

## Known issues with Tibetan font

1. The letters ca and ja are being displayed with a curve on the top called “rafar”. Some experts are of the view that this curve is not required. You are free to reach your own conclusion.

Ca= ཅ      Ja= ཇ

2. The traditional system of writing Pali in Tibetan required **Dots** in between letters as below – however the fonts are not able to do so.

ཨ་བ་ལྷོ་      ཀུ་ལྷོ་ལྷོ་      ལྷོ་ལྷོ་ལྷོ་ལྷོ་
