from Jiangxi province. His teachings can be found in the *Yun’an Zhenjing chanshi yulu*.

Zhenke. (C) (). See [DAGUAN ZHENKE](#).

zhenru. (J. shinryo; K. chinyō). In Chinese, “true thusness” or “true suchness”; the Chinese translation of the Sanskrit terms [BHŪTATATHATĀ](#) or [TĀTHATĀ](#), which comes to play its own important role in indigenous Chinese Buddhist thought. According to the Chinese scholastic tradition, deriving from translations of the [LA KĀVATĀRASŪTRA](#) and [YOGĀCĀRA](#) sources, [ZHENRU](#) is, along with right knowledge (*chengzhi*), one of the two “factors associated with enlightenment” (*wufa*), true thusness being what is seen by correct knowledge when perception is freed from conceptual superimpositions. True thusness (*zhenru*) is described in the [DASHENG QIXIN LUN](#) (“Awakening of Faith According to the Mahāyāna”) as one of two distinct, but complementary, aspects of the one mind ([YIXIN](#)), along with production and cessation (*shengmie*). True thusness and production and cessation correspond, respectively, to ultimate truth ([PARAMĀRTHASATYA](#)) and conventional truth ([SA V TISATYA](#)), or the unconditioned ([ASA SK TA](#)) and conditioned ([SA K TA](#)) realms. Since the mind that is subject to production and cessation (which the *Dasheng qixin lun* identifies with [ĀLAYAMĀJĀNA](#)) remains always grounded on the mind of true thusness (which the treatise identifies with [TĀTHĀGATAGARBHA](#)), the mind may therefore be simultaneously described as both deluded and enlightened. The bifurcation between this enlightened essence of the mind as “true thusness” and its various temporal manifestations as “production and cessation” also aligns with the “essence” ([TI](#)) and “function” ([YONG](#)) distinction that Buddhism imported from indigenous Chinese philosophy.

zhenyan. (J. shingon; K. chinōn). In Chinese, lit. “true word.” See [MANTRA](#); [SHINGONSHŪ](#).

Zhi. (J. Shi; K. Chi). Ethnikon used in China for monks from Scythia (C. Yuezhi) or its successor state, the [KUSHAN](#) kingdom, in the northwest of India.

zhi byed. (*shije*). In Tibetan, lit. “pacification”; a Tibetan Buddhist tradition of meditation practice traced back to the eleventh-century Indian adept [PHADAMPASANGS RGYAS](#), who for many years taught at the small temple of [GLANG SKOR](#), near Ding ri in western Tibet. The name derives from the goal of the practice, which is the “pacification” of all suffering, transforming negative states into positive states through the practice of the six perfections ([PĀRAMITĀ](#)), especially the perfection of wisdom ([PRAJÑĀPĀRAMITĀ](#)). The practice is also said to extend one’s life. Together with the related tradition of [GCOD](#), or “severance,” promulgated by [Pha dam pa sangs rgyas](#)’s female disciple [MAGCIG LAB SGRON](#), pacification is frequently counted as one of eight major streams of Buddhist practice found in Tibet, the so-called eight great conveyances that are lineages of achievement ([SGRUB BRGYUD SHING RTACHEN PO BRGYAD](#)). Unlike the tradition of severance, however, the practice of pacification as a unique system had largely died out by the nineteenth century, when great Tibetan scholars of the nonsectarian ([RIS MED](#)) movement attempted to preserve its transmission.

zhidian. (J. chiden; K. chijōn). In Chinese, lit., “to know the halls,” a “hall prefect”; one of the six prefects (C. [TOUSHOU](#)) at a [CHAN](#) or [ZEN](#) monastery. The hall prefect is in charge of cleaning and preparing the shrine halls and the ritual objects placed therein.

Zhi Dun. [alt. Zhi Daolin] (J. Shi Ton/Shi Dōrin; K. Chi Tun/Chi Torim /) (314–366). An early exegete of the perfection of wisdom ([PRAJÑĀPĀRAMITĀ](#)) literature in the southern part of China and leader of an influential group of early Buddhist philosophers associated with the “Dark Learning” ([XUANJUE](#)) school. Zhi is especially important for his crucial reinterpretation of the Chinese philosophical term [LI](#), which previously had meant the “pattern” or natural order of things. Zhi instead reinterprets *li* in light of perfection of wisdom thought as an absolute “principle,” which later came to be contrasted with the manifestations of that principle in the world as various “phenomena” ([SHI](#)). This distinction between principle and phenomena later occupied a crucial position in the thought of many of the indigenous schools of Chinese Buddhism, including the [Tiantai Zong](#) and the [Huayan Zong](#). Zhi Dun is also known for the earliest communication to a certain monk from the Korean Koguryō Kingdom, at least one decade before the official introduction of Buddhism to the peninsula, suggesting earlier Buddhist contacts between China and Korea than the extant evidence indicates.

zhike. (J. shika; K. chigaek). In Chinese, “guest prefect”; one of the six prefects (C. [TOUSHOU](#)) at a [CHAN](#) monastery. The guest prefect is in charge of receiving and accommodating important visitors and guests. In modern Japanese [ZEN](#), the guest prefect plays an important role in the training of young monks on pilgrimage (J. *ANGYA*; see C. [XINGJIAO](#)) as they engage each other in the elaborate ritual of receiving permission to enter the monastery.

zhi khro. (*shi dro*). In Tibetan, “peaceful and wrathful”; a term used to refer to assemblies (especially in a [MA ALA](#)) of peaceful and wrathful (also known as *khrag* “thung or “blood drinking”) deities. For example, in the so-called *Tibetan Book of the Dead*, known in Tibetan as the [BAR DO THOS GROL CHEN MO](#) or the *Karma zhi khro* (“The Peaceful and Wrathful Deities of [KARMA GLING PA](#)”), a *ma ala* of forty-two peaceful deities and fifty-eight wrathful deities appears during the *chos nyid bar do*, the second of the three bardos ([ANTARĀBHAVA](#)).

Zhikong Chanxian. (J. Shikū Zenken; K. Chigong Sōnhyōn; S. *Śūnyadiśya-Dhyānabhadra) (1289–1363). In Chinese, “Pointing to Emptiness, Meditative Worthy,” an Indian monk who taught first in China, but later came to live and teach in Korea at the end of the Koryō dynasty, where his influence was especially important; his Chinese name is sometimes reconstructed into Sanskrit as [*DHYĀNABHADRA](#) and this is how he is often known in the literature. According to his memorial stele written by the Korean literatus Yi Saek (1328–1396), Zhikong was born as the third son of the ruler of a small state in the [MAGADHA](#) region of northeastern India around 1235. He entered the monastic life at the age of eight and is said to have studied at the famous [NĀLANDĀ](#) monastic university under the guidance of Vinayabhadra (C. Lǔxiān). He claimed to have traveled to Sri Lanka at the age of nineteen to study under Samantaprabhāsa (C. Puming), the 107th patriarch in a putative “Chan” lineage starting from [MAHĀKĀŚYAPA](#), which probably means some sort of meditative lineage quite distinct from the East Asian [CHAN](#) lineages. After receiving transmission from Samantaprabhāsa, Zhikong became the 108th patriarch in that lineage. Around 1324, Zhikong traveled via Tibet to the Yuan dynasty and then went on to Koryō in 1326 at the invitation of King Ch’ungsuk (1294–1339; r. 1313–1330, 1332–1339), whom he had met in Beijing at the Mongol court. During his stay in Koryō, Zhikong went on pilgrimage to many important Buddhist sites, including the famous Diamond Mountains ([JŪMGANGSAN](#)). He also founded Hoeamsa (Fir Tree Cliff Monastery) in 1328 in what is now Kyōnggi province, which is said to have been modeled after Nālandā monastery. He returned to the Yuan in 1328, where he was visited by many Korean students, including the late Koryō monks [NAONG HYGŪN](#) (1320–1376) and [MUHAK CHACH’O](#) (1327–1405), on whom he had great influence. He died in 1363, and because of the reverence in which he was held by King Kongmin (r. 1351–1374), some of his relics were sent to Koryō. The relics were first housed in the royal palace and later enshrined in a reliquary at Hoeamsa. Zhikong was supposed to have been well versed in literature of [PRAJÑĀPĀRAMITĀ](#), [VINAYA](#), and [TANTRA](#). In Korea, there survives a collection of his teachings, the *Chigong hwasang Sōnyo nok* (“Master Zhigong’s Essentials of Sōn Record”), and his putative sūtra, the *Munsusari posal ch’oesangsūng musaenggye kyōng* (“Sūtra on the Ultimate Nonproduction ([ANUTPĀDA](#)) Precepts of the Bodhisattva [MANJUŚRĪ](#)”), which is supposed to have been translated from a Sanskrit original by his disciple Naong.

Zhili. (C) (). See [SIMING ZHILI](#).

Zhi Qian. (J. Shi Ken; K. Chi Kyōm) (fl. c. 220–252). Prolific earlier translator of Buddhist texts into Chinese. A descendant of an Indo-Scythian émigré from the [KUSHAN](#) kingdom in the [KASHMIR-GANDHĀRA](#) region of northwest India, Zhi Qian is said to have been fluent in six languages. Although never ordained as a monk, Zhi Qian studied under the guidance of Zhi Liang (d.u.), a disciple of the renowned Indo-Scythian translator [LOKAK EMA](#) (fl. c. 178–198 CE). Zhi Qian fled northern China in the political chaos that accompanied the collapse of the Han dynasty (206 BCE–220 CE), eventually migrating to the Wu Kingdom in the south. There, he settled first in Wuchang and later in the Wu capital of Jianye, which was where the majority of his translations appear to have been made. Zhi Qian was known to have been artistically talented, and many of his translations were noted for their fluent style that did not strive to adhere to the exact meaning of each word and phrase, but instead sought to convey the insights of the text in an accessible fashion for a Chinese audience. The fifty-three translations that are attributed to Zhi Qian range widely between [ĀGAMA](#) and didactic materials and early [MAHĀYĀNA](#) scriptural literature, but also include many spurious later attributions (see [APOCRYPHA](#)). Among the translations that may with confidence be ascribed to Zhi Qian are early renderings of the [VĪMALĀKĪRTINĪRDEŚA](#), the [PUṢA BENYE JING](#), the [SUKHĀVATĪYUHASŪTRA](#), the [A ASĀHASRIKĀPRAJÑĀPĀRAMITĀ](#), and a primitive recension of the [AVATA SAKASŪTRA](#). Zhi Qian is also presumed to be one of the first Buddhist commentators in the East Asian tradition: [DAO’AN](#) (314–385) states in his scriptural catalogue [ZONGLI ZHONGJING MULU](#) (now embedded in the [CHU SANZANG JIJU](#)) that Zhi Qian wrote a commentary to the [ŚĀLISTAMBASŪTRA](#) (C. Liaoben shengsi jing) while preparing its translation. Late in his life, Zhi Qian retired to Mt. Qionglong, where he is said to have passed away at the age of sixty.

zhishi. (J. chiji; K. chisa). In Chinese, lit., “to know or manage affairs”; a “steward” at a [CHAN](#) monastery. Ideally, there are six stewards who oversee the administration and finances of the monastic community. Because their offices were often located on the east side of the monastery, they were also often referred to as the east section or rank. The influential [CHANYUAN QINGGUI](#) mentions only four stewards, the prior (C. [JIANYUAN](#)), rector (C. [WEINUO](#)), cook (C. [DIANZUO](#)), and overseer (C. [ZHISUI](#)). Later, the prior came to be referred to as the [DUSI](#), and a comptroller (C. [JIANSI](#)) and assistant comptroller (C. [FUSI](#)) were added to the list of four.

zhisui. (J. shissui; K. chikse). In Chinese, “overseer”; one of the six stewards (C. [ZHISHI](#)) at a [CHAN](#) monastery. The *zhisui* supervises the manual labor conducted in the monastery, including everything from large construction projects, repairs, and the cultivation of land to patrolling the monastery grounds.

Zhixu. (J. Chigyoku; K. Chiuk) (C). See [OUYI ZHIXU](#).

Zhiyan. (J. Chigon; K. Chiōm) (602–668). Putative second patriarch of the Chinese [HUAYAN](#) tradition. Zhiyan was a native of Tianshui in present-day Gansu

province. While still a boy, Zhiyan said to become a student of the monk [DUSHUN](#) at the monastery of Zhixiangsi on [ZHONGNANSHAN](#). He was ordained at age fourteen and received the full monastic precepts at age twenty, at which time he began studying the “Four-Part Vinaya” ([SIFEN LÜ](#)) of the [DHARMAGUPTAKA](#) school, as well as the [TATTVAŚIDDHI](#), [DASABHŪMKASŪTRA](#), [BODHISATTVA BHŪM](#), and [MAHĀPARINIRVĀ ASŪTRA](#). Zhiyan also studied the [MAHĀYĀNASĀ GRAHA](#) under Fachang (567–645). While studying under Jinglin (565–640), Zhiyan came across a copy of the [AVATA SAKASŪTRA](#) and, at age twenty-seven, composed his influential commentary on the *Avata sakasūtra*, the [HUAYAN JING SOUXUAN JI](#). He also composed the [KONGMU ZHANG](#) (viz., *Huayan jingnei zhangmendeng za kongmu zhang*), *Shi xuan men*, *Huayan wushi yao wenda*, *Jingang jing lüeshu*, and others. Zhiyan began to make a name for himself by preaching the *Avata sakasūtra* to the rural populace and eventually counted among his many supporters the Emperor Gaozong (r. 649–683) himself. Zhiyan is closely associated with the doctrine of “nature origination” ([XINGQI](#)), which explains how enlightenment can be “originated” only from within the very “nature” of this world; enlightenment is therefore not something that needs to be created, for it derives from the inherent nature of the mind itself. [ZHIYAN](#)’s teachings on the *Avata sakasūtra* were extremely influential in East Asian Buddhism and were developed further by his disciples [UISANG](#) and [FAZANG](#). The Korean monk [WŌNHYO](#) was also heavily influenced by Zhiyan’s writings. Because Zhiyan resided at his teacher’s monastery Zhixiangsi, he later came to be called Great Master Zhixiang.

Zhiyi. (C) () (538–597). See [Tiantai Zhiyi](#).

zhiyu. (J. *chiyoku*; K. *chiyok*). In Chinese, the “bath prefect”; one of the six prefects (C. [TOUSHOU](#)) at a [CHAN](#) monastery. The bath prefect is in charge of cleaning the bathhouse, heating the water for use, and preparing necessities such as towels, incense, and tea. Usually, the bath prefect prepares the bath according to a strict monthly schedule.

zhizhi renxin. (J. *jikishi ninshin*; K. *chikchi insim*). In Chinese, “directly point to the human mind”; a famous aphorism summarizing the soteriological approach of the [CHAN](#) school. The phrase appears for the first time in [HUANGBO XIYUN](#)’s [CHUANXIN FAYAO](#), where it is followed by the line [JIANXING CHENGFO](#) (“see one’s own nature and become a buddha”). Subsequently, these two phrases appear together with two other phrases, [BULIWENZI](#) (“not establishing words or letters”) and [JIAOWAI BIECHUAN](#) (“a special transmission outside the teachings”), in the [ZUTING SHIYUAN](#) compiled in 1108. These four phrases subsequently became a normative teaching for Chan practice and also the foundation on which the Chan, [SŌN](#), and [ZEN](#) traditions created their own self-identity as a separate school of East Asian Buddhism.

Zhongfeng Mingben. (J. *Chūhō Myōhon*; K. *Chungbong Myōngbon*) (1263–1323). Chinese [CHAN](#) master in the [LINJI ZONG](#) and one of the most influential monks of the Yuan dynasty; also known by the toponym Huanzhu (Illusory Abode). Zhongfeng was a native of Qiantang in Hangzhou prefecture (present-day Zhejiang province). While still a youth, Zhongfeng left home to study under the Chan master [GAOFENG YUANMAO](#) of Mt. Tianmu, from whom he eventually received his monastic precepts at age twenty-four. After he left Gaofeng, Zhongfeng maintained no fixed residence and would on some occasions dwell on a boat. As his reputation grew, he came to be known as the Old Buddha of the South (Jiangnan Gufo). Mingben was an especially eloquent advocate of “questioning meditation” ([KANHUA CHAN](#)); his descriptions of the meaning and significance of Chan cases ([GONGAN](#)) and meditative topics ([HUATOU](#)) and the processes and experience of *kanhua* practice are widely cited in the literature. In 1318, he was given a golden robe and the title Chan master Foci Yuanzhao Guanghui (Buddha’s Compassion, Perfect Illumination, Broad Wisdom) from Emperor Renzong (r. 1311–1320). Zhongfeng also served as teacher of the next emperor Yingzong (r. 1320–1323). Emperor Wenzong (r. 1329–1332) also bestowed upon him the posthumous title Chan master Zhijue (Wise Enlightenment). Five years later, Emperor Shundi (r. 1333–1367) entered Zhongfeng’s discourse records ([YULU](#)), the *Zhongfeng guanglu*, into the Chinese Buddhist canon ([DAZANGJING](#)), a signal honor for an indigenous author (few of whom are represented in the official canon); Shundi also bestowed on him the title State Preceptor Puying (Universal Resonance). Zhongfeng also composed his own set of monastic rules ([QINGGUI](#)) titled the *Huanzhu’an qinggui*.

Zhongguan lun shu. (J. *Chūgan ronsho*; K. *Chungguan non so*). In Chinese, “Commentary on the [MŪLAMADHYAMAKĀRIKĀ](#)”; composed by the Chinese [SAN LUN ZONG](#) monk [JIZANG](#) in 608. Jizang begins with his observations on Sengrui’s (378–444?) preface to their teacher [KUMĀRAJĪVA](#)’s translation of the *Mūlamadhyamakakārikā*. He then analyzes the twenty-seven chapters of the *Mūlamadhyamakakārikā* in a manner consistent with other scholars of the San lun tradition. Jizang contends that the middle way is a path traversed by the buddhas and [BODHISATTVA](#)s and explains its contents in terms of conventional truth ([SA V TISATYA](#)), absolute truth ([PARAMĀRTHASATYA](#)), and neither conventional nor absolute truth. (See also [SANDI](#).) Jizang supports his arguments by citing numerous sūtras, commentaries, and theories of other teachers. For his analysis of emptiness ([ŚŪNYATĀ](#)), Jizang frequently makes recourse to the [MAHĀPARINIRVĀ ASŪTRA](#).

zhongjiao. (C) (). See [Huayan Wujiao](#).

Zhongnanshan. (J. *Shūnanzan*; K. *Chongnamsan*). In Chinese, “Southernmost Mountain”; also called Nanshan, Mt. Taibai, Mt. Difei, and Mt. Zhounan. Zhongnanshan is located west of the former Chinese capital of Chang’an (present-day Xi’an) and occupies a section of the Qinling Mountain range that stretches through southern Shaanxi province. Because of its proximity to the capital, Zhongnanshan became an important practice site in both the Buddhist and Daoist traditions. Two Buddhist monasteries were built on the mountain, and they attracted many eminent Buddhist monks throughout the dynasties. [DAOXUAN](#), the founder of the Nanshan branch of the Chinese [VINAYA](#) school ([LŪ ZONG](#)) studied there; because of his long association with the mountain, his tradition of monastic discipline came also to be known as the [NANSHAN LŪ ZONG](#). [FAZANG](#) is also said to have begun his study of the [AVATA SAKASŪTRA](#) on Zhongnanshan and to have performed a Buddhist-Daoist prayer ritual on the mountain at the behest of Emperor Ruizong in order to relieve a drought. The syncretic character of the ritual he performed symbolizes the way in which Zhongnanshan straddles the two religious traditions. Sources differ as to whether the monastery where he performed the ritual was Longchisi (Monastery of the Dragon Pool) or Wuzhensi (Awakening to Truth Monastery).

Zhongxiangcheng. (J. *Shūkōjō*; K. *Chunhyangsōng*). In Chinese, “City of Multitudinous Fragrances”; according to the [A ASĀHASRIKĀPRAJÑĀPĀRAMITĀ](#), the city where the [BODHISATTVA DHARMODGATA](#) lived and taught the perfection of wisdom ([PRAJÑĀPĀRAMITĀ](#)); an alternate name for the Korean “Diamond Mountains.” See also [GANDHĀVATĪ](#), [KŪMGAṆSĀN](#).

Zhu. (J. *Jiku*; K. *Ch’uk*). Ethnicon typically used in China for monks who hailed from India (C. [TIANZHU](#)).

Zhuanhong jue. (C) (). See [MOHE ZHIGUAN FUXING ZHUANHONG JUE](#).

zhuchi. (J. *jūji*; K. *chui*). In Chinese, “abbot” of a Buddhist monastery. The term literally means “dwelling and holding,” from the sense that the abbot occupies his own monastery and maintains the Buddha’s dispensation in the current generation, serving as a “holding vessel” so that the Buddha’s lineage can never be extinguished. The *zhuchi* dwells in the “abbot’s quarters” ([FANGZHANG](#)), a term that in some contexts comes by metonymy to refer to the abbot himself, as is the case in certain Korean monasteries.

Zhu Daosheng. (C) (). See [DAOSHENG](#).

Zhu Fonian. (J. *Jiku Butsunen*; K. *Ch’uk Pullyōm*) (d.u.). A prolific early Chinese translator, who was active between the latter fourth and early fifth centuries. A native of Liangzhou, he collaborated with [BUDDHAYAŚAS](#) in the translation of the [DĪRGHĀGAMA](#), with Dharmanandin in the translation of the [EKOTTARĀGAMA](#), and the “Four-Part Vinaya” ([SIFEN LÜ](#)), the [DHARMAGUPTAKA](#) recension of the [VINAYA](#), which eventually becomes the definitive version of the vinaya in the Sinitic tradition. He was also involved in the translation of such texts as the [A ASĀHASRIKĀPRAJÑĀPĀRAMITĀ](#), the [UDĀNAVARGA](#), a [SARVĀSTIVĀDA](#) anthology of aphorisms, and the [JÑĀNAPRASTHĀNA](#), the central treatise of the Sarvāstivāda [ABHIDHARMA](#). Some indigenous Chinese scriptures (see [APOCRYPHA](#)), such as the [PUṢA YINGLUO BENYE JING](#), are also attributed to him.

Zhuohong. (C) (). See [YUNQI ZHUOHONG](#).

Zhuijing yao ji. (J. *Shokyō yōshū*; K. *Chegyōng yo chip*). In Chinese, “Collection of the Essentials of the Various Scriptures,” edited by the Chinese monk Daoshi (d. 683); also known as the *Shan’è yebao lun* (“Treatise on Good and Evil Karmic Retribution”). As the title implies, the *Zhuijing yao ji* is a collection of what Daoshi considered to be essential passages from more than two hundred primary sources, including various sūtras, [VINAYAS](#), and commentaries. Many of the passages that were chosen by Daoshi for inclusion in his collection are concerned with the issue of [KARMA](#) and retribution, hence the text’s alternative title. The entire collection is comprised of a total of thirty sections: (1) the three jewels ([RATNATRAYA](#)), (2) worshipping [STŪPAS](#), (3) controlling thoughts, (4) entering the way, (5) praises and chants, (6) lighting incense, (7) receiving requests, (8) receiving vegetarian feasts ([ZHAI](#)), (9) breaking fast, (10) wealth, (11) poverty, (12) leading others, (13) repaying debt to others, (14) releasing living beings, (15) the flourishing of merit, (16) choosing friends, (17) staying alert, (18) six classifications of beings ([GATI](#)), (19) cause of karma, (20) desire and defilements, (21) four types of birth, (22) retributions, (23) ten evils, (24) deception, (25) laziness, (26) wine and meat, (27) divination, (28) hell, (29) mortuary customs, and (30) miscellaneous matters.

zhung lnga. (shung nga). [alt. *gzhung chen bka’ pod lnga/gzhung chen pod lnga*]. In Tibetan, “the five books,” five Indian treatises that provided the foundation for the monastic curriculum of the [DGE LUGS](#) sect. The five works are the [ABHISAMAYĀLĀ KĀRA](#) of [MATREYA](#), the [MADHYAMAKĀVATĀRA](#) of [CANDRAKĪRTI](#), the [PRAMĀ AVĀRTTIKA](#) of [DHARMAKĪRTI](#), the [ABHIDHARMAKOSĀBHĀ YA](#) of [VASUBANDHU](#), and the [VINAYASŪTRA](#) of [GU APRABHA](#).

zhuoyu. () In Chinese, “annotation,” or “capping phrase.” See [JAKUGO](#).

zhurengong. (J. shujinkō; K. chuin'gong). In Chinese, literally “master” or “owner”; a term used within the [CHAN](#) tradition to refer to “buddha-nature” (C. [FOXING](#)) or “true mind” (C. zhenxin), sometimes seen also as the variant “old master” (zhurenweng). The [ZIMEN JINGXUN](#) (“Admonitions for the Dark-[Robed]”), an influential Buddhist primer compiled in 1313 by the [CHAN](#) monk Yongzhong (d.u.), specifically refers to the variant zhurenweng as a designation for “true mind.” The [WUMEN GUAN](#) (“Gateless Checkpoint”), the eponymous [GONG'AN](#) collection of [WUMEN HUIKAI](#) (1183–1260), includes a gong'an on zhurengong attributed to Ruiyan Shican (850–910), a second-generation successor of [DESHAN XUANJIAN](#) (782–865): Ruiyan would call to himself every day, “Master (zhurengong)!” And he would respond, “Yes.” Then he would say, “Be clear!” “Yes.” “Any time and any day, don't be fooled by anything.” “I won't be.” Yaun Kagu's (fl. c. 1376) [CHAGYÖNG MÜN](#) (“Self-admonitions”), one of the three texts included in the Korean monastic primer [CH'OBALSIMCHAGYÖNG MÜN](#), opens with an admonition to postulants and novices: “Master (chuin'gong)! Listen to my words! How can you continue to transmigrate through the realms of suffering when so many people have realized the way through the gateway of emptiness?” The Korean Sōn community uses the concept of chuin'gong as a generic “meditative topic” (hwadu; C. [HUATOU](#)) in kanhwa Sōn (C. [KANHUA CHAN](#)), or “questioning meditation.”

Zhwa dmar incarnations. (Shamar). An influential incarnation ([SPRUL SKU](#)) lineage in the [KARMA BKA' BRGYUD](#) sect of Tibetan Buddhism, regarded as a human incarnation of [AMTĀBHA](#). The first incarnation, Grags pa seng ge (Drakpa Senge, 1283–1349), was a disciple of the third [KARMA PA](#), who offered him a red crown (zhwa dmar), from which the name of the line of incarnations derives. Subsequent Zhwa dmar embodiments had close relationships with the Karma pa line, in many cases alternately serving as [GURU](#) and pupil to the [BKA' BRGYUD](#) hierarch. Grags pa seng ge founded a seat at [GNAS NANG](#) monastery in central Tibet, later moved to [YANGS PA CAN](#) monastery under the direction of the fourth incarnation, Chos grags ye shes (Chödrak Yeshe, 1453–1524). Several Zhwa dmar incarnations spent considerable time in Nepal, including the sixth, Gar dbang Chos kyi dbang phyug (Garwang Chökyi Wangchuk, 1584–1630), who composed a detailed description of his travels. The lineage was interrupted for nearly a century when the tenth incarnation, Chos grub rgya mtsho (Chödrup Gyatso, 1741–1791), was accused of forging a treasonous alliance with the Gorkha army during a Tibetan conflict with Nepal, during which [BKRASHIS LHUN PO](#) monastery was sacked. The tenth Zhwa dmar died in prison, by either suicide or murder. The Tibetan government seized Yangs pa can monastery and converted it into a [DGE LUGS](#) monastery. It also banned recognition of new Zhwa dmar embodiments, a proscription that lasted more than a century. In the interim, several incarnations were found but never officially installed. The incarnation lineage includes:

1. Grags pa seng ge (Drakpa Senge, 1283–1349)
2. Mkha' spyod dbang po (Kachö Wangpo, 1350–1405)
3. Chos dpal ye shes (Chöpal Yeshe, 1406–1452)
4. Chos grags ye shes (Chödrak Yeshe, 1453–1524)
5. Dkon mchog yan lag (Könchok Yanlak, 1525–1583)
6. Gar dbang Chos kyi dbang phyug (Garwang Chökyi Wangchuk, 1584–1630)
7. Ye shes snying po (Yeshe Nyingpo, 1631–1694)
8. Dpal chen chos kyi don grub (Palchen Chökyi Döndrup, 1695–1732)
9. Dkon mchog dge ba'i 'byung gnas (Könchok Gewe Jungne, 1733–1740)
10. Chos grub rgya mtsho (Chödrup Gyatso, 1741–1792) [interruption of lineage]
11. 'Jam dbyangs Rin po che (Jamyang Rinpoche, 1892–1946)
12. 'Phrin las kun khyab (Trinle Kunkyp, 1948–1950)
13. Mi pham smra ba'i go cha (Mipam Mawe Gocha, b. 1952)

Zhwa lu. (Shalu). A modest but important monastery near the Tibetan city of Gzhis ka tse (Shigatse), famous as the seat of fourteenth-century polymath [BU STON RIN CHEN GRUB](#), and renowned for its unusual architectural features. The earliest foundations were laid circa 997 by Lo ston Rdo rje dbang phyug (Lotön Dorje Wangchuk, b. tenth century), an active teacher during the outset of the later dissemination ([PHY DAR](#)) of Buddhism in Tibet. His disciple, Lce btsun Shes rab 'byung gnas (Chetsün Sherap Jungne, d.u.), established a larger structure in 1027, having promised his master to construct a temple “as large as a small hat,” from which its name is derived. The project was completed just prior to a visit of the illustrious Bengali scholar [ĀTĪṢA DĪPA KARASĪRĪNĀNA](#). During the thirteenth century, Zhwa lu formed close ties with the ruling [SASKYA](#) hierarchs and their Mongol patrons. In 1306, the Yuan emperor Temür (1265–1307) appointed Grags pa rgyal mtshan (Drakpa Gyaltsen, d.u.) as prelate, under whom the institution flourished. Bu ston's rise to the abbacy in 1320 is traditionally viewed as the beginning of a new lineage, the so-called Zhwa lu pa (“Those of Zhwa lu”) or Bu lugs tshul (“Tradition of Bu [ston]”). It was at Zhwa lu that Bu ston famously redacted the several hundred volumes that would comprise his influential edition of the Tibetan Buddhist canon. The monastery is equally famous for its unique blend of Tibetan and Chinese architecture (most notably, its pagoda-style roof of glazed turquoise tiles) and murals executed under the direction of Newar artist-disciples of the master Newari artisan Amiko.

Zibo. (C) () (1543–1603). See [DAGUAN ZHENKE](#).

Zimen jingxun. (J. Shimon kyōkun/Shimon keikun; K. Ch'imun kyōnghun). In Chinese, “Admonitions for Those in the Dark-[Robed] School”; an important Buddhist primer, in nine rolls, compiled in 1313 by the [CHAN](#) monk [YONGZHONG](#) (d.u.) in the [LINJI ZONG](#) lineage of [ZHONGFENG MINGBEN](#). Yongzhong's text is an expansion of an earlier one-roll primer entitled *Zilin baoxun* (“Precious Admonitions to the Forest of the Dark-[Robed]”), by the Song-dynasty monk Zexian (d.u.). In 1474, the monk Rujin (d.u.) of the monastery of Zhenrusi added some additional work of his own to Yongzhong's text and published the compilation as *Zimen jingxun*, in a total of ten rolls. The text contains 170 anecdotes, instructions, admonitions, and suggestions to neophytes, derived from eminent monks who lived between the Northern Song and the Ming dynasties. The author admonishes Chan students to observe the Buddhist precepts and to exert themselves in the study of Buddhism. Citing such Confucian classics as the *Lunyu* (“Analects of Confucius”) and the *Shijing* (“Book of Poetry”), Yongzhong admonishes students to be diligent in their learning, even encouraging them to study Confucianism and Daoism in order better to promote Buddhism, just as ancient eminent masters had done. He provides several masters' detailed instructions on Chan meditation, including proper physical posture, and offers instructions on the proper way of reading Buddhist scriptures. Finally, Yongzhong includes the instructions of many renowned Chan masters, as conveyed in their sermons ([SHANGTANG](#)) and letters ([SHUZHUANG](#)). Rujin's edition of Yongzhong's work continues to be widely used today to instruct novices and neophytes. In Korea, Yongzhong's nine-roll version has been republished several times since [T'AEGOPU](#) (1301–1381) imported it to the peninsula during the Koryŏ period.

Zimmē Paññāsa. In Burmese, lit. “Chiangmai Fifty”; the Burmese recension of the *Paññāsajātaka*, or “Fifty [Apocryphal] Birth Stories.” See [PAÑÑĀSAJĀTAKA](#).

Zlum brtsegs lha khang. (Dumtsak Lhakang). A large, three-floored [STÜPA](#) constructed in 1421 by the renowned Tibetan adept [THANG STONG RGYAL PO](#) (Tangtong Gyalpo), located in Bhutan's Spa gro (Paro) Valley. According to traditional biographies, the master erected this structure at a geomantically powerful location in order to restrain a malignant demoness dwelling in the region. It was restored and enlarged in 1841 by the twenty-fifth head abbot (rje mkhan po) of Bhutan, Shes rab rgyal mtshan (Sherap Gyaltsen, served 1836–1839).

zong. (J. shū; K. chong). A polysemous term in Chinese, which can refer to the “core teaching,” “cardinal doctrine,” or central “axiom” of a text or scholastic philosophy, or to a “school,” “tradition,” or even “lineage.” Because of the denotation of zong as a cardinal doctrine, the term is used to translate the Sanskrit [SIDDHĀNTA](#), an “axiom” or principal “tenet” of the various schools of Indian philosophy (both Buddhist and non-Buddhist). Although commonly translated as “school” (“sect” is incorrect in a Chinese Buddhist context), this rendering is only appropriate for those scholastic and practice traditions that trace themselves back through an unbroken lineage of ancestors to a specific founding “patriarch” ([ZUSHI](#)), such as the [TIANZI ZONG](#), [HUAYAN ZONG](#), and [CHAN ZONG](#). Commentarial traditions focused upon the exegesis of a specific text, such as the [DI LUN](#) ([DĀŚABHŪMIKASŪTRA](#)), [SHE LUN](#) ([MAHĀYĀNĀSA GRAHA](#)), or [CHENGSHI LUN](#) ([TATTVAŚIDDHI](#)), do not qualify as true schools of Chinese Buddhism, since they neither claim to derive from a single founder nor posit an exclusive lineage of successors; they might more correctly be termed “scholastic traditions.”

Zongjing lu. (J. Sugyōroku; K. Chonggyōng nok). In Chinese, “Records of the Mirror of the Source”; composed c. 961 by the Song-dynasty [CHAN](#) master [YONGMING YANSHOU](#) (904–975), in one hundred rolls; also called “Records of the Mirror of the Mind” (*Xinjing lu*). The “source” (zong), Yanshou says in the preface to

the *Zongjing lu*, refers to the “one mind” ([YIXIN](#)), which functions like a mirror that is able to reflect all dharmas. The *Zongjing lu* offers an exhaustive elaboration of the Chan teaching of “one mind” by systematizing the doctrinal and meditative positions of the various Chan traditions of past and present. The *Zongjing lu* consists of three main sections: exemplifications of the source ([biaozong zhang](#)), questions and answers ([wenda chang](#)), and citations ([yinzheng chang](#)). The first section, which comprises much of the first roll, offers a general overview of the treatise, focusing on Chan’s “source” in the one mind. The massive second section, corresponding to the second half of the first roll through the ninety-third roll, offers various explanations on the one mind through a question raised at the beginning of each section, followed by Yanshou’s detailed response. His explanations are typically accompanied by extensive citations from various sūtras and commentaries, such as the [YUANJUE JING](#) and the [DAZHIDU LUN](#). Throughout this exhaustive survey and explanation of doctrinal matters, Yanshou underscores the importance of the one mind or one dharma as the underlying source of all external phenomena. The third and final section, which comprises the last seven rolls of the collection, validates the previous explanations through quotations of hundreds of scriptures and sayings of eminent Chan masters; its aim is to help those of inferior spiritual capacity give rise to faith. Many of these quotations are from materials that are no longer extant, thus providing an important overview of Chan during Yanshou’s time. Yanshou’s goal throughout this work is to present his distinctive vision of Chan as a pansectarian tradition that subsumes not only the different Chan lineages, but also such doctrinal traditions as [Tiantai](#), [Huayan](#), and [Faxiang](#). Much of the source material that Yanshou compiled in the *Zongjing lu* may derive from [Guifeng Zongmi](#)’s similarly massive *Chanyuan ji* (“Chan Collection”), only the prolegomenon to which survives (see [Chanyuan Zhuquanji Duxu](#)). The collection was influential not only in China, but also in Koryŏ-period Korean [Sŏn](#) and the five mountain ([Gozan](#)) schools of Ashikaga-period Japanese [Zen](#).

Zongli zhongjing mulu. (J. Sōri shūkyō mokuroku; K. Chongni chunggyōng mongnok 錄). A scriptural catalogue ([Jinglu](#)) compiled by the Eastern Jin monk [Dao'an](#) (312–385); often referred to by its abbreviated title, *An lu*, or “An’s Catalogue.” The complete catalogue is no longer extant, but is partially preserved within the [Chu sanzang jiji](#). The catalogue covers texts translated between the Han dynasty to the year 374 and provides the titles, translators’s names, and the dates of the translations, wherever possible. As one of the first such scriptural catalogues compiled in East Asia, Dao’an’s compilation served as the model for all future such endeavors.

Zongmen huomen. (J. Shūmon wakumon; K. Chongmun hongmun 宗門問答). In Chinese, “Some Inquiries into the [Chan] Tradition,” composed by the [Chan](#) master [Zhanran](#) [Yuandeng](#) in the [Caodong zong](#). In 1605, Zhanran replied to inquiries he had received from Chan neophytes about the school’s distinctive teachings and practices and edited together fifty-two of these exchanges as the *Zongmen huomen*. (The zongmen of the title is a common designation for the [Chan zong](#), especially in Song-dynasty and later materials.) As Zhanran explains in his preface, he wrote this text because it is difficult for neophytes to understand Chan since there are so many different Chan teachings and practices. For example, to the question of what is most essential in Chan meditation and how one should begin in Chan practice, Zhanran answers that one must aspire to investigate the matter of birth-and-death. As to how to investigate the matter of birth-and-death, he answers that one has to arouse three states of mind: (1) the mind of great faith; (2) the mind of ferocious effort (cf. [Yongmaeng Chongjin](#)) and nonretrogression; and (3) the mind of great doubt (see [Yiqing](#)). (Cf. [Sanyao](#).) In the course of his exposition, Zhanran also covers other Buddhist practices, including recitation of the Buddha’s name ([Nianfo](#)), but he is adamant that Chan is the best and most direct way to enlightenment. In addition to the series of exchanges, Zhanran also appends the following related texts to the *Zongmen huomen*: the *Canchan shinan* (“Difficulties in Investigating Chan”), *Huomen* (“Some Inquiries”), *Buyi* (“Appended Sayings”), *Daming Dingzi men* (“Clear Replies to Daming’s Inquiries”), and the *Daguan heshang zhaoyang zhuan* (“Tale of the Monk Daguan’s Invitation to Disaster”), a fervent defense of the renowned Chan master [Daguan Zhenke](#) (a.k.a. [Zibo](#)), who died amid political intrigue at court.

Zongmen liandeng huiyao. (J. Shūmon rentōeyō; K. Chongmun yōndūng hoeyo 宗門連燈會要). In Chinese, “Essential Collection of the Lamplight Connections within the [Chan] Tradition”; composed by Huiweng Wuming (d.u.), a third-generation disciple of the [Chan](#) master [Dahui Zonggao](#), in 1183. This work is a collection of anecdotes and teachings culled from the biographies and discourse records ([Yulu](#)) of over six hundred patriarchs and teachers ([Zushi](#)) of the Chan tradition. Huiweng begins the collection with the seven buddhas of the past ([Saptabuddha](#)), the twenty-eight Indian patriarchs, and the six patriarchs of China (see [Chuangeng lu](#)). His collections also include the various lineages and collateral lines that split off from the sixth patriarch ([Liu Zu](#)) [Huineng](#)’s disciples [Qingyuan Xingsi](#) (up to the seventeenth generation) and [Nanyue Huairang](#) (up to the fifteenth generation). In addition to its role as a genealogical history, the *Zongmen liandeng huiyao* was favored by many followers of Chan as a reliable and convenient collection of Chan cases ([Gongan](#)).

Zongmen shigui lun. (J. Shūmon jikkiron; K. Chongmun sipkyu 宗門十規論). In Chinese, “Treatise on the Ten Rules of the [Chan] Tradition,” composed by [Chan](#) master [Fayan Wenyi](#) (885–958); also known as the *Fayan chanshi zongmen shigui lun*, *Jinghui Fayan chanshi zongmen shigui lun*, and simply *Shigui lun*. The *Zongmen shigui lun* warns against ten maladies to which those in the Chan tradition are susceptible, viz., (1) assuming the role of teacher without first purifying one’s own mind, (2) sectarian disputes, (3) positing the main points of Chan without knowing the specific contexts, (4) answering without consideration of time and situation, (5) failure to distinguish defiled from pure, (6) baseless interpretations of the sayings of the masters of old, (7) memorizing slogans and not being able to use them at the right moment, (8) miscitations by not mastering the canon, (9) improperly composing songs and verses before one’s understanding has matured, and (10) defending one’s own shortcomings and indulging in disputes. The *Zongmen shigui lun* is also the first text to mention the names of the five houses (see [Wu Jiaqi Zong](#)) of the mature Chan tradition.

Zongmi. (C) (宗密). See [Guifeng Zongmi](#).

Zongze. (C) (宗則). See [Changlu Zongze](#).

Zuihō. (J) (最奥) (1683–1769). See [Menzan Zuihō](#).

zuishangsheng Chan. (J. saijōjōzen; K. ch’oesangsŭng Sŏn 最上生禪). In Chinese, lit. “supreme vehicle Chan,” referring to one of the styles of practice and pedagogy associated with the [Chan](#) school; often considered to be equivalent to “unconventional Chan” ([Gewai Chan](#)). Supreme vehicle Chan is one of the five categories of Chan listed by [Guifeng Zongmi](#) (780–841) in his *Chanyuan Zhuquanji Duxu* (“Prolegomena to the Source of Chan Collection”). According to Zongmi’s treatment, “supreme vehicle Chan” refers to meditation practices that rely on sudden approaches to awakening ([Dunwu](#)) and generate an initial insight into the true nature of mind, i.e., the original purity of mind that is shared by both sentient beings and buddhas. The text equates this form of Chan with the “pure Chan of the [Tathāgatas](#)” (rulai qingjing Chan), also known by its abbreviated name, tathāgata Chan (rulai Chan); it also is said to be equivalent to “single-practice [Sāṃdhi](#)” ([Yixing Sanmei](#)) and the “sāṃdhi of suchness” (zhenru sanmei), since “supreme vehicle Chan” is the root of all kinds of sāṃdhi. The text also defines supreme vehicle Chan as the “Chan transmitted from [Bodhidharma](#)”; this latter form of Chan is subsequently named “patriarchal Chan” (zushi Chan) in the Song-dynasty Chan collections, such as the [Jingde Zhuandeng Lu](#) (“Record of the Transmission of the Lamplight Published during the Jingde Era”) and Puji’s (1179–1253) *Wudeng huiyuan* (“Collected Essentials of the Five Lamplight Histories”), which in turn redefines “tathāgata Chan” as subordinate to “patriarchal Chan.”

zuochan. (J. zazen; K. chwasŏn 坐禪). In Chinese, “seated meditation.” Zuochan is a combination of the Chinese term “to sit” (zuo) and the character [Chan](#), a transcription of the Sanskrit term [Dhyāna](#) (meditation); often referred to in English-language sources by the Japanese pronunciation zazen. As its etymology implies, zuochan refers to sitting with legs folded on top of each other and eyes slightly closed in meditation. This meditative practice may be generically considered to be directed at sāṃdhi, one of the three trainings (C. sanxue; S. śik ātraya), along with morality ([Śīla](#)) and wisdom ([Prajñā](#)), or alternatively at dhyāna, one of the six [Pāramitās](#) emblematic of [Bodhisattva](#) practice, along with charity ([Dāna](#)), precepts (śīla), forbearance ([Kṣānti](#)), effort ([Vīrya](#)), and wisdom (prajñā). Sitting has long held pride of place within the Buddhist tradition as the archetypal position ([Iryāpāṭha](#)) most suited to sustained meditation training. The prototype for zuochan is the Buddha’s own seated meditation under the [Bodhi tree](#), as well as the legendary Indian monk [Bodhidharma](#)’s “wall gazing” ([Biguan](#)) for nine years in a cave. Because of these associations with both the Buddha and Bodhidharma, the founder of the Chan school, zuochan was widely considered to be the primary practice within the [Chan](#), [Sŏn](#), and [Zen](#) traditions. In China, zuochan came to be viewed as such a stereotypical aspect of the Chan school, broadly conceived, that Chan teachers began to critique its necessity and importance; these critiques suggested instead that Chan practice was not to be confined just to zuochan, but should also be conducted throughout the three other standard deportments of walking, standing, and lying down. For example, the [Liu Zu Tanjing](#) (“Platform Sūtra”), attributed to the sixth patriarch [Huineng](#), includes such a rectification of the meaning of zuochan when it says that “‘seated’ means, externally, to refrain from generating thoughts related to wholesome or unwholesome objects; ‘meditation’ means, internally, to see that the self-nature is unmoving.” In this redefinition, zuochan means not just “seated meditation” but instead encompasses a way of understanding that is to be carried through all aspects of one’s experience.

Zur chung pa. (Zur chung Shes rab grags pa) (1014–1074). A [Rnying ma](#) master, the disciple of [Zur po che](#) (Shākya ’byung gnas, 1002–1062) and father of Zur Shākya seng ge (also known as Sgro sbug pa, 1074–1135). Because he was a poor novice, Zur po che encouraged him to marry the daughter of a wealthy patron, which he reluctantly did. He is said to have spent thirteen years meditating in a cave. His most famous work is his final testament, the *Zhal gdams brgyad cu pa* (“Eighty Oral Instructions”).

Zur po che. ([alt. Zur chen] Shākya ’byung gnas) (1002–1062). A [Rnying ma](#) master of the Zur clan. His disciple [Zur chung pa](#), and Zur Shākya seng ge (also known as Sgro sbug pa, 1074–1135) are known with him as the three Zur (Zur mam pa gsum), with Zur po che as the founding figure. He was a disciple of Nyang Ye shes ’byung gnas and was renowned especially for his practice and teaching of the “magical net” ([Māyājāla](#)) class of [Tantras](#), the *Dgongs pa ’dus pa’i mdo*, and the [Sādhana](#) of [Vajrakīlaya](#). As such, he holds an important place in the transmission of [Rdzogs chen](#) and [Sems sde](#) teachings. He was ordained by the famous [Vinaya](#) master Bla chen Dgongs pa rab gsal and also studied extensively with [Gnubs chen Sangs rgyas ye shes](#). During the time of the later dissemination of Buddhism to

Tibet, he is credited with organizing the Rnying ma tantras in such a way that a particular tantra, its commentaries, sādhanas, and ritual manuals were grouped together. He identified the *Dgongs pa 'dus pa'i mdo* as the root tantra of [ANUYOGA](#), the *GUHYAGARBHA* as the root tantra of [MAHĀYOGA](#), and the *KUN BYED RGYAL PO* as the root tantra of [ATTIYOGA](#). He is also credited with the fundamental division of the Rnying ma teachings in [BKA' MA](#) (words) and [GTER MA](#) (treasures). He founded the monastery of 'Ug pa lung (Owl Land) located to the east of Gzhis ka rse (Shigatse).

zushi. (J. soshi; K. chosa). In Chinese, “patriarch” (lit. “ancestral teacher”), referring to eminent teachers in lineages that are claimed to trace back to [ŚĀKYAMUNI](#) Buddha or even earlier buddhas. Indian Sanskrit texts dating from the 2nd century CE onward refer to a tradition of five “masters of the dharma” (dharmācārya) who succeeded the Buddha as head of the [SA GHA: MAHAKĀŚYAPA, ĀNANDA, MADHYANTIKĀ, ŚĀ AKĀŚIN,](#) and [UPAGUPTA](#) . Later sources expand this list into a roster of nine eminent masters who “handed down the lamplight of wisdom successively through the generations.” Often, these genealogies were extended as far back as the seven buddhas of antiquity ([SAPTATATHĀGATA](#)). It is widely presumed that this notion of dharma-transmission lineages developed from the earlier [VINAYA](#) concept of the “preceptor” ([UPĀDHYĀYA](#)), a senior monk who confers the lower ordination (pravrajyā, see [PRAMAJITA](#)) to new novices ([ŚRĀMA ERA](#)) and higher ordination ([UPASA PADĀ](#)) to monks ([BHIKṢU](#)). This personal connection between preceptor and disciple created incipient ordination families connected to specific preceptors, connections that later could be extended to dharma transmission as well. ¶ In East Asia, these lists of Indian dharma masters continued to be expanded and elaborated upon so that they also included the preeminent indigenous figures within each lineage, thus connecting the Chinese patriarchs of each lineage with their Indian predecessors. Most of the indigenous traditions of East Asian Buddhism, including the [CHAN ZONG, Tiantai Zong, JINGTU ZONG,](#) and [HUAYAN ZONG,](#) draw their legitimacy at least partially from their claims that their teachings and practices derive from an unbroken lineage of authoritative teachers that can be traced back geographically to India and temporally to the person of the Buddha himself. The specific names and numbers of patriarchs recognized within each lineage typically change over time and vary widely between the different traditions. Of these lists, the list of patriarchs recognized in the Chan school has received the lion's share of scholarly attention in the West. This Chan list varies widely, but a well-established roster includes twenty-eight Indian and six Chinese patriarchs. These six Chinese patriarchs (liu zu) —[BODHDHARMA, HUIKE, SENGCAN, DAOXIN, HONGREN,](#) and [HUINENG](#)—are credited by the classical tradition with the development and growth of Chan in China, but early records of the Chan school, such as the [LENGQIE SHIZU JI](#) and [LIDA FABAO JI,](#) reveal the polemical battles fought between disparate contemporary Chan communities to place their own teachers on this roster of patriarchal orthodoxy. It is important to note that all of these various lists of patriarchs, in all the different traditions, are created retrospectively as a way of legitimizing specific contemporary lineages or teachers and verifying the authenticity of their teachings; thus their accounts of the chronology and history of their lineages must be used critically. The compound zushi can mean either “patriarch” (lit., ancestral teacher) or in other contexts “patriarchs and teachers,” as in the stock phrase “all the buddhas of the three time-periods and patriarchs and teachers throughout successive generations” (sanshi zhufu lidai zushi), which explicitly traces a school's ancestral lineage from the past to the present and into the future. Some modern Buddhists, especially in the West, deplore the sexism inherent in the term “patriarch,” preferring instead to render it with the gender-neutral term “ancestor.” See also [CHUANDENGLU; FASI; PARA PARĀ; YINKE.](#)

Zutang ji. (J. Sodōshū; K. Chodang chip). In Chinese, “Anthology of the Patriarchs' Hall.” See [CHODANG CHIP.](#)

Zuting qianchui lu. (J. Sotei kantsuiroku; K. Chojōng kyōmch'u nok 錄). In Chinese, “Record of Forceps and Hammers of the Patriarchs' Hall,” edited by the [CHAN](#) master [FEIYIN TONGRONG](#) (1593–1661) of the [LINJI ZONG](#) during the late Ming dynasty. This collection includes over fifty anecdotes considered to be essential for the training of students. These anecdotes focus on the enlightenment stories of several renowned Tang- and Song-dynasty [LINJI ZONG](#) masters, such as [LINJI YIXUAN,](#) Shoushan Shengnian (926–993), Fenyang Shanzhao (947–1024), Shishuang Chuyuan (986–1039), [YUANWU KEQIN,](#) and [DAHUI ZONGGAO,](#) but also include a few stories concerning renowned masters in the [YUNMEN ZONG](#) and [CAODONG ZONG.](#) Most of these stories are excerpted from Chan texts published during the Song dynasty, especially Puji's (1179–1253) *Wudeng huiyuan* (“Collected Essentials of the Five Lamplight Histories”). Each story is accompanied by Feiyin's own short prose commentary (pingchang). Four additional exchanges between a certain master Wang Jing and the monk Fohui Faquan (d.u.) concerning the history of the Chan tradition are included as an appendix.

Zuting shiyuan. (J. Sotei jion; K. Chojōng sawōn). In Chinese, “Garden of Matters from the Patriarchs' Hall,” edited in eight rolls by Mu'an Shanxiang (d.u.) in 1108; the oldest encyclopedia of the Chinese [CHAN](#) tradition. This collection includes over 2,400 items related to Chan pedagogy, culled from Buddhist and secular stories, proverbs, numerological lists, personal names, local dialects, and so forth. Mu'an is said to have embarked on this project in response to the growing number of monks who were unable to understand the rich content and context of the many [GONG'AN](#) exchanges found in Chan literature. Mu'an's material is drawn from over twenty important Chan sources, such as the discourse records ([YULU](#)) of [YUNMEN WENYAN, XUEDOU CHONGXIAN,](#) and [FAYAN WENYI,](#) and [YONGJIA XUANJUE](#)'s popular [ZHENGDAO GE.](#) The encyclopedia functions as a glossary for these works, offering explanations for their difficult technical terms and obscure names (which are not necessarily Chan or Buddhist in origin), and drawing his explanations from Buddhist, Confucian, and Daoist materials, as well as such secular sources. For example, the first roll of the encyclopedia provides a glossary of the *Yunmen lu*, which discusses the author Yunmen Wenyan, offers definitions of terms and explanations of names appearing in the text, drawing on sources ranging from the *Shiji* (“Book of History”) to the *AGAMASŪTRAS*, and fills out the myriad numerical lists that appear in the text, such as the three vehicles (C. sansheng; S. [TRİYĀNA](#)), the three baskets of the canon (C. sanzang; S. [TRIPĪKA](#)), the eight teachings of Tiantai (see [WUSHI BAJIAO](#)), etc. Mu'an's exhaustive collection meticulously traces the source of each item and provides a detailed commentary on each. The *Zuting shiyuan* was republished in 1154, and numerous editions were published during the Tokugawa period in Japan.

List of Lists

This roster provides some of the most important numerical lists used in the Buddhist traditions. Generally, we include the equivalencies only in Sanskrit, Tibetan, and Chinese, since in most cases these will be adequate to trace the terms back to the relevant entries in the dictionary. In instances where there are several variations of a list, we seek to provide only one common form. In addition, the various languages often provide different interpretations of a particular term, making it difficult to provide a single English translation. For ease in tracing terms back to their main dictionary entries, the numeric elements in the foreign-language names of each list have not been provided; the exceptions are those lists in which numerals are included in the main dictionary entries (for example, daśabhūmi).

ONES

one vehicle. (S. ekayāna; T. theg pa gcig pa; C. yisheng)

TWOS

two accesses/entrances. (C. er ru)

- 1. access of principle (C. liru)
- 2. access of practice (C. xingru)

two accumulations/equipments. (S. sa bhāra; T. tshogs; C. ziliang)

- 1. accumulation/equipment of merit (S. pu yasa bhāra; T. bsod nams kyi tshogs; C. fuziliang)
- 2. accumulation/equipment of wisdom (S. jñānasa bhāra; T. ye shes kyi tshogs; C. zhiziliang)

two aspects of esoteric Buddhism. (C. er mi)

- 1. esoteric as to principle (li mi)
- 2. esoteric as to practices (shi mi)

two attainments. (S. siddhi; T. dngos grub; C. chengjiu/xidi /)

- 1. mundane attainments (S. sādharma asiddhi; T. thun mong gi dngos grub; C. gongtong chengjiu/xidi /)
- 2. supreme attainment (S. uttamasiddhi; T. mchog gi dngos grub; C. zuishang chengjiu/xidi /)

two benefits. (S. artha; T. don; C. li)

- 1. benefitting oneself (S. svārtha/ātmahita; T. rang don; C. zili)
- 2. benefitting others (S. parārtha/parahita; T. gzhan don; C. lita)

two bodies (of a buddha). (S. kāya; T. sku; C. shen)

- 1. truth body (S. dharmakāya; T. chos sku; C. fashen)
- 2. physical body (S. rūpakāya; T. gzugs sku; C. shengshen)

twofold generation of the aspiration to enlightenment. (S. bodhicittotpāda; T. byang chub kyi sems bskyed; C. fa putixin)

- 1. attitude of aspiration (S. pra idhicittotpāda; T. smon pa'i sems bskyed; C. yuan putixin)
- 2. attitude of undertaking (S. prasthānacittotpāda; T. 'jug pa'i sems bskyed; C. xing putixin)

two karmic retributions. (C. er bao)

- 1. retribution proper [viz. one's own actions] (zheng bao)
- 2. adjunct retribution [viz. environmental factors] (yi bao)

two means of knowledge. (S. pramā a; T. tshad ma; C. liang)

- 1. direct perception (S. pratyak a; T. mngon sum; C. xianliang)
- 2. inference (S. anumāna; T. rjes dpag; C. biliang)

two obstructions. (S. āvara a; T. sgribs pa; C. zhang)

- 1. afflictive obstructions (S. kleśāvara a; T. nyon mongs pa'i sgrib ba; C. fannao zhang)
- 2. cognitive or noetic obstructions [to omniscience] (S. jñeyāvara a; T. shes bya'i sgrib ba; C. suozhi zhang)

two stages. (S. krama; T. rim pa; C. cidi)

- 1. stage of generation (S. utpattikrama; T. bskyed rim; C. shengqi cidi)
- 2. stage of completion (S. ni pannakrama; T. rdzogs rim; C. yuanman cidi)

two supreme ones. (T. mchog gnyis)

- 1. Nāgārjuna
- 2. Asa ga

OR

- 1. Gu aprabha
- 2. Śākyaprabha

two truths. (S. satyadvaya; T. bden pa gnyis; C. er di)

- 1. conventional truth (S. sa v tisatya; T. kun rdzob bden pa; C. sudi/shisu di /)
- 2. absolute truth/ultimate truth (S. paramārthasatya; T. don dam bden pa; C. zhendi/shengyi di/diyiyi di / /)

two types of nonself. (S. nairātmya; T. bdag med; C. wuwo)

- 1. nonself of the person (S. pudgalanairātmya; T. gang zag gi bdag med; C. ren wuwo)
- 2. nonself of phenomena (S. dharmanairātmya; T. chos kyi bdag med; C. fa wuwo)

two vehicles. (S. yānavaya; T. theg pa gnyis; C. er sheng)

- 1. vehicle of disciples (S. śrāvakayāna; T. nyan thos kyi theg pa; C. shengwen sheng)
- 2. vehicle of solitary buddhas (S. pratyekabuddhayāna; T. rang rgyal gyi theg pa; C. yuanjue sheng 緣)

OR

1. great vehicle (S. mahāyāna; T. theg pa chen po; C. dasheng)
2. lesser vehicle (S. hīnayāna; T. theg pa dman pa; C. xiaosheng)

THREES

three actions. (S. karman; T. las; C. ye)

1. wholesome/virtuous (S. kuśala; T. dge ba; C. shan)
2. unwholesome/unvirtuous (S. akuśala; T. mi dge ba; C. bushan)
3. neutral/indeterminate (S. avyāk ta; T. lung ma bstan; C. wuji 禮)

three afflictions. (S. kleśa; T. nyon mongs; C. fannao)

1. desire/greed (S. rāga; T. 'dod chags; C. tan)
2. hatred/aversion (S. dve a; T. zhe sdang; C. chen)
3. delusion (S. moha; T. gtī mug; C. chi)

three baleful destinies. (S. apāya/durgati; T. ngan song; C. equ)

1. animals (S. tiryak; T. dud 'gro; C. chusheng)
2. ghosts (S. preta; T. yi dwags; C. egui)
3. hell denizens (S. nāraka; T. dmyal ba; C. diyu)

three baskets of the canon. (S. tripi aka; T. sde snod gsum; C. sanzang)

1. basket of discourses (S. sūtrapi aka; T. mdo sde'i sde snod; C. jingzang)
2. basket of discipline (S. vinayapi aka; T. 'dul ba'i sde snod; C. lüzang)
3. basket of abhidharma/scholastic exegesis (S. abhidharmapi aka/*śāstrapi aka; T. chos mngon pa'i sde snod; C. lunzang)

three becomings. (S. bhava; T. srid pa; C. you)

1. becoming in the sensual realm (S. kāmabhava; T. 'dod pa'i srid pa; C. yuyou)
2. becoming in the realm of subtle materiality (S. rūpabhava; T. gzugs kyi srid pa; C. seyou)
3. becoming in the immaterial realm (S. ārūpyabhava; T. gzugs med kyi srid pa; C. wuseyou)

three bodies [of a buddha]. (S. trikāya; T. sku gsum; C. san shen)

1. truth body (S. dharmakāya; T. chos sku; C. fashen)
2. enjoyment body (S. sa bhogakāya; T. longs spyod rdzogs pa'i sku; C. baoshen)
3. emanation body (S. nirmā akāya; T. sprul pa'i sku; C. huashen)

three classes of atiyoga. (T. rdzogs chen sde gsum)

1. mental class (T. sems sde)
2. instruction class (T. man ngag sde)
3. expanse class (T. klong sde)

three contaminants. (āsrava; T. zag pa; C. lou)

1. contaminant of sensuality (S. kāmāsrava; T. 'dod pa'i zag pa; C. yu lou)
2. contaminant of becoming (S. bhavāsrava; T. srid pa'i zag pa; C. you lou)
3. contaminant of ignorance (S. avidyāsrava; T. ma rig pa'i zag pa; C. wuming lou)

three enlightenments. (S. bodhi; T. byang chub; C. puti)

1. enlightenment of the disciples (S. śrāvakabodhi; T. nyan thos kyi byang chub; C. shengwen puti)
2. enlightenment of the pratyekabuddhas (S. pratyekabodhi; T. rang rgyal gyi byang chub/rang sangs rgyas kyi byang chub; C. yuanjue puti 緣)
3. complete perfect enlightenment [of the buddhas] (S. anuttarasamyaksa bodhi; T. bla na med pa yang dag par rdzogs pa'i byang chub; C. anouduoluo sanmiao sanputi)

three families, lords of. (S. trikulanātha; T. rigs gsum mgon po; C. sanbu huzhu)

1. Avalokiteśvara (T. Spyan ras gzigs; C. Guanshiyin)
2. Mañjuśrī (T. 'Jam dpal; C. Wenshu)
3. Vajrapā i (T. Phyang na rdo rje; C. Jingangshou 金)

threefold contemplation. (C. sanguan)

1. contemplation of emptiness (C. kongguan)
2. contemplation of conventional existence (C. jiaguan)
3. contemplation of their mean (C. zhongguan)

three gates. [viz. types of karmic activity] (S. dvāra; T. sgo; C. men)

1. body (S. kāya; T. lus; C. shen)
2. speech (S. vāc; T. ngag; C. kou)
3. mind (S. manas; T. yid; C. yi)

three gates to deliverance. (S. vimok amukha; T. nam thar sgo; C. jietuo men 脫)

1. emptiness (S. śūnyatā; T. stong pa nyid; C. kong)
2. signlessness (S. ānimitta; T. mtshan ma med pa; C. wuxiang)
3. wishlessness (S. apra ihita; T. smon pa med pa; C. wuyuan/wuzuo /)

three inner tantras. (T. nang rgyud sde gsum)

1. mahāyoga (T. mal 'byor chen po)
2. anuyoga (T. rjes su mal 'byor)
3. atiyoga (T. shin tu mal 'byor)

three jewels. (S. ratnatraya; T. dkon mchog gsum; C. sanbao)

1. the buddha (T. sang rgyas; C. fo/fotuo /)
2. the teachings (S. dharma; T. chos; C. fa/damo /)
3. the community (S. sa gha; T. dge 'dun; C. seng/sengqie /)

three knowledges. (S. trividyā; T. rig pa gsum; C. sanming)

1. recollection of past lives (S. pūrvanivāsānusm ti; T. sngon gyi gnas rjes su dran pa; C. suzhu suinian/suming ming /)
2. "the divine eye"/clairvoyance (S. divyacak us; T. lha'i mig; C. tianyan ming)
3. the extinction of the contaminants (S. āśravak aya; T. zag pa zad pa shes pa; C. loujin ming)

three means of knowledge. (S. pramā a; T. tshad ma; C. liang)

1. direct perception (S. pratyak a; T. mngon sum; C. xianliang)
2. inference (S. anumāna; T. rjes dpag; C. biliang)
3. scripture (S. āgama; T. lung; C. shengyan liang/shengjiao liang /)

three natures. (S. trisvabhāva; T. mtshan nyid gsum/ngo bo nyid gsum/rang bzhin gsum; C. sanxing)

1. imaginary/imputed (S. parikalpita; T. kun btags; C. pianji suozhi xing)
2. dependent (S. paratantra; T. gzhan dbang; C. yitai xing)
3. perfected/consummate (S. parini panna; T. yongs su grub pa; C. yuanchengshi xing)

three poisons. (S. trivi a; T. dug gsum; C. sandu)

1. desire/greed (S. rāga; T. 'dod chags; C. tan)
2. hatred/aversion (S. dve a; T. zhe sdang; C. chen)
3. delusion (S. moha; T. gti mug; C. chi)

three realms. [of existence] (S. traidhātuka; T. kham gsum; C. san jie)

1. sensuous realm/desire realm (S. kāmadhātu; T. 'dod kham; C. yu jie)
2. realm of subtle materiality/form realm (S. rūpadhātu; T. gzugs kham; C. se jie)
3. immaterial realm/formless realm (S. ārūpyadhātu; T. gzugs med kham; C. wuse jie)

three refuges. (S. trisāra a; T. skyabs gsum; C. san gui/san guiyi /)

1. the buddha (T. sang rgyas; C. fo/fotuo /)
2. the teachings (S. dharma; T. chos; C. fa/damo /)
3. the community (S. sa gha; T. dge 'dun; C. seng/sengqie /)

three roots. (S. mūla; T. rtsa ba)

1. teacher (S. guru; T. bla ma)
2. tutelary deity (T. yi dam)
3. ākinī (S. ākinī; T. mkha' 'gro ma)

three sages of Huayan. (C. Huayan sansheng)

1. Vairocana Buddha (C. Piluzhena zunfo 毗盧遮那佛)
2. Samantabhadra bodhisattva (C. Puxian pusa 普賢菩薩)
3. Mañjuśrī bodhisattva (C. Wenshu pusa 文殊菩薩)

three sufferings. (S. du kha; T. sdug bsngal; C. ku)

1. suffering of [physical and mental] pain (S. du khadu khatā; T. sdug bsngal gyi sdug bsngal; C. kuku)
2. suffering inherent in change (S. vipari āmadu katā; T. 'gyur ba'i sdug bsngal; C. huaiku)
3. suffering inherent in conditionality (S. sa skāradu khatā; T. 'du byed kyi sdug bsngal; C. xingku)

three times. (S. trikāla; T. dus gsum; C. sanshi)

1. past (S. atīta; T. 'das pa; C. guoqushi)
2. present (S. vartamāna; T. da lta ba; C. xianzaishi)
3. future (S. anāgata; T. ma 'ongs pa; C. weilaishi)

three trainings. (S. trīśik ā; T. bslab pa gsum; C. sanxue)

1. morality/higher morality (S. śīla/adhiśīlaśik ā; T. tshul khirms/lhag pa'i tshul khirms kyi bslab pa; C. jie/zengshangjie xue /)
2. concentration/higher concentration (S. samādhi/adhisamādhiśik ā; T. ting nge 'dzin/lhag pa'i ting nge 'dzin gyi bslab pa; C. ding/zengshangxin xue /)
3. wisdom/higher wisdom (S. prajñā/adhiprajñāśik ā; T. shes rab/lhag pa'i shes rab kyi bslab pa; C. hui/zengshanghui xue /)

three truths/judgments. [of the Tiantai school] (C. sandi)

1. truth of emptiness (C. kongdi)
2. truth of being provisionally real (C. jiadi)
3. truth of the mean (C. zhongdi)

three turnings of the wheel of the law. (S. dharmacakrapravartana; T. chos 'khor rim pa; C. zhuan falun)

1. the dharma-wheel of the four noble truths (S. catu satyadharmacakra; T. bden pa bzhi'i chos 'khor; C. sidi falun)
2. the dharma-wheel of the absence of defining characteristics (S. alak a adharmacakra; T. mtshan nyid med pa'i chos 'khor; C. wuxiang falun)
3. the dharma-wheel of thorough delineations (S. *suvibhaktadharmacakra/pravicayadharmacakra; T. legs par mam par phye ba'i chos 'khor; C. [shan] fenbie falun/shan bian falun [] /)

three vehicles. (S. triyāna; T. theg pa gsum; C. san sheng)

1. śrāvakayāna (T. nyan thos kyi theg pa; C. shengwen sheng)
2. pratyekabuddhayāna (T. rang sangs rgyas kyi theg pa; C. yuanjue sheng/pizhi fo sheng 緣覺 /)
3. bodhisattvayāna (T. byang chub sems dpa'i theg pa; C. pusa sheng)

three restraints. (S. sa vara; T. sdom pa; C. lüyi/sanbaluo 律 /)

1. the disciplinary rules of a monk or nun (S. prātimok asa vara; T. so so thar pa'i sdom pa; C. boluotimuchahu/biejietuo lüyi / 脫)
2. the restraint that is engendered by meditative absorption (S. dhyānajasa vara; T. bsam gtan skyes pa'i sdom pa; C. chanlüyi 律)
3. the restraint that derives from being free from the contaminants (S. anāśravasa vara; T. zag pa med pa'i sdom pa; C. wuloulüyi 律).

OR

three vows. (S. trisa vara; T. sdom gsum; C. san lüyi 律)

1. the disciplinary rules of a monk or nun (S. prātimok asa vara; T. so so thar pa'i sdom pa; C. boluotimuchahu/biejietuo lüyi / 脫)
2. bodhisattva vows (S. bodhisattvasa vara; T. byang sems kyi sdom pa; C. pusa lüyi 律)
3. secret mantra vows (S. guhyamantrasa vara; T. gsang sngags kyi sdom pa; C. mizhou lüyi)

three wisdoms. (S. prajñā; T. shes rab; C. hui)

1. wisdom derived from learning (S. śrutamayiprajñā; T. thos pa las byung ba'i shes rab; C. wenhui)
2. wisdom derived from reflection (S. cintāmayiprajñā; T. bsam pa las byung ba'i shes rab; C. sihui)
3. wisdom derived from cultivation (S. bhāvanāmayiprajñā; T. bsgoms pa las byung ba'i shes rab; C. xiuhui)

FOURS

four absorptions. (S. dhyāna; T. bsam gtan; C. chan/ding /)

1. first absorption (S. prathamadhyāna; T. bsam gtan dang po; C. chuchan)
2. second absorption (S. dvitīyadhyāna; T. bsam gtan gnyis pa; C. erchan)
3. third absorption (S. tītyadhyāna; T. bsam gtan gsum pa; C. sanchan)
4. fourth absorption (S. caturthadhyāna; T. bsam gtan bzhi pa; C. sichan)

four activities. (S. karman; T. las; C. shiye)

1. pacification (S. śāntika; T. zhi ba'i las; C. xizai)
2. enrichment (S. pau ika; T. rgyas pa'i las; C. zengyi)
3. control (S. vaśīkara a; T. bdang gi las; C. huai'ai)
4. wrath (S. abhicāra; T. drag po mngon spyod; C. xiangfu)

four aids to penetration. (S. nirvedhabhāgiya; T. nges par 'byed pa'i cha mthun; C. shunjuezenfen)

1. heat (S. ū man; T. drod; C. nuan)
2. summit (S. mūrdhan; T. rtse mo; C. ding)
3. receptivity/acquiescence (S. k ānti; T. bzod pa; C. ren)
4. supreme worldly dharmas (S. laukikāgradharma; T. 'jig rten pa'i chos kyi mchog; C. shi diyi fa)

four analytical knowledges. (S. pratīsa vid; T. so so yang dag par rig pa; C. wu'ai jie/wu'ai bian /)

1. of factors (S. dharma; T. chos; C. fa)
2. of meaning (S. artha; T. don; C. yi)
3. of etymology or language (S. nirukti; T. nges pa'i tshig; C. ci/ci /)
4. of eloquence (S. pratibhāna; T. spobs pa; C. leshuo 說)

four baleful destinies. (S. apāya/durgati; T. ngan song; C. equ)

1. demigods (S. asura; T. lha ma yin; C. axiuluo qu)
2. animals (S. tiryak; T. dud 'gro; C. chusheng qu)
3. ghosts (S. preta; T. yi dwags; C. egui qu)
4. hell denizens (S. nāraka; T. dmyal ba; C. diyu qu)

four bases of psychic power. (S. ddhipāda; T. rdzu 'phrul gyi rkang pa; C. shenzu/ruyizu /)

1. aspiration (S. chanda; T. 'dun pa; C. yu)
2. vigor/effort (S. vīrya; T. brtson 'grus; C. qin)
3. thought/concentration (S. citta; T. bsam pa; C. xin)
4. analysis (S. mīmā sā; T. dpyod pa; C. siwei/guan /)

four bodies [of a buddha]. (S. kāya; T. sku; C. shen)

1. dharma body (S. dharmakāya; T. chos sku; C. fashen)
2. enjoyment body (S. sa bhogakāya; T. longs spyod rdzogs pa'i sku; C. baoshen)
3. emanation body (S. nirmā akāya; T. sprul pa'i sku; C. huashen)
4. essence body (S. svābhāvikakāya; T. ngo bo nyid kyi sku; C. zixing shen)

four bonds/fetters. (S. grantha/sa yojana; T. 'ching ba; C. jie/fu /)

1. covetousness (S. abhidhyā; T. brnab sems; C. yu'ai)
2. ill-will (S. vyāpāda; T. gnod sems; C. chenhui)
3. attachment to rules and rituals (S. śīlavrataparāmarśa; T. tshul khriims dang brtul zhugs mchog tu 'dzin pa; C. jiejinqu)
4. attachment to views/dogmatic fanaticism (S. d īparāmarśa/īda satyābhiniveśa; T. lta ba mchog tu 'dzin pa; C. wojianqu)

four boundless states/immeasurables. (S. apramā a; T. tshad med; C. wuliang xin)

1. loving-kindness (S. maitrī; T. byams pa; C. ci)
2. compassion (S. karu ā; T. snying rje; C. bei)
3. empathetic joy (S. muditā; T. dga' ba; C. xi)
4. equanimity (S. upek ā; T. btang snyoms; C. she)

four characteristics of all conditioned objects. (S. sa sk talak a a/caturlak a a; T. 'dus byas kyi mtshan nyid/mtshan nyid bzhi; C. youwei xiang/sixiang /)

1. origination/birth (S. jāti; T. skye ba; C. sheng)
2. maturation/continuance (S. sthiti; T. gnas pa; C. zhu)
3. senescence/decay/aging (S. jarā; T. rga ba; C. yi)
4. desinence/extinction (S. anitya [alt. anityatā]; T. mi rtag pa; C. mie)

four conditions. (S. pratyaya; T. rkyen; C. yuan 緣)

1. causal condition (S. hetupratyaya; T. rgyu rkyen; C. yin yuan 緣)
2. immediate antecedent condition (S. samanantarapratyaya; T. de ma thag pa'i rkyen; C. dengwujiang yuan 緣)
3. objective-support condition (S. ālambanapratyaya; T. dmigs rkyen; C. suoyuan yuan)
4. predominant condition (S. adhipatipratyaya; T. bdag rkyen; C. zengshang yuan)

four contaminants. (S. āsrava; T. zag pa; C. lou)

1. contaminant of sensuality (kā māsrava; T. 'dod pa'i zag pa; C. yu lou)
2. contaminant of becoming (bhavāsrava; T. srid pa'i zag pa; C. you lou)
3. contaminant of ignorance (avidyāsrava; T. ma rig pa'i zag pa; C. wuming lou)
4. contaminant of views (d yāsrava; T. lta ba'i zag pa; C. jian lou)

four continents. (S. dvīpa; T. gling; C. [da][bu]zhou [])

1. videha [east] (T. lus 'phags; C. dong shengshen zhou)
2. Jambudvīpa [south] (T. 'dzam bu gling; C. nan Shanbu zhou)

3. godāniya [west] (T. ba glang spyod; C. xi niuhuo zhou)
4. uttarakuru [north] (T. sgra mi snyan; C. bei julu zhou 俱)

four “defeat” offenses. (S. pārājika; T. phas pham pa; C. poluoyi)

1. sexual intercourse (S. abrahmacarya; T. mi tshangs pa spyod pa; C. yin)
2. theft (S. adattādāna; T. ma byin par len pa; C. dao)
3. killing [of a human being] (S. vadha; T. gsod pa; C. sha)
4. lying about one’s higher spiritual achievements (S. uttaramanu yadharmapralāpa; T. mi’i chos bla mar smra ba; C. wang)

four deportments/postures. (S. īryāpatha; T. spyod lam; C. weiyi)

1. walking (S. ca krama; alt. gamana; T. ’chag pa; C. xíng)
2. standing (S. sthāna; sthita; T. ’greng ba; C. zhu)
3. sitting (S. ni a a; T. ’dug pa; C. zuo)
4. lying down (S. śayana; T. nyal ba; C. wo)

four divine abidings. (S. brahmavihāra; T. tshang pa’i gnas; C. fanzhu)

1. loving-kindness (S. maitrī; T. byams pa; C. ci)
2. compassion (S. karu ā; T. snying rje; C. bei)
3. empathetic joy (S. muditā; T. dga’ ba; C. xī)
4. equanimity (S. upek ā; T. btang snyoms; C. she)

four empowerments. (S. abhi eka; T. dbang; C. guanding)

1. vase empowerment (S. kalaśābhi eka; T. bum dbang; C. baoping guanding)
2. secret empowerment (S. guhyābhi eka; T. gsang dbang; C. mimi guanding)
3. wisdom–knowledge empowerment (S. prajñājñānābhi eka; T. shes rab ye shes kyi dbang; C. zhihui guanding)
4. word empowerment (S. śabdābhi eka; T. tshig dbang/dbang bzhi pa; C. mingci guanding)

four fearlessnesses/self-confidences. (S. vaiśāradya; T. mi ’jigs pa; C. wusuowei)

The Tathāgata’s self-confidence derives from:

1. his knowledge of all phenomena (S. sarvadharmābhisa bodhivaiśāradya; T. chos thams cad mkhyen pa la mi ’jigs pa; C. zhufa xiandengjue wuwei)
2. his knowledge that all the contaminants are destroyed (S. sarvāsravak ayajñānavaiśāradya; T. zag pa zad pa thams cad mkhyen pa la mi ’jigs pa; C. yiqie loujinzhi wuwei)
3. his correct identification of all the obstacles to liberation (S. antarāyikadharmānanyathātvanīcitavyākara avaiśāradya; T. bar du gcod pa’i chos mams bzhan du mi ’gyur bar nges pa’i lung bstan pa la mi ’jigs pa; C. zhangfa buxu jue ding shouji wuwei 虛禮)
4. his realization of all the marvelous qualities that are to be achieved through completing the path to liberation (S. sarvasampadadhigamāyanairyā ikapratipattathātvavaiśāradya; T. phun sum tshogs pa thams cad thob par ’gyur bar nges par ’byung ba’i lam de bzhin du gyur ba la mi ’jigs pa; C. weizheng yiqie juzu chudao ruxing wuwei)

four floods. (S. ogha; T. chu bo; C. puliu)

1. craving for sensuality (S. kāmarāga; T. ’dod pa la ’dod chags; C. yu’ai)
2. craving for continued existence (S. bhavarāga; T. srid pa’i ’dod chags; C. you’ai)
3. ignorance (S. avidyā; T. ma rig pa; C. wuming)
4. views (S. d i; T. lta ba; C. jian)

four foundations of mindfulness. (S. sm tyupasthāna; T. dran pa’i nyer bzhag; C. nianchu)

1. mindfulness of the body (S. kāyasm tyupasthāna; T. lus dran pa nye bar bzhag pa; C. shen nianchu)
2. mindfulness of sensations (S. vedanāsm tyupasthāna; T. tshor ba dran pa nye bar bzhag pa; C. shou nianchu)
3. mindfulness of mental states (S. cittasm tyupasthāna; T. sems dran pa nye bar bzhag pa ; C. xin nianchu)
4. mindfulness of phenomena (S. dharmasm tyupasthāna; T. chos dran pa nye bar bzhag pa; C. fa nianchu)

four fruitions. [of sanctity] (S. phala; T. ’bras bu; C. guo [zheng/wei] [/])

1. stream-enterer (S. srotaāpanna; T. rgyun du zhugs pa; C. yuliu guo/xutuohuan guo /)
2. once-returner (S. sak dāgāmin; T. lan cig phyr ’ong ba; C. yilai guo/situohan guo /)
3. non-returner (S. anāgāmin; T. phyr mi ’ong ba; C. buhuan guo/anahan guo /)
4. worthy one (S. arhat; T. dgra bcom pa; C. wuxue guo/aluohan guo /)

four graspings. (S. upādāna; T. nyer len; C. qu)

1. of sensuality (S. kāmopādāna; T. ’dod pa nye bar len pa; C. yuqu)
2. of wrong views (S. d yupādāna; T. lta ba nye bar len pa; C. jianqu)
3. of rules and rituals (S. śīlavratopādāna; T. tshul khirms dang brtul zhugs mchog ’dzin nye bar len pa; C. jieljin] qu [])
4. of the concept “self” (S. ātmavāḍopādāna; T. bdag lta nye bar len pa; C. woyu qu)

four great elements. (S. mahābhūta; T. ’byung ba chen po; C. da)

1. earth/solidity (S. p thivī; T. sa; C. di)
2. water/cohesion (S. āpas; T. chu; C. shui)
3. fire/warmth (S. tejas; T. me; C. huo)
4. air/mobility (S. vāyu; T. rlung; C. feng)

four guardian kings. (S. mahārājan/lokapāla; T. rgyal chen; C. [hushi] tianwang/huguo tianwang [] /)

1. Dh tarā ra; in the east (T. Yul ’khor srung; C. Chiguo)
2. Virū haka; in the south (T. ’Phags skyes po; C. Zengzhang)
3. Virūpāk a; in the west (T. Spyen mi bzang; C. Guangmu)
4. Vaiśrava a; in the north (T. Rnam thos sras; C. Duowen)

four immaterial absorptions. (S. ārūpyāvacaradhyāna; T. gzugs med pa’i snyoms ’jug; C. wuse ding) See [FOUR IMMATERIAL REALMS](#) (s.v.).

four immaterial realms. (S. ārūpyadhātu; T. gzugs med kham pa’i gnas; C. wuse jie)

1. infinite space (S. ākāśānantyāyatana; T. nam mkha’ mtha’ yas skye mched; C. kong wubian chu)
2. infinite consciousness (S. vijñānānantyāyatana; T. nam shes mtha’ yas skye mched; C. shi wubian chu)
3. nothingness (S. ākiñcanyāyatana; T. ci yang med pa’i skye mched; C. wu suoyou chu)
4. neither perception nor nonperception (S. naivasa jñānāsa jñāyatana; T. ’du shes med ’du shes med min skye mched; C. feixiang feifeixiang chu)

four intentions. (S. abhiprāya; T. dgongs pa; C. yiqū/miyi [/])

1. intention directed towards sameness (S. samatābhiprāya; T. mnyam pa nyid la dgongs pa; C. pingdeng yiqu)
2. intention directed towards other meanings (S. arhāntarābhiprāya; T. don gzhan la dgongs pa; C. bieyi yiqu)
3. intention directed towards other times (S. kālāntarābhiprāya; T. dus gzhan la dgongs pa; C. bieshi yiqu)
4. intention directed towards other individuals (S. pudgalāntarābhiprāya; T. gang zag gzhan la dgongs pa; C. buteqieluo yiyao yiqu)

four intermediate states. (S. antarābhava; T. bar do)

1. intermediate state of the birth (S. jātyantarābhava; T. skye gnas kyi bar do)
2. intermediate state of the moment of death (S. mumūr āntarābhava; T. 'chi kha'i bar do)
3. intermediate state of dharmatā (S. dharmatāntarābhava; T. chos nyid bar do)
4. intermediate state of rebirth (S. bhavāntarābhava; T. srid pa bar do)

four Māras. (S. māra; T. bdud; C. mo)

1. Māra of the aggregates (S. skandhamāra; T. phung po'i bdud; C. yinmo)
2. Māra of the afflictions (S. kleśamāra; T. nyon mongs pa'i bdud; C. fannao mo)
3. Māra of death (S. m tyumāra; T. 'chi bdag gi bdud; C. simo)
4. Māra the deity (S. Devaputramāra; T. Lha'i bu bdud; C. Tianzimo)

four means of conversion. (S. sa grahavastu; T. bsdu dngos; C. sheshi; shefa /)

1. generosity (S. dāna; T. sbyin pa; C. bushi)
2. kind words (S. priyavādita; T. snyan par smra ba; C. aiyu)
3. helpfulness; viz. teaching others to fulfill their aims (S. arthacaryā; T. don spyod pa; C. lixing)
4. consistency between words and deeds (S. samānārthatā; T. don mthun pa; C. tongshi)

four modes of birth. (S. yoni; T. skye gnas rigs; C. sheng)

1. oviparous birth (S. a āja; T. sgo nga las skye ba; C. luansheng)
2. viviparous birth (S. jarāyuja; T. mngal nas skye ba; C. taisheng)
3. moisture-born (S. sa svedaja; T. drod sher las skye ba; C. shisheng)
4. metamorphic or transformative birth; viz. spontaneous generation [as of divinities] (S. upapāduka; T. brdzus te skye ba; C. huasheng)

four noble ones. (S. ārya; T. 'phags pa; C. sheng)

1. śrāvaka (T. nyan thos; C. shengwen)
2. pratyekabuddha (T. rang rgyal; C. yuanjue 緣)
3. bodhisattva (T. byang chub sems dpa'; C. pusa)
4. buddha (T. sang rgyas; C. fo)

four noble persons. (S. āryapudgala; T. 'phags pa'i gang zag; C. xiansheng)

1. stream-enterer (S. srotaāpanna; T. rgyun du zhugs pa; C. yuliu guo/xutuohuan guo /)
2. once-returner (S. sak dāgāmin; T. lan cig phyir 'ong ba; C. yilai guo/situohan guo /)
3. non-returner (S. anāgāmin; T. phyir mi 'ong ba; C. buhuan guo/anahan guo /)
4. worthy one (S. arhat; T. dgra bcom pa; C. wuxue guo/aluohan guo /)

four noble truths. (S. āryasatya; T. 'phags pa'i bden pa; C. shengdi)

1. truth of suffering (S. du khasatya; T. sdug bsngal gyi bden pa; C. kudi)
2. truth of origination (S. samudayasatya; T. kun 'byung gi bden pa; C. jidi)
3. truth of cessation (S. nirodhasatya; T. 'gog pa'i bden pa; C. miedi)
4. truth of the path (S. mārgasatya; T. lam gyi bden pa; C. daodi)

four persons. (S. pudgala; T. gang zag; C. buteqieluo)

1. ordinary persons (S. p thagjana; T. so so skye bo; C. fanfu)
2. disciples (S. śrāvaka; T. nyan thos; C. shengwen)
3. solitary buddhas (S. pratyekabuddha; T. rang rgyal; C. yuanjue 緣)
4. bodhisattvas (T. byang chub sems dpa'; C. pusa)

four perverted views. (S. viparyāsa; T. phyin ci log; C. diandao)

1. to view as permanent what is actually impermanent (S. nityaviparyāsa; T. mi rtag pa la rtag par 'dzin pa; C. chang diandao)
2. to view as pleasurable what is actually suffering (S. sukhaviparyāsa; T. sdug bsngal ba la bde bar 'dzin pa; C. le diandao)
3. to view as pure what is actually tainted (S. śuciviparyāsa; T. mi gtsang ba la gtsang bar 'dzin pa; C. jing diandao)
4. to view as self what is actually non-self (S. ātmaviparyāsa; T. bdag med pa la bdag tu 'dzin pa; C. wo diandao)

four philosophical systems. (S. siddhāntabheda; T. grub mtha' smra ba)

1. Vaibhā ika [Sarvāstivāda] (T. Bye brag tu smra ba; C. Piposha bu)
2. Sautrāntika (T. Mdo sde pa; C. Jingliang bu)
3. Vijñānavāda/Cittamātra (T. Rnam shes su smra ba/Sems tsam pa; C. Weishi)
4. Madhyamaka (Dbu ma pa; C. Zhongguan)

four realms of reality [dharmadhātu]. (C. si fajie)

1. dharmadhātu of phenomena (C. shi fajie)
2. dharmadhātu of principle (C. li fajie)
3. dharmadhātu of the unimpeded interpenetration between principle and phenomena (C. lishi wu'ai fajie)
4. dharmadhātu of unimpeded interpenetration of phenomenon and phenomena (C. shishi wu'ai fajie)

four reliances. (S. pratisara a; T. rton pa; C. yi)

1. reliance on the meaning rather than the words (S. arthapratīsara ena bhavitavya na vyāñjanapratīsara ena; T. don la rton par bya yi tshig 'bru la rton par mi bya; C. yi yi buyi yu)
2. reliance on the teaching rather than on the person [who delivers the teaching] (S. dharmapratīsara ena bhavitavya na pudgalapratīsara ena; T. chos la rton par bya yi gang zag la rton par mi bya; C. yifa buyi ren)
3. reliance on wisdom rather than [ordinary] consciousnesses (S. jñānapratīsara ena bhavitavya na vijñānapratīsara ena; T. ye shes la rton par bya yi mam shes la rton par mi bya; C. yizhi buyi shi)
4. reliance on the definitive meaning rather than the provisional meaning (S. nītārthasūtrapratīsara ena bhavitavya na neyārthasūtrapratīsara ena; T. nges don la rton par bya yi drang don la rton par mi bya; C. yiliaoyi buyi buliaoyi)

four right efforts. (S. samyakpradhāna/samyakprahā a; T. spong pa; C. zhengqin)

1. to bring about the (future) non-production of evil and unwholesome dharmas that have not yet been produced (S. anutpannānā pāpakānām akuśalānā

- dharmā ām anutpādāya cchanda janayati/anutpannānā akuśālānā sa rak a a ; T. mi dge ba ma skyes pa mi bkyed pa; C. weisheng e ling busheng)
2. the abandonment of those evil and unwholesome dharmas that have been produced (S. utpannānā pāpakānām akuśālānā dharmā ā prahā āya cchanda janayati/utpannānā akuśālānā prahā a ; T. mi dge ba skyes pa spong ba; C. yisheng e ling yongduan)
3. the production of wholesome dharmas that have not yet been produced (S. anutpannānā kuśālānā dharmā ām utpādāya cchanda janayati; T. dge ba ma skyes pa bskyed pa; C. weisheng shan ling sheng)
4. the increase of those wholesome dharmas that have been produced (S. utpannānā kuśālānā dharmā ā sthitaye bhūyobhāvāya asa pramo āya paripūra āya cchanda janayati/anutpannānā punarutpāda; T. dge ba skyes pa spel ba; C. yisheng shan ling zengzhang)

four seals. (S. mudrā; T. phyag rgya; C. yin)

- pledge seal (S. samayamudrā; T. dam tshig phyag rgya; C. sanmoye yin)
- dharmas seal (S. dharmamudrā; T. chos kyi phyag rgya; C. fa yin)
- action seal (S. karmamudrā; T. las kyi phyag rgya; C. jiemo yin)
- great seal (S. mahāmudrā; T. phyag rgya chen po; C. da yin)

four seals indicative of the Buddhist view. (S. caturmudrā/d inimitamudrā; T. phyag rgya bzhi/bka' rtags kyi phyag rgya; C. siyin/fayin /)

- all that is compounded is impermanent (S. sarvasa skārānityatā ; T. 'dus byas thams cad mi rtag pa; C. zhuxing wuchang)
- all that is contaminated is suffering (S. sarvasa skārādu khā ; T. zag cas thams cad sdug bsngal ba; C. yiqie jie ku)
- all phenomena are without self (S. sarvadharmā anātmāna ; T. chos thams cad bdag med pa; C. zhufa wuwo)
- nirvā a is peace (S. nirvā aśānta; T. mya ngan las 'das pa zhi ba; C. niepan jijing)

four tantra classes. (S. tantra; T. rgyud sde)

- action tantra (S. kriyātantra; T. bya ba'i rgyud)
- performance tantra (S. caryātantra; T. spyod pa'i rgyud)
- yoga tantra (S. yogatantra; T. mal 'byor gyi rgyud)
- unexcelled yoga tantra (S. anuttarayogatantra; T. mal 'byor bla na med pa'i rgyud)

FIVES

five acts that bring immediate retribution. (S. ānantaryakarma; T. mtshams med pa; C. wujian ye [nizui/zhongzui] [/])

- matricide (S. māt ghāta; T. ma gsod pa; C. hai mu/sha mu /)
- patricide (S. pit ghāta; T. pha gsod pa; C. hai fu/sha fu /)
- killing an arhat (S. arhadghāta; T. dgra bcom pa gsod pa; C. hai aluohan/sha aluohan /)
- maliciously spilling a buddha's blood (S. tathāgatasyāntike du acittarudhirotpādanam; T. de bzhin gshegs pa'i sku la ngan sems kyi's khrag 'byin pa; C. [exin] chu foshen xie [])
- creating a schism in the order (S. sa ghabheda; T. dge 'dun gyi dbyen byas pa; C. poseng)

five aggregates. (S. skandha; T. phung po; C. yun/yin /)

- aggregate of materiality (S. rūpaskandha; T. gzugs kyi phung po; C. se yun/se yin /)
- aggregate of sensation (S. vedanāskandha; T. tshor ba'i phung po; C. shou yun/shou yin /)
- aggregate of perception (S. sa jñāskandha; T. 'du shes kyi phung po; C. xiang yun/xiang yin /)
- aggregate of conditioning factors (S. sa skāraskandha; T. 'du byed kyi phung po; C. xing yun/xing yin /)
- aggregate of consciousness (S. vijñānaskandha; T. mam shes kyi phung po; shi yun/shi yin /)

five aids to liberation. (S. mok abhāgiya; T. thar pa cha mthun; C. shunjietuofen 脫)

- faith (S. śraddhā; T. dad pa; C. xin)
- effort (S. vīrya; T. brtson 'grus; C. jingjin/qin /)
- mindfulness (S. sm ti; T. dran pa; C. nian)
- concentration (S. samādhi; T. ting nge 'dzin; C. ding)
- wisdom (S. prajñā; T. shes rab; C. hui)

five buddha families. (S. pañcakula; T. rigs lnga; C. wu bujia /)

- tathāgata family (S. tathāgatakula; T. de bzhin gshegs pa'i rigs; C. rulai bu)
- vajra family (S. vajrakula; T. rdo rje'i rigs; C. jingang bu 金)
- jewel family (S. ratnakula; T. rin chen rigs; C. bao bu)
- lotus family (S. padmakula; T. padma rigs; C. lianhua bu 蓮)
- action family (S. karmakula; T. las kyi rigs; C. ye bu)

five buddhas. (S. pañcatathāgata; T. de bzhin gshegs pa lnga; C. wuzhi rulai/wu fo /)

- Vairocana (T. Rnam par snang mdzad; C. Dari rulai/Piluzhena /毗)
- Ak obhya (T. Mi bskyod pa; C. Achu fo)
- Ratnasambhava (T. Rin chen 'byung gnas; C. Baosheng rulai)
- Amitābha (T. 'Od dpag med; C. Amituo fo/Wuliangshou fo /)
- Amoghasiddhi (T. Don yod grub pa; C. Bukong Chengjiu rulai fo)

five destinies [of rebirth]. (S. gati; T. 'gro ba; C. qu/dao /)

- divinities (S. deva; T. lha; C. tian)
- humans (S. manu ya; T. mi; C. ren)
- animals (S. tiryak; T. dud 'gro; C. chusheng)
- ghosts (S. preta; T. yi dwags; C. egui)
- hell denizens (S. nāraka; T. dmyal ba; C. diyu)

five effects. (S. pañcaphala; T. 'bras bu lnga; C. wu guo)

- correlative effect (S. ni yandaphala; T. rgyu mthun gyi 'bras bu; C. dengliu guo)
- retributive effect (S. vipākaphala; T. mam smin gyi 'bras bu; C. yishu guo)
- separation effect (S. visa yogaphala; T. bral ba'i 'bras bu; C. liji guo)
- effect caused by human action (S. puru akārāphala; T. skyes bus byed pa'i 'bras bu; C. shiyong guo)
- predominant effect (S. adhipatiphala; T. bdag po'i 'bras bu; C. zengshang guo)

five elements. (S. mahābhūta/dhātu; T. 'byung po chen po; C. da[zhong] [])

- earth/solidity (S. p thivi; T. sa; C. di)
- water/cohesion (S. āpas; T. chu; C. shui)
- fire/warmth (S. tejas; T. me; C. huo)

4. air/mobility (S. vāyu; T. rlung; C. feng)
5. space (S. ākāśa; T. nam mkha'; C. kong)

five eyes. (S. cak us; T. spyan; C. yan)

1. fleshly eye (S. mā sacak us; T. sha'i spyan; C. rouyan)
2. divine eye/clairvoyance (S. divyacak us; T. lha'i spyan; C. tianyan)
3. wisdom eye (S. prajñācak us; T. shes rab kyi spyan; C. huiyan)
4. dharma eye (S. dharmacak us; T. chos kyi spyan; C. fayan)
5. buddha eye (S. buddhacak us; T. sangs rgyas kyi spyan; C. foyan)

five factors of meditative absorption. (S. dhyānā ga; T. bsam gtan gyi yan lag; C. chanzhi/dingzhi /)

1. applied thought/initial application of attention (S. vitarka; T. rtog pa; C. xun)
2. sustained thought/sustained attention (S. vicāra; T. dpyod pa; C. si)
3. physical rapture (S. prīti; T. dga' ba; C. xi)
4. mental ease (S. sukha; T. bde ba; C. le)
5. one-pointedness (S. cittaikāgratā; T. sems rtse gcig pa; C. xin yijing xing)

five faculties/dominants. (S. indriya; T. dbang po; C. gen)

1. faith (S. śraddhā; T. dad pa; C. xin)
2. effort (S. vīrya; T. brtson 'grus; C. jingjin/qin /)
3. mindfulness (S. sm ti; T. dran pa; C. nian)
4. concentration (S. samādhi; T. ting nge 'dzin; C. ding)
5. wisdom (S. prajñā; T. shes rab; C. hui)

five hindrances [to dhyāna]. (S. nīvara a; T. sgrib pa; C. gai)

1. sensual desire (S. kāmacchanda; T. 'dod pa la 'dun pa ; C. tanyu)
2. malice (S. vyāpāda; T. gnod sems; C. chenhui)
3. sloth and torpor (S. styānamiddha; T. rmugs pa dang gnyid; C. shuimian/huanchen /)
4. restlessness and worry (S. audhatyakauk tyā; T. rgod pa dang 'gyod pa; C. diaojue/sanluan/ezuo/hui / / /)
5. skeptical doubt (S. vicikitsā; T. the tshom; C. yi)

Five Huayan classifications of the teachings. (C. Huayan wujiao)

Earlier division, according to Dushun and Fazang:

1. hīnayāna teachings/śrāvakayāna teachings (C. xiaosheng jiao/shengwensheng jiao /)
2. elementary teachings [of Mahāyāna] (C. shijiao)
3. advanced/final teachings [of Mahāyāna] (C. zhongjiao)
4. sudden teachings (C. dunjiao)
5. perfect teachings/consummate teachings (C. yuanjiao)

Later division, according to Guifeng Zongmi:

1. teachings for divinities and humans (C. rentian jiao)
2. hīnayāna teachings (C. xiaosheng jiao)
3. dharma-characteristics teachings of Mahāyāna (C. dasheng faxiang jiao)
4. characteristics-negating teachings of Mahāyāna (C. dasheng poxiang jiao)
5. The nature-revealing teaching of the one vehicle (C. yisheng xianxing jiao)

five lineages. (S. gotra; T. rigs pa; C. zhongxing /)

1. tathāgata lineage (S. tathāgatayānābhisamayagotra; T. de bzhin gshegs pa'i theg pa mngon par rtogs pa'i rigs; C. rulai sheng zhongxing)
2. pratyekabuddha lineage (S. pratyekabuddhayānābhisamayagotra; T. rang rgyal gyi theg pa mngon par rtogs pa'i rigs; C. dujue sheng zhongxing)
3. śrāvakayāna lineage (S. śrāvakayānābhisamayagotra; T. nyan thos kyi theg pa mngon par rtogs pa'i rigs; C. shengwen sheng zhongxing)
4. uncertain lineage (S. aniyatagotra; T. ma nges pa'i rigs; C. buding zhongxing)
5. no lineage [viz. icchantika] (S. agotraka; T. rigs med pa; C. wu zhongxing)

five nectars. (S. am ta; T. bdud tsi; C. ganlu)

1. semen (S. bodhicitta; T. byang sems; C. nanjing)
2. blood (S. rakta; T. rak ta; C. nǚxue 女)
3. urine (S. mūtra; T. dri chu; C. niao)
4. excrement (S. purī a; T. dri chen; C. shi)
5. flesh (S. mā sa; T. sha; C. gusui)

five paths. (S. pañcamārga; T. lam lnga; C. wuwei)

1. path of equipment/accumulation (S. sa bhāramārga; T. tshogs lam; C. ziliang wei)
2. path of preparation (S. prayogamārga; T. sbyor lam; C. jiaxing wei)
3. path of vision (S. darśanamārga; T. mthong lam; C. jiandao wei)
4. path of cultivation (S. bhāvanāmārga; T. bsgom lam; C. xiudao wei)
5. adept path (where there is nothing more to learn) (S. aśaik amārga; T. mi slob lam; C. wuxue wei)

five periods and eight teachings. [according to the Tiantai school] (C. wushi bajiao)

The five major chronological periods of the Buddha's teaching (C. wushi)::

1. Huayan period (C. Huayan shiqi)
2. āgamas/Deer Park period (C. ahan shiqi /Luyuan shiqi)
3. expansive (vaipulya) Mahāyāna period (C. Fangdeng shiqi)
4. perfection of wisdom (prajñāpāramitā) period (C. bore shiqi)
5. Lotus (*Saddharmapu rīkasūtra*) and Nirvā a (*Mahāparinirvā asūtra*) scriptures period (C. Fahua Niepan shiqi)

Fourfold division of the teaching according to means of conversion (C. huayi sijiao)::

1. sudden [Huayan jing] (C. dunjiao)
2. gradual [āgamas, vaipulya, prajñāpāramitā] (C. jianjiao)
3. indeterminate (C. puding jiao)
4. secret/esoteric (C. mimi jiao)

Fourfold division of the teaching according to content [and based on the capacity of the audience] (C. huafa sijiao)::

1. tripi aka, viz., hīnayāna (C. sanzang jiao)
2. common/shared [by both hīnayāna and Mahāyāna] (C. tongjiao)

3. distinct/separate [Mahāyāna] (C. biejiao)
4. perfect/consummate [Lotus and Nirvā a sutras] (C. yuanjiao)

five powers. (S. bala; T. stobs; C. li)

1. power of faith (S. śraddhābala; T. dad pa'i stobs; C. xin li)
2. power of effort (S. vīryabala; T. brtson 'grus kyi stobs; C. jingjin li/qin li /)
3. power of mindfulness (S. sm tibala; T. dran pa'i stobs; C. nian li)
4. power of concentration (S. samādhibala; T. ting nge 'dzin gyi stobs; C. ding li)
5. power of wisdom (S. prajñābala; T. shes rab kyi stobs; C. hui li)

five precepts. [of the laity] (S. pañcaśīla; T. tshul khirms lnga; C. wujie)

1. to abstain from killing living creatures (S. prā ātipāta-vīratī; T. srog gcod pa spong ba; C. bu shasheng/li shasheng 不 /)
2. to abstain from taking what is not given (S. adattādāna-vīratī; T. ma byin par len pa spong ba; C. bu toudao/li buyu qu 不 / 不)
3. to abstain from engaging in sexual misconduct (S. kāmamithyācāra-vīratī; T. 'dod pas log par g.yem pa spong ba; C. bu xieyin/li yu xiexing 不 /)
4. to abstain from lying (often explained as lying about the possession of high states of attainment or superhuman powers) (S. m āvāda-vīratī; T. rdzun du smra ba spong ba; C. bu wangyu/li xukuang yu 不 / 虛)
5. to abstain from intoxicants (S. madyapāna-vīratī; T. myos par 'gyur ba'i btung ba spong pa; C. bu yinjiu/li yinjiu 不 /)

five pure abodes. (S. śuddhāvāsa; T. gtsang gnas; C. jing jutian)

1. free from afflictions (S. av ha; T. mi che ba; C. wufan tian)
2. not burning/without torment (S. atapa; T. mi gdung ba; C. wure tian)
3. perfect form (S. sud śa; T. gya nom snang ba; C. shanxian tian)
4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian)
5. highest (S. akani ha; T. 'og min; C. se jujing tian)

five royal treasure revealers. (T. gter ston rgyal po lnga)

1. Nyang ral Nyi ma 'od zer
2. Guru Chos kyi dbang phyug
3. Rdo rje gling pa
4. Pad ma gling pa
5. 'Jam dbyang mkhyen brtse dbang po

five sciences. (S. pañcavidyā; T. rig pa lnga; C. wuming)

1. manual arts (S. śilpakarma[vidyā]; T. bzo gnas kyi rig pa; C. gongqiao ming)
2. grammar (S. śabdavidyā; T. sgra'i rig pa; C. shengming)
3. medicine (S. cikitsāvidyā; T. gso ba'i rig pa; C. yifangming)
4. logic (S. hetuvidyā; T. gtan tshigs kyi rig pa; C. yinming)
5. inner knowledge (S. adhyātmavidyā; T. nang gi rig pa; C. neiming)

five supranormal powers. (S. abhijñā; T. mngon shes; C. shentong)

1. psychic powers (S. ddhividhābhijñā; T. rdzu 'phrul gyi bya ba shes pa; C. shenjing zhizheng tong)
2. “the divine eye”/clairvoyance (S. divyacak us; T. lha'i mig; C. tianyan)
3. “the divine ear”/clairaudience (S. divyaśrotra; T. lha'i ma ba; C. tian'er)
4. knowledge of others' minds (S. paracittajñāna; T. pha rol gyi sems shes pa; C. taxin tong)
5. knowledge of past lives (S. pūrvanivāsānusrm ti; T. sngon gyi gnas rje su dran pa; C. suzhu suinian/suming tong /)

five turbidities/degenerations. (S. ka āya; T. snyigs ma; C. zhao)

1. turbidity of the lifespan (S. ayu ka āya; T. tshe'i snyigs ma; C. min zhao)
2. turbidity of views (S. d ika āya; T. lta ba'i snyigs ma; C. jian zhao)
3. turbidity of afflictions (S. kleśaka āya; T. nyon mongs kyi snyigs ma; C. fannao zhao)
4. turbidity of sentient beings (S. sattvaka āya; T. sems can gyi snyigs ma; C. zhongsheng zhao)
5. turbidity of the age (S. kalpaka āya; T. dus kyi snyigs ma; C. jie zhao)

five wheels/cakras. (S. cakra; T. 'khor lo; C. lun)

1. great bliss wheel [at the forehead] (S. mahāsukhacakra; T. spyi bde chen gyi 'khor lo; C. dalelun/dinglun /)
2. enjoyment wheel [at the throat] (S. sambhogacakra; T. mgrin pa longs spyod kyi 'khor lo; C. baolun/shouyonglun/houlun / /)
3. dharma wheel [at the heart] (S. dharmacakra; T. snying ka chos kyi 'khor lo; C. falun/xinlun /)
4. emanation wheel [at the navel] (S. nirmā acakra; T. lte ba sprul pa'i 'khor lo; C. huanhualun/qilun /)
5. bliss protecting wheel [at the perineum] (S. sukhapālacakra; T. bde skyong gi 'khor lo; C. hulelun)

five wisdoms/knowledges. (S. pañcājñāna; T. ye shes lnga; C. wuzhi)

1. wisdom of the dharmadhātu (S. dharmadhātujñāna; T. chos dbyings kyi ye shes; C. fajie tixing zhi)
2. mirror-like wisdom/great perfect mirror wisdom (ādarśajñāna/mahādarśajñāna; T. me long gi ye shes; C. da yuanjing zhi)
3. wisdom of equality/knowledge of impartiality (S. samatājñāna; T. mnyam nyid kyi ye shes; C. pingdeng xing zhi)
4. wisdom of specific knowledge (S. pratyavek a ājñāna; T. so sor rtog pa'i ye shes; C. miao guancha zhi)
5. wisdom of having accomplished what was to be done (S. k tyānu hānājñāna; T. bya ba grub pa'i ye shes; C. cheng suozuo zhi)

SIXES

six aspects [of all phenomena in Huayan]. (C. liuxiang)

1. generic/universal aspect (C. zongxiang)
2. constituent/particular aspect (C. biexiang)
3. identity/similarity aspect (C. tongxiang)
4. differentiated aspect (C. yixiang)
5. integrated/collective aspect (C. chengxiang)
6. disintegration/instantiated aspect (C. huaixiang)

six causes. (S. a hetu; T. rgyu drug; C. liu yin)

1. efficient cause (S. kāra ahetu; T. byed pa'i rgyu; C. nengzuo yin)
2. coexistent cause (S. sahabhūhetu; T. lhan cig 'byung ba'i rgyu; C. juyou yin 俱)
3. conjoined cause (S. sa prayuktahetu; T. mtshungs ldan gyi rgyu; C. xiangying yin)
4. homogeneous cause (S. sabhāgahetu; T. skal mnyam gyi rgyu; C. tonglei yin)
5. all-pervasive cause (S. sarvatragahetu; T. kun gro'i rgyu; C. bianxing yin)

6. retributive cause (S. vipākahetu; T. mam smin gyi rgyu; C. yishu yin)

six consciousnesses. (S. vijñāna; T. mam par shes pa; C. shi)

1. visual consciousness (S. cak urvijñāna; T. mig gi mam shes; C. yanshi)
2. auditory consciousness (S. śrotravijñāna; T. ma ba'i mam shes; C. ershi)
3. olfactory consciousness (S. ghrā avijñāna; T. sna'i mam shes; C. bishi)
4. gustatory consciousness (S. jihvāvijñāna; T. lce'i mam shes; C. sheshi)
5. tactile consciousness (S. kāyavijñāna; T. lus kyi mam shes; C. shenshi)
6. mental consciousness (S. manovijñāna; T. yid kyi mam shes; C. yishi)

six destinies. [of rebirth] (S. gati; T. 'gro ba; C. dao/qu /)

1. divinities (S. deva; T. lha; C. tian)
2. demigods (S. asura; T. lha ma yin; C. axiuluo)
3. humans (S. manu ya; T. mi; C. ren)
4. animals (S. tiryak; T. dud 'gro; C. chusheng)
5. ghosts (S. preta; T. yi dwags; C. egui)
6. hell denizens (S. nāraka; T. dmyal ba; C. diyu)

six doctrines of Nāropa. (S. Nādapādadharma; T. Nā ro chos drug)

1. inner heat (S. ca dalyoga; T. gtum mo)
2. illusory body (S. māyākāyayoga; T. sgyu lus)
3. dreams (S. svapanayoga; T. rmi lam)
4. clear light (S. prabhāsvarayoga; T. 'od gsal)
5. intermediate state (S. antarābhavayoga; T. bar do)
6. transference (S. sa krāntiyoga; T. 'pho ba)

six elements. (S. dhātu; T. kham; C. da/jie /)

1. earth/solidity (S. p thivī; T. sa; C. di)
2. water/cohesion (S. āpas; T. chu; C. shui)
3. fire/warmth (S. tejas; T. me; C. huo)
4. wind/mobility (S. vāyu; T. rung; C. feng)
5. space (S. ākāśa; T. nam mkha'; C. kong)
6. consciousness (S. vijñāna; T. mam shes; C. shi)

six heavens of the sensuous realm. (S. kāmadhātu-deva; T. 'dod pa'i kham kyi lha; C. Yujie tian)

1. four great kings (S. cāturmahārājika; T. rgyal chen rigs bzhi; C. siwang tian)
2. divinities of the thirty-three (S. trāyastri śa; T. sum cu rtsa gsum; C. daoli tian/sanshisan tian /)
3. free from conflict (S. yāma; T. 'thab bral; C. yemo tian)
4. contented (S. tu ita; T. dga' ldan; C. doushuai[tuo] tian [])
5. enjoyment of creation (S. nirmā arati; T. 'phrul dga'; C. huale tian)
6. divinities who have power over the creations of others/divinities who partake of the pleasures created in other heavens (S. paranirmitavaśavartin; T. gzhan 'phrul dbang byed; C. tahua zizai tian)

six intermediate states. (S. antarābhava; T. bar do)

1. intermediate state of the present lifetime (S. jatyantarābhava; T. skye gnas rang bzhin gyi bar do)
2. intermediate state of absorption (S. samādhyanantarābhava; T. bsam gtan gyi bar do)
3. intermediate state of dreams (S. svapanāntarābhava; T. rmi lam gyi bar do)
4. intermediate state of the moment of death (S. mumūr āntarābhava; T. 'chi kha'i bar do)
5. intermediate state of dharmatā (S. dharmatāntarābhava; T. chos nyid bar do)
6. intermediate state of existence (S. bhavāntarābhava; T. srid pa bar do)

six-limbed yoga [of the *Kālacakratānta*]. (S. a a gayoga; T. sbyor drug)

1. retraction (T. sor sdud)
2. concentration (T. bsam gtan)
3. breath control (T. srog 'dzin)
4. retention of the complete deity (T. sku ril bur 'dzin pa)
5. recollection (T. rjes su dran pa)
6. contemplation (T. ting nge 'dzin)

six non-Buddhist teachers. (S. tīrthika-śāst; T. mu stegs can gyi ston pa; C. waidaoshi)

1. Pūra a-Kāśyapa (T. 'Od srung rdzogs byed; C. Fulanna jiashe)
2. Maskarin Gośālīputra (T. Kun tu rgyu gnag lhas kyi bu; C. Moqieli jusheli/Moqieli jushelizi / 黎 黎)
3. Ajita Keśakambala (T. Mi pham sgra'i la ba can; C. Aqiduo chishe qinpoluo)
4. Kakuda Kātyāyana (T. Ka tya'i bu nog can; C. Jialuo jiutuo jiazhanyan)
5. Nirgrantha-Jñātīputra (T. Gcer bu pa gnyen gyi bu; C. Nijiantuo Ruotizi /)
6. Sañjaya Vairā īputra (T. Smra 'dod kyi bu mo'i bu yang dag rgyal ba can; C. Shanduye pilyu zhizi 毗)

six ornaments of the world. (T. 'dzam gling rgyan drug)

1. Nāgārjuna (T. Klu sgrub)
2. Āryadeva (T. 'Phags pa lha)
3. Asa ga (T. Thogs med)
4. Vasubandhu (T. Dbyig gnyen)
5. Dignāga (T. Phyogs glang)
6. Dharmakīrti (T. Chos kyi grags pa)

six perfections. (S. pāramitā; T. pha rol tu phyin pa; C. du/boluomi /)

1. giving/generosity (S. dāna, T. sbyin pa; C. bushi/tan /)
2. morality (S. śīla; T. tshul khriims; C. chijie/shiluo /)
3. patience/forbearance (S. k ānti; T. bzod pa; C. renru/chanti /)
4. effort/vigor (S. vīrya; T. brtson 'grus; C. jingjin/piliye 毗)
5. meditative absorption (S. dhyāna; T. bsam gtan; C. jinglū/chan /)
6. wisdom (S. prajñā; T. shes rab; C. zhihui/bore /)

six recollections. (S. anusm ti; T. rjes su dran pa; C. nian)

1. recollection of the buddha (S. buddhānusm ti; T. sangs rgyas rjes su dran pa; C. nianfo)
2. recollection of the dharma (S. dharmānusm ti; T. chos rjes su dran pa; C. nianfa)
3. recollection of the sa gha (S. sa ghānusm ti; T. dge 'dun rjes su dran pa; C. nianseng)
4. recollection of morality (S. śīlānusm ti; T. tshul khrims rjes su dran pa; C. nianjie)
5. recollection of charity (S. tyāgānusm ti; T. gtong ba rjes su dran pa; C. nianshi)
6. recollection of the divinities (S. devatānusm ti; T. lha rjes su dran pa; C. niantian)

six sense faculties/sense bases. (S. indriya; T. dbang po; C. gen)

1. visual faculty (S. cak urindriya; T. mig gi dbang po; C. yangen)
2. auditory faculty (S. śrotendriya; T. ma ba'i dbang po; C. ergen)
3. olfactory faculty (S. ghrā endriya; T. sna'i dbang po; C. bigen)
4. gustatory faculty (S. jihvendriya; T. lce'i dbang po; C. shegen)
5. tactile faculty (S. kāyendriya; T. lus kyi dbang po; C. shengen)
6. mental faculty (S. manendriya; T. yid kyi dbang po; C. yigen)

six superknowledges/supramundane powers. (S. abhijñā; T. mngon par shes pa; C. shentong)

1. psychic powers (S. dḍividhi; T. rdzu 'phrul gyi bya ba shes pa'i mngon shes; C. shenjing/shenzu [zhizheng] tong / [])
2. "the divine eye"/clairvoyance (S. divyacak us; T. lha'i mig gi mngon shes; C. tianyan [zhizheng] tong [])
3. "the divine ear"/clairaudience (S. divyaśrotra; T. lha'i ma ba'i mngon shes; C. tian'er [zhizheng] tong [])
4. knowledge of other's minds (S. paracittāññā; T. pha rol gyi sems shes pa'i mngon shes; C. taxin [zhizheng] tong [])
5. knowledge of past lives (S. pūrvanivāsānusm ti; T. sngon gyi gnas rje su dran pa'i mngon shes; C. suzhu suinian zhizheng tong/suming [zhizheng] tong [] / [])
6. knowledge of the extinction of the contaminants (S. āsṛavak ayajñā; T. zag pa zad pa'i mngon shes; C. loujin [zhizheng] tong [])

six tantras. (T. rgyud sde drug; C. dateluo)

1. kriyātantra (T. bya rgyud)
2. caryātantra (T. spyod rgyud)
3. yogatantra (T. mal 'byor rgyud)
4. mahāyogatantra (T. mal 'byor chen po'i rgyud)
5. anuyogatantra (T. rje su mal 'byor rgyud)
6. atiyogatantra (T. shin tu mal 'byor rgyud)

SEVENS

seven-branch service. (S. saptā gavidhi; T. yan lag bdun pa; C. qizhi zuofa)

1. obeisance (S. vandanā; T. phyag 'tshal ba; C. lijing zhufo 禮敬)
2. offerings (S. pūjana; T. mchod pa phul ba; C. guangxiu gongyang)
3. confession of transgressions (S. pāpadeśanā; T. sdig pa bshags pa; C. chanhui yezhang)
4. admiration/joy (S. anumodana; T. rjes su yi rang ba; C. suixi gongde)
5. request [to turn the wheel of dharma] (S. sa codana; T. bskul ba; C. qing zhuan falun)
6. request [to remain in the world] (S. prārthanā; T. gsol ba; C. qingfo zhushi)
7. dedication of merit (S. pari āmanā; T. bsngo ba; C. pujie huixiang)

seven buddhas [of the past]. (S. saptatathāgata; T. sangs rgyas rabs bdun; C. qifo)

1. Vipāśyin (T. Rnam gzigs; C. Piposhi[fo] [])
2. Śikhin (T. Gtsug gtor can; C. Shiqi[fo] [])
3. Viśvabhū (T. Kun skyobs; C. Pishepo[fo] [])
4. Krakucchanda (T. Log pa dang sel; C. Juliusun[fo] [])
5. Kanakamuni (T. Gser thub; C. Junahanmouni[fo] [])
6. Kāśyapa (T. 'Od srung; C. Jiashe[fo] [])
7. Śākyamuni (T. Shākya thub pa; C. Shijiamouni)

seven factors of enlightenment/limbs of awakening. (S. bodhya ga; T. byang chub yan lag; C. juezhi/putifen /)

1. mindfulness (S. sm ti; T. dran pa; C. nian)
2. investigation of states (S. dharmapṛavicaya; T. chos rab tu mam par 'byed pa; C. zefa)
3. perseverance/energy (S. vīrya; T. brtson 'grus; C. jingjin)
4. rapture/bliss (S. prīti; T. dga' ba; C. xi)
5. tranquility (S. praśrabdhi; T. shin yu sbyangs pa; C. qingan)
6. concentration (T. samādhi; T. ting nge 'dzin; C. ding)
7. equanimity (S. upek ā; T. btang snyoms; C. she)

seven jewels [of a cakravartin]. (S. ratna; T. rin chen; C. [lunwang]bao [])

1. wheel [chariot] (S. cakraratna; T. 'khor lo rin po che; C. lunbao)
2. precious jewel (S. ma iratna; T. nor bu rin po che; C. [moni]zhubao [])
3. queen (S. strīratna; T. btsun mo rin po che; C. nūbao)
4. minister (S. pari āyakaratna; T. blon po rin po che; C. jushi bao/zhuzang bao /)
5. elephant (S. hastiratna; T. glang po rin po che; C. xiangbao)
6. general (S. senāpatiratna; T. dmag dpon rin po che; C. zhubingchen bao/jiangjun bao /)
7. horse (S. aśvaratna; T. rta mchog rin po che; C. mabao)

seven men who were tested. (T. sad mi mi bdun)

The first monks ordained in Tibet:

1. Sba khri gzigs, ordained as Śrīgho a (Dpal dbyangs)
2. Sba gsal snang, ordained as Jñānendra (Ye shes dbang po)
3. Sba khri bzher/bzhir
4. Ba gor Vairocana, or Vairocanarak ita
5. Rma rin chen mchog
6. Rgyal ba mchog dbyangs
7. 'Khon Klu'i dbang po srung ba, or Nāgendarak ita

seven-point posture of Vairocana. (T. Rnam snang gi chos bdun)

1. legs in the vajra posture (T. rkang ba skyil krung)
2. hands in the positions of equipoise (T. lag pa mnyam bzhag)
3. spine straight (T. sgäl tshigs drang por bsrang ba)

4. neck slightly bent (T. mgrin cung zad gug pa)
5. shoulders spread like the wings of a vulture (T. dpung ba rgod gshog ltar brkyangs pa)
6. gaze resting at the tip of the nose (T. mig sna rtser phabs pa)
7. tongue touching the palate (T. lce ya rkan la sbyar ba)

seven riches/prizes. (S. saptadhana; T. 'phags pa'i nor bdun; C. qi cai)

1. faith/confidence (S. śraddhā; T. dad pa; C. xin)
2. vigor/effort (S. vīrya; T. brtson 'grus; C. jingjin)
3. morality (S. śīla; T. tshul khirms; C. jie)
4. shame and fear of blame/decey and modesty (S. hrīapatrāpya; T. ngo tsha shes pa khrel yod pa; C. cankui)
5. learning (S. śruta; T. thos pa; C. wen)
6. relinquishment/renunciation (S. prahā a/tyāga; T. spang ba/gtong ba; C. duan/shi /)
7. wisdom (S. prajñā; T. shes rab; C. hui)

EIGHTS

eight classes of non-human beings. (S. a asenā; T. lha srin sde brgyad/mi ma yin; C. tianlong babu)

1. divinities (S. deva; T. lha; C. tian)
2. serpents (S. nāga; T. klu; C. long)
3. demons (S. yak a; T. gnod sbyin; C. yecha)
4. demigods (S. asura; T. lha ma yin; C. axiuluo)
5. divine musicians (S. gandharva; T. dri za; C. gantapo)
6. mythical birds (S. garu a; T. khyung, mkha' lding; C. jialouluo)
7. half-horse, half-human beings (S. ki nara; T. mi 'am ci; C. jinnaluo)
8. great snakes (S. mahorāga; T. lto 'phye chen po; C. mohouluoja)

eight close sons. See [EIGHT GREAT BODHISATTVAS](#).

eight common accomplishments. (S. sādharma asiddhi; T. thun mong gi dngos grub; C. gongtong chenjiu)

1. medicinal pills (S. gulikā; T. ril bu; C. miaodan)
2. eye medicine (S. añjana; T. mig sman; C. yanyao)
3. swift-footedness (S. ja ghākara; T. rkang mgyogs; C. tuzu)
4. going beneath the earth (S. pātāla; T. sa 'og; C. tuxing)
5. enchanted sword (S. kha ga; T. ral gri; C. baojian)
6. traveling through the sky (S. khecara; T. mam mkha' phur ba; C. kongxing)
7. invisibility (S. antardhāna; T. mi snang ba; C. yinxing)
8. immortality (S. am ta; T. 'chi med; C. busi)

eight consciousnesses. (S. vijñāna; T. mam shes; C. shi)

1. visual consciousness (S. cak urvijñāna; T. mig gi mam shes; C. yanshi)
2. auditory consciousness (S. śrotravijñāna; T. ma ba'i mam shes; C. ershi)
3. olfactory consciousness (S. ghrā avijñāna; T. sna'i mam shes; C. bishi)
4. gustatory consciousness (S. jihvāvijñāna; T. lce'i mam shes; C. sheshi)
5. tactile consciousness (S. kāyavijñāna; T. lus kyi mam shes; C. shenshi)
6. mental consciousness (S. manovijñāna; T. yid kyi mam shes; C. yishi)
7. afflicted mental consciousness (S. kli amanas; T. nyon yid; C. mona shi)
8. storehouse consciousness (S. ālayavijñāna; T. kun gzhi'i mam shes; C. alaiye shi)

eight episodes in the life of a buddha. (S. a abuddhakārya, T. sangs rgyas kyi mdzad pa brgyad; C. baxiang)

1. descending from tu ita heaven (T. dga' ldan gyi gnas nas 'pho ba; C. doushuai jiangshi)
2. entry into the womb (T. lhums su zhugs pa; C. rutai)
3. birth (T. sku bltams pa; C. chutai)
4. renouncing the world (T. rab tu byung ba; C. chujia)
5. subjugating Māra (T. bdud btul ba; C. xiangmo)
6. attaining enlightenment (T. mngon par rdzogs par sangs rgyas pa; C. chengdao)
7. turning the wheel of the dharma (dharmacakrapravartana) (T. chos kyi 'khor lo bskor ba; C. zhuan falun)
8. passing into parinirvā a (T. mya ngan las 'das pa; C. ru niepan)

eightfold noble path. (S. āryā ā gamārga; T. lam yan lag brgyad; C. bazhengdao/bashengdao /)

1. right views (S. samyagd i; T. yang dag pa'i lta ba; C. zhengjian)
2. right intention (S. samyaksa kalpa; T. yang dag pa'i rtog pa; C. zhengzhi/zhengsiwei /)
3. right speech (S. samyagvāk; T. yang dag pa'i ngag; C. zhengyu)
4. right action (S. samyakkarmānta; T. yang dag pa'i las kyi mtha'; C. zhengye)
5. right livelihood (S. samyagājīva; T. yang dag pa'i 'tsho ba; C. zhengming)
6. right effort (S. samyagvyāyāma; T. yang dag pa'i rtsol ba; C. zhengqin/zheng jingjin /)
7. right mindfulness (S. samyaksm ti; T. yang dag pa'i dran pa; C. zhengnian)
8. right concentration (S. samyaksamādhi; T. yang dag pa'i ting nge 'dzin; C. zhengding)

eight great bodhisattvas. (S. mahā-upaputra; T. nye sras; C. bada suifo dizi/bada fozi /)

1. Mañjuśrī (T. 'Jam dpal; C. Wenshu pusa)
2. Vajrapā i (T. Phyag na rdo rje; C. Jingan shou pusa)
3. Avalokiteśvara (T. Spyān ras gzigs dbang phyug; C. Guanyin pusa)
4. K itigarbha (T. Sa'i snying po; C. Dizang pusa)
5. Sarvanīvara avi kamthin (T. Sgrib pa thams cad mnam par sel ba; C. Chu gaizhang pusa)
6. Ākāśagarbha (T. Nam mkha'i snying po; C. Xukongzang pusa 虛)
7. Maitreya (T. Byams pa; C. Mile pusa)
8. Samantabhadra (T. Kun tu bzang po; C. Puxian pusa)

eight great chariots of the practice lineage. (T. sgrub brgyud shing rta chen po brgyad)

1. ancient translation tradition (T. sna' 'gyur mying ma)
2. tradition of precepts and instructions (T. bka' gdams)
3. tradition of the path and result (T. lam 'bras)
4. tradition of the transmitted precepts of Marpa (T. Mar pa bka' brgyud)
5. tradition of the transmitted precepts of the Shang Valley (T. Shangs pa bka' brgyud)
6. traditions of pacification and severance (T. zhi byed gcod)

7. tradition of vajrayoga (T. rdo rje'i mal 'byor)
8. propitiation and attainment of the three adamantine states (T. rdo rje gsum gyi bsnyen sgrub)

eight great charnel grounds. (S. mahāśmaśāna, śmaśāna; T. dur khrod chen po; C. da shilin/ da hanlin 尸林 / 尸林)

1. most fierce (S. ca igrā; T. gtum drag; C. baonue hanlin 最惡)
2. dense thicket (S. gahvara; T. tshang tshing 'khrigs pa; C. micong hanlin 密叢)
3. blazing vajra (S. vajrajvala; T. rdo rje bar pa; C. jingangyan hanlin 金剛焰)
4. endowed with skeletons (S. kara kin; T. keng rus can; C. gusuo hanlin 骨所)
5. cool grove (S. śīlavana; T. bsil bu tshal; C. hanlin 寒林)
6. black darkness (S. ghorāndhakāra; T. mun pa nag po; C. youan hanlin 幽暗)
7. resonant with "kilikili" (S. kilikilāra; T. ki li ki lir sgra sgrog pa; C. jiujiu hanlin 九九)
8. cries of "ha ha" (S. a ahāsa; T. ha ha rgod pa; C. kuangxiao hanlin 狂笑)

eight great fears. (S. mahābhaya; T. 'jigs pa chen po; C. nan 難)

1. lions (S. si ha; T. seng ge; C. shi nan 獅)
2. elephants (S. hastināga; T. glang po che; C. xiang nan 象)
3. fire (S. agni; T. me; C. huo nan 火)
4. snakes (S. sarpa; T. sbrul ; C. duchong nan 蛇)
5. thieves (S. taskara; T. rkun po; C. zei nan 賊)
6. violent waters (S. jalār ava; T. chu bo; C. shui nan 水)
7. imprisonment (S. niga a; T. lcags sgrog; C. lao[yu] nan 牢 [])
8. demons (S. piśāca; T. sha za; C. feiren nan/mo nan 魔 / 魔)

eight liberations. (S. vimok a; T. nam thar ; C. jietuo/beishe 脫 / 脫)

1. embodied, one sees forms [of the realm of subtle materiality] (S. rūpī rūpā i paśyati; T. gzugs can gzugs mams la lta ba'i mam thar; C. neiyou sexiang guan zhuse 內)
2. without perceiving inward form [viz., one's own physical body], one sees outward forms [of the realm of subtle materiality] (S. adhyātmarūpasamjñī bahirdhā rūpā i paśyati; T. nang gzugs med par 'du shes las phyi rol gyi gzugs mams la lta ba'i mam thar; C. nei wusexiang guan waise 內)
3. one develops determination by contemplating the beautiful/one becomes resolved on what is lovely (S. śubham ity evādhimukto bhavati; T. sdug pa'i mam thar; C. jing jietuo shenzuozheng juzu zhu 脫)
4. the sphere of infinite space (S. ākāśānāntāyātana; T. nam mkha' mtha' yas skye mched kyi mam thar; C. ru wubiankong kong wubianchu juzu zhu/kong wubianchu juzu zhu /)
5. the sphere of infinite consciousness (S. vijñānāntāyātana; T. mam shes mtha' yas skye mched kyi mam thar; C. ru wubian shi shiwubian chu juzu zhu/shi wubianchu juzu zhu /)
6. the sphere of nothingness (S. ākiñcanyāyātana; T. ci yang med pa'i skye mched kyi mam thar; C. ru wusuoyou wu suoyouchu juzu zhu/wusuoyouchu juzu zhu /)
7. the sphere of neither perception nor nonperception (S. naivasa jñānāsa jñāyātana; T. 'du shes med 'du shes med min skye mched kyi mam thar; C. ru feixiang feifeixiangchu juzu zhu/feixiang feifeixiangchu juzu zhu /)
8. the cessation of perception and sensation (S. samjñāvedayitanirodha; T. 'du shes dang tshor ba 'gog pa'i mam thar; C. ru shouxiangmie shenzuozheng juzu zhu/miexiangshouding juzu zhu /)

eight manifestations of the Guru [Rin po che]. (T. guru mtshan brgyad)

1. Padmākara
2. Padmasambhava
3. Blo Idan mchog sred
4. Shākya Seng ge
5. Seng ge sgra grogs
6. Padma rgyal po
7. Rdo rje gro lod
8. Nyi ma 'od zer

eight noble persons. (S. a āryapudgala; T. 'phags pa'i gang zag brgyad; C. baxiansheng)

1. candidate for the fruit of stream-enterer (S. srotaāpannaphalapratipannaka; T. rgyun du zhugs pa'i 'bras bu la zhugs pa; C. yuliu xiang)
2. recipient of the fruit of stream-enterer (S. srotaāpannaphalastha; T. rgyun du zhugs pa'i 'bras bu la gnas pa; C. zheng yuliu guo)
3. candidate for the fruit of once-returner (S. sak dāgāmiphalapratipannaka; T. phyir 'ong gi 'bras bu la zhugs pa; C. yilai xiang)
4. recipient of the fruit of once-returner (S. sak dāgāmiphalaastha; T. phyir 'ong gi 'bras bu la gnas pa; C. zheng yilai guo)
5. candidate for the fruit of non-returner (S. anāgāmiphalapratipannaka; T. phyir mi 'ong gi 'bras bu la zhugs pa; C. buhuan xiang)
6. recipient of the fruit of non-returner (S. anāgāmiphalaastha; T. phyir mi 'ong gi 'bras bu la gnas pa; C. zheng buhuan guo)
7. candidate for worthy one (S. arhatphalapratipannaka; T. dgra bcom pa'i 'bras bu la zhugs pa; C. aluohan xiang)
8. worthy one (S. arhat; T. dgra bcom pa; C. zheng aluohan guo)

eight opportune births. (S. k a a; T. dal ba; C. yuanli banan/yuanli ba wuxia /)

Freedom from rebirth:

1. as a denizen of the hells (S. nāraka; T. dmyal ba; C. zai diyu nan)
2. as a ghost (S. preta; T. yi dwags; C. zai egui nan)
3. as an animal (S. tiryak; T. dud 'gro; C. zai chusheng nan)
4. as a long-lived divinity (S. dīrghāyurdeva; T. lha tshe ring bo; C. zai changshou tian nan)
5. in a border region (S. pratyantajanapada; mtha' 'khob kyi mi; C. zai biandi zhi yudanyue nan)
6. with impaired sense faculties (S. indriyavaikalya; T. dbang po ma tshang ba; C. manglong yinya nan)
7. holding erroneous views (S. mithyādarśana; T. log par lta ba; C. shizhi congbian nan)
8. in a land where a tathāgata has not appeared (S. tathāgatānūtpāda; T. de bzhin gshegs pa ma byung ba; C. shengzai foqian fohou nan)

eight precepts. [of the laity on upo adha days] (S. a ā gasamanvāgatam upavāsam/po adhaśīla; T. bsnyen gnas yan lag brgyad; C. baguan zhai jie/ba zhajjie/ba guan zhai/ba jiezhai / / /)

1. not to kill living beings (S. prā ātipāta-virati; T. srog gcod pa spong ba; C. li shasheng)
2. not to steal (S. adattādāna-virati; T. ma byin par len pa spong ba; C. li buyu qu 不)
3. not to engage to sexual activity (S. abrahmacarya-virati; T. mi tshangs par spyod pa spong pa; C. li feifanxing)
4. not to lie [about spiritual attainments] (S. m āvāda-virati; T. rdzun du smra ba spong ba; C. li xukuangyu 虛)
5. not to use intoxicants (S. madyapāna-virati; T. myos par 'gyur ba'i btung ba spong pa; C. li yin zhujiu)
6. not to eat at improper times [viz. after twelve noon] (S. vikālabhojana-virati; T. dus ma yin pa'i kha zas spong pa; C. li feishi shi)
7. not to use perfumes, garlands, or cosmetics and not to sing, dance, play music, or attend entertainments (S. gandhamālyavilepanavar akadhāra a-virati [n tyagīta-virati]; T. spos dang kha dog dang byug pa dang phreng ba thogs pa spong pa [glu gar spong pa]; C. li tushi xingman[li gewu quanting] [])
8. not to sleep on high and luxurious beds (S. uccaśayanamahāśayana-virati; T. khri stan mthon po dang khri stan chen po spong pa; C. li yanzuo gaoguang yanli chuanguzuo)

eight illusions of illusion. (S. a amāyopamā; T. sgyu ma'i dpe brgyad; C. ruhanan yu)

Dharmas lack inherent nature (svabhāva), because they are like a:

1. dream (S. svapna; T. rmi lam; C. meng)
2. illusion (S. māyā; T. sgyu ma; C. huanjing)
3. optical illusion (S. pratibhāsa; T. mig yor; C. guangying)
4. mirage (S. marīci; T. smig rgyu; C. yangyan)
5. reflection of the moon in water (S. udakacandra; T. chu zla; C. shui zhong yue)
6. echo (S. pratiśabda; T. brag cha; C. yuxiang)
7. city of the gandharvas (S. gandharvanagara; T. dri za'i grong khyer; C. xunxiang cheng/gantapo cheng /)
8. phantom (S. nirmita; T. sprul pa; C. huashen)

eight stūpas. (S. stūpa; T. mchod rten; C. dalingta)

1. heap of lotuses stūpa (T. pad spungs mchod rten), commemorating the Buddha's birth at Lumbinī
2. enlightenment stūpa (T. byang chub mchod rten) at Bodhgayā
3. many auspicious doors stūpa (bkra shis sgo mang mchod rten), commemorating the first turning of the wheel of the dharma at īpatana/Sārnāth
4. display of miracles stūpa (T. cho 'phrul mchod rten), commemorating the Buddha's display of the paired miracles at Śrāvastī
5. divine descent stūpa (T. lha babs mchod rten), commemorating the Buddha's descent from the trāyastri śa heaven at Sa kāśya.
6. settling of disputes stūpa (T. dbyen bsdums mchod rten), commemorating the Buddha's healing of the schism caused by Devadatta
7. victory stūpa (T. mam rgyal mchod rten), commemorating the Buddha's extension of his life by three months at the Cāpālacaitya
8. nirvā a stūpa (T. myang 'das mchod rten), commemorating the Buddha's passage into parinirvā a at Kuśinagarī.

eight sufferings. (S. a adu kha; T. sdug bsngal rgyad; C. baku)

1. birth (S. jāti; T. skye ba; C. shengku)
2. aging (S. jarā; T. rga ba; C. laoku 老)
3. sickness (S. vyādhi; T. na ba; C. bingku)
4. death (S. mara a; T. 'chi ba; C. siku)
5. separation from what is dear (S. priyaviprayoga; T. sdug pa dang bral ba; C. ai bieli ku)
6. encountering what is not dear (S. apriyasa prayoga; T. mi sdug pa dang phrad pa; C. yuanzeng hui ku)
7. not finding what one seeks (S. yad apīchayā parye amā o na labhate; T. 'dod pa btshal gyang ma myed pa; C. qiu bude ku)
8. the five aggregates that are objects of clinging (S. pañcopādānaskandha; T. nye bar len pa'i phung po; C. wu quyun ku)

eight vidyādhara. (T. rig 'dzin brgyad)

1. Vimalamitra
2. Hū kara
3. Mañjuśrimitra
4. Nāgārjuna
5. Padmasambhava
6. Dhanasa sk ta
7. Rambuguhya-Devacandra
8. Śāntigarbha

eight worldly concerns. (S. lokadharma; T. 'jig rten chos; C. [shi]feng [])

1. gain (S. lābha; T. rnyed pa; C. li)
2. loss (S. alābha; T. ma rnyed pa; C. shuai)
3. pleasure (S. sukha; T. bde ba; C. le)
4. pain (S. du kha; T. sdug bsnyal; C. ku)
5. fame (S. yaśas; T. snyan grags; C. yu)
6. disgrace (S. ayaśas; T. ma grags pa; C. hui)
7. praise (S. praśa sā; T. bstod pa; C. cheng)
8. blame (S. nindā; T. smad pa; C. ji)

NINES

nine attainments of successive stations of equipoise. (S. anupūrvavihārasamāpatti; T. mthar gyis gnas pa'i snyoms par 'jug pa; C. ru jiujiing chan/cidi ding /)

(1–4) the four absorptions of the realm of subtle materiality (S. dhyāna/rūpāvacaradhyāna; T. bsam gtan bzhi; C. sichan/ding /)

(5–8) the four absorptions of the immaterial realm (S. ārūpyāvacaradhyāna; T. gzhuags med bzhi; C. si wuse ding)

(9) attainment of the cessation of perception and sensation/equipoise of cessation (S. sa jñāvedayitanirodha/alt. nirodhasamāpatti; T. 'gog pa'i snyoms par 'jug pa; C. xiangshou mie[jin] ding/ shouxiang mie[jin] ding [] / [])

nine categories of scripture. (BHS. navā ga[pravacana]; T. gsung rab yan lag dgu; C. jiu bu jing)

1. discourses (S. sūtra; T. mdo; C. qijing/changhang /)
2. aphorisms in mixed prose and verse (S. geya; T. dbyangs bsnyad; C. yingsong)
3. prophetic teachings (S. vyākara a; T. lung bstan; C. jibie/shouji 禮 / 禮)
4. verses (S. gāthā; T. tshig bcad; C. fengsong/guqi /)
5. utterances/meaningful expressions (S. udāna; T. ched du brjod pa; C. zishuo 說)
6. framing stories (S. nidāna/tiv ttaka; T. gleng gzhi; C. yinyuan 緣)
7. expanded teachings (S. vaipulya; T. shin tu rgyas pa; C. fangguang)
8. tales of previous lives (S. jātaka; T. skyes rabs; C. bensheng)
9. marvelous events (S. adbhutadharma; T. rmad du byung ba; C. xifa)

nine foulness contemplations/nine contemplations on the impure. (S. aśubhabhāvanā/aśubhasa jñā; T. mi sdug pa'i 'du shes; C. bujing guan/bujing xiang /)

Contemplation of:

1. a swollen corpse [bloating and tumefaction] (S. vyādhmātakasa jñā; T. nam par bam pa'i 'du shes; C. zhangxiang)
2. a worm-eaten, rotting corpse (S. vipadumakasa jñā; T. nam par 'bus gzhiq pa'i 'du shes; C. huaixiang)
3. a festering corpse [discharging pus] (S. vipūyakasa jñā; T. nam par mags pa'i 'du shes; C. nonglan xiang)
4. a bloody corpse (S. vilohitakasa jñā; T. nam par dmar ba'i 'du shes; C. xietu xiang)
5. a blueish corpse [mottled discoloration] (S. vinīlakasa jñā; T. nam par bsngos pa'i 'du shes; C. qingyu xiang)
6. a corpse being devoured by worms and maggots (S. vikhāditakasa jñā; T. nam par zos ba'i 'du shes; C. danxiang)
7. a scattered corpse [dissolution of flesh and exposure of bones and sinews] (S. vik iptakasa jñā; T. nam par mthor ba'i 'du shes; C. sanxiang)
8. a burned corpse [cremated remains] (S. vidagdhakasa jñā; T. nam par tshig pa'i 'du shes; C. shaoxiang)
9. a skeleton (S. asthisa jñā; T. rus gong gi 'du shes; C. guxiang)

nine similes [for the presence of the tathāgataḡarbha]. (S. navodāhara āni; T. dpe dgu; C. jiu yu 九喻)

The tathāgataḡarbha is present:

1. like a statue of the buddha in a soiled lotus (S. buddha kupadme; T. sangs rgyas pad ngan; C. weihua zhong zhufu)
2. like honey in beehives (S. madhu mak ikāsu; T. sbrang rtsi sbrang ma la; C. zhongfeng zhong meimi)
3. like kernels in husks (S. tu e u sārā i; T. sbun pa snying po; C. pi deng zhong shi)
4. like gold in filth (S. aśucau suvar am; T. mi gtsang nang na gser; C. fenhui zhong zhenjin)
5. like treasure under the ground (S. nidhi k itau; T. sa la gter; C. di zhong zhenbao zang)
6. like the stages beginning with the sprout in a tiny seed (S. alpaphale ’ kurādi; T. myug sogs ’bras chung; C. zhu guozi zhong ya)
7. like a conqueror’s body in sodden clothes (S. praklinnavastre u jinātmabhāva ; T. gos hrul nang na rgyal ba’i sku; C. xiugu bihuai yi changuo zhenjin xiang)
8. like royalty in the womb of a common woman (S. jaghanyanārjā hare n patva ; T. bud med ngan ma’i lto na mi bdag; C. pinjian choulou nü huai zhuanlun shengwang)
9. like a precious image buried in the mud (S. m tsu ca ratnabimbam; T. sa la rin chen gzugs; C. jiaohei nimo zhong youshang miaobao xiang)

nine vehicles. (S. yāna; T. theg pa dgu)

1. śrāvakayāna (T. nyan thos kyi theg pa)
2. pratyekabuddhayāna (T. rang rgyal gyi theg pa)
3. bodhisattvayāna (T. byang sems kyi theg pa)
4. kriyātantra (T. bya rgyud kyi theg pa)
5. caryātantra (T. spyod pa’i rgyud kyi theg pa)
6. yogatantra (T. mal ’byor gyi rgyud kyi theg pa)
7. mahāyogatantra (T. mal ’byor chen po’i rgyud kyi theg pa)
8. anuyogatantra (T. rjes su mal ’byor gyi rgyud kyi theg pa)
9. atiyogatantra (T. shin tu mal ’byor gyi rgyud kyi theg pa)

TENS

ten dharma activities. (S. dharmacarya; T. chos spyod; C. faxing)

1. writing (S. lekhana; T. yi ge ’bri pa; C. shuxie)
2. worship (S. pūjā; T. mchod pa; C. gongyang)
3. charity (S. dāna; T. sbyin pa; C. shita)
4. listening/learning (S. śrava a; T. nyan ba; C. tingwen)
5. reading (S. vācana; T. klog pa; C. pidu)
6. comprehending (S. udgraha a; T. ’dzin pa; C. shouchi)
7. instructing (S. prakāśana; T. rab tu ston pa; C. kaiyan)
8. reciting (S. svādhyāya; T. kha ’don byed pa; C. fengsong)
9. contemplation (S. cintana; T. sems pa; C. siwei)
10. meditation (S. bhāvanā; T. sgom pa; C. xiuxi)

ten directions. (S. daśadiś; T. phyogs bcu; C. shifang)

1. east (S. pūrvā; T. shar; C. dong)
2. southeast (S. pūrvadak i ā; T. shar lho; C. dongnan)
3. south (S. dak i ā; T. lho; C. nan)
4. southwest (S. dak i apaścimā; T. lho nub; C. xinan)
5. west (S. paścima ; T. nub; C. xi)
6. northwest (S. paścimōttarā; T. nub byang; C. xibei)
7. north (S. utara ; T. byang; C. bei)
8. northeast (S. uttarapūrvā; T. byang shar; C. dongbei)
9. zenith (S. ūrdhvam; T. bla ma; C. shang)
10. nadir (S. adha ; T. ’og; C. xia)

ten endowments. (T. ’byor ba bcu)

One has taken rebirth:

1. as a human (T. mi)
2. in a central land (T. yul dbus)
3. with complete sense faculties (T. dbang po tshang ba)
4. not engaging in mistaken actions (T. las kyi mtha’ ma log pa)
5. having faith (T. gnas la dad pa)and when:

1. a buddha has appeared in the world (T. sangs rgyas ’jig rten du byon pa)
2. he has taught the dharma (T. des dam pa’i chos ston pa)
3. his teaching remains (T. bstan pa gnas pa)
4. it has followers (T. de’i rjes su ’jug pa)
5. they kindly act on behalf of others (T. gzhan phyir snying brtse ba)

ten fetters. (S. sa yojana; T. kun tu sbyor ba; C. jie)

1. view of a perduring self (S. satkāyad i; T. ’jig lta; C. shenjian)
2. attachment to rules and rituals (S. śīlavrataparāmarśa; T. tshul khrim s brtul zhugs mchog ’dzin; C. jiejin qu)
3. skeptical doubt (S. vicikitsā; T. the tshom; C. yi)
4. craving for sensual gratification (S. kāmacchanda; T. ’dod pa’i ’dun pa; C. tanyu)
5. malice (S. vyāpāda; T. zhe sdang; C. chenhui)
6. craving for the realm of subtle materiality (S. rūparāga; T. gzugs kyi sred pa; C. seai)
7. craving for the immaterial realm (S. ārūpyarāga; T. gzugs med pa na spyod pa’i sred pa; C. wuseai)
8. conceit (S. māna; T. nga rgyal; C. man)
9. delusion (S. moha; gti mug; C. wuming)
10. restlessness (S. auddhatya; T. rgod pa; C. diaoju)

ten fundamental afflictions. (S. mūlakleśa; T. rtsa nyon; C. shi/huo/genben fannao / /)

1. sensuality/greed (S. rāga; T. ’dod chags; C. tan)
2. anger (S. pratigha; T. khong khro; C. chen)
3. conceit (S. māna; T. nga rgyal; C. man)
4. ignorance (S. avidyā; T. ma rig pa; C. wuming)
5. skeptical doubt (S. vicikitsā; T. the tshom; C. yi)
6. view of a perduring self (S. satkāyad i; T. ’jig lta; C. shenjian)
7. extreme views (S. antagrāhad i; T. mthar lta; C. bianjian)

8. attachment to one's own point of view (S. d īparāmarśa; T. lta ba mchog 'dzin; C. jianqu jian)
9. wrong views (S. mithyād ī; T. log lta; C. xiejian)

ten masteries. (S. vaśitā; T. dbang; C. zizai)

1. lifespan (S. āyu ; T. tshe; C. ming zizai)
2. actions (S. karman; T. las; C. ye zizai)
3. necessities of life (S. pari kāra; T. yo byad; C. cai zizai)
4. determination (S. adhimukti; T. mos pa; C. shengjie zizai)
5. aspiration (S. pra idhāna; T. smon lam; C. yuan zizai)
6. psychic powers (S. ddhi; T. rdzu 'phrul; C. shentong zizai)
7. birth (S. upapatti; T. skye ba; C. sheng zizai)
8. phenomena/teachings (S. dharma; T. chos; C. fa zizai)
9. mind (S. citta; T. sems; C. xin zizai)
10. wisdom (S. jñāna; T. ye shes; C. zhi zizai)

ten meanings [of unimpeded interpenetration in the Huayan school]. (C. Huayan shiyi)

1. teachings and their meanings/significance (C. jiaoyi)
2. principle and phenomena (C. lishi)
3. understanding and implementation (C. jiejing)
4. causes and fruitions (C. yinguo)
5. the "persons" who expound the dharma and the "dharma" they expound (C. renfa)
6. the "distinction" and "unity" between discrete things (C. fenqi jingwei)
7. the "teacher," his "disciple," the "dharma" that is imparted, and the "wisdom" that the disciple develops (C. shidi fazhi)
8. the "dominant" and "subordinate," "primary" and "secondary" relations that pertain between things (C. zhuban yizheng)
9. the enlightened sages who "respond" to the spiritual maturity of their audiences and the audiences whose spiritual maturity "solicited" the appearance of the enlightened sages in the world (C. suishenggen yushixian)
10. "autonomy" with regard to spiritual "obstacles" and their "antidotes," the "essence" of phenomena and their "functions" (C. nishun tiyong zizai).

ten perfections. (S. pāramitā; T. pha rol tu phyin pa; C. du/ boluomi /)

1. perfection of generosity/giving (S. dānapāramitā; T. sbyin pa'i pha rol tu phyin pa; C. [bu]shi [])
2. perfection of morality (S. śīlapāramitā; T. tshul khriims kyi pha rol tu phyin pa; C. [chi]jie [])
3. perfection of patience/forbearance (S. k āntipāramitā; T. bzod pa'i pha rol tu phyin pa; C. ren[ru] [])
4. perfection of effort/vigor (S. vīryapāramitā; T. brtson 'grus kyi pha rol tu phyin pa; C. jinjing)
5. perfection of meditative absorption (S. dhyānapāramitā; T. bsam gtan gyi pha rol tu phyin pa; C. chan[dīng] [])
6. perfection of wisdom (S. prajñāpāramitā; T. shes rab kyi pha rol tu phyin pa; C. bore)
7. perfection of skillful means (S. upāyapāramitā; T. thabs kyi pha rol tu phyin pa; C. fangbian)
8. perfection of aspiration (S. pra idhānapāramitā; T. smon lam gyi pha rol tu phyin pa; C. yuan)
9. perfection of powers (S. balapāramitā; T. stobs kyi pha rol tu phyin pa; C. li)
10. perfection of knowledge (S. jñānapāramitā; T. ye shes kyi pha rol tu phyin pa; C. zhi)

ten powers of a bodhisattva. (S. bala; T. byang chub sems dpa'i stobs; C. pusa li)

1. power of reflection (S. āśayabala; T. bsam pa'i stobs; C. shenxin li/zhixin li /)
2. power of superior aspiration (S. adhyāśayabala; T. lhag bsam pa'i stobs; C. zengshang shenxin li)
3. power of application (S. prayogabala; T. sbyor ba'i stobs; C. fangbian li)
4. power of wisdom (S. prajñābala/jñānabala; T. shes rab/ye shes stobs; C. zhi[hui] li [])
5. power of their vow (S. pra idhānabala; T. smon lam gyi stobs; C. yuanli)
6. power of vehicle (S. yānabala; T. theg pa'i stobs; C. shengli)
7. power of conduct (S. caryābala; T. spyod pa'i stobs; C. xingli)
8. power of transformation (S. vikurva abala; T. mam par 'phrul pa'i stobs; C. shenbian li/youxi shentong li /)
9. power of enlightenment (S. bodhibala; T. byang chub kyi stobs; C. puti li)
10. power of turning the wheel of the dharma (S. dharmacakrapravartanabala; T. chos kyi 'khor lo bskor ba'i stobs; C. zhuan falun li)

ten powers of a tathāgata. (S. tathāgatabala; T. de bzhin gshegs pa'i stobs; C. rulai li)

1. power of knowing the positive and negative contingencies of things (S. sthānāsthānajñānabala; T. gnas dang gnas ma yin pa mkhyen pa'i stobs; C. chu feichu zhili)
2. power of knowing the maturation of deeds (S. karmavipākajñānabala; T. las kyi mam smin mkhyen pa'i stobs; C. ye yishou zhili)
3. power of knowing diverse aspirations (S. nānādhimuktijñānabala; T. mos pa sna tshogs mkhyen pa'i stobs; C. zhongzhong shengjie zhili)
4. power of knowing diverse dispositions (S. nānādhātujñānabala; T. kham sna tshogs mkhyen pa'i stobs; C. zhongzhong jie zhili)
5. power of knowing those who are of superior acumen and those who are not (S. indriyaparāparajñānabala; T. dbang po mchog dang mchog ma yin pa mkhyen pa'i stobs; C. gen shangxia zhili)
6. power of knowing the paths going everywhere (S. sarvatragāmaṇipatipajñāna; T. thams cad du 'gro ba'i lam mkhyen pa'i stobs; C. bianquxing zhili)
7. power of knowing absorption, liberation, concentration, trance, affliction, purification, and acquisition (S. sarvadhyanāvimok asamādhisamāpattisa kleśavyavadānavyutthānajñānabala; T. bsam gtan dang mam thar dang ting nge 'dzin dang snyoms par 'jug pa dang kun nas nyon mongs pa dang mam par byang ba dang ldan pa thams cad mkhyen pa'i stobs; C. jinglü jietuo dengchi dengzhi zhili 脫)
8. power of recollecting past lives (S. pūrvanivāsānusm tijñānabala; T. sngon gyi gnas rjes su dran pa mkhyen pa'i stobs; C. suzhu suinian zhili/suming zhili /)
9. power of knowing death and rebirth (S. cyutyupattijñānabala; T. 'chi 'pho bo dang skye ba mkhyen pa'i stobs; C. sisheng zhili)
10. power of knowing the cessation of the contaminants (S. āsravak ayajñānabala; T. zag pa zad pa mkhyen pa'i stobs; C. loujin zhili)

ten precepts. [of novices] (*daśaśīla/śrāma erasa vara; T. dge tshul gyi sdom pa; C. [shami] shijie [])

1. not to kill living beings (S. prā ātipāta-virati; T. srog gcod pa spong ba; C. bu shasheng jie)
2. not to steal (S. adattādāna-virati; T. ma byin par len pa spong ba; C. bu toudao jie)
3. not to engage in sexual activity (S. kāmamithyācāra-virati/abrahmacarya-virati; T. 'dod pas log par g.yem pa spong ba/mi tshangs par spyod pa spong pa; C. bu xieyin jie/li fei fanxing jie 不 /)
4. not to lie [about spiritual attainments] (S. m āvāda-virati; T. rdzun du smra ba spong ba; C. bu wangyu jie 不)
5. not to use intoxicants (S. madyapāna-virati; T. myos par 'gyur ba'i btung ba spong pa; C. bu yinjiu jie)
6. not to eat at improper times [after twelve noon] (S. vikālabhojana-virati; T. dus ma yin pa'i kha zas spong pa; C. bu feishi shi jie 不)
7. not to use perfumes, garlands, or cosmetics (S. gandhamālyavilepanavar akadhāra a-virati; T. spos dang kha dog dang byug pa dang phreng ba thogs pa spong pa; C. bu tushi xiangman jie 不)
8. not to sing, dance, play music, or attend entertainments (S. n tyagīta-virati; T. glu gar spong pa; C. bu gewu guanting jie 不)
9. not to sleep on high and luxurious beds (S. uccaśayanamahāśayana-virati; T. khri stan mthon po dang khri stan chen po spong pa; C. bu zuo gaoguang dachuang jie)
10. not to handle gold and silver/money (S. jātarūparajatapratigraha a-virati; T. gser dang dngul la reg pa spong pa; C. bu xu jinyinbao jie 不)

ten realms of reality [dharmadhātu]. (C. shi fajie)

1. divinities (S. deva; T. lha; C. tian)
2. demigods (S. asura; T. lha ma yin; C. axiuluo)
3. humans (S. manu ya; T. mi; C. ren)
4. animals (S. tiryak; T. dud 'gro; C. chusheng)
5. ghosts (S. preta; T. yi dwags; C. egui)
6. hell denizens (S. nāraka; T. dmyal ba; diyu)
7. disciples (S. śrāvaka; T. nyan thos; C. shengwen)
8. solitary buddhas (S. pratyekabuddha; T. rang rgyal; C. yuanjue 緣)
9. bodhisattvas (T. byang chub sems dpa'; C. pusa)
10. buddhas (T. sang rgyas; C. fo)

ten recollections. (S. anusm ti; T. rjes su dran pa; C. nian/suinian /)

1. the Buddha (T. sangs rgyas rjes su dran pa; C. nianfo/fo suinian /)
2. the dharma (T. chos rjes su dran pa; C. nianfa/fa suinian /)
3. the sa gha (T. dge 'dun rjes su dran pa; C. nianseng/seng suinian /)
4. morality (S. śīla; T. tshul khriims rjes su dran pa; C. nianjie/jie suinian /)
5. renunciation/generosity (S. tyāga; T. gtong ba rjes su dran pa; C. nianshi/shi suinian /)
6. the divinities (S. devatā; T. lha rjes su dran pa; C. niantian/tian suinian /)
7. breathing (S. ānāpāna; T. dbugs phyi nang du rgyu ba rjes su dran pa; C. nian anban/ruchuxi suinian /)
8. disgust (S. udvega; T. skyo ba rjes su dran pa; C. yan sui nian)
9. death (S. mara a; T. 'chi ba rjes su dran pa; C. niansi/si suinian /)
10. what concerns the body (S. kāyagatā; T. lus kyi mam pa rjes su dran pa; C. nianshen/shen suinian /)

ten stages [of the bodhisattva path]. (S. daśabhūmi; T. sa bcu; C. shidi)

1. joyful (S. pramuditā; T. rab tu dga' ba; C. jixidi/huanxi di /)
2. immaculate/stainless (S. vimalā; T. dri ma med pa; C. ligou di/wugou di /)
3. luminous (S. prabhākari; T. 'od byed pa; C. faguang di)
4. radiant (S. arcī matī; T. 'od 'phro ba; C. yanhui di)
5. invincible (S. sudurjayā; T. sbyang dka' ba; C. jijnansheng di [])
6. immediacy/coming face-to-face (S. abhimukhī; T. mngon du byed pa; C. xianqian di)
7. far-reaching/transcendent (S. dūra gamā; T. ring du song ba; C. yuanxing di)
8. immovable/steadfast (S. acalā; T. mi g.yo ba; C. budong di)
9. eminence/auspicious intellect (S. sādhumatī; T. legs pa'i blo gros; C. shanhui di)
10. cloud of dharma (S. dharmameghā; T. chos kyi sprin pa; C. fayun di)

ten unwholesome courses of action. (S. akuśala-karmapatha; T. mi dge ba; C. e yedao)

1. killing (prā ātipāta; T. srog bcod pa; C. sha[sheng] [])
2. stealing (S. adattādāna; T. ma byin par len pa; C. [tou]dao [偷])
3. sexual misconduct (kāmamithyācāra; T. 'dod pas log par g.yem pa; C. xieyin)
4. lying (S. m āvāda; T. rdzun du smra ba; C. wangyu)
5. malicious speech (paiśunyavāda; T. phra ma; C. liangshe)
6. verbal abuse (pārū yavāda; T. tshig rtsub; C. ekou)
7. frivolous prattle/idle gossip (sa bhinnapralāpa; T. ngag 'khyal ba; C. qiyu)
8. covetousness (S. abhidhyā; T. brnab sems; C. tan[yu]/qiantan [] /)
9. malice/ill-will (S. vyāpāda; T. gnod sems; C. chen[hui])
10. wrong views (S. mithyād i; T. log lta; C. xiejian/yuchi /)

ten visualization devices. (S. *k tsnāyatana; P. kasi a; T. zad par gyi skye mched; C. bianchu)

1. earth (S. p thivī; T. sa; C. di)
2. water (S. āpas; T. chu; C. shui)
3. fire (S. tejas; T. me; C. huo)
4. wind (S. vāyu; T. rlung; C. feng)
5. empty-space (S. ākāśa; T. nam mkha'; C. kong)
6. blue (S. nīla; T. sngon po; C. qing)
7. yellow (S. pīta; T. ser po; C. huang 黃)
8. red (S. lohita; T. dmar po; C. chi)
9. white (S. avadāta; T. dkar po; C. bai)
10. light (S. āloka/tejas; T. 'od/me; C. guangming/huo /)/[alt.] consciousness (S. vijñāna; T. mam shes; C. shi)

ten wholesome courses of action. (S. kuśala-karmapatha; T. dge ba bcu; C. shanyedao) Abstention from the [TEN UNWHOLESOME COURSES OF ACTION](#) (s.v.).

ELEVENS

eleven cognitions. (S. jñāna; T. shes pa; C. zhi)

1. of suffering (S. du khajñāna; T. sdug bsngal shes pa; C. kuzhi)
2. of origination (S. samudayajñāna; T. kun 'byung ba shes pa; C. jizhi)
3. of cessation (S. nirodhajñāna; T. 'gog pa shes pa; C. miezhi)
4. of the path (S. mārgajñāna; T. lam shes pa; C. dao zhi)
5. of extinction (S. k ayajñāna; T. zad pa shes pa; C. jin zhi)
6. of nonproduction (S. anutpādayñāna; T. mi skye ba shes pa; C. wusheng zhi)
7. of factors (S. dharmajñāna; T. chos shes pa; C. fazhi)
8. of subsequent cognition (S. anvayajñāna; T. rjes su rtogs par shes pa; C. leizhi)
9. of worldly conventions (S. sa v tijñāna; T. kun rdzob shes pa; C. shisu zhi)
10. of others' minds (S. paracittajñāna; T. gzhan gyi sems shes pa; C. taxin zhi)
11. of things-as-they-are (S. yathābhūtajñāna; T. yang dag pa ji lta ba bzhin du yongs su shes pa; C. rushi zhi)

TWELVES

twelve ascetic practices. (S. dhūtagu a; P. dhuta ga; T. sbyangs pa'i yon tan; C. shi'er toutou xing)

1. wears rag clothing from dust-heaps (S. pā śukūlika; T. phyag dar khrod pa; C. zhao fensao yi/zhao bina yi /)
2. possesses only three robes (S. traicivarika; T. chos gos gsum pa; C. dan sanyi)
3. does not eat after midday (S. khalupaścādbhaktika; T. zas phyis mi len pa; C. zhonghou bude yinjiang)
4. eats only alms (S. pai apātika; T. bsod snyoms pa; C. cidi qishi)

3. eats one meal in a single sitting (S. aikāsanika; T. stan gcig pa; C. shou yishi fa)
6. restricts the amount of food consumed (S. nāmantika; T. 'phyings pa pa; C. jieliang shi)
7. dwells in isolation in the forest (S. āra yaka; T. dgon pa ba; C. alanruo chu zhu)
8. dwells at the foot of a tree (S. v k amūlika; T. shing drung pa; C. shuxia zhi)
9. dwells in open, unsheltered places (S. ābhyavakāśika; T. bla gab med pa; C. ludi zuo)
10. dwells in charnel grounds (S. śmāśānika; T. dur khrod pa; C. zhongjian zhu)
11. never lies down to sleep (S. nai yadika; T. cog bu pa; C. changzuo buwo)
12. does not omit any house on the almsround (S. yathāsa starika; T. gzhi ji bzhin pa; C. changxing qishi)

twelve categories of scripture. (S. dvādaśa ga[pravacana]; T. gsung rab yan lag bcu gnyis; C. shi'erbu jing/shi'erfen jiao /)

1. discourses (S. sūtra; T. mdo; C. qijing/changhang /)
2. aphorisms in mixed prose and verse (S. geya; T. dbyangs bsnyad; C. yingsong)
3. prophecies (S. vyākara a; T. lung bstan; C. jibie/shouji 禮 / 禮)
4. verses (S. gāthā; T. tshig bcad; C. fengsong/guqi /)
5. utterances/meaningful expressions (S. udāna; T. ched du brjod pa; C. zishuo 說)
6. framing stories (S. nidāna; T. gleng gzhi; C. yinyuan 緣)
7. expanded teachings (S. vaipulya; T. shin tu rgyas pa; C. fangguang)
8. tales of previous lives (S. jātaka; T. skyes rabs; C. bensheng)
9. marvelous events (S. adbhutadharma; T. rmad du byung; C. xifa)
10. narratives (S. avadāna; T. rtogs pa brjod pa; C. piyu 喻)
11. fables (S. itiv ttaka; T. de lta bu byung ba; C. benshi)
12. instructions (S. upadeśa; T. gtan phab; C. lunyi)

twelve deeds of a buddha. (S. dvādaśabuddhakārya; T. sangs rgyas kyi mdzad pa bcu gnyis; C. shi'er xiang chengdao)

1. descent from tu ita heaven (T. dga' ldan gyi gnas nas 'pho ba; C. doushuai jiangshi)
2. entry into the womb (T. lhums su zhugs pa; C. rutai)
3. taking birth (T. sku bltams pa; C. chutai)
4. proficiency in the arts (T. bzo yi gnas la mkhas pa; C. shanxian jiyi)
5. enjoyment of consorts (T. btsun mo'i 'khor dgyes rol ba; C. shouyong feijuan)
6. renouncing the world (T. rab tu byung ba; C. chujia)
7. practicing asceticism (T. dka' ba spyad pa; C. xiu kuxing)
8. going to the bodhima a (T. byang chub snying por gshegs pa; C. qu jingang zuo 金)
9. subjugating Māra (T. bdud btul ba; C. xiangmo)
10. attaining enlightenment (T. mngon par rdzogs par sangs rgyas pa; C. chengdao)
11. turning the wheel of the dharma (S. dharmacakrapravartana; T. chos kyi 'khor lo bskor ba; C. zhuan falun)
12. passing into parinirvā a (T. mya ngan las 'das pa; C. ru niepan)

twelfefold chain of dependent origination. (S. pratītyasamutpāda; T. rten cing 'brel bar 'byung ba; C. yuanqi 緣)

1. ignorance (S. avidyā; T. ma rig pa; C. wuming)
2. predispositions/habituations (S. sa skāra; T. 'du byed; C. xing)
3. consciousness (S. vijñāna; T. mam shes; C. shi)
4. name and form/mentality and materiality (S. nāmarūpa; T. ming gzugs; C. mingse)
5. six sense-bases (S. a āyatana; T. skye mched drug; C. liuru)
6. sensory contact (S. sparśa; T. reg pa; C. chu)
7. sensations (S. vedanā; T. tshor ba; C. shou)
8. craving/thirst (S. t ā; T. sred pa; C. ai)
9. clinging (S. upādāna; T. len pa; C. qu)
10. existence/process of becoming (S. bhava; T. srid pa; C. you)
11. [re]birth (S. jāti; T. skye ba; C. sheng)
12. old age and death (S. jarāmara a; T. rga shi; C. laosi)

twelve sense-fields/bases of cognition. (S. āyatana; T. skye mched; C. ru/chu/ruchu / /)

1. the sense-field of the visual sense-base (S. cak urāyatana; T. mig gi skye mched; C. yan)
2. the sense-field of visual objects (S. rūpāyatana; T. gzugs kyi skye mched; C. se)
3. the sense-field of the auditory sense-base (S. śrotrāyatana; T. rna ba'i skye mched; C. er)
4. the sense-field of auditory objects (S. śabdāyatana; T. sgra'i skye mched; C. sheng)
5. the sense-field of the olfactory sense-base (S. ghrā āyatana; T. sna'i skye mched; C. bi)
6. the sense-field of olfactory objects (S. gandhāyatana; T. dri'i skye mched; C. xiang)
7. the sense-field of the gustatory sense-base (S. jihvāyatana; T. lce'i skye mched; C. she)
8. the sense-field of gustatory objects (S. rasāyatana; T. ro'i skye mched; C. wei)
9. the sense-field of the tactile sense-base (S. kāyāyatana; T. lus kyi skye mched; C. shen)
10. the sense-field of tactile objects (S. spra avyāyatana; T. reg bya'i skye mched; C. chu)
11. the sense-field of the mental sense-base (S. manāyatana; T. yid kyi skye mched; C. yi)
12. the sense-field of mental objects (S. dharmāyatana; T. chos kyi skye mched; C. fa)

FOURTEENS

fourteen indeterminates/unanswerable questions. (S. avyāk ta; T. lung du ma bstan pa'i chos; C. wuji 禮)

1. Is the world eternal? (S. śāśvato loka ; T. 'jig rten rtag pa; C. shi chang)
2. Is the world not eternal? (S. aśāśvato loka ; T. 'jig rten mi rtag pa; C. shi wuchang)
3. Is the world both eternal and not eternal? (S. śāśvataś cāśāśvataś ca; T. 'jig rten rtag kyang rtag la mi rtag kyang mi rtag pa; C. shi yi chang yi wuchang)
4. Is the world neither eternal nor not eternal? (S. naiva śāśvato nāśāśvataś ca; T. 'jig rten rtag pa yang ma yin mi tag pa yang ma yin; C. shi feichang feiwuchang)
5. Is the world endless (viz. infinite)? (S. antavānloka ; T. 'jig rten mtha' yod pa; C. shi youbian)
6. Is the world not endless (viz. finite)? (S. anantavānloka ; T. 'jig rten mtha' yod pa ma yin; C. shi wubian)
7. Is the world both endless and not endless? (S. antavā ś cānantavānlokaś ca; T. 'jig rten mtha' yod kyang yod la mtha' med kyang med; C. shi yi youbian yi wubian)
8. Is the world neither endless nor not endless? (S. naivāntavān nānantavā ś ca; T. 'jig rten mtha' yod pa yang ma yin med pa yang ma yin; C. shi feiyoubian feiwubian)
9. Does the tathāgata exist after death? (S. bhavati tathāgata para maranāt; T. de bzhin gshegs pa zhi nas yod; C. rulai sihou weiyou)
10. Does the tathāgata not exist after death? (S. na bhavati tathāgata para mara āt; T. de bzhin gshegs pa zhi nas med; C. rulai sihou feiyou)
11. Does the tathāgata both exist and not-exist after death? (S. bhavati ca na bhavati ca tathāgata para mara āt; T. de bzhin gshegs pa zhi nas yod kyang yod la med kyang med; C. rulai sihou yi you yi feiyou)

12. Does the tathāgata neither exist nor not-exist after death? (S. naiva bhavati na na bhavati tathāgata para mara āt; T. de bzhin gshegs pa zhi nas yod pa yang ma yin med pa yang ma yin; C. rulai sihou feiyou fei feiyou)
13. Are the life-force and the body identical? (S. sa jīvas tac charīram; T. srog de lus yin; C. mingzhe jishen 即)
14. Are the life-force and the body different? (S. anyo jīvo 'nyac charīram; T. srog kyang gzhan la lus kyang gzhan; C. mingzhe yishen)

fourteen root violations of the tantric commitments.

1. contradicting one's guru
2. contradicting or denigrating the teachings of the Buddha or one's guru
3. quarreling with others on the same path
4. violating the bodhisattva vows (in action, word, or thought)
5. violating the sacred drops in the heart cakra through illicit sexual activity
6. denigrating the teachings and paths of other systems
7. revealing secrets to non-initiates or those not ready to receive them
8. viewing the five aggregates that compose the psycho-physical continuum as impure
9. doubting one's entrance into the path
10. having the ability to perceive the mental continuum of others and recognizing that someone will commit great harm to others, but not taking action
11. holding either of the extreme views of eternalism or annihilationism
12. refusing to teach someone who asks for teachings and is qualified to receive those teachings
13. superficial or dualistic clinging to appearances of pure/impure; good/bad, etc.
14. verbally or mentally denigrating women

SIXTEENS

sixteen arhats. (S. o aśasthavira; T. gnas brtan bcu drug; C. shiliu luohan)

According to the East Asian tradition:

1. Pi ola Bhāradvāja (T. Bha ra dhwa dza bsod snyoms len; C. Bintoulu Baluoduo)
2. Kanakavatsa (T. Gser gyi be'u; C. Jianuojiafacuo)
3. Kanaka Bhāradvāja (T. Bha ra dhwa dza gser can; C. Jianuojiabaliduoshe)
4. Subinda [alt. Suvinda]/Abheda (T. Mi phyed pa; C. Supintuo)
5. Bakkula [alt. Nakula/Vakula] (T. Ba ku la; C. Bojuluo)
6. Bhadra (T. Bzang po; C. Batuoluo)
7. Kālīka [alt. Karīka] (T. Dus ldan; C. Jialijia)
8. Vajraputra (T. Rdo rje mo'i bu; C. Fasheluo fuduoluo)
9. Jīvaka (T. 'Tsho byed; C. Qipo/Shubojia /)
10. Panthaka [alt. Mahāpanthaka] (T. Lam chen bstan; C. Bantuojia)
11. Rāhula (T. Sgra gcan 'dzin; C. Luohouluo)
12. Nāgasena (T. Klu sde; C. Naqlexina)
13. A gaja (T. Yan lag 'byung; C. Yinjietuo 揭)
14. Vanavāsin (T. Nags na gnas; C. Fanaposi)
15. Ajita (T. Ma pham pa; C. Ayiduo)
16. Cū apanthaka [alt. Cūapantha] (T. Lam phran bstan; C. Zhutubantuojia)

sixteen aspects of the four noble truths. (S. ākāra; T. bden bzhi'i mam pa; C. xingxiang)

1. impermanence (S. anitya; T. mi rtag pa; C. wuchang)
2. suffering (S. du kha; T. sdug bsngal ba; C. ku)
3. emptiness (S. śūnyatā; T. stong pa nyid; C. kong)
4. selflessness (S. anātmaka; T. bdag med pa; C. wuwo/feiwo /)
5. origination (S. samudaya; T. kun 'byung ba; C. ji)
6. production/process (S. prabhava; T. rab tu skye ba; C. sheng)
7. cause (S. hetu; T. rgyu; C. yin)
8. conditions (S. pratyaya; T. rkyen; C. yuan 緣)
9. cessation (S. nirodha; T. 'gog pa; C. mie)
10. serenity (S. śānta; T. zhi ba; C. jing)
11. sublimity (S. pra īta; T. gya nom pa; C. miao)
12. deliverance (ni sara a; T. nges par 'byung ba; C. li)
13. path (S. mārga; T. lam; C. dao)
14. correctness (S. nyāya; T. rigs pa; C. ru)
15. achievement (S. pratipatti; T. sgrub pa; C. xing)
16. release (S. nairyā ika; T. nges par 'byin pa; C. chu)

sixteen elders. (S. o aśasthavira; T. gnas brtan bcu drug; C. shiliu zunzhe). See [SIXTEEN ARHATS](#).

sixteen emptinesses. (S. śūnyatā; T. stong pa nyid; C. kong)

1. emptiness of the internal (S. adhyātmaśūnyatā; T. nang stong pa nyid; C. nei kong 內)
2. emptiness of the external (S. bahirdhāśūnyatā; T. phyi stong pa nyid; C. wai kong)
3. emptiness of both the internal and external (S. adhyātmabahirdhāśūnyatā; T. phyi nang stong pa nyid; C. neiwai kong 內)
4. emptiness of emptiness (S. śūnyatāśūnyatā; T. stong pa nyid stong pa nyid; C. kongkong)
5. emptiness of the great (S. mahāśūnyatā; T. chen po stong pa nyid; C. dakong)
6. emptiness of the ultimate (S. paramārthaśūnyatā; T. don dam pa stong pa nyid; C. shengyi kong)
7. emptiness of the compounded (S. sa sk taśūnyatā; T. 'dus byas stong pa nyid; C. youwei kong)
8. emptiness of the uncompounded (S. asa sk taśūnyatā; T. 'dus ma byas stong pa nyid; C. wuwei kong)
9. emptiness of the infinite (S. atyantāśūnyatā; T. mtha' las 'das pa stong pa nyid; C. bijing kong)
10. emptiness of the beginningless and endless (S. anavārāgraśūnyatā; T. thog ma dang mtha' ma med pa stong pa nyid; C. wuji kong)
11. emptiness of what cannot be repudiated (S. anavakāraśūnyatā; T. dor ba med pa stong pa nyid; C. wusan kong)
12. emptiness of essential nature (S. prak tiśūnyatā; T. rang bzhin stong pa nyid; C. benxing kong)
13. emptiness of all dharmas (S. sarvadharmāśūnyatā; T. chos thams cad stong pa nyid; C. yiqiefa kong 切)
14. emptiness of intrinsic marks (S. lak a aśūnyatā; T. mtshan nyid stong pa nyid; C. zixiang kong)
15. emptiness of the unobservable (S. anupalambhaśūnyatā; T. mi dmigs pa stong pa nyid; C. bu kede kong 不)
16. emptiness of the nature of nonexistence (S. abhāvasvabhāvaśūnyatā; T. dngos po med pa'i ngo bo nyid stong pa nyid; C. wuzixing zixing kong)

sixteen moments of the path of vision. (S. darśanamārgak a a; T. mthong lam shes bzod skad cig ma; C. [jiandao wei] shiliu xin [])

1. acquiescence to the cognition of dharma with regard to suffering in the sensuous realm (S. du khe dharmajñānak ānti ; T. sdug bsngal chos bzod; C. kufa ren)

2. cognition of dharma with regard to suffering in the sensuous realm (S. du khe 'nvayajñānam; T. sdug bsngal chos shes; C. kufa zhi)
3. acquiescence to the subsequent cognition with regard to suffering in the subtle-materiality and immaterial realms (S. du khe 'nvayajñānak ānti ; T. sdug bsngal rjes bzod; C. kulei ren)
4. subsequent cognition with regard to suffering in the subtle-materiality and immaterial realms (S. du khe 'nvayajñānam; T. sdug bsngal rjes shes; C. kuleizhi)
5. acquiescence to the cognition of dharma with regard to origination in the sensuous realm (S. samudaye dharmajñānak ānti ; T. kun 'byung chos bzod; C. jifa ren)
6. cognition of dharma with regard to origination in the sensuous realm (S. samudaye dharmajñānam; T. kun 'byung chos shes; C. jifa zhi)
7. acquiescence to the subsequent cognition of origination in the subtle-materiality and immaterial realms (S. samudaye 'nvayajñānak ānti ; T. kun 'byung rjes bzod; C. jilei ren)
8. subsequent cognition of origination in the subtle-materiality and immaterial realms (S. samudaye 'nvayajñānam; T. kun 'byung rjes shes; C. jilei zhi)
9. acquiescence to the cognition of dharma with regard to cessation in the sensuous realm (S. nirodhe dharmajñānak ānti ; T. 'gog pa chos bzod; C. miefa ren)
10. cognition of dharma with regard to cessation in the sensuous realm (S. nirodhe dharmajñānam; T. 'gog pa chos shes; C. miefa zhi)
11. acquiescence to subsequent cognition with regard to cessation in the subtle-materiality and immaterial realms (S. nirodhe 'nvayajñānak ānti ; T. 'gog pa rjes bzod; C. mielei ren)
12. subsequent cognition with regard to cessation in the subtle-materiality and immaterial realms (nirodhe 'nvayajñānam; T. 'gog pa rjes shes; C. mielei zhi)
13. acquiescence to the cognition of dharma with regard to the path in the sensuous realm (S. mārge dharmajñānak ānti ; T. lam chos bzod; C. daofa ren)
14. cognition of dharma with regard to the path in the sensuous realm (S. mārge dharmajñānam; T. lam chos shes; C. daofa zhi)
15. acquiescence of subsequent cognition with regard to the path in the subtle-materiality and immaterial realms (S. mārge 'nvayajñānak ānti ; T. lam rjes bzod; C. daolei ren)
16. subsequent cognition with regard to the path in the subtle-materiality and immaterial realms (S. mārge 'nvayajñānam; T. lam rjes shes; C. daolei zhi)

SEVENTEENS

seventeen heavens of the realm of subtle materiality. (S. rūpadhātunivāsa; T. gzugs khamś gnas ris; C. sejie shiqi tian)

FIRST DHYĀNA:

1. Brahmā's retainers (S. brahmakāyika; T. tshangs ris; C. fanzhong tian)
2. Brahmā's ministers (S. brahmapurohita; T. tshangs pa mdun na 'don; C. fanfu tian)
3. Great Brahmā (S. mahābrahmā; T. tshangs pa chen po; C. dafan tian)

SECOND DHYĀNA:

1. lesser radiance (S. parīttābha; T. 'od chung; C. shaoguang tian)
2. immeasurable radiance (S. apramā ābha; T. tshad med 'od; C. wulianguang tian)
3. ultimate radiance (S. ābhāsvara; T. 'od gsal; C. guangyin tian/jiguangjing tian /)

THIRD DHYĀNA:

1. lesser purity (S. parīttasūbha; T. dge chung; C. shaojing tian)
2. immeasurable purity (S. apramā asūbha; T. tshad med dge; C. wuliangjing tian)
3. pervasive purity (S. śubhak tsna; T. dge rgyas; C. bianjing tian)
4. cloudless (S. anabhraka; T. sprin med; C. wuyun tian)
5. meritorious birth (S. pu yaprasava; T. bsod nams 'phel; C. fusheng tian)
6. extensive fruition (S. b hatphala; T. 'bras bu che; C. guangguo tian)

FOURTH DHYĀNA (THE FIVE PURE ABODES, [ŚUDDHĀVĀSA](#)):

1. free from afflictions (S. av ha; T. mi che ba; C. wufan tian)
2. not burning/without torment (S. atapa; T. mi gdung pa; C. wure tian)
3. perfect form (S. sud śa; T. gya nom snang ba; C. shanxian tian)
4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian)
5. highest (S. akani ha; T. 'og min; C. sejiujing tian)

EIGHTEENS

eighteen elements/bases of cognition. (S. dhātu; T. khamś bco brgyad; C. jie)

1. visual sense-base (S. cak urdhātu; T. mig gi khamś; C. yan)
2. visual sense-object (S. rūpadhātu; T. gzugs kyi khamś; C. se)
3. visual consciousness (S. cak urvijñānadhātu; T. mig gi mam par shes pa'i khamś; C. yanshi)
4. auditory sense-base (S. śrotradhātu; T. ma ba'i khamś; C. er)
5. auditory sense-object (S. śabdadhātu; T. sgra'i khamś; C. sheng)
6. auditory consciousness (S. śrotravijñānadhātu; T. ma ba'i mam par shes pa'i khamś; C. ershi)
7. olfactory sense-base (S. ghrā adhātu; T. sna'i khamś; C. bi)
8. olfactory sense-object (S. gandhadhātu; T. dri'i khamś; C. xiang)
9. olfactory consciousness (S. ghrā avijñānadhātu; sna'i mam par shes pa'i khamś; C. bishi)
10. gustatory sense-base (S. jihvādhātu; T. lce'i khamś; C. she)
11. gustatory sense-object (S. rasadhātu; T. ro'i khamś; C. wei)
12. gustatory consciousness (S. jihvāvijñānadhātu; T. lce'i mam par shes pa'i khamś; C. sheshi)
13. tactile sense-base (S. kāyadhātu; T. lus kyi khamś; C. shen)
14. tactile sense-object (S. spra avyadhātu; T. reg bya'i khamś; C. chu)
15. tactile consciousness (S. kāyavijñānadhātu; T. lus kyi mam par shes pa'i khamś; C. shenshi)
16. mental sense-base (S. manodhātu; T. yid kyi khamś; C. yi)
17. mental sense-object (S. dharmadhātu; T. chos kyi khamś; C. fa)
18. mental consciousness (S. manovijñānadhātu; T. yid kyi mam par shes pa'i khamś; C. yishi)

eighteen emptinesses. (S. śūnyatā; T. stong pa nyid bco brgyad; C. kong)

1. emptiness of the internal (S. adhyātmaśūnyatā; T. nang stong pa nyid; C. nei kong 內)
2. emptiness of the external (S. bahirdhāśūnyatā; T. phyi stong pa nyid; C. wai kong)
3. emptiness of both the internal and external emptiness (S. adhyātmabahirdhāśūnyatā; T. phyi nang stong pa nyid; C. neiwai kong 內)
4. emptiness of emptiness (S. śūnyatāśūnyatā; T. stong pa nyid stong pa nyid; C. kongkong)
5. emptiness of the great (S. mahāśūnyatā; T. chen po stong pa nyid; C. dakong)
6. emptiness of the ultimate (S. paramārthaśūnyatā; T. don dam pa stong pa nyid; C. shengyi kong)
7. emptiness of the compounded (S. sa sk taśūnyatā; T. 'dus byas stong pa nyid; C. youwei kong)
8. emptiness of the uncompounded (S. asa sk taśūnyatā; T. 'dus ma byas stong pa nyid; C. wuwei kong)
9. emptiness of the infinite (S. atyantaśūnyatā; T. mtha' las 'das pa stong pa nyid; C. bijing kong)

10. emptiness of the beginningless and endless (S. anavāgāraśūnyatā; T. thog ma dang mtha' ma med pa stong pa nyid; C. wuji kong)
11. emptiness of what cannot be repudiated (S. anavakāraśūnyatā; T. dor ba med pa stong pa nyid; C. wusan kong)
12. emptiness of essential nature (S. prak tiśūnyatā; T. rang bzhin stong pa nyid; C. benxing kong)
13. emptiness of all dharmas (S. sarvadharmaśūnyatā; T. chos thams cad stong pa nyid; C. yiqiefu kong 切)
14. emptiness of intrinsic marks (S. lak a śūnyatā; T. mtshan nyid stong pa nyid; C. zixiang kong)
15. emptiness of the unobservable (S. anupalambhaśūnyatā; T. mi dmigs pa stong pa nyid; C. bu kede kong 不)
16. emptiness of the nature of nonexistence (S. abhāvasvabhāvaśūnyatā; T. dngos po med pa'i ngo bo nyid stong pa nyid; C. wuxing zixing kong)
17. emptiness of existence (S. bhāvaśūnyatā; T. dngos bo'i stong pa nyid; C. youxing kong)
18. emptiness of nonexistence (S. abhāvaśūnyatā; T. dngos po med pa'i stong pa nyid; C. wuxing kong)

eighteen mainstream Buddhist schools. (S. a ādaśānikāya; T. sde pa bco brgyad; C. shiba bupai)

1. Sarvāstivāda (T. Thams cad yod par smra ba; C. Shuo yiqie you bu 說)
 1. Mūlasarvāstivāda (T. Gzhi thams cad yod par smra ba'i sde; C. Genben shuo yiqie you bu 說)
 2. Kāśyapiya (T. 'Od srung pa'i sde; C. Yinguang bu)
 3. Mahīśāsaka (T. Sa ston sde; C. Huadi bu)
 4. Dharmaguptaka (T. Chos srung sde; C. Fazang bu)
 5. Bahuśrutiya (T. Mang du thos pa'i sde; C. Duowen bu)
 6. Tāmraśā īya (T. Gos dmar sde; C. Tongxie bu)
 7. Vibhajyavādin (T. Rnam par phye ste smra ba'i sde; C. Fenbieshuo bu 說)
2. Sa mītiya (T. Kun gyis bkur ba; C. Zhengliang bu)
 1. Kaurukullaka (T. Sar sgrog rigs kyi sde; C. Julujuluo bu/Xuandi bu /)
 2. Avantaka (T. Bsrung ba pa'i sde; C. Bukeqi bu)
 3. Vātsīputriya (T. Gnas ma bu pa'i sde; C. Duzi bu)
3. Mahāśā ghika (T. Dge 'dun phal chen; C. Dazhong bu)
 1. Pūrvaśaila (T. Shar gyi ri bo'i sde; C. Dongshanzhu bu)
 2. Aparāśaila (T. Nub kyi ri bo'i sde; C. Xishanzhu bu)
 3. Haimavata (T. Gang ri bo'i sde; C. Xueshan bu)
 4. Lokottaravāda (T. 'Jig rten 'das smra'i sde; C. Shuo chushi bu 說)
 5. Prajñaptivāda (T. Btags par smra ba'i sde; C. Shuojia bu 說)
4. *Sthavīranikāya (T. Gnas brtan sde; C. Shangzuo bu)
 1. Mahāvihāravāsa (T. Gtsug lag khang chen gnas sde; C. Dasizhu bu)
 2. Jetavanīya (T. Rgyal byed tshal gnas pa'i sde; C. Zhiduolin zhu bu)
 3. Abhayagirivāsa (T. 'Jigs med ri gnas sde; C. Wuweishan zhu bu)

eighteen sciences. (S. vidyāsthāna; T. rig gnas)

1. music (S. gandharva; T. rol mo)
2. erotic arts (S. vaiśika; T. 'khrig thabs)
3. livelihood (S. vārttā; T. 'tsho chas)
4. accounting (S. sa khya; T. grangs can)
5. grammar (S. śabda; T. sgra)
6. medicine (S. cikitsā; T. gso dpyad)
7. law (S. nīti; T. chos lugs)
8. the arts (S. śilpa; T. bzo)
9. archery (S. dhanurveda; T. 'phong dpyad)
10. reasoning (S. hetu; T. gtan tshigs)
11. yoga (T. mal 'byor)
12. learning (S. śruti; T. thos pa)
13. memorization (S. sm ti; T. dran pa)
14. astronomy (S. jyoti a; T. skar ma'i dpyad)
15. astrology (S. ga ita; T. rtsis)
16. magic (S. māyā; T. mig 'phrul)
17. legend (S. purā a; T. sngon gyi rabs)
18. history (S. itihāsaka; T. sngon byung)

eighteen unshared factors [distinct attributes] of the buddhas. (S. āve ikabuddhadharma; T. sangs rgyas kyi chos ma 'dres pa bco brgyad/ma 'dres pa'i chos; C. bugong[fo]fa [])

1. their actions are without error (S. nāsti [tathāgatasya] skhalitam; T. 'khrul pa med pa; C. shen wushi)
2. their speech is not noisy (S. nāsti ravitam; T. ca co med pa; C. kou wushi)
3. they are never forgetful (S. nāsti mu itasm titā; T. bsnyel ba med pa; C. nian wushi)
4. their mind is never not in equipoise (S. nāsty asamāhitacittam; T. sems mnyam par ma gzhas pa med pa; C. wu yixiang)
5. their perception is free from discursiveness (S. nāsti nānātvasa jñā; T. tha dad pa'i 'du shes med pa; C. wu buding)
6. their equanimity is not due to a lack of discernment (S. nāsty apratiśa khyāyopek ā; T. so sor ma rtogs pa'i btang snyoms med pa; C. wu buzhi she)
7. they do not regress in their zeal (S. nāsti cchandasya hāni ; T. 'dun pa nyams pa med pa; C. yu wumie)
8. they do not regress in their effort (S. nāsti vīryasya hāni ; T. brtson 'grus nyams pa med pa; C. jingjin wumie)
9. they do not regress in their recollection (S. nāsti sm tihāni ; T. dran pa nyams pa med pa; C. nian wumie)
10. they do not regress in their concentration (S. nāsti samādhīhāni ; T. ting nge 'dzin nyams pa med pa; C. ding wumie)
11. they do not regress in their wisdom (S. nāsti prajñāhāni ; T. shes rab nyams pa med pa; C. hui wumie)
12. they do not regress in their liberation (S. nāsti vimuktihāni ; T. mnam par grol ba nyams pa med pa; C. jietuo zhijian wumie 脫)
13. all their physical actions are preceded by gnosis and remain in conformity with gnosis (S. sarvakāyakarmajñānapūrvagama jñānānuparivartī; T. lus kyi las thams cad ye shes kyi sngon du 'gro shing ye shes kyi rjes su 'brang ba; C. yiqie shenye sui zhihui xing)
14. all their verbal actions are preceded by gnosis and remain in conformity with gnosis (S. sarvavākkarmajñānapūrvagama jñānānuparivartī; T. ngag gi las thams cad ye shes kyi sngon du 'gro shing ye shes kyi rjes su 'brang ba; C. yiqie kouye sui zhihui xing)
15. all their mental actions are preceded by gnosis and remain in conformity with gnosis (S. sarvamaṇa karmajñānapūrvagama jñānānuparivartī; T. yid kyi las thams cad ye shes kyi sngon du 'gro shing ye shes kyi rjes su 'brang ba; C. yiqie yiye sui zhihui xing)
16. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the past (S. atīte 'dhvany asa gam apratīhata jñānadarśana pravartate; T. 'das pa'i dus la ma chags ma thogs pa'i ye shes gzigs par 'jug pa; C. zhihui zhi guoqushi wu'ai)
17. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the future (S. anāgate 'dhvany asa gam apratīhata jñānadarśana pravartate; T. ma 'ongs pa'i dus la ma chags ma thogs pa'i ye shes gzigs par 'jug pa; C. zhihui zhi weilaiishi wu'ai)
18. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the present (S. pratyutpanne 'dhvany asa gam apratīhata jñānadarśana pravartate; T. da ltar gyi dus la ma chags ma thogs pa'i ye shes gzigs par 'jug pa; C. zhihui zhi xianzaishi wu'ai)

TWENTIES

twenty-eight classes of divinities. (S. deva; T. lha; C. tian)

SENSUOUS REALM (KAMADHĀTU):

1. four great kings (S. cāturmahārājakāyika; T. rgyas chen rigs bzhi; C. siwang tian)
2. divinities of the thirty-three (S. trāyastri śa; T. sum cu rtsa gsum; C. daoli tian/sanshisan tian /)
3. free from conflict (S. yāma; T. 'thab bral; C. yemo tian)
4. contented (S. tu ita; T. dga' ldan; C. doushuai[tuo] tian [])
5. enjoyment of creation (S. nirmā arati; T. 'phrul dga'; C. huale tian)
6. divinities who have power over the creations of others/divinities who partake of the pleasures created in other heavens (S. paranirmitavaśavartin; T. gzhan 'phrul dbang byed; C. tahua zizai tian)

REALM OF SUBTLE MATERIALITY (RŪPADHĀTU):

FIRST DHYĀNA

1. Brahmā's retainers (S. brahmakāyika; T. tshangs ris; C. fanzhong tian)
2. Brahmā's ministers (S. brahmapurohita; T. tshangs pa mdun na 'don; C. fanfu tian)
3. Great Brahmā (S. mahābrahmā; T. tshangs pa chen po; C. dafan tian)

SECOND DHYĀNA

1. lesser radiance (S. parīttābha; T. 'od chung; C. shaoguang tian)
2. immeasurable radiance (S. apramā ābha; T. tshad med 'od; C. wuliang guang tian)
3. ultimate radiance (S. ābhāsvara; T. 'od gsal; C. guangyin tian/jiguangjing tian /)

THIRD DHYĀNA

1. lesser purity (S. parīttasubha; T. dge chung; C. shaojing tian)
2. immeasurable purity (S. apramā āsubha; T. tshad med dge; C. wuliangjing tian)
3. pervasive purity (S. śubhak tsna; T. dge rgyas; C. bianjing tian)
4. cloudless (S. anabhraka; T. sprin med; C. wuyun tian)
5. meritorious birth (S. pu yaprasava; T. bsod nams 'phel; C. fusheng tian)
6. extensive fruition (S. b hatphala; T. 'bras bu che; C. guangguo tian)
7. nonperception (S. asa jñisattva; T. 'du shes med pa'i lha; C. wuxiang tian) [Note: This heaven is sometimes added to the list of seventeen heavens of the realm of subtle materiality and is included on this list for comprehensiveness.]

FOURTH DHYĀNA (THE FIVE PURE ABODES, [SIDDHĀŚA](#))

1. free from afflictions (S. av ha; T. mi che ba; C. wufan tian)
2. without torment (S. atapa; T. mi gdung pa; C. wure tian)
3. perfect form (S. sud śa; T. gya nom snang ba; C. shanxian tian)
4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian)
5. highest (S. akani ha; T. 'og min; C. sejiujing tian)

IMMATERIAL REALM (ĀRŪPYADHĀTU)

1. infinite space (S. ākāśānantyāyatana; T. nam mkha' mtha' yas skye mched; C. kong wubian chu tian)
2. infinite consciousness (S. vijñānānantyāyatana; T. nam shes mtha' yas skye mched; C. shi wubian chu tian)
3. nothingness (S. ākiñcanyāyatana; T. ci yang med pa'i skye mched; C. wusuoyou chu tian)
4. neither perception nor nonperception (S. naivasamjñānāsamjñāyatana; T. 'du shes med 'du shes med min skye mched; C. feixiang feifeixiang tian)

twenty varieties of the sa gha. (S. vi śatiprabhedasa gha; T. dge 'dun nyi shu; C. ershi sengqie/shengwen cidi, /)

1. srotaāpanna (T. rgyun du zhugs pa; C. yuliu [guo]/xutuohuan [])
2. one who takes up to seven existences (S. saptak dbhavaparama; T. re ltar thogs na srid pa lan bdun pa; C. jiqi fanyou)
3. one who goes from family to family (S. kula kula; T. rigs nas rigs su skye ba; C. wang tianshang/jiajia /)
4. once-returner (S. sak dāgāmin; T. lan gcig phyir 'ong ba; C. yilai/situohan /)
5. one who has a single obstacle (S. ekavīcika; T. bar chad gcig pa; C. yijian,)
6. non-returner (S. anāgāmin; T. phyir mi 'ong ba; C. bu huan/bu lai/anahan /不 /)
7. one who achieves nirvā a in the intermediate state (S. antarāparinirvāyin; T. bar ma dor yongs su mya ngan las 'das ba; C. zhong ban/zhong banniepan /)
8. one who achieves nirvā a at birth (S. upapadyaparinirvāyin; T. skyes nas yongs su mya ngan las 'das ba; C. sheng ban/sheng banniepan /)
9. one who achieves nirvā a through effort (S. sābhisa skāraparinirvāyin; T. mngon par 'du byed dang bcas pas yongs su mya ngan las 'das ba; C. youxing ban/youxing banniepan /)
10. one who achieves nirvā a without effort (S. anabhisa skāraparinirvāyin; T. mngon par 'du byed pa med par yongs su mya ngan las 'das ba; C. wuxing ban/wuxing banniepan /)
11. one who goes higher/upstreamer (S. ūrdhvasrotas; T. gong du 'pho ba; C. shangliu ban/shangliu banniepan /)
12. bodily witness (S. kāyasāk in; T. lus kyi mngon sum du byed pa; C. shenzheng)
13. follower through faith (S. śraddhānusārin; T. dad pa'i rjes su 'brang ba; C. suixin xing)
14. follower through doctrine (S. dharmānusārin; T. chos kyi rjes su 'brang ba; C. suifa xing)
15. one who aspires through faith (S. śraddhādhimukta; T. dad pas lhag par mos pa; C. xinjie)
16. one who attains through seeing (S. d iprāpta; T. mthong bas thob pa; C. jianzhi/jiande /)
17. one who is liberated dependent upon a specific occasion (S. samayavimukta; T. dus dang sbyor bar mam par grol ba; C. shi jietuo 脫)
18. one who is liberated regardless of occasion (S. asamayavimukta; T. dus dang mi sbyor bar mam par grol ba; C. bushi jietuo 不 脫)
19. one who is liberated through wisdom (S. prajñāvimukta; T. shes rab kyi mam par grol ba; C. hui jietuo 不 脫)
20. one who is liberated both ways (S. ubhayatobhāgavimukta; T. gnyis ga'i cha las mam par grol ba; C. ju jietuo 俱 脫)

THIRTIES

thirty-two marks of a great man. (S. mahāpuru alak a a; T. skyes bu chen po'i mtshan sum bcu rtsa gnyis/mtshan bzang so gnyis; C. daren xiang)

1. his feet stand firmly on the ground (S. suprati hitapāda; T. zhabs shin tu gnas pa; C. zu shan anzhu xiang)
2. he has thousand-spoked wheels on the palms of his hands and the soles of his feet (S. cakrā kitahastapādātala; T. phyag dang zhabs kyi mthil 'khor lo'i mtshan dang ldan pa; C. shouzu lunxiang)
3. the heels of his feet are broad (S. āyatapādapār i; T. zhabs kyi mthil rting pa yangs pa; C. zugen fuchang xiang)
4. he has long fingers (S. dīrghā guli; T. sor mo ring ba; C. xianzhang zhi xiang)
5. his hands and feet are smooth (S. m dutaru ahastapāda; T. phyag dang zhabs kyi mthil 'jam shing gzhon sha chags pa; C. shouzu xiruan xiang)
6. his hands and feet are webbed (S. jālahastapāda; T. phyag dang zhabs dra bas 'brel ba; C. shouzu wangman xiang)
7. his legs are long [alt. his ankles are not prominent] (S. utsa gapāda; T. zhabs kyi long bu mi mngon pa; C. zufu gaoman xiang)
8. he has thighs like an antelope (S. ai eyaja gha; T. byin pa ri dwags e na ya'i 'dra; C. yiniye chuai xiang 璽)

9. his arms extend to the knees (S. sthītānavanata-pralambabāhu; T. bzhengs bzhin du ma btud par phyogs pus mor slebs pa; C. lishou moxi xiang)
10. his penis is retracted (S. kośopagata-vastiguhya; T. 'doms kyī sba ba sbubs su nub pa; C. shifeng zangmi xiang)
11. his brow is broad and even (S. samalalāta; T. dpral ba'i dbyes mnyams pa; C. e guangping qi)
12. his skin is smooth and golden (S. sūk masuvar acchavi; T. pags pa srab cing mdog gser 'dra ba; C. pifu xihua xiang)
13. he has one hair in each pore of his body (S. ekaikaroma; T. spu re re nas skyes shing g.yas su 'khyil ba; C. shenzhu maokong yi yi maosheng xiang)
14. the hairs of his body stand erect (S. ūrdhvāgraroma; T. sku'i spu gyen du phyogs pa; C. shenmao shangmi xiang)
15. his thighs are well rounded (S. suvarītoru; T. brla legs par zlum pa; C. tui meiyuan xiang)
16. the seven parts of his body are well-proportioned (S. saptotsada; T. bdun mtho ba; C. qichu jiemian xiang)
17. the upper part of his body is like a lion's (S. si hapūrvārdhakāya; T. ro stod seng ge'i 'dra ba; C. shen shang ban ru shiziwang xiang)
18. he has broad shoulders (S. citāntarā sa; T. tha! gong rgyas pa; C. bojian chongshi xiang)
19. his body and limbs are perfectly proportionate and thus shaped like a fig tree (S. nyagrodhaparima ala; T. shing nya gro dha ltar chu zheng gab pa; C. shenxiang yuanman runuojutuo)
20. he has full, round shoulders (S. susa vttaskandha; T. dpung mgo shin tu zlum pa; C. jianshan yuanman xiang)
21. he has an excellent sense of taste (S. rasarasāgra; T. ro bro ba'i mchog dang ldan pa; C. yu zhuwei zhong de zui shangwei)
22. he has a jaw like a lion's (S. si hahanu; T. 'gram pa seng ge'i 'dra ba; C. han ru shizi xiang)
23. he has forty teeth (S. catvāri śaddanta; T. tshems bzhi bcu mnga' ba; C. jusishichi)
24. his teeth are even (S. samadanta; T. them mnyam pa; C. chi qiping)
25. his teeth are evenly spaced (S. aviraladanta; T. tshems thags bzang ba; C. chi wuxi)
26. his teeth are white (S. suśukladanta; T. tshems shin tu dkar ba; C. chi xianbai)
27. his tongue is long and broad (S. prabhūtatanujihva; T. ljags shin tu ring zhing srab pa; C. she guangbo)
28. his voice is like Brahmā's (S. brahmasvara; T. tshangs pa'i dbyangs; C. da fanyin)
29. his eyes are deep blue with eyelashes like a bull (S. abhinīlanetragopak ma; T. spyān mthon mthing la ba'i rdzi ma lta bu; C. mu ganqing jie ru niuwang)
30. he has a white tuft of hair between his eyebrows (S. ūr ākeśa; T. mdzod spu; C. meijian baihao xiang)
31. the hair on his head turns to the right (S. pradak i āvartakeśa; T. dbu skra g.yas su 'khyil ba; C. toufa youxuan)
32. he has a protrusion on the crown of the head (S. u ī aśīr a; T. dbu gtsug tor dang ldan pa; C. dingshang xian wusenisha)

thirty-seven wings of enlightenment/factors pertaining to awakening. (S. bodhipāk ikadharmā; T. byang chub kyī phyogs kyī chos; C. daopin/puti fen /)

1. four applications of mindfulness (S. sm tyupasthāna; T. dran pa nye bar bzhag pa bzhi; C. si nianchu)
2. four right efforts (S. samyakpradhāna/samyakprahā a; T. yang dag par spong ba bzhi; C. si zhengqin)
3. four bases of psychic power (S. ddhipāda; T. rdzu 'phrul gyi rkang pa bzhi; C. si shenzu/si ruyi zu /)
4. five [spiritual] faculties/dominants (S. indriya; T. dbang po lnga; C. wugen)
5. five powers (S. bala; T. stobs lnga; C. wuli)
6. seven factors of enlightenment (S. bodhya ga; T. byang chub yan lag bdun; C. qi puti fen/qi juezhi /)
7. eightfold [noble] path (S. āryā ā gamārga; T. 'phags lam yan lag brgyad; C. ba zhengdao)

FIFTIES

fifty-one/fifty-two mental concomitants. (S. caitta; P. cetasika; T. sem byung lnga bcu rt sa gcig; C. xin suoyou fa). See EIGHTY-TWO DHAMMAS OF THE STHAMRANIKĀYA THERAVĀDA SCHOOL; [ONE-HUNDRED DHARMAS OF THE YOGĀCĀRA SCHOOL](#).

SEVENTIES

seventy-five dharmas of the Sarvāstivāda school. (S. pañcasaptatidharma; T. chos don lnga; C. qishiwu fa)

1. eleven material factors (S. rūpa; T. gzugs; C. sefa)
 1. visual faculty (S. cak urindriya; T. mig gi dbang po; C. yangen)
 2. auditory faculty (S. śrotrendriya; T. ma ba'i dbang po; C. ergen)
 3. olfactory faculty (S. ghrā endriya; T. sna'i dbang po; C. bigen)
 4. gustatory faculty (S. jihvendriya; T. lce'i dbang po; C. shengen)
 5. tactile faculty (S. kāyendriya; T. lus kyī dbang po; C. shengen)
 6. visual objects (S. rūpa; T. gzugs; C. se)
 7. sound (S. śabda; T. sgra; C. sheng)
 8. scent (S. gandha; T. dri; C. xiang)
 9. flavor (S. rasa; T. ro; C. mei)
 10. contact (S. spra avya; T. reg bya; C. chu)
 11. unmanifest materiality (S. avijñaptirūpa; T. mam par rig byed ma yin pa'i gzugs; C. wubiao se)
2. mind (S. citta; T. sems; C. xinwang)
3. forty-six mental concomitants (S. caitta; T. sems byung; C. xin suoyou fa)
 1. ten omnipresent mental factors (S. mahābhūmika; T. sems kyī sa mang; C. dadi fa)
 1. sensation (S. vedanā; T. tshor ba; C. shou)
 2. perception (S. sa jñā; T. 'du shes; C. xiang)
 3. volition/intention (S. cetanā; T. sems pa; C. si)
 4. sensory contact (S. sparśa; T. reg pa; C. chu)
 5. zeal/desire-to-act (S. chanda; T. 'dun pa; C. yu)
 6. discernment (S. matī; T. shes rab; C. hui)
 7. mindfulness/memory (S. sm ti; T. dran pa; C. nian)
 8. attention (S. manaskāra; T. yid la byed pa; C. zuoyi)
 9. determination (S. adhimok a; T. mos pa; C. shengjie)
 10. concentration (S. samādhi; T. ting nge 'dzin; C. ding)
 2. ten omnipresent wholesome factors (S. kuśalamahābhūmika; T. dge ba'i sa mang; C. da shan di fa)
 1. faith (S. śraddhā; T. dad pa; C. xin)
 2. heedfulness/vigilance (S. apramāda; T. bag yod pa; C. bu fangyi)
 3. tranquillity/serenity (S. praśrabdhi; T. shin tu sbyangs pa; C. [qing] an [])
 4. equanimity (S. upek ā; T. btang snyoms; C. xingshe)
 5. shame/decency/propriety (S. hrī; T. ngo tsha shes pa; C. can)
 6. fear of blame/modesty (S. apatrāpya; T. khrel yod pa; C. kui)
 7. absence of craving (S. alobha; T. ma chags pa; C. wu tan)
 8. absence of ill-will (S. adve a; T. zhe sdang med pa; C. wu chen)
 9. absence of harmful intentions (S. avihi sā; T. mam par mi 'tshe ba; C. bu hai)
 10. effort/vigor (S. vīrya; T. brtson 'grus; C. qin/jingjin /)
3. six omnipresent afflicted factors (S. kleśamahābhūmika; T. nyon mongs chen po'i sa mang; C. da fannao di fa)

1. delusion (S. moha; T. ma rig pa; C. chi)
2. heedlessness (S. pramāda; T. bag med pa; C. fangyi)
3. lassitude (S. kausīdya; T. le lo; C. xiedai)
4. lack of faith (S. āśraddhya; T. ma dad pa; C. bu xin)
5. sloth (S. styāna; T. mugs pa; C. [hun]shen [])
6. restlessness (S. audhdhatya; T. rgod pa; C. diaoju)
4. two major omnipresent unwholesome factors (S. akuśalamahābhūmika; T. mi dge ba'i sa mang; C. da bushan di fa)
1. lack of shame/decency/propriety (S. āhṛīkya; T. ngo tsha med pa; C. wucan)
2. lack of fear of blame/lack of modesty (S. anapatrāpya; T. khrel med pa; C. wukui)
5. ten minor afflicted factors of wide extent (S. parīttakleśabhūmika; T. nyon mongs chung ngu'i sa mang; C. xiao fannao di fa)
1. anger (S. krodha; T. khro ba; C. fen)
2. disparagement/hypocrisy/concealing (S. mrak a; T. 'chab pa; C. fu)
3. selfishness/stinginess (S. mātṣarya; T. ser sna; C. qian)
4. envy (S. īr yā; T. phrag dog; C. ji)
5. vexation (S. pradāśa; T. 'tshig pa; C. nao)
6. hostility (S. vihi sā; T. mam par 'tshe ba; C. hai)
7. enmity/resentment (S. upanāha; T. 'khon 'dzin; C. hen)
8. deception (S. śāhya; T. g.yo; C. chan)
9. deceit (S. māyā; T. sgyu; C. kuang)
10. arrogance (S. mada; T. rgyags pa; C. jiao)
6. eight indeterminate mental factors (S. aniyata; T. gzhan 'gyur; C. buding)
1. applied thought (S. vitarka; T. rtog pa; C. xun)
2. sustained thought (S. vicāra; T. dpyod pa; C. si)
3. worry (S. kauk tya; T. 'gyod pa; C. ezuo)
4. torpor (S. middha; T. gnyid; C. shuimian)
5. sensuality (S. rāga; T. 'dod chags; C. tan)
6. hatred (S. pratigha; T. khong khro; C. chen)
7. pride (S. māna; T. nga rgyal; C. man)
8. skeptical doubt (S. vicikitsā; T. the tshom; C. yi)
4. fourteen conditioned forces dissociated from thought (S. cittaviprayuktasa skāra; T. ldan min 'du byed; C. xin bu xiangying xing fa)
1. possession (S. prāpti; T. 'thob pa; C. de)
2. nonpossession (S. aprāpti; T. 'thob pa med pa; C. feide)
3. homogeneity (S. sabhāgatā/nikāyasabhāga; T. rigs 'thun pa; C. zhong tongfen)
4. state of nonperception (S. āsa jñika; T. 'du shes med pa; C. wuxiang guo/wuxiang bao/wuxiang shi / /)
5. equipoise of nonperception (S. asa jñāsamāpatti; T. 'du shes med pa'i snyoms 'jug; C. wuxiang ding)
6. equipoise of cessation (S. nirodhasamāpatti; T. 'gog pa'i snyoms 'jug; C. mie jin ding)
7. vitality (S. jīvitendriya; T. srog gi dbang po; C. ming gen)
8. origination/birth (S. jāti; T. skye ba; C. sheng)
9. continuance/maturation (S. sthiti; T. gnas pa; C. zhu)
10. senescence/decay (S. jarā; T. rga ba; C. yi/lao /)
11. desinence/extinction (S. anityatā; T. mi rtag pa; C. mie/wuchang /)
12. name set (S. nāmakāya; T. ming gi tshogs; C. ming shen)
13. phrase set (S. padakāya; T. tshig gi tshogs; C. ju shen)
14. syllable set (S. vyañjanakāya; T. yi ge'i tshogs; C. wen shen)
5. three uncompounded factors (S. asa sk ta; T. 'dus ma byas kyi chos; C. wuwei [fa] [])
1. space (S. ākāśa; T. nam mkha'; C. xukong 虚)
2. analytical cessation (S. pratīsa khyānirodha; T. so sor brtags 'gog pa; C. zemie)
3. nonanalytical suppression (S. apratīsa khyānirodha; T. so sor brtags min gyi 'gog pa; C. feizemie)

EIGHTIES

eighty secondary marks [of a mahāpuru a]. (S. anuvyañjana; T. dpe byad bzang po; C. bashi zhong hao)

1. copper-colored nails (S. ātāmanakha ; T. sen mo zangs kyi mdog lta bu; C. zhizhao hongtong xiang/zhizhao chitong se /)
2. glossy nails (S. snigdhanakha ; T. sen mo mdog snum pa; C. zhise huaze)
3. raised nails (S. tu ganakha ; T. sen mo mtho ba; C. zhizhao gao)
4. rounded fingers and toes (S. v ttā guli ; T. sor mo mams zlum pa; C. zhuzhi yuanxiang/zhichang xianyuan /)
5. tapered fingers and toes (S. anupūrvā guli ; T. sor mo byin gyis phra ba; C. zhuzhi xirou (xiang)/zhuzhi jianxi ()/)
6. full fingers and toes (S. citā guli ; T. sor mo mams rgyas pa; C. zhuzhi fengman xiang)
7. veins are not visible (S. nigū haśira ; T. rtsa mi mngon pa; C. maijin bulou 不)
8. veins are free from knots (S. nirgranthīśira ; T. rtsa mdud med pa; C. erwu maijie/jinmai wujie /)
9. anklebones do not protrude (S. gū hagulpha ; T. long bu mi mngon pa; C. zu buxian gu/huai buxian 不 / 不)
10. feet [and hands] do not differ in size (S. avi amapāda ; T. zhabs mi mnyam pa med pa; C. zu wubuping/shouzu ruyi 不 /)
11. walks with the stride of a lion (S. si havikrāntagāmī; T. seng ge'i stabs su gshegs pa; C. xing ru shizi/weiyi ru shizi /)
12. walks with the stride of an elephant (S. nāgavikrāntagāmī; T. glang po che'i stabs su gshegs pa; C. xingan ru xiang/jinshi ru xiangwang /)
13. walks with the stride of a goose (S. ha savikrāntagāmī; T. ngang pa'i stabs su gshegs pa; C. xing ru e/xingfa ru ewang /)
14. walks with the stride of a bull (S. v abhavikrāntagāmī; T. khyu mchog gi stabs su gshegs pa; C. xing ru shengqun/jinshi ru niuwang /)
15. walks turning toward the right side (S. pradak i āvartagāmī; T. g.yas phyogs su ldog cing gshegs pa; C. xiangyou/huishen gushi bijie youxuan /)
16. walks elegantly (S. cārugāmī; T. mdzes par gshegs pa; C. weimiao xiang/xingxiang mei/xingbu yansu / / 步)
17. walks without swaying (S. avakragāmī; T. mi g.yo bar gshegs pa; C. bu waixie/xingbu duanzheng 不 / 步)
18. well-rounded body (S. v ttagātra ; T. sku 'khril bag chags pa; C. shen zhongxi/shen zichi weiyi /)
19. cleansed body (S. m agātra ; T. sku byi dor byas pa; C. shen guangze ru diaozhuo/guangze ming ligou /)
20. well-proportioned body (S. anupūrvagātra ; T. sku rim par 'tsham pa; C. shen jubei/shenti xiangcheng /)
21. clean body (S. śucigātra ; T. sku gtsang ba; C. shen jiejing/shenti qingjie /)
22. supple body (S. m dugātra ; T. sku 'jam pa; C. shen rouruan)
23. pure body (S. vīśuddhagātra ; T. sku mam par dag pa; C. qingjing shen/shen qingjing /)
24. has perfect genitals (S. paripūr avyañjana ; T. mtshan yong su rdzogs pa; C. juzu xiang/shen manzu /)
25. broad and magnificent frame (S. p thucāruma alagātra ; T. sku kho lag yangs shing bzang ba; C. shenzhi qimiao/shen runze/miao guangxia xiangcheng / /)
26. walks with an even pace (S. samakrama ; T. gom pa snyoms pa; C. xingbu zhengzhi 步)
27. youthful body (S. sukumāragātra ; T. sku shin tu gzhon mdog can; C. shense nenruan/rongyan qimiao changruo shaonian /)
28. unimpaired body (S. adīnagātra ; T. sku zhum pa med pa; C. shen wu tuiqu/shenti buqu / 不)

29. broad body (S. unnatagātra ; T. sku rgyas pa; C. shen fengman/ruyi fengman /)
30. firm body (S. susa hitagātra ; T. sku shin tu grims pa; C. shenzhi anshang buqing/zhuchu wu nengdong zhe/shenzhi jianshi 不 / /)
31. limbs and features are well-proportioned (S. suvibhaktā gapratya ga ; T. yan lag dang nying lag shin tu mam par 'byed pa; C. zhijie junping/gujie ru gousuo /)
32. sight is free from disease and clear (S. vitimiraviśuddhāloka ; T. gzigs pa rab rib med cing mam par dag pa; C. mu qingjing wu buming 不)
33. round belly (S. v ttakuk i ; T. dku zlum pa; C. fu yuan)
34. clean belly (S. m akuk i ; T. dku skabs phyin pa; C. shen wu buxiu 不)
35. belly is free from defects (S. abhugnakuk i ; T. dku ma myongs pa; C. fu wu aotu)
36. flat belly (S. k āmodara ; T. phyal phyang nge ba; C. fu yuanxiang)
37. deep navel (S. ga bhīranābhi ; T. lte ba zab pa; C. qi shen/qi shen yuanhao /)
38. navel turns to the right (S. pradak i āvartanābhi ; T. lte ba g.yas phyogs su 'khyil ba; C. qi youxuan)
39. beautiful from all sides (S. samantaprāsādikā ; T. kun nas mdzes pa; C. guan wuyan zu)
40. conduct is pure (S. śucisamācāra ; T. kun tu spyod pa gtsang ba; C. xingshi jiejing)
41. body has no black moles (S. vyapagatatilakakālagātra ; T. sku la sme ba dang gnag bag med pa; C. shen wu zhidian)
42. hands are soft like cotton (S. tūlasad śasukumārapā i ; T. phyag shing bal ltar shin tu 'jam pa; C. shouruan ru mian)
43. lustrous lines on his hands (S. snigdhapā ilekha ; T. phyag gi ri mo mdangs yod pa; C. shouwen juguang[se] [])
44. deep lines on his hands (S. gambhīrapā ilekha ; T. phyag gi ri mo zab pa; C. shouwen sheshen)
45. long lines on his hands (S. āyatapā ilekha ; phyag gi ri mo ring ba; C. shouwen chang)
46. face is not too long (S. nātyāyataavadana ; T. shal ha cang yang mi ring ba; C. mian bu changda)
47. lips the color of a bimba fruit (S. bimbo hi; T. mchu bim ba ltar dmar ba; C. chun hong ru xiangxiangsi guo)
48. supple tongue (S. m dujihva ; T. ljags mnyen pa; C. she ruanmei/she meiruan /)
49. slender tongue (S. tanujihva ; T. ljags srab pa; C. she ruan/she boguang /)
50. red tongue (S. raktajihva ; T. ljags dmar ba; C. she xianhong/she sechi /)
51. voice resonates like an elephant and like thunder (S. gajagarjitajīmūtagho a ; T. glang po che'i nga ro dang 'brug gi sgra dang ldan pa; C. ju xiangyu leiyin/xiangsheng longyin /)
52. sweet, pleasing, and gentle voice (S. madhuracāruramāñjusvara ; T. gsung snyan cing mnyen la 'jam pa; C. yinyun meihao/yinyun hechang /)
53. round canine teeth (S. v ttada ra ; T. mche ba zlum pa; C. ya yuan)
54. sharp canine teeth (S. tik ada ra ; T. mche ba mo ba; C. ya kuaili)
55. white canine teeth (S. śuklada ra ; T. mche ba dkar ba; C. ya bai)
56. even canine teeth (S. samada ra ; T. mche ba mnyam pa; C. ya fang/ya pingzheng /)
57. tapered canine teeth (S. anupūrvada ra ; T. mche ba byin gyis phra ba; C. ya jianxi)
58. high nose (S. tu ganāsa ; T. shangs mtho ba; C. bi gao/bikong buxian /)
59. clean nose (S. śucināsa ; T. shangs gtsang pa; C. bi qingjing)
60. clear eyes (S. viśuddhanetra ; T. spyen mam par dag pa; C. mu qingjing)
61. wide eyes (S. viśālanetra ; T. spyen yangs pa; C. mu guang)
62. thick eyelashes (S. citrapak mā ; T. rdzi ma stug pa; C. yanmao meihao)
63. the iris and sclera of his eyes contrast like the petals and stamen of a blue lotus (S. sitāsitaśakamaladalaśakalanayana ; T. spyen dkar nag 'byes shing pad ma'i 'dab ma'i mdangs pa lta bu; C. mu heibai fenqingmei ru lianhua xingxiang/mu heibai mei ru lianhua xingxiang /)
64. long eyebrows [like a young crescent moon] (S. āyatabhūrū ; T. smin tshugs ring ba; C. meimao xiuchang/mei ru chuyue /)
65. soft eyebrows (S. ślak abhrū ; T. smin ma 'jam pa; C. shuangmei nenruan)
66. eyebrows with even hairs (S. samaromabhūrū ; T. smin ma spu mnyam pa; C. meimao pingqi)
67. lustrous eyebrows (S. snigdhabhrū ; T. smin ma snum pa; C. meimao run)
68. full and long ears (pīnāyatakāra ; T. snyan shal stug cing ring ba; C. er hou xiuchang)
69. even ears (S. samakāra ; T. snyan mnyam pa; C. er qiping)
70. unimpaired sense of hearing (S. anupahatakāra endriya ; T. snyan gyi dbang po ma nyams pa; C. ergen pingjun)
71. well-developed forehead (S. supari atalālā a ; T. dpral ba legs par dbyes pa; C. e guang yuanman)
72. broad forehead (S. p thulālā a ; T. dpral ba dbyes che ba; C. e kuan pingzheng)
73. large head (S. suparipūr a-uttamā ga ; T. dbu shin tu rgyas pa; C. tou ru motuona guo)
74. hair on the head is black as a bee (S. bhramarasad śakeśa ; T. dbu skra bung ba ltar gnag pa; C. fa se ganqing ru fengwang)
75. thick hair on the head (S. citakeśa ; T. dbu skra stug pa; C. fa mei)
76. soft hair on the head (S. ślak akeśa ; T. dbu skra 'jam pa; C. fa nenruan)
77. hair on the head is not disheveled (S. asa lūlitakeśa ; T. dbu skra ma 'dzings pa; C. fa buluan)
78. hair on the head is not rough (S. aparū akeśa ; T. dbu skra mi gshor ba; C. shoufa zhengqi)
79. fragrant hair on the head (S. surabhikeśa ; T. dbu skra dri zhim pa; C. shoufa xiangfu)
80. hands and feet are adorned with such auspicious symbols as the śrīvatsa [endless knot]; svastika [swastika]; and nandīyāvarta [elaborated swastika form] (S. śrīvatsasvastikanandīyāvartalalitapā ipāda ; T. phyags dang zhabs dpal gyi be'u dang bkra shis g.yung drung 'khyil bas brgyan pa; C. shouzu youru xiangdu jiangu/shouzu jixiang dexiang miaohao juzu /)

eighty-two dhammas of the *Sthaviranikāya/Theravāda school.

1. twenty-eight material factors (P. rūpa)
 1. four primary elements (P. mahābhūta)
 1. earth/solidity (P. pa havī[dhātu])
 2. water/cohesion (P. āpo[dhātu])
 3. fire/heat (P. tejo[dhātu])
 4. air/mobility (P. vāyo[dhātu])
 2. twenty-four types of derived materiality (P. upādārūpa)
 1. eye/visual faculty (P. cakkhu)
 2. ear/auditory faculty (P. sota)
 3. nose/olfactory faculty (P. ghāṇa)
 4. tongue/gustatory faculty (P. jivhā)
 5. body/tactile faculty (P. kāya)
 6. visual objects (P. rūpa)
 7. sound (P. sadda)
 8. scent (P. gandha)
 9. flavor (P. rasa)
 10. femininity (P. itthindriya)
 11. masculinity (P. purisindriya)
 12. [physical] vitality/life-force (P. jīvita, [rūpa]jīvitindriya)
 13. heart [as the physical basis of mentality] (P. hadaya[vatthu])
 14. bodily intimation (P. kāyaviññatti)
 15. verbal intimation (P. vacīviññatti)
 16. limitation/space element (P. pariccheda, ākāsadhātu)
 17. lightness/buoyancy (P. lahutā)
 18. malleability (P. mudutā)
 19. wieldiness (P. kammaññatā)
 20. birth/development (P. upacaya)

21. continuity (P. santati)
22. senescence/decay (P. jaratā)
23. desinence/extinction/impermanence (P. aniccatā)
24. nutriment (P. āhāra)
2. mind (citta)
 1. mind/consciousness/mentality (P. citta, viññā a, manas)
3. fifty-two mental concomitants (P. cetasika)
 1. thirteen morally indeterminate (P. avyākata)
 1. seven general/universal (P. sabbacittasādhāra a)
 1. contact (P. phassa)
 2. sensation (P. vedanā)
 3. perception (P. saññā)
 4. intention (P. cetanā)
 5. one-pointedness (P. ekaggatā)
 6. [mental] vitality/life-force (P. jīva, [nama]jīvitindriya)
 7. attention (P. manasikāra)
 2. six secondary (P. paki aka)
 1. applied thought (P. vittaka)
 2. sustained thought (P. vicāra)
 3. determination/resolution (P. adhimokkha)
 4. energy (P. viriya)
 5. rapture (P. pīti)
 6. zeal (P. chanda)
 2. twenty-five wholesome (P. kusala)
 1. nineteen sobhanasādhāra a (universal splendid mental factors)
 1. faith/confidence (P. saddhā)
 2. mindfulness (P. sati)
 3. shame/propriety/decency (P. hiri)
 4. fear of blame/modesty (P. ottappa)
 5. nongreed (P. alobha)
 6. nonhatred (P. adosa)
 7. equanimity (P. tatramajjhataṭṭā)
 8. tranquillity of mental body (P. kāyapassaddhi)
 9. tranquillity of consciousness (P. cittapassaddhi)
 10. lightness of mental body (P. kāyalahutā)
 11. lightness of consciousness (P. cittalahutā)
 12. malleability of mental body (P. kāyamudutā)
 13. malleability of consciousness (P. cittamudutā)
 14. wieldiness of mental body (P. kāyakammaññatā)
 15. wieldiness of consciousness (P. cittakammaññatā)
 16. proficiency of mental body (P. kāyapāguññatā)
 17. proficiency of consciousness (P. cittapāguññatā)
 18. rectitude of mental body (P. kāyujjukatā)
 19. rectitude of consciousness (P. cittujjukatā)
 2. three abstinences (virati)
 1. abstinence from physical misconduct (P. kāyaduccaritavirati); alt. right action (P. sammākamanta)
 2. abstinence from verbal misconduct (P. vacīduccaritavirati); alt. right speech (P. sammāvācā)
 3. abstinence from mental misconduct (P. manoduccaritavirati); alt. abstinence from wrong livelihood (P. ājīvaduccaritavirati), viz. right livelihood (P. sammājīva)
 3. two illimitables (appamañña)
 1. compassion (P. karu ā)
 2. empathetic joy (P. muditā)
 4. one wisdom faculty (P. paññindriya)
 1. wisdom (P. paññā)
3. fourteen unwholesome (P. akusala)
 1. delusion (P. moha)
 2. lack of shame or lack of decency (P. ahirika)
 3. lack of fear of blame or lack of modesty (P. anottappa)
 4. restlessness (P. uddhacca)
 5. greed (P. lobha)
 6. wrong view (P. di hi)
 7. pride/conceit (P. māna)
 8. hatred (P. dosa)
 9. envy (P. issā)
 10. selfishness/stinginess (P. macchariya)
 11. worry/remorse (P. kukkucā)
 12. sloth (P. thīna)
 13. torpor (P. middha)
 14. skeptical doubt (P. vicikicchā)
4. uncompounded (P. asa khata)
 1. nirvā a (P. nibbāna)

eighty-four mahāsiddhas. (T. grub thob brgyad bcu rtsa bzhi)

When the Tibetan is not provided, the Tibetan typically transliterates the Indic name.

1. Lūyipa (T. Nya'i rgyu ma za ba)
2. Līlāpa (T. Sgeg pa)
3. Virūpa
4. ombipa
5. Śavaripa
6. Saraha (T. Mda' snun)
7. Kankaripa

8. Mīnapa (T. Nya bo pa)
9. Gorak a (T. Ba glang bsrung)
10. Caurā gi (T. Chom rkun gyū yan lag)
11. Vīnapa (T. Pi vang pa)
12. Śāntipa
13. Tantipa (T. Thags mkhan)
14. Camaripa (T. Lham mkhan)
15. Kha gapa (T. Ral gri pa)
16. Nāgārjuna (T. Klu sgrub)
17. Kā apa (T. Nag po spyod pa)
18. Kar aripa/Āryadeva ('Phags pa lha)
19. Thagnapa (T. Rdzun smra ba)
20. Nāropa (T. Rtsa bshad pa)
21. Śalipa (T. Spyān ki pa)
22. Tilopa (T. Snum pa)
23. Catrapa
24. Bhadrapa (T. Bzang po)
25. Dhukhandi (T. Gnyis gcig tu byed pa)
26. Ajokipa (T. Le lo can)
27. Kalapa (T. Smyon pa)
28. Dhombipa (T. Khrus khan)
29. Ka kana (T. Gdu bu can)
30. Kambala (T. Lwa ba pa)
31. e gipa (T. 'Bras rdung ba)
32. Bhandhepa (T. Nor la 'dzin pa)
33. Tandhepa (T. Cho lo pa)
34. Kukkuripa
35. Kucipa (T. Ltag lba can)
36. Dharmapa (T. Thos pa'i shes rab bya ba)
37. Mahipa (T. Ngar rgyal can)
38. Acinta (T. Bsam mi khyab pa)
39. Babhahi (T. Chu las 'o ma len)
40. Nalina (T. Pad ma'i rtsa ba)
41. Bhusuku (T. Zhi lha)
42. Indrabhūti (T. Dbang po'i blo)
43. Mekopa
44. Ko ali (T. Tog rtse zhabs)
45. Ka paripa (T. Mgar pa)
46. Jālandhari (T. Dra ba 'dzin pa)
47. Rāhula
48. Dharmapa (T. Chos pa)
49. Dhokaripa (T. Rdo ka ri)
50. Medhina (T. Thang lo pa)
51. Pa kaja (T. 'Dam skyes)
52. Gha hapa (T. Dril pu pa)
53. Yogipa
54. Caluki
55. Gorura (T. Bya ba)
56. Lucika
57. Nigu a (T. Yon tan med pa)
58. Jayānanda (T. Rgyal ba mtha' med)
59. Pacari (T. 'Khur ba 'tsong ba)
60. Campaka
61. Bhik ana (T. So gnyis pa)
62. Telopa (T. Mar nag 'tshong mkhan)
63. Kumaripa (T. Rdza mkhan)
64. Caparipa
65. Ma ibhadrā
66. Mekhalā
67. Kanakhalā
68. Kalakala (T. Ku co can)
69. Kantali (T. Tshem bu pa)
70. Dhahuli (T. Rtswa thag can)
71. Udheli (T. Phur pa)
72. Kapalapa (T. Thod pa can)
73. Kirava (T. Rnam rtog spang ba)
74. Sakara (T. Mtsho skyes)
75. Sarvabhak a (T. Thams cad za ba)
76. Nāgabodhi (T. Klu'i byang chub)
77. Dārika (T. Smad 'tshong can)
78. Putali (T. Rgyan slang ba)
79. Panaha (T. Mchil lham can)
80. Kokali (T. Ko la la'i skad du chags)
81. Ana ga
82. Lak mīnkarā (Legs smin kara)
83. Samudra (T. Rgya mtsho nas nor bu len mkhan)
84. Vyali

HUNDREDS

one-hundred dharmas of the Yogācāra school. (S. śatadharmā; T. chos brgya; C. baifa)

1. eight consciousnesses (S. vijñāna; T. mam par shes pa; C. xīnfā/shi /)
 1. visual consciousness (S. cak urvijñāna; T. mig gi mam par shes pa; C. yānshi)
 2. auditory consciousness (S. śrotravijñāna; T. ma ba'i mam shes pa; C. ershi)
 3. olfactory consciousness (S. ghrā avijñāna; T. sna'i mam par shes pa; C. bishi)

4. gustatory consciousness (S. jihvāvijñāna; T. lce'i mam par shes pa; C. sheshi)
5. tactile consciousness (S. kāyavijñāna; T. lus kyi mam par shes pa; C. shenshi)
6. mental consciousness (S. manovijñāna; T. yid kyi mam par shes pa; C. yishi)
7. afflicted mental consciousness (S. kli amanas; T. nyon yid mam par shes pa; C. mona shi)
8. storehouse consciousness (S. ālayavijñāna; T. kun gzhi mam shes pa; C. alaiye shi)
2. fifty-one mental concomitants (S. caitta; T. sem byung; C. xin suoyou fa)
1. five omnipresent mental functions (S. sarvatraga; T. kun 'gro; C. bianxing[xinsuo] [])
 1. sensation (S. vedanā; T. tshor ba; C. shou)
 2. perception (S. sa jñā; T. 'du shes; C. xiang)
 3. volition (S. cetanā; T. sems pa; C. si)
 4. attention (S. manaskāra; T. yid la byed pa; C. zuoyi)
 5. sensory contact (S. sparśa; T. reg pa; C. chu)
2. five specific mental concomitants (S. viniyata; T. yul nges; C. biejing[xinsuo] [])
 1. zeal/desire-to-act (S. chanda; T. 'dun pa; C. yu)
 2. determination (S. adhimok a; T. mos pa; C. shengjie)
 3. mindfulness/recollection/memory (S. sm ti; T. dran pa; C. nian)
 4. concentration (S. samādhi; T. ting nge 'dzin; C. ding)
 5. wisdom/cognition (S. prajñā; T. shes rab; C. hui)
3. eleven wholesome mental comcomitants (S. kuśala; T. dge ba; C. shan)
 1. faith (S. śraddhā; T. dad pa; C. xin)
 2. shame/decency/propriety (S. hrī; T. ngo tsha shes pa; C. can)
 3. fear of blame/modesty (S. apatrāpya; T. khrel yod pa; C. kui)
 4. lack of craving (S. alobha; T. ma chags pa; C. wu tan)
 5. lack of ill-will (S. adve a; T. zhe sdang med pa; C. wu chen)
 6. lack of delusion (S. amoha; T. gti mug med pa; C. wu chi)
 7. vigor (S. vīrya; T. brtson 'grus; C. qin/jingjin /)
 8. tranquillity/serenity (S. praśrabdhi; T. shin tu sbyangs pa; C. [qing] an [])
 9. vigilance (S. apramāda; T. bag yod pa; C. bu fangyi)
 10. equanimity (S. upek ā; T. btang snyoms; C. xingshe)
 11. absence of harmful intentions (S. avihi sā; T. mam par mi 'tshe ba; C. bu hai)
4. six root afflictions (S. mūlakteśa; T. rtsa nyon; C. genben fannao)
 1. sensuality/lust (S. rāga; T. 'dod chags; C. tan)
 2. anger (S. pratigha; T. khong khro; C. chen)
 3. ignorance (S. avidyā; T. ma rig pa; C. chi/wuming /)
 4. pride (S. māna; T. nga rgyal; C. man)
 5. skeptical doubt (S. vicikitsā; T. the tshom; C. yi)
 6. wrong views (S. d i; T. lta ba nyon mongs can; C. jian)
5. twenty secondary afflictions (S. upakleśa; T. nye nyon; C. sui fannao)
 1. anger (S. krodha; T. khro ba; C. fen)
 2. resentment (S. upanāha; T. 'khon 'dzin; C. hen)
 3. vexation/maliciousness (S. pradāśa; T. 'tshig pa; C. nao)
 4. disparagement/hypocrisy (S. mrak a; T. 'chab pa; C. fu)
 5. deception (S. māyā; T. sgyu; C. kuang)
 6. deceit (S. śāhya; T. g.yo; C. chan)
 7. arrogance (S. mada; T. rgyags pa; C. jiao)
 8. hostility (S. vihi sā; T. mam par 'tshe ba; C. hai)
 9. envy (S. īr yā; T. phrag dog; C. ji)
 10. selfishness/stinginess (S. mātṣarya; T. ser sna; C. qian)
 11. lack of shame/decency/propriety (S. āhrikyā; T. ngo tsha med pa; C. wucan)
 12. lack of fear of blame/lack of modesty (S. anapatrāpya; T. khrel med pa; C. wukui)
 13. lack of faith (S. āśraddhya; T. ma dad pa; C. bu xin)
 14. lassitude (S. kausīdya; T. le lo; C. xiedai)
 15. heedlessness (S. pramāda; T. bag med pa; C. fangyi)
 16. sloth (S. styāna; T. rmugs pa; C. hunchen)
 17. restlessness (S. audhatya; T. rgod pa; C. diaojun)
 18. forgetfulness (S. mu itasm titā; T. brjed nges pa; C. shininian)
 19. lack of circumspection (S. asa prajanya; T. shes bzhin ma yin pa; C. bu zhengzhi)
 20. distraction (S. vik epa; T. mam par g.yeng ba; C. sanluan)
6. four indeterminate factors (S. aniyata; T. gzhan 'gyur; C. buding [fa] [])
 1. torpor/drowsiness (S. middha; T. gnyid; C. shuimian)
 2. worry/remorse (S. kauk tyā; T. 'gyod pa; C. ezuo)
 3. applied thought (S. vitarka; T. rtog pa; C. xun)
 4. sustained thought (S. vicāra; T. dpyod pa; C. si)
3. eleven material factors (S. rūpa; T. gzugs; C. shiyi sefa)
 1. visual faculty (S. cak urindriya; T. mig gi dbang po; C. yangen)
 2. auditory faculty (S. śrotrendriya; T. ma ba'i dbang po; C. ergen)
 3. olfactory faculty (S. ghrā endriya; T. sna'i dbang po; C. bigen)
 4. gustatory faculty (S. jihvendriya; T. lce'i dbang po; C. shengen)
 5. tactile faculty (S. kāyendriya; T. lus kyi dbang po; C. shengen)
 6. visual objects (S. rūpa; T. gzugs; C. se)
 7. sound (S. śabda; T. sgra; C. sheng)
 8. scent (S. gandha; T. dri; C. xiang)
 9. flavor (S. rasa; T. ro; C. mei)
 10. contact (S. spra avya; T. reg bya; C. chu)
 11. materiality associated with the sphere of mental factors [e.g.; materiality generated in meditative states] (S. dharmāyatanarūpa; T. chos kyi skye mched pa'i gzugs; C. fachu suoshe se)
4. twenty-four conditioned forces dissociated from thought (S. cittaviprayuktasa skāra; T. ldan min 'du byed; C. xin bu xiangying xing fa)
 1. possession (S. prāpti; T. 'thob pa; C. de)
 2. vitality (S. jvitendriya; T. srog gi dbang po; C. ming gen)
 3. homogeneity (S. nikāyasabhāga; T. rigs 'thun pa; C. zhong tongfen)
 4. nature of ordinary people (S. p thagjanatva; T. so so skye bo nyid; C. yisheng xing)
 5. equipoise of nonperception (S. asa jñāsamāpatti; T. 'du shes med pa'i snyoms 'jug; C. wuxiang ding)
 6. equipoise of cessation (S. nirodhasamāpatti; T. 'gog pa'i snyoms 'jug; C. mie jin ding)

7. state of nonperception (S. āsa jñāka; T. 'du shes med pa; C. wuxiang guo/wuxiang bao/wuxiang shi / /)
 8. name set (S. nāmakāya; T. ming gi tshogs; C. ming shen)
 9. phrase set (S. padakāya; T. tshig gi tshogs; C. ju shen)
 10. syllable set (S. vyañjanakāya; T. yi ge'i tshogs; C. wen shen)
 11. origination/birth (S. jāti; T. skye ba; C. sheng)
 12. continuance/maturation (S. sthiti; T. gnas pa; C. zhu)
 13. senescence/decay (S. jarā; T. rga ba; C. yi/lao /)
 14. desinence/extinction (S. anityatā; T. mi rtag pa; C. mie/wuchang /)
 15. continuity (S. prav tti; T. 'jug pa; C. liuzhuan)
 16. distinction (S. pratiniyama; T. so sor nges pa; C. dingyi)
 17. association (S. yoga; T. 'byor 'grel; C. xiangying)
 18. instantaneity (S. jāva; T. 'gyogs pa; C. shisu)
 19. order (S. anukrama; T. go rim; C. cidi)
 20. direction/area (S. deśa; T. yul; C. fang)
 21. time (S. kāla; T. dus; C. shi)
 22. number (S. sa khyā; T. grangs; C. shu)
 23. complete assemblage [of the causes and conditions that lead to the production of dharmas] (S. sāmagrī; T. tshogs pa; C. hehe xing)
 24. incomplete assemblage (S. asāmagrī; T. ma tshogs pa; C. bu hehe xing 不)
5. six uncompounded factors (S. asa sk tadharma; T. 'dus ma byas kyi chos; C. wuwei fa)
1. space (S. ākāśa; T. nam mkha'; C. xukong 虛)
 2. analytical cessation (S. pratīsa khyānirodha; T. so sor brtags 'gog pa; C. zemie)
 3. nonanalytical suppression (S. apratīsa khyānirodha; T. so sor brtags min gyi 'gog pa; C. feizemie)
 4. motionlessness (S. āniñjya; T. mi g.yo ba; C. budong)
 5. cessation of perception and sensation (S. sa jñāvedayitanirodha; T. 'du shes dang tshor ba 'gog pa; C. xiangshou mie)
 6. suchness (S. tathatā; Tib. de bzhin nyid; C. zhenru)
